[1] On May 23, 1979, the American Bakers Association, the American Meat Institute, and the National Milk Producers Federation filed a joint request with the Commission for extension of time for the submitting of copies of petitions for alternate fuel determination.

essential agricultural use requirements as priority 2 entitlements.

Section 281.211(b)(1) requires these requests for classifications as priority 2 entitlements to be filed by June 15, 1979.

The "Subpart C" referred to is that part of the Commission's regulations being considered in Docket No. RM79–40. Since no rule has yet been issued in that docket, Section 281.211(b)(1)(ii)(D) has no present effect concerning requests for classification otherwise required by § 281.211(b)(1). Because "Subpart C" has not yet been issued, essential agricultural users filing requests under § 281.211(b)(1) are not presently required to file accompanying copies of petitions for alternate fuel determinations.

Accordingly, all interstate natural gas pipelines should consider informing their customers that June 15, 1979, is only a proposed deadline for filing petitions for alternate fuel determinations, that it is not yet in effect, and that it may be modified from the date proposed in Docket No. RM79–40, depending on what final rule is eventually issued. The pipelines should also inform their customers that 18 CFR § 281.211(b)(1)(ii)(D) does not yet affect any filings by essential agricultural users, since the "Subpart C", to which that section refers, has not yet been enacted. Finally, the pipelines should consider requesting that their distributor customers pass on to their essential agricultural customers (end-users) this clarification of the proposed rule in Docket No. RM 79–40 and the final rule in Docket No. RM79–15.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

VETERANS ADMINISTRATION

[38 CFR Ch. I]

Improving Government Regulations; Semiannual Agenda

AGENCY: Veterans Administration.

ACTION: Semiannual agenda of regulations, significant and nonsignificant, under development or review.

SUMMARY: This agenda announces the regulations, both significant and nonsignificant, that the Veterans Administration will have under development and review during the 6-month period from June 18, 1979 through December 16, 1979. The Veterans Administration's purpose in publishing this agenda is to give the public notice for comment on those regulations under development or review during this 6-month period.

DATE: Comments must be received on or before August 17, 1979.

ADDRESSES: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420.

FOR FUTHER INFORMATION CONTACT: Mr. W.E. Stewart, Management Services (61), 810 Vermont Avenue, NW., Washington, DC 20420, (202–389–3770).

SUPPLEMENTARY INFORMATION: Comments should be addressed to Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington DC 20420. All written comments will be available for public inspection until August 27, 1979, at the above address, room 132, between the hours of 8 am and 4:30 pm Monday through Friday (except holidays). Persons visiting the VA Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit (271A) in room 132. Persons visiting or calling VA field stations will be informed that the records are available for inspection only in Central Office.

Executive Order 12044, "Improving Government Regulations" requires that executive agencies publish, every 6 months, in the **Federal Register** a semiannual agenda of regulations under development and review. The Veterans Administration's next semiannual agenda of regulations will be published in the December 17, 1979 issue of the **Federal Register.**

Approved: June 11, 1979.

By direction of the Administrator.

Rufus H. Wilson,

Deputy Administrator.

	SIGNIFICANT REGULATIONS PROPOSED OR UNDER DEVELOPMENT		
Pub. L. 94–581, Veterans Omnibus Health Care Act of 1976, 10–21–76.	Protection of Patient Rights	Provides for VA policy dealing with informed patient consent related to all medical and prosthetic research, and to the maximum extent practicable, to all patient care furnished by VA health care facilities.	J. F. Beckenstein, (800) 389–3785.
Pub. L. 94–581	Mental Health Services	Provides for furnishing certain mental health services for members of the family of a veteran or of persons eligible for care under VAR 6054.	Do.
Pub. L. 94–581	Priorities for Medical Services	Provides a priority order for furnishing medical services to eligible veterans.	Do.
Pub. L. 94–581	Immunizations Under National Programs.	Provides authority for administering vaccines for immunizations as part of a national immunization program to veterans receiving care for any disability in a VA health care facility.	Do.
Pub. L. 94–581	Obtaining Vehicles for Special Driving Training Courses.	Provides for obtaining vehicles for driver training.	Do.
Pub. L. 94–581	Post Hospital Outpatient Dental	Provides for furnishing of outpatient dental care which is reasonably necessary to complete treatment of a non-service-connected disability which was begun while the veteran was receiving VA authorized hospital care.	Do.
Pub. L. 94–581	Prerequisites for Payments to State Homes.	Establishes prerequisites for payments or grants to state homes.	Do.
Pub. L. 95–202, G.I. Bill Improvement Act of 1977, 11–23–77.	Duty Periods Defined	Provides authority for furnishing VA medical benefits to persons who served as Women's Air Forces Service Pilots (WASPS) when the Secretary of Defense determines that service is considered active duty and issues the person a discharge from such service under honorable conditions.	Do.
Pub. L. 95–202	G.I. Bill Improvement Act and Post-Vietnam Era Veterans Educational Assistance Act.	To amend and augment appropriate VA Regulations to implement provisions of the G.I. Bill Improvement Act of 1977 and to adjust the education loan program.	June C. Schaeffer, (202) 389–3062.
Pub. L. 94–502, Veterans' Education and Employment Assistance Act of 1976, 10–15–76.	Post-Vietnam Era Veterans' Educational Assistance.	To provide joint DoD/VA regulations to implement those provisions of Pub. L. 94–502, which concern a voluntary education program for service members and veterans.	Do.
Pub. L. 95–476, Veterans' Housing Benefits Act of 1978, 10–18–78 and 38 U.S.C. 1810(e)(4).	Energy Conservation Home Improvement Loan Regulations and Home Improvement Loan Regulations for Alterations, Improvements, or Repairs.	To establish a home improvement loan program for energy conservation improvements including solar energy improvements and to revise the present home improvement loan program for alterations, improvements or repairs.	George D. Moorman, (202) 389–3042.

Legal authority	Title	Brief description	Knowledge official
SIGNIFICANT REGULATIONS PROPOSED OR UNDER DEVELOPMENT—Continued			
Pub. L. 95-476	Condominum Loan Regulations	To amend VA Regulations to include the Criteria for VA approval of existing, proposed, and converted condominium developments or projects.	Do.
Pub. L. 95-476	State Cemetery Grants	Authorizes a program of grants assistance to states for the establishment, expansion, and improvement of State veterans cemeteries.	C. W. Eyman, (202) 389-2313.
Pub. L. 95-521, Ethics in Government Act of 1978, 10-26-78.	Financial Disclosure for Executive Personnel.	Will require Federal employees in grades GS-16 and above to disclose in great detail each year their income, assets, debts, any gifts worth more than $250 not from their relatives and considerable other financial information.	Charles M. Johnston, (202) 389-3761.
(Listed in December 18, 1978, Semiannual Agenda of Regulations—These regulations are still under development and responsibility for them has been shifted to the office of the General Counsel.)			
SIGNIFICANT REGULATIONS SCHEDULED FOR REVIEW			
38 CFR 14.620	Power of Attorney and Delegation of Authority.	The procedures used by VA to delegate and record the authority exercised by VA officials in real estate transactions will be reviewed to reduce paperwork and improve efficiency.	James P. Kane, (202) 389-2189.
38 CFR 17.100	Transportation of Claimants and Beneficiaries.	Revises the conditions under which travel payment or reimbursement may be made by specifying that payment shall not be made unless certain requirements are met.	J. F. Fleckenstein, (202) 389-3785.
38 CFR 17.50b	Use of Public or Private Hospitals for Veterans.	Extends authority for furnishing hospital care on a contract basis in public or private hospitals in the Commonwealth of Puerto Rico and other possessions through December 31, 1981.	Do.
38 CFR21.1-21.735	Vocational Rehabilitation	To improve and modernize the Vocational Rehabilitation Program.	June C. Schaeffer, (202) 389-2092.
38 CFR 36.4300-36.4369	Loan Guaranty—Guaranty or Insurance of Home Loans to veterans.	Sets forth basic requirements for loan origination, loan service, and loan termination of VA guaranteed and insured home and condominium loans, and specifies the rights, duties and obligations of veterans, lenders, holders, builders, and other entities engaged in activities relating to the VA guaranteed and insured loan program.	George D. Moerman, (202) 389-3042.
(Listed in Semiannual Agenda Dated December 18, 1978—Review is continuing.)			
NON-SIGNIFICANT REGULATIONS PROPOSED OR UNDER DEVELOPMENT			
38 CFR 36.4275, 4315, 4600.	Partial payments made by obligors on VA home, mobile home and vendee loans.	To establish regulatory requirements in the home, mobile home and vendee loan regulations governing holder rights and responsibilities when holder receives a partial payment from an obligor.	Raymond L. Brodie, (202) 389-3668.
38 CFR 36.4263	Repairs to Repossessed Mobile Home Units.	To require holders to obtain VA prior approval of repairs to a repossessed mobile home unit if the repairs will cost more than $400.	Do.
38 CFR 36.4313	Attorney Fees	To increase the allowable attorney fees which may be paid to an attorney handling the foreclosure of a VA guaranteed or insured home or condominium loan.	Do.
38 CFR 36.4303	Reporting requirements on VA guaranteed and insured home and condominium loans.	To increase the allowable number of days which a lender may timely report a fully disbursed home or condominium loan to the VA and request a Certificate of Guaranty or Insurance.	George D. Moerman, (202) 389-3042.
NON-SIGNIFICANT REGULATIONS SCHEDULED FOR REVIEW			
38 CFR 1.450-1.455	Investigation	Covers investigation policies, jurisdiction, and regulations, pertaining to Central Office investigations.	William L. Rettew, (202) 389-3093.

(A radical change in subject regulations is required because of recent IG legislation. Therefore, information printed in the Semiannual Agenda of Regulations dated December 18, 1978, remains applicable.)

Legal authority	Title	Brief description	Knowledge official
	NON-SIGNIFICANT REGULATIONS SCHEDULED FOR REVIEW—Continued		
38 U.S.C. 210(c)	Applicability of Title VI of the Civil Rights Act.	Indicate that payment of VA burial benefits is subject to Title VI of the Civil Rights Act.	T. H. Spindle, (202) 389–3005.
38 CFR 3.12	Amendment of character of discharge rules.	Elimination, in most cases, of homosexual acts as grounds for considering other than honorable discharge to have been issued under dishonorable conditions.	Do.
38 CFR 3.57	Age of Recognition of adopted child or stepchild.	Eliminate present requirement that adoption or stepchild status must have occurred prior to age 18 before adopted or stepchild can be recognized as a child of a veteran.	Do.
38 CFR 3.310	Presumption that cardiovascular disease is service-connected in veterans with certain service-connected lower extremity amputation or amputations.	Ischemic heart disease or other cardiovascular disease developing in a veteran who has a service-connected amputation of one lower extremity at or above the knee or service-connected amputations of both lower extremities at or above the ankles.	Do.
38 CFR 3.401(a)	Effective date of award of aid and attendance or housebound benefits.	Amend current effective date regulations to clarify when an award of aid and attendance or housebound benefits is effective.	Do.
(Listed in Semiannual Agenda dated December 6, 1978—Review is continuing.)			
38 CFR 3.951	Twenty year rating protection	Amend current 20 year disability rating protection to extend protection only when; veteran has been in receipt of monetary award of 20 or more years.	Do.
38 CFR 6.79, 6.80, and 6.88.	United States Government Life Insurance Reinstatement.	Change in job titles to Assistant Director for Insurance. Make the necessary gender changes.	Murray Zuckerman, (215) 488–5733.
38 CFR 6.90	Physical Examinations and Inspections.	Enables a physician's assistant to make certain examinations for insurance purposes. Make the necessary gender changes.	Do.
38 CFR 8.0	National Service Life Insurance Eligibility.	To include the Modified Life at Age 70 plan. Make the necessary gender changes.	Do.
38 CFR 8.1	Definition of and criteria for "good health".	To make the required gender changes	Do.
38 CFR 8.3	Premiums	To include the 20-Payment Life plan where appropriate.	Do.
38 CFR 8.24	Application and Medical Evidence.	Change in job title to Assistant Director for Insurance. Make the necessary gender changes.	Do.
38 CFR 8.27	Cash value	States how long paid-up additions must be in force for cash values.	Do.
38 CFR 8.29	Extended Term and Paid-Up Insurance.	To make the necessary changes for the Modified Life at Age 70 plan.	Do.
38 CFR 8.33–8.36	Change in Plan	To make the necessary changes for the Modified Life at Age 70 plan and 20-Payment Life plan. Make the necessary gender changes.	Do.
38 CFR 8.64 and 8.65	Examinations	Enables a physician's assistant under certain conditions to make an examination. Changes the title to Director for the head of a regional office. Necessary gender changes made.	Do.
38 CFR 8.70	Claims Alleging Insurance where there is no Application for Insurance on file.	Changes the title of person charged with making original determinations as to valid contracts.	Do.
38 CFR 8.99c	Total Disability Income Provisions.	Provides for updated pamphlets dealing with premiums for the Total Disability Income Provisions. Add the 20-Payment Life plan where appropriate.	Do.
38 CFR 8.100	Insurance Provided by Special Legislation.	Makes the required gender changes	Do.
38 CFR 8.102	National Service Life Insurance Appropriations.	Provides for the 20-Payment Life plan where appropriate.	Do.
38 CFR 8.103	National Service Life Insurance Nonparticipating Funds.	Provides for the 20-Payment Life plan where appropriate. Makes the necessary gender changes.	Do.
38 CFR 8.106	National Service Life Insurance Policy Forms.	Updates the applicable forms. Includes the modified Life at Age 70 plan and the 20-Payment Life plan where appropriate.	Do.
38 CFR 8.110–8.113b	National Service Life Insurance issued on or after April 25, 1951.	Includes the Modified Life at Age 70 plan where appropriate. Makes the necessary gender changes.	Do.

Legal authority	Title	Brief description	Knowledge official
	NON-SIGNIFICANT REGULATIONS SCHEDULED FOR REVIEW—Continued		
38 CFR 13.1-13.111	Veterans Assistance—DVB Fiduciary Activities.	Administration of benefits due to incompetent adult beneficiaries or minors.	Charles F. Lee, (202) 389-3643.
(Listed in Semiannual Agenda dated December 8, 1978—Review is continuing.)			
38 CFR 14.633	Limitation of Recognition	To provide for suspension of agents and attorneys after notice and opportunity for hearing.	Martin D. Gusow, (202) 389-2440.
38 CFR 17.30	Definitions and Active Duty	Redefines the terms "Domiciliary Care," "Nursing Home Care," "Rehabilitative Services," and "VA Facility," and deletes the requirement of war service in determining a veteran's eligibility for state home care.	J. F. Fleckenstein, (202) 389-3785.
38 CFR 17.31	Duty Periods Defined	Provides for a change in title of organization from Coast and Geodetic Survey to National Oceanic and Atmospheric Administration.	Do.
38 CFR 17.38	Hospital or Nursing Home Care at Veterans' Memorial Hospital, Philippines.	Amends the VA regulation to delete the requirement of war service for United States veterans in the determination of veteran's eligibility for care of nonservice-connected disabilities at Veterans' Memorial Hospital, Manila, PI.	Do.
38 CFR 17.47	Eligibility for Hospital, Domiciliary, or Nursing Home Care or Persons Discharged or Released From Active Military, Naval or Air Service.	Deletes the requirements of war service in the determination of veterans eligibility for domiciliary care and deleted references to transportation expenses now contained in VA Regulation 6100.	Do.
38 CFR 17.48	Considerations Applicable in Determining Eligibility for Hospital or Domiciliary Care.	Adds "Nursing Home" to the title, deletes reference to transportation expenses, and deletes the word "exclusive" in referring to health care facilities over which the Administrator has control.	Do.
38 CFR 17.50b	Use of Public or Private Hospitals for Veterans.	Provides that veterans hospitalized at government facilities with which the Administrator contracts may be transferred to a public or private hospital if they develop a need for emergency treatment of a condition which poses a serious threat to the veteran's life or health.	Do.
38 CFR 17.51	Use of Community Nursing Homes.	Increases the maximum percent of the cost of Community Nursing Home Care reimbursable by the VA.	Do.
38 CFR 17.54	Medical Care for Survivors and Dependents of Certain Veterans.	Extends medical care benefits to the spouse or child of a veteran who, at the time of death, had a total disability, permanent in nature, resulting from a service-connected disability.	Do.
38 CFR 17.60	Outpatient Care for Eligible Persons.	Provides for medical services within the limits of VA facilities to obviate the need for hospital care. Provides for furnishing certain home health services. Limits the duration of post-hospital care. Provides for furnishing outpatient care for any condition, except dental, for those veterans rated as 50% or more for a service-connected disability.	Do.
38 CFR 17.98	Authority to Approve Sharing Agreements, Contracts for Scarce Medical Specialists Services and Contracts for Other medical Services.	Permits VA contracts with schools and colleges of podiatry and optometry for scarce medical specialist services.	Do.
38 CFR 17.165 and 17.165c.	Recognition of a State Home	Deletes the requirement of war service in the determination of veterans' eligibility for state home care.	Do.
38 CFR 17.166 and 17.166b.	Aid for Domiciliary Care and Aid for Hospital Care.	Deletes the requirement of war service in the determination of veterans' eligibility for state home care.	Do.
38 CFR 17.166c	Amount of Aid Payable	Revises the amount of aid payable to state homes.	Do.
38 CFR 17.210	Sharing Specialized Medical Resources.	Specifies that charges for services provided to Medicare beneficiaries under a sharing agreement will be at rates prescribed by the Secretary of Health, Education and Welfare, after consultation with the Administrator	Do.

BILLING CODE 8320-01-M

[38 CFR Part 1]

Regional Office Committees on Waivers and Compromises

AGENCY: Veterans Administration.

ACTION: Proposed Regulations.

SUMMARY: The regulations are revised for purposes of overall clarification. Revision is also made to reflect additions to, and deletions from, the jurisdiction of the regional office Committees on Waivers and Compromises.

DATES: Comments must be received on or before July 18, 1979. It is proposed to make these regulations effective on the date of final approval.

ADDRESSES: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420. Comments will be available for inspection at the address shown above during normal business hours until July 30, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Peter T. Mulhern (047C5), Waivers and Compromises Division, Office of the Controller, Veterans Administration, Washington, DC 20420, (202–389–3405).

SUPPLEMENTARY INFORMATION: This revision of 38 CFR 1.955 through 1.970 provides overall clarification. In addition, the Committee is now granted authority to consider work study and education loan default debts for waiver of collection. Authority to consider school liability questions is removed from Committee jurisdiction. Refund policy is clarified concerning recouped overpayments of erroneous pay and allowances and, also, the date of recovery is established where recoupment is made from a running award. The Chief of the Fiscal activity and the Chief, Centralized Accounts Receivable Division are given authority in certain instances to accept or reject compromise offers on other than loan guaranty program debts, regardless of whether or not there has been a prior denial of waiver. The Chief, Centralized Accounts Receivable Division is now given authority to suspend or terminate collection on all debts within the Centralized Accounts Receivable Division's jurisdiction, not in excess of $20,000, exclusive of interest.

Additional Comment Information

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (271A), Veterans' Administration, 810 Vermont Avenue NW., Washington, DC 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 am and 4:30 pm Monday through Friday (except holidays) until July 30, 1979. Any person visiting Central Office for the purpose of inspecting comments will be received by the Central Office Veterans Services Unit in room 132. Visitors to any VA field station will be informed that records are available for inspection only in Central Office and furnished the address and the above room number.

Approved: June 11, 1979.

By direction of the Administrator.

Rufus H. Wilson,
Deputy Administrator.

1. The center title is changed and § 1.955 is revised to read as follows:

Regional Office Committees on Waivers and Compromises

§ 1.955 Regional office Committees on Waivers and Compromises.

(a) *Delegation of authority and establishment.* (1) Sections 1.955 et seq. are issued to implement 38 U.S.C. 1820(a)(4) and 2102, 31 U.S.C. 951–953 and 5 U.S.C. 5584. The duties, delegations of authority and all actions required of the Committee on Waivers and Compromises, are to be accomplished under the direction of, and authority vested in, the Director of the regional office.

(2) There is established in each regional office, a Committee on Waivers and Compromises to perform the duties and assume the responsibilities delegated by §§ 1.955 and 1.957. The term "regional office", as used in §§ 1.955 et seq., includes VA Medical and Regional Office Centers and VA Centers where such are established.

(b) *Committee on Waivers and Compromises*—(1) *Composition.* The Committee shall consist of a Chairperson and five members at regional offices having loan guaranty activities or a Chairperson and four members at other regional offices. Members shall be selected so that in each of the debt claims activities of compensation, pension, education, insurance, loan guaranty (at offices having such activities), and finance, there is at least one member with special competence. An alternate Chairperson and an unlimited number of alternate members may be designated and used in place of Committee member(s), or as panel members (see paragraph (c) of this section), whenever needed.

(2) *Selection.* The Director shall designate the employees to serve as Chairperson, members and alternates. Except upon specific authorization of the Chief Benefits Director, when workload warrants a full-time committee, such designation will be part-time additional duty upon call of the Chairperson.

(3) *Control and staff.* The Division Chief of the Fiscal activity is accountable for the administrative control of the Committee functions. The quality control of the Committee and its professional and clerical staff is the responsibility of the Chairperson.

(4) *Overall control.* The Controller is delegated complete management authority, including planning, policy formulation, control, coordination, supervision and evaluation of Committee operations.

(c) *Panels.* When a claim is properly referred to the Committee, the Chairperson shall ordinarily designate from members and/or alternates, a panel of three (of whom the Chairperson may be one), to consider and determine the action to be taken. One person from this panel shall be specially qualified in the program field in which the debt arose. If their panel decision is unanimous, it will be the Committee decision. Otherwise, the case will be decided by the entire membership of the Committee (i.e., either six or five persons as provided in paragraph (b)(1) of this section) and the majority vote of the Committee shall determine the decision. In such cases the Chairperson shall not vote except when necessary on four-member committees to break a tie.

(d) *Single signature authority.* Where a request is for waiver of collection of a debt of $500 or less, exclusive of interest, the Chairperson shall designate from members and/or alternates one person, with special competence in the program area where the debt arose, to consider the request. His/her signature alone to the decision will suffice. In compromise cases, however, three-person panels are always required regardless of the amount of the debt. (38 U.S.C. 210(c)(1))

2. Section 1.956 is amended as follows:

(a) By adding the words "or her" before the word "discretion" and adding the legal citation "(38 U.S.C. 210(c)(1))" at the end of paragraph (b).

(b) By revising the introductory portion of paragraph (a) and paragraph (a)(1)(i) to read as follows:

§ 1.956 Jurisdiction.

(a) The regional office Committees are authorized, except as to determinations under § 2.6(e)(4)(i) of this chapter where applicable, to consider and determine as limited in §§ 1.955 et. seq., settlement, compromise and/or waiver concerning the following debts and overpayments:

(1) Arising out of operations of the Department of Veterans Benefits:

(i) Overpayment or erroneous payments of pension, compensation, dependency and indemnity compensation, burial allowances, plot allowance, subsistence allowance, education (includes debts from work study and education loan defaults as well as from other overpayments of educational assistance benefits) or insurance benefits, clothing allowance and automobile or other conveyance and adaptive equipment allowances.

* * * * *

3. Sections 1.957, 1.958, 1.959, and 1.960 are revised to read as follows:

§ 1.957 Committee authority.

(a) *Regional office committee.* On matters covered in § 1.956, the regional office Committee is authorized to determine the following issues:

(1) *Waivers.* A decision may be rendered to grant or deny waiver of collection of a debt in any amount (except for erroneous payment of pay and allowances as explained in this subparagraph) in the following overpayment categories:

(i) Loan guaranty program (38 U.S.C. 3102(b)). Committees may consider waiver of the indebtedness of a veteran or spouse resulting from (A) the payment of a claim under the guaranty or insurance of loans, (B) the liquidation of direct loans, (C) the liquidation of loans acquired under § 36.4318, and (D) the liquidation of vendee accounts. The phrase "veteran or spouse" includes a veteran-borrower, veteran-transferee, a veteran-purchaser on a vendee account, a former spouse or surviving spouse of a veteran.

(ii) Other than loan guaranty program. (38 U.S.C. 3102(a))

(iii) Services erroneously furnished. (§ 17.62(a))

(iv) Erroneous payment of pay and allowances. (5 U.S.C. 5584) Overpayments in this category may be considered for waiver by the Committee only if $500 or less.

(2) *Compromises*—(i) *Loan program debts.* Accept or reject a compromise offer irrespective of the amount of the debt (loan guaranty matters under 38 U.S.C. ch. 37, are unlimited as to amount).

(ii) *Other than loan program debts (38 U.S.C. 951–953).* (a) Accept or reject a compromise offer on a debt which exceeds $1,000 but which is not over $20,000 (both amounts exclusive of interest).

(b) Accept or reject a compromise offer on a debt of $1,000 or less, exclusive of interest, which is not disposed of by the Chief, Fiscal activity or the Chief, Centralized Accounts Receivable Division pursuant to paragraph (b) of this section.

(3) *Breached career residency contracts.* Final settlement of any breached career residency contract in which terms are different than those provided in the contract, which will result in the payment of less than liquidated value or in an extension of time in which to pay damages.

(b) *Chief of the Fiscal Activity and the Chief, Centralized Accounts Receivable Division.* The Chief of the Fiscal activity at both Department of Veterans Benefits and Department of Medicine and Surgery offices and the Chief, Centralized Accounts Receivable Division have authority, as to debts arising within their jurisdictions, to:

(1) Suspend or terminate collection action on all debts of $20,000 or less, exclusive of interest.

(2) On other than loan guaranty program debts under 38 U.S.C. chapter 37, accept compromise offers of 50 percent or more of a total debt not in excess of $1,000, exclusive of interest, regardless of whether or not there has been a prior denial of waiver.

(3) On other than loan guaranty program debts under 38 U.S.C. chapter 37, reject any offer of compromise of a total debt not in excess of $1,000, exclusive of interest, regardless of whether or not there has been a prior denial of waiver. (38 U.S.C. 210(c)(1))

§ 1.958 Finality of decisions.

A decision by the regional office Committee operating within the scope of its authority, denying waiver of all or a part of an overpayment is subject to appeal. There is no right of appeal from a decision rejecting a compromise offer. (38 U.S.C. 210(c)(1))

§ 1.959 Records and certificates.

The Chairperson of the Committee shall execute or certify any documents pertaining to its proceedings. He/she will be responsible for maintaining needed records of the transactions of the Committee and preparation of any administrative or other reports which may be required. (38 U.S.C. 210(c)(1))

§ 1.960 Legal and technical assistance.

Legal questions involving a determination under § 2.6(e)(4) of this chapter will be referred to the District Counsel for action in accordance with delegations of the General Counsel, unless there is in existence a General Counsel's opinion or an approved District Counsel's opinion dispositive of the controlling legal principle. As to matters not controlled by § 2.6(e)(4) of this chapter, the Chairperson of the regional office Committee or at his/her instance, a member, may seek and obtain advice from the District Counsel on legal matters within his/her jurisdiction and from other division chiefs in their areas of responsibility, on any matter properly before the Committee. Guidance may also be requested from the Central Office staff. (38 U.S.C. 210(c)(1))

4. Section 1.962 is amended as follows:

(a) By deleting the words "Chief Attorney" and inserting the words "District Counsel" in the third sentence and adding the legal citation "(38 U.S.C. 210(c)(1))" at the end of paragraph (b).

(b) By revising the introductory portion preceding paragraph (a) to read as follows:

§ 1.962 Waiver of overpayments.

The term "overpayment" means payments made and determined to be erroneous, indebtedness resulting from work study and education loan defaults, indebtedness resulting from services erroneously furnished and indebtedness of a veteran-borrower or veteran-transferee under the loan guaranty program or the indebtedness of the spouse under laws administered by the Veterans Administration.

* * * * *

5. Section 1.963 is amended as follows:

(a) By adding the legal citation "(38 U.S.C. 210(c)(1))" at the end of paragraph (c).

(b) By revising paragraph (b) to read as follows:

§ 1.963 Waiver; other than loan guaranty.

* * * * *

(b) *Application.* Request for waiver of an overpayment will be considered only if received within 2 years following the date of notice of the indebtedness by the Veterans Administration to the payee.

* * * * *

6. In § 1.963a, paragraph (e) is revised to read as follows:

§ 1.963a Waiver; erroneous payment of pay and allowances.

* * * * *

(e) There shall be no right of appeal to the Board of Veterans Appeals from a determination made under this section denying a waiver of erroneous payment of pay or allowances. Denial of a waiver of erroneous payment of pay and allowances may be appealed to the General Accounting Office (GAO) in accordance with procedures established by that agency and the Veterans Administration. (38 U.S.C. 210(c)(1))

§ 1.964 [Amended]

7. Section 1.964 is amended by deleting the words "widow (widower)" and "widow or widower" and inserting the words "surviving spouse" in paragraph (c) and inserting the legal citation "(38 U.S.C. 210(c)(1))" at the end of paragraph (f).

§ 1.966 [Amended]

8. By deleting the word "his" and inserting "his/her" in paragraph (a); by deleting the words "field station Committee" and inserting "regional office Committee" in the introductory portion of paragraph (b) and by inserting the legal citation "(38 U.S.C. 210(c)(1))" at the end of paragraph (b)(2)(ii).

9. In § 1.967, paragraph (c) is revised to read as follows:

§ 1.967 Refunds.

* * * * *

(c) Amounts which have been recovered by the U.S. Government prior to the date of receipt by the Veterans Administration of a request for waiver, will not be refunded and will be excluded from waiver. Where recovery is made by offset or recoupment from a check(s) of a running award, the date of recovery is the date of issuance of the check from which the offset is made; or in the case of total recoupment the date of recovery is the date on which the check would have been issued. However, any amounts repaid because of erroneous payment of pay or allowances to employees will be considered for waiver action (regardless of date of request as long as such is timely in accordance with § 1.963a(c)) and, if waived, refund will be made to the employee, provided application for refund is made no later than 2 years following the date of waiver. (38 U.S.C. 210(c)(1))

§ 1.968 [Revoked]

10. Section 1.968 is revoked.

11. Sections 1.969 and 1.970 are revised to read as follows:

§ 1.969 Revision of waiver decisions.

(a) *Jurisdiction.* A decision involving waiver may be reversed or modified on the basis of new and material evidence, fraud, a change in law or interpretation of law specifically stated in a Veterans Administration issue, or clear and unmistakable error shown by the evidence in file at the time the prior decision was rendered by the same or any other regional office Committee.

(b) *Finality of decisions.* Except as provided in paragraph (a) of this section, a decision involving waiver rendered by the Committee having jurisdiction is final, subject to the provisions of:

(1) Sections 3.104(a), 19.153 and 19.154 of this chapter as to finality of decisions;

(2) Section 3.105(a) and (b) of this chapter as to revision of decisions, except that the Central Office staff may postaudit or make an administrative review of any decision of a regional office Committee;

(3) Sections 3.103, 19.113 and 19.114 of this chapter as to notice of disagreement and the right of appeal;

(4) Section 19.124 of this chapter as to the filing of administrative appeals and the time limits for filing such appeals.

(c) *Difference of opinion.* Where reversal or amendment of a involving waiver is authorized under § 3.105(b) of this chapter because of a difference of opinion, the effective date of waiver will be governed by the principle contained in § 3.400(h) of this chapter. (38 U.S.C. 210(c)(1))

§ 1.970 Standards for compromise.

Decisions of the Committee respecting acceptance or rejection of a compromise offer shall be in conformity with the standards in §§ 1.900 through 1.937. In loan guaranty cases the offer of a veteran or other obligor to effect a compromise must relate to an indebtedness established after the liquidation of the security, if any, and shall be reviewed by the Committee. An offer to effect a compromise may be accepted if it is deemed advantageous to the Government. A decision on an offer of compromise may be revised or modified on the basis of any information which would warrant a change in the original decision. (38 U.S.C. 210(c)(1))

[FR Doc. 79-18790 Filed 6-15-79; 8:45 am]

BILLING CODE 8320-01-M

[38 CFR Part 21]

Veterans Education; Independent Study

AGENCY: Veterans Administration.

ACTION: Proposed Regulation.

SUMMARY: The proposed regulation is intended to make the criteria used for measuring courses involving independent study clearer and more uniform and thus make payments of educational assistance to veterans and eligible persons more equitable.

The law provides different rates of payment of educational assistance which depend in part upon whether the veteran or eligible person is pursuing a program of education by independent study, residence training or a combination of the two. Educational institutions and state approving agencies, however, do not always define these terms in the same way, so that two students with the same attendance schedule might be paid different educational assistance. The amendment rectifies this situation.

DATES: Comments must be received on or before July 18, 1979. It is proposed to make this amendment effective the date of final approval.

ADDRESSES: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420. Comments will be available for inspection at the address shown above during normal business hours until July 30, 1979.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer, Assistant Director for Policy and Program Administration, Education and Rehabilitation Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420 (202–389–2092).

SUPPLEMENTARY INFORMATION: Section 21.4280(a), Title 38, Code of Federal Regulations is amended to make clear that educational assistance may be paid to veterans and eligible persons who are attending combined independent study-resident training courses or subjects. Section 21.4280(b) is amended to provide a number of definitions which are necessary to apply this section. Section 21.4280(c) is amended to include only material dealing with measuring independent study courses or subjects for Veterans Administration purposes. Section 21.4280(d) is added to provide for paying educational assistance to veterans and eligible persons enrolled in independent study courses or subjects. Section 21.4280(e) is added to provide for measuring and paying for enrollments in both independent study and resident training.

Additional Comment Information

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 am and 4:30 pm Monday through Friday (except holidays) until July 30, 1979.

Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Approved: June 11, 1979.

By direction of the Administrator.

Rufus H. Wilson,

Deputy Administrator.

Section 21.4280 is revised to read as follows:

§ 21.4280 Independent study leading to a standard college degree.

(a) *General.* An eligible veteran or person may receive an educational assistance allowance for pursuit of an independent study course or subject or for an independent study-resident course or subject under the following conditions:

(1) The course or subject leads to or is fully creditable toward a standard college degree;

(2) The course or subject meets the definition of independent study or independent study-resident training found in paragraph (b) of this section;

(3) The course or subject is approved as independent study or independent study-resident training by the State approving agency

(38 U.S.C. 1682(e))

(b) *Definitions.* For the purposes of measurement and payment of educational assistance whether an eligible veteran or person is pursuing a course or subject entirely by independent study shall depend upon the type of course subject in which the eligible veteran or person is enrolled and in certain instances, defined by the subparagraphs of this paragraph, upon the frequency of class attendance.

(1) A veteran or eligible person is in resident training when he or she:

(i) Is enrolled under chapter 34, title 38, United States Code, in a flight training course (this subdivision refers to veterans only);

(ii) Is enrolled in a course or subject not leading to a standard college degree offered solely through regularly scheduled, weekly conventional classroom or laboratory sessions;

(iii) Is enrolled in an undergraduate course or subject leading to a standard college degree offered through regularly scheduled, weekly conventional classroom or laboratory sessions, and/or flight training;

(iv) Is a student teacher;

(v) Is enrolled in a graduate, advanced professional or law course or subject leading to a standard college degree that either:

(A) Is offered through regularly scheduled, conventional classroom or laboratory sessions, or

(B) Consists of research necessary for the preparation of the student's master's thesis, doctoral dissertation, or a similar treatise which trains the student in the techniques of scholarly investigation; contributes to the body of knowledge; and is a prerequisite to the conferring of the degree the student is pursuing.

(38 U.S.C. 1682, 1732)

(2) A veteran or eligible person is pursuing research in absentia when he or she is a graduate student pursuing off campus research which has all the characteristics of the course or subject described in paragraph (b)(1)(v)(*B*). When a student is registered at a school for research in absentia, the research shall be treated as a resident course or subject. See § 21.4273(b).

(38 U.S.C. 1682, 1732)

(3) No veteran or eligible person is in independent study for the purpose of this section when he or she is enrolled in either a cooperative course as definded in § 21.4233(a), a farm cooperative course, a course approved as a correspondence course, a course meeting the requirements of paragraph (b) (1) or (2) of this section or a course offered by open-circuit television. A veteran or eligible person enrolled in any other course or subject is in independent study only when the course or subject in which he or she is enrolled:

(i) Leads to or is fully creditable toward a standard college degree;

(ii) Consists of a prescribed program of study with provision for interaction either by mail, telephone, or personally between the student and the regularly employed faculty of the university or college;

(iii) Is approved as independent study by the State approving agency;

(iv) Is offered without any regularly scheduled, conventional classroom or laboratory sessions.

(38 U.S.C. 1682, 1732)

(4) A veteran is in independent study-resident training if he or she:

(i) Is enrolled concurrently in one or more courses or subjects offered by resident training as defined by paragraph (b) (1) or (2) of this section and one or more courses or subjects offered by independent study as defined by paragraph (b)(3) of this section; or

(ii) Is enrolled in one or more undergraduate subjects which are offered by resident training as defined by paragraph (b) (1) or (2) of this section for part of a term, quarter or semester; and which are offered by independent study as defined by paragraph (b)(3) of this section for the remainder of the term, quarter or semester; or

(iii) Is enrolled in a subject which includes resident training as defined in paragraph (b)(1) of this section occuring at the same time as independent study

as defined in paragraph (b)(3) of this section.

(38 U.S.C. 1682, 1732)

(c) *Measurement of independent study.* A course or subject offered solely by independent study be measured as less than half-time training as follows:

(1) If the institution of higher learning evaluates the course or subject in semester or quarter hours of credit and prescribes a period for completion, the course shall be measured as less than one-half but more than one-quarter time when the semester hours per semester or equivalent, are 4 or more, and measured as one-quarter time or less for 1 through 3 semester hours per semester, or equivalent.

(2) If the institution of higher learning does not evaluate the independent study program in standard semester or quarter hours or the equivalent, independent study shall be measured as less than one-half but more than one-quarter time training.

(38 U.S.C. 1682(e), 1732(c))

(d) *Payment for independent study.* A veteran or eligible person who is pursuing only independent study under chapter 34 or chapter 35, title 38, United States Code, shall be paid an educational assistance allowance based on the training time determined in paragraph (c) of this section at the institutional rate prescribed in § 21.4136(a).

(38 U.S.C. 1682(e), 1732(c))

(e) *Independent study-resident training.* For the purpose of this paragraph a course or subject described in paragraph (b)(4)(ii) shall be treated as independent study during any week in which no classroom or laboratory sessions are scheduled and as resident training during any week in which classroom or laboratory sessions are scheduled. For the purpose of this paragraph the number of weekly conventional classroom sessions in a course or subject described in paragraph (b)(4)(iii) will be converted to credit hours on a 1 to 1 basis, and the number of laboratory sessions in a course or subject described in paragraph (b)(4)(iii) will be converted to credit hours on a 2 to 1 basis. The remainder of the credit hours assigned by the school will be considered to be independent study. Such a course or subject will be treated as two courses or subjects for payment purposes, one resident training and one independent study. In all cases when the resident training portion of undergraduate independent study-resident training does not have sufficient supporting conventional classroom or laboratory sessions as required by § 21.4272(d) before the independent study-resident training in measured.

the credit hours pursued in residence will be adjusted in accordance with § 21.4272(d)

(38 U.S.C. 1682(e), 1732(c))

(1) If independent study and resident training are pursued concurrently by a veteran or eligible person under chapter 34 or chapter 35, title 38, United States Code, and both are measured on a credit-hour basis, the allowable rate shall be determined on the basis of the combined training load provided a major portion of the credit hours are being pursued in residence.

(38 U.S.C. 1682(e), 1732(c))

(2) When a major portion of the credit hours being pursued by a veteran or eligible person under chapter 34 or chapter 35, title 38, United States Code, is not pursued in residence and the part that is pursued in residence would equal half-time or more, the number of independent study credit hours will be converted to the number of credit hours consistent with less than half-time training as stated in § 21.4270. The converted independent study credit hours shall be added to the credit hours pursued in residence. The allowable rate shall be determined on the basis of the combined training load.

(38 U.S.C. 1682(e), 1732(c))

(3) When a major portion of the credit hours being pursued by a veteran or eligible person under chapter 34 or chapter 35, title 38, United States Code, is not pursued in residence, the portion that is pursued in residence is equal to less than half-time or one-quarter time, and the portion that is by independent study is equal to half-time or more, the number of independent study credit hours shall be coverted to the highest number of credit hours consistent with less than half-time training as stated in § 21.4270. The training load shall be determined by adding the resulting credit hours together. The monthly rate shall be determined by computing the monthly rate separately for independent study and residence training and combining them, except that the monthly rate cannot exceed the institutional rate prescribed in § 21.4136(a) for the combined training load.

(38 U.S.C. 1682(e), 1732(c))

(4) When a major portion of the credit hours being pursued by a veteran or eligible person under chapter 34 or chapter 35, title 38, United States Code, is not pursued in residence and both the portion that is pursued in residence and the independent study portion are each equal to less than half-time or one-quarter time, the training load shall be determined by adding together the hours attributable to each. The monthly rate shall be determined by computing the monthly rates separately for independent study and resident training and combining them, except that the monthly rate cannot exceed the institutional rate prescribed in § 21.4136(a) for the combined training load.

(38 U.S.C. 1682(e), 1732(c))

(5) When measurement of courses being pursued by a veteran or eligible person under chapter 34 or chapter 35, title 38, United States Code, is different (i.e. class attendance on a credit-hour basis and independent study under paragraph (c)(2) of this section), the appropriate rate for each part shall be determined and the combined rates paid, but not to exceed the full-time institutional allowance rate.

(38 U.S.C. 1682(e), 1732(c))

BILLING CODE 8320-01-M

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[BC Docket No. 79-149; RM-3343]

FM Broadcast Station in St. Simons Island, Ga.; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rule Making.

SUMMARY: Action taken herein proposes the assignment of a Class A FM channel to St. Simons Island, Georgia, in response to a petition filed by Canon's Point Broadcasting Compnay. Petitioner states the proposed station would provide a first local aural broadcast service to the community.

DATES: Comments must be filed on or before August 6, 1979, and reply comments must be filed on or before August 27, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mildred B. Nesterak, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: June 7, 1979.

Released: June 13, 1979.

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations. (St. Simons Island, Georgia), BC Docket No. 79–149, Rm–3343.

1. *Petitioner, Proposal, Comments.* (a) A petition for rule making[1] was filed on February 21, 1979, by Canon's Point Broadcasting Company ("petitioner"), proposing the assignment of FM Channel 249A to St. Simons Island, Georgia, as a first Fm assignment to that community.

(b) The channel can be assigned to St. Simons Island in compliance with the minimum distance separation requirements.

(c) Petitioner states it will apply for the channel, if assigned.

2. *Community Data*—(a) *Location.* St. Simons Island, an unincorporated community in Glynn County, is one of the coastal islands situated off the coast of Georgia, approximately 65 kilometers (53 miles) south of Savannah, Georgia.

(b) *Population.* St. Simons Island—5,346; Glynn county—50,528.[2]

(c) *Local Aural Broadcast Service.* There is no local aural broadcast service on St. Simons Island.

3. *Economic Considerations.* Petitioner asserts that although St. Simons Island is unincorporated, plans are being discussed for its incorporation. It notes that suggestions have been made for funding of a study on incorporation by the legislature and a bill has been introduced in the Georgia State Legislature for studies looking toward incorporation of the community. Petitioner states that the primary industry on the island is resort recreation. It points out that St. Simons Island has its own post office, schools, banks, churches, library, civic organizations, shopping center and chamber of commerce. According to the St. Simons Island Chamber of Commerce, the current population of the community is estimated at 15,000.

4. In light of the above information and the fact that the proposed FM station would provide the community[3] with a first full-time aural broadcast service, the Commision proposes to amend the FM Table of Assignments, § 73.202(b) of the rules, with respect to St. Simons Island, Georgia, as follows:

City	Channel No.	
	Present	Proposed
St. Simons Island, Georgia		249A

5. Authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements, are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before August 6, 1979, and reply comments on or before August 27, 1979.

7. For further information concerning this proceeding, contact Mildred B. Nesterak, Broadcast Bureau, (202) 632–7792. However, members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

Federal Communications Commission.

Philip L. Verveer

Chief, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later that that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[FR Doc. 79-18835 Filed 6-15-79; 8:45 am]

BILLING CODE 6712-01-M

[1] Public Notice of the petition was given on March 19, 1979, Report No. 1188.

[2] Population figures are taken from the 1970 U.S. Census, unless otherwise indicated.

[3] Based on petitioner's showing, St. Simons Island does appear to be a community for purposes of making an assignment.

[47 CFR Part 73]

[BC Docket No. 79–148; RM–3339]

FM Broadcast Station in Moriah, N.Y.; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rule Making.

SUMMARY: Action taken herein proposes the asssignment of a Class A FM channel to Moriah, New York, at the request of Peter E. Hunn. The proposed assignment would provide for a first local aural broadcast service to the community.

DATES: Comments must be filed on or before August 6, 1979, and reply comments on or before August 27, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:
Mildred B. Nesterak, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: June 7, 1979.
Released: June 13, 1979.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Moriah, New York), BC Docket No. 79-148, RM-3339.

1. The Commission has under consideration a petition for rule making [1] seeking amendment of § 73.202(b) of the Commission's Rules, the FM Table of Assignments. The petition was filed by Peter E. Hunn ("petitioner"), requesting the assignment of FM Channel 292A to Moriah, New York. No responses to the petition were received.

2. Moriah (pop. 5,244), [2] in Essex Country (pop. 34,631), is situated in the Lake Champlain-Adirondack Mountain area, approximately 61 kilometers (38 miles) north of Glens Falls, New York. There is no local aural broadcast service in Moriah. Channel 292A can be assigned to this community in conformity with the minimum distance separation requirements.

3. Petitioner states that the proposed FM station could serve the area residents by broadcasting important local information, including local weather forecasts which are important to an area located near the shores of Lake Champlain and the Adirondack Mountains. He adds that the station would serve to inform people about local issues and events and would broadcast many views on various subjects which are of interest to the people of the community.

4. Since Moriah is located within 402 kilometers (250 miles) of the U.S.-Canada border, the proposed assignment of Channel 292A to Moriah, New York, requires coordination with the Canadian Government before if can be assigned.

5. In view of the apparent need for a first local aural broadcast service, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the rules, with regard to Moriah New York, as follows:

City	Channel No.	
	Present	Proposed
Moriah, New York		292A

6. Authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. Interested parties may file comments on or before August 6, 1979, and reply comments on or before August 27, 1979.

8. For further information concerning this proceeding, contact Mildred B. Nesterak, Broadcast Bureau, (202) 632-7792. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all ex parte contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An ex parte contract is a message (spoken or written) concerning the merits of pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

Federal Communications Commission.

Philip V. Verveer,
Chief, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D. C.

[BC Docket No. 79-150; RM-3314]

FR Broadcast Station in Murfreesboro, Ark.; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rule Making

SUMMARY: Action taken herein proposes the assignment of a Class A FM channel to Murfreesboro, Arkansas, in response to a petition filed by Ball Broadcasting Company. Petitioner states the proposed station would provide a first aural broadcast service to the community.

DATES: Comments must be filed on or before August 6, 1979, and reply comments must be filed on or before August 27, 1979.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:
Mildred B. Nesterak, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Notice of Proposed Rule Making

Adopted: June 7, 1979.
Released: June 13, 1979.

[1] Public Notice of the petition was given on March 19, 1979, Report No 1166.
[2] Population figures are taken from the 1970 U.S. Census.

In the Matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Murfreesboro, Arkansas).

By the Chief, Broadcast Bureau: 1. The Commission has under consideration a petition for rule making[1] seeking the amendment of Section 73.202(b) of the Commission's Rules, the Table of FM Assignments. The petition was filed on behalf of Ball Broadcasting Company ("petitioner"), proposing the assignment of FM Channel 237A to Murfreesboro, Arkansas. The channel can be assigned in conformity with the minimum distance separation requirements without affecting the present assignments in the FM Table. Petitioner states that it will apply for the channel, if assigned. No responses were made to the proposal.

2. Murfreesboro (pop. 1,350), seat of Pike County (pop. 8,711),[2] is located approximately 161 kilometers (100 miles) southwest of Little Rock, Arkansas. There is no local aural broadcast service in Murfreesboro.

3. Petitioner states that according to the Murfreesboro Chamber of Commerce, the community's population is currently 1,540, which is an 8.7 percent increase since 1970. It notes that Murfreesboro's economy is based on farming, lumber milling and tourism. Petitioner points out that since there is no local aural broadcast service in Pike County, the proposed station would provide a forum for programs dealing with community problems of the area. It states that a full-time facility would fill the need for coverage of important news items, including storm alerts, disasters affecting the area, and nighttime sports, in addition to serving as an advertising outlet for local business firms.

4. In view of the fact that the proposed FM channel assignment would provide Murfreesboro and Pike County with a first full-time aural broadcast service, the Commission believes it appropriate to propose amending the FM Table of Assignments, Section 73.202(b) of the Rules, with regard to the community listed below:

City	Channel No.	
	Present	Proposed
Murfreesboro, Arkansas	----------	237A

5. Authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required before a channel will be assigned.

6. Interested parties may file comments on or before August 6, 1979, and reply comments on or before August 27, 1979.

7. For further information concerning this proceeding, contact Mildred B. Nesterak, Broadcast Bureau, (202) 632-7792. However, members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

Federal Communications Commission.

Philip L. Verveer,

Chief, Broadcast Bureau.

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, Section 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in Sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[49 CFR Part 222]

[Docket No. RSGC-2, Notice 2]

Proposed Requirement for Display of Alerting Lights by Locomotives at Public Grade Crossings

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of Proposed rulemaking (NPRM).

SUMMARY: This notice proposes new regulations that would require locomotives to display flashing alerting lights at rail-highway grade crossings. The effect of this action would be to alert motorists and pedestrians of an approching train. This action is taken by FRA in an effort to reduce the number of accidents which have occurred at points where highways cross railroad tracks.

DATES: (1) Written Comments: Written comments must be received before September 28, 1979. Comments received after that date will be considered so far as possible without incurring additional expense or delay.

(2) Public Hearings: Public hearings will be held at 10:00 a.m. in Chicago, Illinois on September 17, 1979 and in Washington, D.C. on September 20, 1979. Any person who desires to make an oral statement at either hearing should notify the Docket Clerk before September 12, 1979, by phone or by mail.

ADDRESSES: (1) Written comments: Written comments should identify the docket number and the notice number and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Adminstration (Trans Point Building), 2100 Second Street, SW., Washington, D.C. 20590. Written comments will be available for examination both before and after the closing date for written comments, during regular business hours in Room 4406 of the Trans Point Building at the above address.

(2) Public Hearings: Public hearings will be held in Room 349 of the John C. Kluczynski Building, 230 S. Dearborn Street, Chicago, Illinois, and in Room 2230 of the Nassif Building, 400 Seventh Street, SW., Washington, D.C. Persons desiring to make oral statements at either hearing should notify the Docket Clerk by telephone (202–426–8836) or by writing to: Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, (Trans Point Building), 2100 Second Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Principal Authors

Principal Program Person: J. A. McNally, Office of Standards and Procedures, Federal Railroad Administration, Washington, D.C. 20590. Telephone (202) 426–9178.

Principal Attorney: Michael E. Chase, Office of the Chief Counsel, Federal Railroad Administration, Washington, D.C. 20590. Telephone 202–426–8836.

SUPPLEMENTARY INFORMATION:

Background

On March 7, 1978, FRA issued an Advance Notice of Proposed Rulemaking (ANPRM) (43 FR 9324). The ANPRM stated that FRA was considering development of proposed safety regulations to require locomotives to be equipped with lighted devices that are more effective than the standard headlight now in use in alerting motorists that a train is approaching a grade crossing. The ANPRM was intended to obtain information about various types of lighted devices, especially the alerting qualities (conspicuity) and potential drawbacks of xenon flash tube lights (strobe lights). Increasing the conspicuity of locomotives is one method of attempting to reduce the large number of grade crossing accidents and their resulting injuries and deaths.

It should be noted that the FRA proposal contained in this notice, which would require that locomotives be equipped with alerting lights, is designed to supplement other efforts being made within DOT to reduce accidents at rail-highway grade crossings. In this connection, DOT has several active programs directed at eliminating hazards at railroad-highway grade crossings. These include the installation of active and passive warning devices, new grade crossing surfaces, construction of grade separations, and endorsing measures to improve driver awareness of the hazards involved through driver education programs and effective enforcement of all traffic laws.

The National Grade Crossing Inventory indicates the following number of crossings: 219,062 public; 142,338 private; and 3,601 pedestrian. During the 10-year period 1967 through 1976, there was an annual average of 1,328 fatalities and 3,680 injuries resulting from rail-highway grade crossing accidents involving collisions between rail equipment and motor vehicles, other vehicles, or machines and pedestrians.

In 1977, the most current year for which data has been finalized, there was a total of 12,299 crossing accidents of all types resulting in 944 fatalities and 4,649 injuries. Of the total number of accidents, 11,849 involved collisions between rail equipment and motor vehicles. These are the accidents which are most pertinent to this proceeding.

The 11,849 accidents between rail equipment and motor vehicles consisted of 8,528 collisions where a train struck a motor vehicle (resulting in 674 fatalities, 3,057 injuries) and 3,321 collisions in which a motor vehicle ran into the side of train (resulting in 172 fatalities and 1,396 injuries). Of the 11,849 collisions, 7,022 occurred in daylight and 4,827 took place at night. A breakdown of the types of protection at the crossings where these accidents occurred indicates that 1,013 occurred at crossings with gates, 4,532 at crossings with flashing lights, wigwags or bells, and 6,104 at crossings with passive warning signs only.

The FRA presently has in effect a regulation (49 CFR 230.231) which requires each locomotive used in road service to be equipped with a headlight "which shall afford sufficient illumination to enable a person in the cab of such locomotive who possesses the usual visual capacity required of locomotive enginemen, to see in a clear atmosphere, a dark object as large as a man of average size standing erect at a distance of at least 800 feet ahead and in front of such headlight; and such headlight must be maintained in good condition." In the case of locomotives used in yard service, the distance requirement is reduced to 300 feet. Additionally, FRA requires that each locomotive be provided with a "suitable whistle or its equivalent" (49 CFR 230.234).

The Association of American Railroads (AAR) Standards Code of Operation Rules is the foundation for the operating rules and practices of most railroads, including rules governing the display of a locomotive headlight and use of the locomotive bell and whistle. Using the AAR Code as a guideline, each railroad constructs, interprets, applies, and expands upon the Code rules as it sees fit according to conditions or operating practices prevailing on the individual railroad. Rule 17 of the AAR Code provides that: "The headlight must be displayed brightly to the front of every train by day and by night. When an engine is running backward, a white light must be displayed by night on the leading end." Rule 16 of the AAR Code provides that: "Yard engines will display the headlight to the front and rear by night. When not provided with a headlight at the rear, a white light must be displayed".

FRA has conducted research to determine means of enhancing the visibility of trains at grade crossings. Several types of devices, including xenon strobe lights, were investigated. This research is documented in the following reports: "The Visibility and Audibility of Trains Approaching Grade Crossings," J. O. Aurelius and N. Korobow System Consultants, Inc. FRA–RP–71–2, May 1971 (NTIS No. PB–202–683); "Field Evaluation of Locomotive

Conspicuity Lights," D. B. Devoe and C. N. Abernathy, Transportation Systems Center, FRA-ORD-75-54, May 1975 (NTIS No. FB-244-532); and "Guidelines for Enhancement of Visual Conspicuity of Trains at Grade Crossings," John B. Hopkins and A. T. Newfell, Transportation Systems Center, FRA-ORD-71, May 1975 (NTIS No. PB-244-551). Copies of these reports may be obtained from the National Technical Information Service, Springfield, Va. 22161.

Also available in the docket are two other reports. One is "Analysis for NPRM Strobe Light on Locomotives (Docket No. RSGC-2)," May 28, 1978, prepared by the Transportation Systems Division of Input Output Computer Services, Inc., Cambridge, Massachusetts. The analysis includes an examination of the effectiveness of strobe lights in preventing accidents, an estimate of the benefits, an evaluation of the costs of a regulation requiring strobe lights, and a measure of the economic impact of the regulation on the railroad industry. The other report, "Grade Crossing Resource Allocation for Strobe Lights and Conventional Warning Systems," is a resource allocation analysis conducted by the Transportation Systems Center, Cambridge, Massachusetts.

Members of Congress have also expressed their interest in the use of strobe lights to improve grade crossing safety. Congressman Paul Simon has introduced a bill on this subject (H.R. 8017, 95th Cong., 1st Sess. (1977)). If it had been enacted, it would have directed the Secretary of Transportation to issue regulations that require the locomotive of all freight, passenger, and commuter trains to be equipped with strobe lights. These regulations would also have had to require that the strobe lights be operated at grade crossings and at other locations where the Secretary finds that their operation is required in the interest of safety.

In addition to laboratory research and field testing, FRA initiated operational tests in fiscal year 1977 with Amtrak, Santa Fe, Chessie, and Boston and Maine Railroads to evaluate the effectiveness of strobe lights and to identify and remedy any operational problems associated with their use. This project should be completed in fiscal year 1979.

Preliminary data collected from two of the railroads has been conflicting. The experience of one railroad indicates the strobe lights have been effective in reducing grade crossing accidents and have been relatively troublefree from an operational and a maintenance standpoint. In this instance, the control group (without strobe lights) had an accident rate higher than the National average. The other railroad experienced operational and maintenance problems, and did not experience any reduction in grade crossing accidents. On this railroad the control group had an accident record lower than the national average. However, neither railroad identified any adverse effects due to the strobe lights.

After careful review and analysis of the comments filed in response to the ANPRM, the research currently available, and the experience from the operational tests, FRA has concluded that it is appropriate to propose Federal requirements for the display of alerting light devices at public grade crossings.

ANPRM Comments

The ANPRM requested comment on the need for and the specific requirements of regulations governing additional lighted devices on locomotives. It also requested specific advice in several question areas. Where possible, the comments have been grouped under the appropriate question area. The more general comments on the need for regulations or suggesting alternatives are discussed before the responses to the ten question areas.

A total of twenty-five comments were received. Out of these, twelve were from railroads, five were from individuals, two were from manufacturers of strobe lights, three were from State transportation regulatory agencies, one was from the National Transportation Safety Board (NTSB), one was from the Association of American Railroads (AAR), and one was from a Congressman, cosigned by five other members.

Eight commenters favored additional lighted devices because they believed increased locomotive conspicuity could reduce the number of grade crossing accidents. Two of the eight were railroads, one was the NTSB, one was a State transportation regulatory agency, one was the Congressman, one was a manufacturer of strobe lights, and two were individuals.

Thirteen commenters were explicitly or implicitly opposed to requiring additional lighted devices because they doubted the potential usefulness of lighted devices in reducing grade crossing accidents, or because they believed additional study of their usefulness should precede any further action. The AAR and seven railroads were among the thirteen, as were three individuals, and two State transportation regulatory agencies. Two other railroads which operate only historic steam trains for educational and recreational purposes were opposed to requiring strobe lights on their locomotives because of the costs and because of a desire for historical accuracy.

The commenters who did not favor additional lighted devices questioned their usefullness. Seven commenters believed additional lighted devices would not deter bad driving. Several noted that drivers often ignore the existing grade crossing warnings. Three commenters suggested that improving signs and other warning devices at grade crossings would be more effective. Two suggested the use of rumble strips, which are strips of asphalt or other substance placed on the road to alert drivers of an upcoming rail-highway grade crossing. Two commenters thought better enforcement of the law where drivers ignore warning signs would be helpful. Two suggested driver education programs and three mentioned "Operation Lifesaver", a program to increase public awareness of the hazard at grade crossings. Three commenters believed that more study is necessary.

Several commenters opposed requiring additional lighted devices because of the costs. In this connection, one commenter suggested that money for additional grade crossing protection, such as strobe lights, should come from highway funds. The FRA does not agree that alerting lights are too costly or that public funding is required. The safety benefits of alerting lights would reduce the number of accidents, injuries, and fatalities, as well as reduce the costs to the railroads associated with grade crossing accidents.

FRA agrees that better law enforcement, driver education, and public awareness are desirable and would help reduce grade crossing accidents. However, the number of grade crossing accidents continues at a high level despite improved technology in crossing protection systems and joint efforts of railroad management, labor, and State and Federal governments of railroad management, labor, and State and Federal governments on public awareness projects such as "Operation Lifesaver". Many motorists approaching a grade crossing either ignore the warning signs and devices or proceed through the crossing after slowing or stopping if they do not see a train in close proximity. Even if the crossing is protected by a lowered gate, some motorists continue to go around the gate and enter the crossing if a train is not sighted.

An additional lighted device on the locomotive that is highly alerting would increase driver awareness that a train is actually approaching the crossing. Lighted alerting devices, including strobe lights, are being used successfully to warn motorists of the approach of an emergency vehicle or of the presence of highway work equipment such as snow removal equipment.

The current information available to the FRA indicates that installation on locomotives of a certain type of lighted device, dual alternating strobe lights, would have the effect of reducing grade crossing accidents. FRA's most recent study, "Analysis for NPRM Strobe Lights on Locomotives", evaluates their effectiveness by fault free analysis.

While the true value of human life cannot be measured in dollars, FRA believes that the cost to society of deaths and injuries at rail-highway grade crossings is an additional indicator of the need for regulatory action. In this connection, FRA calculations indicate that between 124 and 129 fatalities and between 566 and 680 injuries could be avoided on an annual basis if strobe lights were used as proposed in this notice. This reduction in fatalities and injuries would result in an annual savings to society of between 65 and 76 million dollars.

In addition, a resource allocation analysis conducted by the Transportation Systems Center at Cambridge, Massachusetts, indicates that strobe lights are cost effective. However, it should be noted that the benefits considered in the analysis are primarily societal in nature.

ANPRM Query No. 1

What types of lights should FRA consider requiring on locomotives to increase their conspicuity? Strobe lights, more powerful or oscillating headlights, or revolving dome lights? Could any of these lights be confused with other lights in the present railroad environment and result in potentially dangerous situations? Could any of these lights have a negative or distracting effect on railroad employees, motorists, pedestrians or persons who reside near a railroad?

In responding as to the type of lighted device that should be considered, eight commenters recommended strobe lights and two suggested strobe lights as a temporary alternative pending development of better methods of reducing grade crossing accidents. Four of these commenters recommended dual strobe lights which flash alternatively. On the other hand, some commenters expressed support for different types of alerting devices. In this connection, two commenters favored the use of an oscillating headlight believing that it would more easily supplement the present stationary headlight and that the relatively focused sweep of its high candela beam would be highly alerting to motorists at or very near to the grade crossing. One railroad commenter noted it had replaced strobe lights with an oscillating headlight because of employee complaints about the flashing strobe light. One commenter favored a revolving dome light and another commenter noted that its locomotives were already outfitted with a revolving dome light.

Confusion of additional lighted devices with lights in the present railroad environment was not seen as a problem. Two commenters who favored strobe lights, which are white in color, suggested that clear lens be used. The issue is not one of additional lights, rather it is the color of the additional lights. (See ANPRM Query No. 3 for discussion of color.)

A number of possible negative effects of strobe lights were identified and one possible negative effect was identified for dome lights. One commenter suggested that a roof top light might interfere with the radio antenna thereby causing interruptions in radio communications. Six commenters were concerned that reflected light at night would disturb the train crew. One commenter was also concerned that the reflected light of a strobe might be detrimental to visibility, create depth perception problems, have a hypnotic effect, or cause psychological problems. Four commenters suggested that strobes would have an adverse effect on persons along the right of way. The problems suggested included momentary blinding or disorienting railroad employees on the ground, distracting drivers or automobiles or trucks, and disturbing persons who reside close to the right of way.

One commenter who favored dome lights contended that strobe lights tend to draw and hold an observer's gaze directly into the light source, thereby creating a problem in visual acuity adjustment. This commenter further pointed out that any light source as sharp and bright as a strobe has a tendency to diffuse in fog or mist and create uncertainty as to its true location. Three commenters noted that photosensitive persons suffering from epilepsy may be adversely affected by strobe lights with a high flash rate. Three commenters were of the opinion that use of strobe lights would not adversely affect railroad employees.

FRA believes that a bright flashing light, such as a strobe light, is an effective alerting light device. The oscillating headlight is less effective because it has a much narrower focus. Thus, vehicles traveling parallel to the lead locomotive would be less likely to notice it.

The adverse effects noted by several commenters can be virtually eliminated by a reduction in the maximum candela of the light while still retaining the alerting qualities of the device. This has been confirmed in field testing of the device under actual operating conditions on the main line of a railroad. In addition, if the alerting lights are actuated only while approaching and passing over a grade crossing, employee exposure will be reduced to a minimum. Perhaps those commenters opposing strobe lights visualized their being operated continuously whenever the locomotive is in motion, much as the headlight is continuously lighted, instead of being activated only at grade crossings.

ANPRM Query No. 2

Should these lights be required on all locomotives or only on road locomotives? Should these lights be required to be installed only on locomotives that operate independently of other locomotives or that are used as the lead unit of locomotive consists?

The majority of commenters commenting on the questions posed in this query agreed that the lighted warning device should be applied to all road locomotives except those which by design would not be utilized as a leading unit in a consist. Two commenters thought all locomotives that operate across grade crossings should have additional lighted devices. Four commenters thought that only the lead locomotive should be required to have the devices, while one commenter thought that all locomotives should have the device except for those which by design can't be operated as a lead unit. Still another commenter thought it should be displayed on the lead unit and on the rear trailing unit.

Three commenters opposed installing lighted warning devices on switching locomotives that are primarily operated in yards or utilized solely for industry switching. It was pointed out that many switching operations are performed at locations where there may be many competing lighted elements, such as flashing neon signs or emergency vehicles, that would decrease the effectiveness of an additional lighted device on the locomotive. Also, freight

cars often preceded the locomotive in switching operations.

In addressing accident statistics and ratio of severity, it is important to focus attention on locomotives operated in main line road service because of their higher speeds. However, it should also be recognized that switching locomotives usually move over grade crossings more frequently than road locomotives during the course of their assigned work, and these crossings many times involve a higher volume of vehicular traffic than crossings out on the line of road. Furthermore, some classes of locomotives, depending upon the carrier, are used in both switching and road service, sometimes during the course of a single tour of duty.

If the alerting device is relatively unique and is activated only approaching and crossing over grade crossings, it should alert the unwary motorist despite existing lighted elements prevalent in the surrounding area. Since the hazard is a locomotive approaching a crossing when the motorist is unwary, an alerting device can have a bearing on reducing the extent of the hazard. Therefore, FRA believes that the locomotive at the head of a train or other movement which operates across a grade crossing should have increased conspicuity.

ANPRM Query No. 3

How many lights should be required on each locomotive? What color should they be? What values should be specified for light intensity, frequency of flashing, and width and height of beam or angular coverage?

The commenters responding to this portion of the ANPRM expressed a variety of opinions relative to the number of lighted devices that should be required on a locomotive. Their recommendations ranged from one device on the front end of the locomotive only, to one on each end, to a total of four devices per unit. The commenter recommending four devices per unit suggested that two red and two blue lights flashing alternatively be used. One commenter suggested a blue colored lighted device and another rejected amber as a possibility. Several commenters suggested white. A commenter cautioned that only colors which are not prevalent in railroad signal systems or not utilitized in vehicular traffic control should be considered.

Those commenters responding to the question relative to the proposed intensity and angles of the light beam suggested angles which ranged from a very narrow conical beam of 5 to 10 degrees aimed directly forward with an intensity of 20,000 to 50,000 candela, to beams having a horizontal width of 320 degrees and a vertical width of 5 to 10 degrees with an intensity of 400 candela. One commenter pointed out that each strobe light should be required to have an additional continous burning 32 candela miniature incandescent lamp filament inside the optical lens to act as a reference light source.

Because locomotives in general service on railroads today are capable of being operated in either direction, alerting lighted devices should be highly visible in whatever direction the locomotive is being operated. FRA does not favor use of the colors blue or red. FRA believes that the color blue should be reserved for blue signal protection of workmen. The color red is considered unsatisfactory because of its use in the signal systems. Furthermore, both colors are widely used on emergency vehicles and law enforcement vehicles on the nation's highways. On the other hand, a white light, which is produced by a xenon strobe, is highly alerting, does not conflict with the majority of automatic block signal aspects, and enjoys only limited use as an alerting color in a lighted device on highway vehicles.

FRA feels the flash rate for alerting lights must be held to between 60 and 90 flashes per minute to maintain maximum alerting characteristics. Flash rates substantially in excess of 90 per minute have the potential to induce seizures in persons with photosensitivity.

The intensity of alerting lights should not exceed 3,000 candela during the day or 1200 candela during the night in order to avoid possible adverse side affects. Operating two lights alternatively would insure that the device would provide maximum conspicuity to warn motorists of the approach of a locomotive.

FRA further feels the beam width should not be required to exceed a +5 and −5 vertical width over a forward area of at least 270 degrees. Operation of the strobe over the 90 degrees in the rearward direction may adversely affect crewmembers. Limiting the vertical range of the flash will minimize any adverse impacts.

ANPRM Query No. 4

How effective would each type of light be in alerting motorists and preventing grade crossing accidents? Based upon available statistics, what percentage of accidents that occurred in 1977 could have been avoided by each type of light?

Several commenters were of the opinion that the proposed lighting devices would not prove to be effective in alerting a motorist approaching a grade crossing. On the other hand, two commenters, one of whom was a lighting manufacturer, supported the proposed warning lights and were convinced that they would effectively aid in the reduction of grade crossing accidents. One railroad commenter attested to the fact that this railroad's accident record improved after oscillating lights were introduced into use. However, none of the commenters provided statistics to support their position.

FRA believes that flashing light devices mounted on a locomotive could help alert motorists approaching grade crossings. Accident statistics indicate quite clearly that the locomotive headlight, and sounding of the whistle and bell, are often not effective. In some cases, these are being ignored by the motorists; in many others, they fail to draw the attention of motorists in time for them to take action to avoid an accident.

ANPRM Query No. 5

How costly would each type of light be to install and maintain? What would be the labor and material costs per locomotive to install each type? What would be the annual maintenance cost for each type? Is each type readily available in sufficient number? How much time would be required to equip all locomotives with each type?

Two commenters commented as to the length of time that would be needed to install various proposed devices. One of these estimated it would take one month to equip his entire locomotive fleet with either strobe or dome lights. the other estimated that, for each locomotive, it would take four days to install a single strobe light or a single revolving dome light, six days to install an oscillating headlight, and six days to install two strobe lights.

A total of five railroads and one manufacturer commented relative to estimated installation costs. Estimates as to per unit costs for installation ranged from $200 to $1,203 for strobe lights and $1,000 to $1,583 for oscillating headlights. Three commenters who combined the material and labor costs estimated from $530 to $2,000 per strobe unit. One of the three estimated that it would cost $2,200 per unit for an oscillating headlight.

Several comments were received on the subject of annual maintenance costs. The estimates provided ranged rom $55 to $200 for strobe lights, from $105 to $600 for oscillating headlights, and from $60 to $200 for revolving dome lights.

ANPRM Query No. 6

If regulations were promulgated requiring locomotives to be equipped with two strobe lights that flash alternatively, each with an effective intensity of between 800 and 3,000 candela over the forward 270 degrees of the lamp with a vertical beam width of ±degrees and with a flash rate of between 60 and 90 flashes/minute for each lamp, what would be the labor and material costs per locomotive to intall these lights? What would be the annual maintenance costs for these lights per locomotive? Are these lights readily available in sufficient supply? How much time would be required to equip locomotives with these lights?

Several commenters commented relative to installation and maintenance costs if two strobe lights of stipulated specifications were to be required on each locomotive. Estimates as to cost of labor ranged from $200 to $2,406 per locomotive. Two commenters who combined the cost of labor and material estimated the combined cost to be between $530 and $1,500. One comment originating from a member of Congress estimated that the overall cost of equipping a locomotive would be $500. Estimates relative to cost of material ranged from, $400 to $648, while annual maintenance costs ranged from $55 to $224. Estimates of time required per unit for installation ranged from two to six days.

ANPRM Query No. 7

Should these lights be illuminated at all times when the locomotive is in motion? Only at night or during reduced visibility? Only when approaching grade crossings that are not protected by flashing lights or gates? When approaching all grade crossing regardless of the type of grade crossing protection provided? What discretion, if any, should railroads and localities be allowed in this respect? If these lights are to be activated only when approaching grade crossings, should they be installed so that they are automatically activated whenever the locomotive bell or horn is used, or should they be independently activated?

In commenting as to when strobe lights should be illuminated, the NTSB recommended that all locomotives be equipped with strobe lights and that they be activated at all times when a locomotive is in operation. A commenting carrier representative was of the same opinion. Three commenters were of the opinion that the additional lighted devices should be displayed at grade crossings, but that the individual carriers should determine under what other conditions they should be displayed. These commenters point out that there are great dissimilarities, varying physical characteristics, and a variety of operating practices prevalent on railroad systems throughout the country.

Several commenters thought that the lights should be activated only at grade crossings. Two of these commenters suggested that the lights be installed so as to be activated automatically whenever the whistle or bell on the locomotive were sounded with provisions made for sounding it independently when conditions warranted. One commenter stated that the display of these lights should be required only when approaching and passing over public crossings at grade which were protected by passive warning devices, leaving it up to the discretion of the railroad as to whether they should be displayed at grade crossings protected by active warning devices.

A number of commenters, including three representing carriers, argued that the lights should be installed to be activated independently of the locomotive whistle and bell. They point out that there are numerous situations when these audible warning devices are utilized in accordance with operating rules for purposes other than to warn vehicular traffic at grade crossings and, in some of those instances, flashing strobe lights could be inappropriate and distracting.

One carrier thought that these warning lights should be primarily utilized to supplement the lighted locomotive headlight in an effort to provide greater visual warning to the motorist approaching the grade crossing. If this were done, the proposed lights would be displayed whenever the locomotive headlight was displayed in compliance with railroad operating rules.

None of the commenters specifically addressed the issue of displaying these lighted devices only at night or under conditions of reduced visibility. However, one commenter did express the opinion that their use under these conditions should be mandatory regardless of what else might be required.

The grade crossing problem is not one which involves only the larger carrier, nor is it restricted to specific geographical locations or the characteristics of the terrain. To insure that these lights are effective, they must be activated approaching and pasing over all grade crossings, similar to the locomotive's whistle or bell. However, FRA does not believe that the flashing light devices should be displayed at all times when the locomotive is in motion. Continuous display could negate some of the alerting aspects and might distract or disturb railroad employees or persons along the right of way.

In addition, FRA believes that alerting lights should be capable of being operated independently. This would accommodate situations where ordinances do not allow the whistle to be sounded or the whistle is sounded for operating reasons other than approaching grade crossings.

ANPRM Query No. 8

What State and local jurisdictions have laws, ordinances, and regulations in effect that:

(a) Require locomotives to display strobe lights, flashing lights, or any other type of lights to alert motorists at grade crossings?

(b) Prohibit or limit the use of strobe lights, flashing lights, or any other type of lights?

(c) Prohibit or limit the use of horns, bells, whistles, or other types of audible warning devices?

The four commenters responding to this portion of the ANRPM stated that they were not aware of any State or local jurisdictions having laws, ordinances, or regulations in effect that would require locomotives to display such lights or prohibit their use. However, two of these commenters stated that they were aware of State and municipal ordinances which restricted the use of locomotive whistles. One commenter, representing a State regulatory body, stated that restraints were imposed on the sounding of audible warning devices at about one percent of the grade crossings in that State. The precise location and specific hours of prohibition are spelled out by special order. A commenter from an eastern railroad stated that there were no such restrictions in effect at any location on that railroad.

FRA is aware that throughout the country various ordinances require railroads to refrain from using locomotive whistles while moving through specific urban areas, except in emergency situations. However, FRA is not aware of any locations where similar ordinances have been issued relative to the sounding of the locomotive bell. Further, it is not aware of any ordinance that restrains the use of lighted warning devices on locomotives.

ANPRM Query No. 9

How many of the following grade crossing accidents occurred in 1977:

(a) A locomotive equipped with only a standard fixed headlight struck a motor vehicle or pedestrian?

(b) A locomotive equipped with an oscillating headlight, strobe light, or revolving light struck a motor vehicle or pedestrian?

(c) A motor vehicle struck the side of a locomotive or one of the first 20 cars in a train when the locomotive was equipped with an oscillating headlight, strobe light, or revolving light?

A commenter representing a State regulatory body stated that in his State during the year 1977 records indicate that there had been 15 accidents in which a locomotive equipped with a standard fixed headlight had struck a motor vehicle at a grade crossing. Four commenters commenting on this portion of the ANPRM stated that none had occurred on their property during the year 1977.

Six commenters submitted data relative to the number of grade crossing accidents in 1977 that involved a locomotive equipped with an oscillating headlight, strobe light or revolving light. Three of these commenters reported having no grade crossing accidents, two commenters reported having one, and one commenter reported 17 accidents.

Six commenters responded to the question relative to a motor vehicle striking the side of a train at a grade crossing when the locomotive was equipped with only a standard fixed headlight. Two of these commenters reported that no accidents had occurred, one commenter reported having two, another commenter reported having three, and one commenter reported a total of 29.

Four commenters commented on the rate of similar accidents involving trains where the locomotive was equipped either with an oscillating headlight, strobe light, or revolving light. Two of these reported that no accidents had occurred while two commenters reported having had eight each during the year.

FRA believes that the data received are too fragmentary and indefinite to draw any conclusions.

ANPRM Query No. 10

For each accident category in question 9.

(a) What was the grade crossing accident rate based on locomotive miles?

(b) How many fatalities resulted?

(c) How many injuries resulted? To the extent possible, categorize injuries as permanently disabling, major and minor, or superficial.

(d) How much damage resulted to railroad and other private property?

(e) How many accidents occurred at grade crossings protected by gates? By flashing lights without bells? By wigwags with and without bells? By passive warning signs?

(f) How many accidents occurred in daylight, dawn/dusk, and in darkness?

Only one commenter calculated its grade crossing accident rate based upon locomotive miles. The entire locomotive fleet of this railroad is equipped with either a revolving or flashing dome light. The accident rate was 5.97 per million locomotive miles.

In general, the data submitted in response to ANPRM Query No. 10 are too fragmentary and lack the degree of detail necessary to fit them into the categories outlined in the question. The most that can be said is that existing crossing protection, including lowered gates, does not always convince unwary motorists that a train is actually approaching a crossing. This suggests a need for a supplemental warning device which attracts the attention of motorists to the actual presence of a locomotive and provides sufficient warning time to avoid an accident.

Section by Section Analysis

Section 222.1—This section sets forth the scope of the part. Part 222 prescribes the minimum requirements regarding the use of alerting lights on railroad locomotives. It allows a railroad to adopt additional requirements governing their use. This flexibility would permit a railroad to tailor the use of alerting lights to its individual operating environment.

Section 222.1—This section specifies the applicability of the part. It provides that the requirements of the part apply to all locomotives operated on standard gauge track which is part of the general railroad system of transportation. By way of clarification, it also provides that the part does not apply to locomotives operated only on track inside an installation which is not part of the general railroad system of transportation or to locomotives operated by a rapid transit railroad only on track used exclusively for rapid transit passenger service.

FRA believes that alerting lights should be required, regardless of the type of service or operation. Although speeds may be greater on the main track outside of yards, movements over grade crossings within yards, particularly when switching, occur more frequently. Furthermore, the volume of automobile traffic is generally greater. Analysis of the grade crossing accident data demonstrates that there is a significant possibility of collisions at grade crossings irrespective of relatively slower speeds, locale, or type of service being performed.

Section 222.5—Proposed definitions necessary to the understanding and implementation of the part are set forth in this section. Most of the definitions are simple and do not involve any underlying substantive issues. The definition of "locomotive" is similar to that used in other regulations and encompasses the many variations of motive power used by railroads. The term would include units without propelling motors but with "control stands", which are drivers seats. These units are included since they are regularly the lead unit in "push-pull" train operations. These are operations in which the locomotive pulls cars from one point to another and then pushes the cars back to the point from which they originally departed.

The proposed definition of "public grade crossing" has the identical elements of that term defined in the National Grade Crossing Inventory. The proposed requirements of the part regarding the display of alerting lights would apply only at public grade crossings. Private crossings would not be included for several reasons. First, the overwhelming percentage of accidents occur at public grade crossings and those crossings are where the public has a reasonable expectation of special protection. Many private crossings are used very infrequently. Second, the operational practices of a railroad and the holder of a private right of crossing are subject to agreement between the two parties. The parties can best determine the appropriateness of displaying alerting lights and take the necessary actions at private crossings. Third, to the extent that certain private crossings have a quasi-public quality, State and local governments are in the best position to identify them and to require the display of alerting lights.

Section 222.7—This section would prescribe a civil penalty of at least $250, but nor more than $2,500, for each violation of a provision of the proposed part. Each day of each violation would constitute a separate offense. These penalty provisions are consistent with penalty provisions established in other regulations involving mandatory standards governing railroad operations.

Section 222.9—The proposed procedures for petitioning FRA for a

waiver of compliance with any requirement of the proposed part are set forth in this section.

Section 222.11—This section sets forth the proposed requirements for the display of alerting lights. In general, the section would require that each locomotive at the front of a train, or other movement, display two alternately flashing alerting lights at all public grade crossings. (The proposed specifications of each alerting light are set forth in § 222.13 and the proposed procedure for installing alerting lights is covered by § 222.15.) Studies indicate that alternate flashing provides the maximum alerting quality.

The phrase, "at the head of train or other movement", is used for two reasons. First, it makes clear that, if a locomotive is not the first piece of rolling equipment to enter a public crossing, the display of alerting lights would not be required. Second, it indicates that, if a locomotive enters a public crossing without any rolling equipment in front, it would have to display alerting lights irrespective of whether it is pulling any other equipment.

Proposed § 222.11 also provides that the required display begin at least 30 seconds prior to the locomotive entering any public grade crossing and continue until 30 seconds after the locomotive has cleared the crossing or until the entire train has cleared the crossing, whichever occurs sooner. This proposed time frame reflects FRA's view of the period when alerting lights will be effective in warning vehicles approaching the crossing of the presence of the locomotive. It should provide motorists with ample opportunity to take action to avoid an accident, while minimizing any possible adverse impacts from use of the alerting lights.

The section also includes an exception to the proposed requirement that a locomotive at the head of a train, or other movement, display alerting lights at all public grade crossings. A non-equipped locomotive, or a locomotive with defective alerting lights, would be permitted to operate across public grade crossings within an engine servicing area or train yard at a speed not exceeding 5 mph for the purpose of servicing the locomotive or assembling or disassembling multi-unit locomotive consists.

This proposed exception follows logically from the fact that only the locomotive at the head of the train, or other movement, is required to display alerting lights. It is possible that other locomotives in a multi-unit consist will either not be equipped with alerting lights or may have defective lights. In order to assemble or disassemble a consist of that type, and to move a locomotive for repair, an exception appears necessary. The limited geographic boundary, the limited purposes, and the low speed of the exception would minimize the safety risk.

The proposed requirement to display alerting lights would become effective three years from issuance of the final rules based on the NPRM. The three year interval should enable the industry to obtain and install the lights without creating any undue burden on railroad operations.

Section 222.13—The proposed specifications of the alerting lights are contained in this section. They are performance specifications so that there would be maximum opportunity for light manufacturers to develop alerting lights and railroads to choose the best device. The performance characteristic can be met now by xenon strobe lights. FRA is not aware of any other type of light currently available that can meet the specifications.

The section proposes that each alerting light have a flash rate not less than .75 nor more than 1.5 flashes per second. The combined flash rate would be between 1.5 and 3.0 flashes per second. The range of permissible flash rate would provide excellent conspicuity without posing a problem to photosensitive persons.

Under the proposed section, the alerting light would be required to have a flash duration not in excess of .1 seconds, and the light would have to be "aviation white" in color. FRA believes that the short flash duration is an essential element of the alerting quality and that the color white is appropriate due to its relative uniqueness in the railroad environment.

The angular coverage proposed is plus or minus 5 degrees in the vertical direction and at least plus or minus 135 degrees in the forward horizontal direction. The narrow vertical range would focus the flash at the level of vehicles approaching a crossing. It would also minimize undesirable beam scatter. The wide horizontal range would maximize the alerting capability of the light, and would make it visible even to vehicles approaching the crossing at a sharp angle to the tracks and vehicles paralleling the locomotive before crossing the track. The rearward 90 degrees of the flash would not be required to be visible since it could prove distracting in some situations to crewmen behind the locomotive displaying the alerting lights.

Under this proposed section, the effective intensity of the alerting light over the entire angular coverage is specified for day, night, and dawn and dusk. An effective intensity of between 800 and 3,000 candela would be required during the day, between 400 and 1,200 candela during the night, and between 400 and 3,000 during dawn and dusk. The different intensity ranges for different time periods is proposed to permit a railroad to use a multi-intensity light. Thus, for example, if unusual operating conditions warrant an especially high intensity light during the day, a railroad could install a two level alerting light.

It will be noted that a single intensity light with an effective intensity of between 800 and 1,200 candela could be operated at all times. This range is proposed because it provides adequate conspicuity during the day without creating an excessively intense flash at night.

Section 222.15—Under this proposed section, the alerting lights would have to be mounted not less than 5 feet apart, equidistant from the nearer end of the locomotive and at least 8 feet above the rail. This minimum height requirement is proposed to insure that the lights are visible from a considerable distance. Ideally, they should be mounted as high as possible. It is anticipated that in most instances they would be mounted on the roof of the locomotive. The minimum lateral separation of 5 feet is proposed to accentuate the alerting quality of the alternating flash.

Section 222.17—This proposed section provides that whenever one of the alerting lights becomes inoperative enroute, the locomotive could be operated at track speed to the next forward point where repairs can be made or the locomotive replaced. Even if both alerting lights on the locomotive at the front of the train, or other movement, become inoperative enroute, the locomotive still could be operated at track speed to the next forward point where repairs can be made. In addition, the locomotive could be replaced by another locomotive in the consist if the replacement locomotive has an operative alerting light.

Where neither the locomotive at the front of the train, or other movement, nor any other locomotive in the consist has an operative alerting light, the lovomotive would be permitted to operate only at a speed which would enable it to stop short of an obstruction at public grade crossings. This proposed requirement is considered essential, not only in view of the reduced conspicuity of the locomotive, but also due to the

expectation on the part of the public that locomotives will be displaying alerting lights.

Section 222.19—Under this proposed section, a locomotive that is equipped with alerting lights and operated at the front of a train, or other movement, would have to display those lights as specified by proposed section 222.11. This proposed requirement would become effective after 30 days from the date of issuance of the final rules based on this NPRM.

Economic Impact

FRA has evaluated this NPRM in light of Executive Order 12044 and DOT's policies for the evaluation of regulatory impacts (E.O. 12044, 43 FR 12661, March 24, 1978; Policies and Procedures for Simplification, Analysis, and Review of Regulations, 44 FR 11034, February 26, 1979). Based on that evaluation, FRA has determined that this NPRM contains a significant regulatory proposal.

FRA certifies that a regulatory analysis has been prepared and that a copy of that analysis has been placed in Docket No. RSGC–2. Interested persons may examine the regulatory analysis during regular business hours in Room 4406, Trans Point Building, 2100 Second Street, S.W., Washington, D.C. 20590. Persons interested in obtaining a copy of the analysis for review and comment should contact the Docket Clerk by telephone (202) 426–8836 or by writing to: Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, Trans Point Building, at the above address.

As previously explained, this NPRM would require that locomotives display alerting lights at public grade crossings. The proposed requirement would apply to each locomotive, whether operated as a single unit or at the front of a train.

FRA has estimated the cost of installing strobe lights using two different approaches. The first approach is based on the TSC recommendation (Hopkins, John B. and Newfell, A. T., Guidelines for Enhancement of Visual Conspicuity of Trains at Grade Crossings, Cambridge, MA, Transportation Systems Center, 1975 (DOT/FRA)). While the specifications set forth in these guidelines are not yet in production, the estimated cost for equipping locomotives with alerting lights pursuant to this approach is $1,750 per locomotive. This cost is based on use of the following specification: 4000 candela—Day 800–4000 candela; Night 100–400 candela; Dim 50–100 candela; Day/Night transition automatic—photocell; automatic hookup to horn and/or whistle; and On/Off Manual override. Thus, if all of the 28,000 locomotives currently in use were equipped pursuant to this approach, the total cost would amount to $49,000,000 (28,000 × $1,750).

If this approach is used, the estimated cost for subsequent maintenance, based on a five-year maintenance interval, is $285.00 per locomotive. This cost is computed as follows: Rebuilt $80.00; Labor remove/replace 2 hours × $25.00 = $50.00; 3 sets of bulbs = $130.00; 1 hour labor.

The second approach is based on currently available equipment. If this equipment is used, the estimated cost of installation is $555.00 per locomotive. This cost is based on use of the following specification: 1100 candela—Standard 1500 candela; 3 level option 100/550/1100 candela; automatic transition—photocell; automatic hookup and/or whistle; and manual override. Thus, if all of the locomotives currently in use were equipped pursuant to this approach, the total cost would amount to $15,540,000 (28,000 × $550.00).

If currently available equipment is used, the estimated cost for subsequent maintenance, based on a 5-year maintenance interval, is $174.00 per locomotive. This cost is computed as follows: Rebuilding $80.00; labor remove/replace 2 hrs. × $25.00 $44.00. = $50.00; 1 bulb/per

It should be noted that the actual cost of installation and maintenance of the strobe lights proposed in this notice would be lower than the cost of installation and maintenance based on the TSC recommendation or currently available equipment. The cost would be lower since some of the options discussed in connectin with those approaches, such as the three level option and automatic transition—photocell, would not be required by this notice.

Alternatives

FRA, in its deliberation of this proposed regulation, has considered various methods of improving grade crossing safety. These methods, grade separation and installation of active warning devices, have been compared with alerting lights for the purpose of determining the relative merits of alerting lights. These alternative methods, however, are crucial elements of an overall grade crossing program.

Grade Separation

Grade separation is one effective means of reducing grade crossing accidents. There are locations throughout the rail-highway network where the nature and volume of automotive and train traffic over a particular grade crossing warrants the major expenditures related to the construction of a grade separation. These types of crossings exist in high speed rail corridors where the closing speed between the automotive and rail vehicle is of such short duration that an extremely hazardous condition is created. Additional areas requiring grade separation exist in connection with the interstate highway system where high volume roadways intersect a railroad right-of-way.

However, the unit cost of a grade separation during 1978 was $1 million based on the average construction cost, (excluding preliminary engineering and right-of-ways) of federal-aid highway projects. Although grade separation projects are currently being funded by the Federal Highway Administration (FHWA), it is recognized that use of this approach at the vast majority of public grade crossings cannot be justified.

Active Warning Devices

Installation of train activated alerting devices (i.e., flashing lights or automatic gates) is another alternative. Installation of these devices constitutes a major portion of the ongoing FHWA program to improve safety at rail-highway grade crossings. The conventional grade-crossing flashing light systems have generally been found to reduce accidents at unprotected crossings from 60% to 75%, with even better results of 90% when augmented by automatic gates.

Per unit costs associated with these types of devices average $26,000 for flashing lights and $90,200 for automatic gates. Recognizing that there are presently 168,000 unprotected crossings, the cost associated with equipping all of these crossings would be enormous.

The vastness of the rail-highway network and the extremely wide variation in the amount of exposure to accident potential that exists at these crossings precludes the desirability and justification for equipping all unprotected crossings with these permanently located automated devices. There are large numbers of grade crossings where rail traffic is very limited (i.e., one train per day or two trains per week) and vehicular traffic is also at a minimum.

Alerting Lights

Alerting lights can be installed on locomotives for a small fraction of the cost that would be required to eliminate all rail-highway crossings or equip all crossings with active warning devices.

Although these methods would provide significantly higher levels of grade crossing safety, FRA studies indicate that alerting lights would provide a valuable added safety factor with a more favorable cost-benefit basis. In fact, as previously noted, the cost of grade separation or equipping all crossings with active warning devices would be prohibitive and, in some case, unjustifiable from a cost-benefit standpoint.

Alerting lights would provide additional warning at all rail-highway grade crossings, most of which are not currently protected by active devices. Moreover, they would serve as a useful supplemental warning system at crossings which are protected by active devices. The added warning provided by alerting lights is, therefore, consistent with the current program for the installation of active warning devices at grade crossings.

In view of these factors, FRA believes that alerting lights are needed to supplement existing departmental efforts to reduce accidents at rail-highway grade crossings.

Written Comments and Hearings

Interested persons are invited to participate in this proceeding by submitting written data, views or comments. Communications would identify the regulatory docket number and the notice number, and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, 2100 Second Street, S.W., Washington, D.C. 20590. Persons desiring receipt of their communications to be acknowledged should attach a stamped pre-addressed postcard to the first page of each communication. Communications received before September 28, 1979, will be considered before final action is taken on the proposed rules. All comments received will be available for examination by interested persons at any time during regular working hours in Room 4406, Trans Point Building, 2100 Second Street, S.W., Washington, D.C. 20590.

In addition, FRA will conduct public hearings at 10:00 a.m. on September 17, 1979, in Room 340 of the John C. Kluczynski Building, Chicago, Illinois and on September 20, 1979, in Room 2230 of the Nassif Building, Washington, D.C. The hearings will be informal, and not judicial or evidentiary hearings. There will be no cross examination of persons making statements. A staff member of FRA will make an opening statement outlining the matter set for hearing. Interested persons will then have the opportunity to present their oral statements.

At the completion of all initial oral statements, those persons who wish to make rebuttal statements will be given the opportunity to do so in the same order in which they make their initial statements. Additional procedures for conducting the hearings will be announced at the hearings.

Interested persons may present oral or written statements at the hearings. All statements will be made a part of the record of the hearings and will be a matter of public record. Any person who wishes to make an oral statement at the hearings should notify the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, 2100 Second Street, S.W., Washington, D.C. 20590 (Telephone (202) 426-8836), before September 12, 1979, stating the amount of time required for the initial statement.

The proposals contained in this notice may be changed in light of the oral statements made at the public hearings, or the written comments submitted in response to this notice.

The Proposed Rule

In consideration of the foregoing, FRA proposes to adopt a new Part 222 (49 CFR Part 222) to read as follows:

PART 222—ALERTING LIGHTS—LOCOMOTIVES

Sec.

222.1 Scope.
222.3 Application.
222.5 Definitions.
222.7 Civil Penalty.
222.9 Waivers.
222.11 Alerting Lights Display.
222.13 Alerting Light Specifications.
222.15 Alerting Lights Installation.
222.17 Movement of Defective Equipment.
222.19 Interim Utilization of Equipped Locomotives.

Authority: Secs. 2, 7, 8, 9, and 13, Locomotive Inspection Act (45 U.S.C. 23, 28, 29, 30 and 34); sec. 6 (e) and (f), Department of Transportation Act (49 U.S.C. 1655 (e) and (f)).

§ 221.1 Scope.

This part prescribes minimum requirements governing alerting lights on locomotives. So long as these minimum requirements are met, railroads may adopt additional or more stringent requirements governing their use.

§ 222.3 Application.

(a) Except as provided in paragraph (b) of this section, this part applies to all locomotives operated on standard gauge track which is part of the general railroad system of transportation.

(b) This part does not apply to locomotives—

(1) Operated only on track inside an installation which is not part of the general railroad system of transportation; or

(2) Operated by a rapid transit railroad only on track used exclusively for rapid transit passenger service in a metropolitan or suburban area.

§ 222.5 Definitions.

As used in this part:

(a) "Alerting light" means a light having the characteristics prescribed in § 222.13.

(b) "Dawn" means the period between one half hour before sunrise and one half hour after sunrise.

(c) "Day" means the period between one half hour after sunrise and one half hour before sunset.

(d) "Dusk" means the period between one half hour before sunset and one half hour after sunset.

(e) "Effective intensity" means that intensity of a light in candela as defined by the Illuminating Engineering Society's Guide for Calculating the Effective Intensity of Flashing Signal Lights, November, 1964.

(f) "Locomotive" means a unit of equipment—

(1) With propelling motors designed for moving other equipment;

(2) With propelling motors designed to carry freight, or passenger traffic, or both, in revenue service; or

(3) Without propelling motors but with control stands.

(g) "Locomotive servicing track area" means one or more tracks within a area in which the testing, servicing, repair, inspection, or rebuilding of locomotives is under the exclusive control of mechanical department personnel.

(h) "Public grade crossing" means a location where one or more railroad tracks cross a road open to public travel which is under the jurisdiction of, and maintained by, a public authority.

§ 222.7 Civil penalty.

Each railroad that operates a locomotive in violation of any requirement prescribed by this part is liable to a civil penalty of not less than $250, nor more than $2,500, for each violation. Each day of each violation constitutes a separate offense.

§ 222.9 Waivers.

(a) A railroad may petition the Federal Railroad Administration for a waiver of compliance with any requirement prescribed in this part.

(b) Each petition for a waiver under this section must be filed in the manner,

and contain the information, required by Part 211 of this Chapter.

(c) If the Administrator finds that a waiver of compliance is in the public interest, and is consistent with railroad safety, he may grant the waiver subject to any condition he deems necessary. Notice of each waiver granted, including a statement of the reason therefor, is published in the Federal Register.

§ 222.11 Alerting lights display.

(a) Except as provided in paragraph (b) of this section, after (three years from issuance of the final rules), each locomotive at the front of a train, or other movement, shall display two alternately flashing alerting lights, installed in accordance with § 222.15, at a minimum of 30 seconds before entering any public grade crossing and continuing until 30 seconds after the locomotive has cleared the crossing or until the entire train has cleared the crossing, whichever occurs sooner.

(b) A non-equipped locomotive, or a locomotive with defective alerting lights, may be operated at the front of a train, or other movement, across a public grade crossing located within an engine servicing area or train yard without displaying alerting lights at a speed not exceeding 5 mph for the purpose of servicing the locomotive or assembling or disassembling multi-unit locomotive consists.

§ 222.13 Alerting light specifications.

Each alerting light shall have—

(a) A flash rate of not less than .75, nor more than 1.5, flashes per second;

(b) A flash duration, as defined by the period during which 90 percent of the total energy within the visible range associated with the flash is emitted, not in excess of .1 seconds;

(c) A color that falls within the limits of "aviation white" as defined in the Code of Federal Regulations, Title 14, § 23.1397(c) (14 CFR 23.1397(c));

(d) An angular coverage of ± degrees in the vertical direction, and not less than ±135 degrees in the forward horizontal direction; and

(e) An effective intensity over the entire angular coverage of between 800 and 3,000 candela during the day, between 400 and 1,200 candela during the night, and between 400 and 3,000 candela during dawn and dusk.

§ 222.15 Alerting lights installation.

The two alerting lights shall be mounted not less than 5 feet apart, equidistant from the nearest end of the locomotive, and not less than eight feet above the rails.

§ 222.17 Movement of defective equipment.

(a) Whenever one of the alerting lights prescribed in this part becomes inoperative en route, the locomotive may be operated at track speed to the next forward point where repairs can be made or the locomotive can be replaced.

(b) Whenever both of the alerting lights prescribed in this part become inoperative en route, the locomotive may be operated to the next forward point where repairs can be made or the locomotive can be replaced—

(1) At track speed if another locomotive in the locomotive consist at the front of the train has an operative alerting light; or

(2) At a speed which will enable it to stop short of any obstruction at public grade crossings.

§ 222.19 Interim utilization of equipped locomotives.

After (30 days from issuance of the final rule), each locomotive that is operated at the front of a train, or other movement, and which is equipped with alerting lights as prescribed in this part, shall display those lights as specified by § 222.11(a)

(Secs. 2, 7, 8, 9, and 13, Locomotive Inspection Act (45 U.S.C. 23, 28, 29, 30 and 34); Sec. 6(e) and (f), Department of Transportation Act (49 U.S.C. 1655(e) and (f))

Issued in Washington, D.C. on June 12, 1979.

John M. Sullivan,
Administrator.

[BMCS Docket No. MC-80; Notice No. 79-5]

Toxic Gases in Commercial Motor Vehicles

AGENCY: Federal Highway Administration, Department of Transportation.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Comments and information are solicited on a proposed revision to the Federal Motor Carrier Safety Regulations (FMCSR), to establish definite exposure limits to certain toxic gases within commercial motor vehicles operating under the jurisdiction of the Federal Highway Administration. These limits would provide commercial vehicle drivers with the same basic protection afforded industrial workers through current occupational safety standards as set by the Occupational Safety and Health Administration.

DATE: Comments must be received August 17, 1979.

ADDRESS: All comments should refer to the Docket number and notice number that appear at the top of this document and must be submitted (original and two copies) to Room 3402, Bureau of Motor Carrier Safety, 400 Seventh Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT: Mr. Gerald J. Davis, Chief, Driver Requirements Branch, Regulations Division, Bureau of Motor Carrier Safety, (202) 426-9767, or Mr. Gerald M. Tierney, Attorney, Motor Carrier and Highway Safety Law Division, Federal Highway Administration, Department of Transportation, Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. e.s.t., Monday through Friday.

SUPPLEMENTARY INFORMATION: An Advance Notice of Proposed Rulemaking (ANPRM), Docket No. MC-80, Notice No. 77-11, was published in the Federal Register (43 FR 20), January 3, 1978, proposing revisions to these Regulations. The FMCSR in § 392.66 currently requires that:

"No person shall dispatch or drive any motor vehicle or permit any passengers thereon, when the following conditions are known to exist, until such conditions have been remedied or repaired:

(a) Where an occupant has been affected by carbon monoxide;

(b) Where carbon monoxide has been detected in the interior of the vehicle;

(c) When a mechanical condition of the vehicle is discovered, which would be likely to produce a hazard to the occupants by reason of carbon monoxide."

Respondents were invited to comment regarding whether the Federal Highway Administration (FHWA) should expand the regulation dealing with carbon monoxide to include other toxic gases such as nitric oxide and nitrogen dioxide; whether the FHWA should regulate the levels of these harmful gases; and if so, what concentration levels should be set as the maximum.

Twelve responses were filed in response to this ANPRM. The consensus supported the proposal to adopt maximum driver exposure levels for these toxic gases.

The FHWA's initial investigation about the problem of gas intrusion into truck cabs began in April 1973, when a number of drivers and union officials alleged that truck drivers were operating unsafe equipment because of the harmful and hazardous fumes in their

truck cabs, in violation of the FMCSR. Testing which was conducted then, at one motor carrier, failed to disclose significant concentrations of these gases within their cabs.

Complaints continued to be received from drivers from various sections of the country. Accordingly, the FHWA had experimental research conducted to measure the in-cab concentration of these toxic gases over a variety of conditions.

Test Protocol

A worst-case selection of 88 vehicles was made from 8 participating trucking fleets. In most cases both idling and road tests were performed on the same vehicle. Idling tests were conducted in basic conformance with Society of Automotive Engineers' Test Procedure] 988; based upon these results, individual vehicles were selected for road testing. While a technician operated measuring equipment, drivers assisted by changing window, vent, and other conditions; thus, allowing several variables to be studied.

Final testing was conducted to determine gas leakage routes into truck cabs. A tracer gas, sulfur hexafluoride, was released and then measured along the exhaust systems of idling and moving vehicles.

Test Results

The maximum concentrations which were recorded during idling and road testing were: nitric oxide, 2 parts per million (ppm); nitrogen dioxide, 3 ppm; and carbon monoxide, 30 ppm. These measurements consisted of a combination of vehicle and outside air (ambient) concentrations. The proposed National Institute of Occupational Safety and Health (NIOSH) nitrogen dioxide ceiling value of one ppm was commonly exceeded when the levels in the ambient were added to those found in the cab. NIOSH is an advisory government agency. Worst-case nitrogen dioxide levels were found to be statistically correlated with exhaust leaks and closed cabs; testing showed that cab floor openings were the principal pathways for entrance of engine compartment gases.

Interpretation of Test Results

The driver is affected by toxic gas exposure in two ways, the first is by potentially chronic or acute health effects, the second is by performance degradation. These effects were considered for all gases, and it was determined that the consequences of exposure to nitrogen dioxide was greatest followed by carbon monoxide. Nitric oxide under certain atmospheric conditions is changed into nitrogen dioxide.

Nitrogen dioxide, a product of diesel exhaust, is classified as a deep lung irritant, which is known to increase breathing difficulties. In addition, laboratory animal studies have shown this gas to cause pathological changes in the lungs, which may lead to emphysema.

The carbon monoxide levels measured during the test program were considered less hazardous to drivers than the nitrogen dioxide levels, but were high enough to be of concern. This is especially true when vehicle self-contamination levels are combined with any of the following conditions: when the driver smokes, when ambient carbon monoxide levels are elevated, or when a vehicle is operated by a driver suffering from heart or lung disease.

Although the implications for long-term exposure to these gases are not fully known, these conditions create concentrations in the blood sufficiently high to cause short-term health and performance problems. Therefore, the FHWA proposes to adopt requirements for these gases identical to those of the American Conference of Governmental Industrial Hygienists (ACGIH),[1] a voluntary consensus organization. The Department of Labor's Occupational Safety and Health Administration (OSHA) uses these same values with the exception of the Threshold Limit Value—Short-term Exposure Limits (TLV-STELS).[2] Support for the adoption of voluntary consensus standards was provided by the Office of Management and Budget's memorandum of December 22, 1977, to the Heads of Executive Departments and Establishments, published on January 3, 1978, which encourages the use of voluntary consensus standards." * * * whenever possible and appropriate, as a means of reducing and eliminating redundant Federal efforts to develop and maintain in-house Government standards" (43 FR 48).

If justified by future evidence, research, and/or analysis, these levels may need to be revised. It is felt that commercial vehicle drivers should be offered, without further delay, basically the same protection which has safeguarded other industrial workers for years.

The proposed revisions would adopt the Threshold Limit Value—Ceiling, (TLV-C), for nitrogen-dioxide, which is the driver exposure concentration level which must not be exceeded even instantaneously. For carbon monoxide and nitric oxide, 2 measurement levels will be established. The first, the Threshold Limit Value—Short Term Exposure Level, (TLV-STEL), establishes the maximum concentration to which a driver can be exposed for a period up to 15 minutes, continuously. The second, the Threshold Limit Value—Time Weighted Averge, (TLV-TWA), establishes a time-weight average concentration level for driver exposure during a normal 8-hour work day or 40-hour work week.

Although the TLV-TWA values are based on a conventional 8-hour workday or 40-hour work week, they are nevertheless regarded as appropriate for truck and bus drivers. A 1977 FHWA nationwide survey established the mean driving time for these drivers as 30.1 hours and 32.2 hours, respectively.

The adoption by the FHWA of ACGIH standards should not impose undue hardships on the motor carrier industry. Testing which was conducted for the FHWA indicated that well maintained vehicles do not exceed these levels. Thus, this proposed Regulation is expected to have minimal impact, and therefore, does not warrant a full evaluation in accordance with the criteria established by the Department of Transportation, under Executive Order 12044. Consequently, no statement is being placed in the public docket.

The new requirement being proposed will encompass the present rule, and will prohibit anyone from driving, dispatching, or carrying passengers in a vehicle in which concentrations of these gases exceed the established values.

Accordingly, it is proposed that Part 393 Subpart J, published at 43 FR 8638, Feb. 15, 1978, be redesignated as Part 399 Subpart L and it is proposed that § 392.66 of the FMCSR (Subpart G of Chapter III, Title 49, Code of Federal Regulations) be revised and redesignated as § 399.1001 under the new Subpart Z, entitled, Toxic and Hazardous Substances.

---

[1] TLVs® Threshold Limit Values for Chemical Substances in Workroom Air Adopted by ACGIH for 1977. Available from Secretary-Treasurer, ACGIH, P.O. Box 1937, Cincinnati, Ohio 45201. Price $1.50.

[2] Occupational Safety and Health Standards, Subpart Z—Toxic and Hazardous Substances. Code of Federal Regulations, Title 29, Chapter XVII. (§ 1910.1000(d)(1)(ii)).

PART 399—EMPLOYEE SAFETY AND HEALTH STANDARDS

Subpart A—General (Proposed in MC-64; 43 FR 8566)

Subpart B—Recording and Reporting Employee Injuries and Illness (Proposed in MC-64; 43 FR 8566)

Subpart C through J [Reserved]

Subpart K—Medical and Emergency Medical Care (Proposed in MC-64; 43 FR 8566)

Subpart L—Step, Handhold, and Deck Requirements on Commercial Motor Vehicles (Proposed in MC-58-1; 43 FR 6638, formerly published as Subpart J to Part 393)

Subpart M through Y [Reserved]

Subpart Z—Toxic and Hazardous Substances

§ 399.1001 Toxic gases.

No motor carrier shall permit or require a driver to drive any motor vehicle or permit any passengers thereon, when the following exist:

(a) Where an occupant has been affected by carbon monoxide, nitric oxide, or nitrogen dioxide;

(b) Where gases have been detected in the interior of the vehicle above the following levels:

Substance	TWA [1]	STEL [2]
Carbon Monoxide	50 ppm	400 ppm
Nitric Oxide	25 ppm	35 ppm
Nitrogen Dioxide	[3]5 (c) ppm	5(c) ppm

[1] Threshold Limit Value—Time Weighted Average (TLV-TWA)—the time-weighted average concentration for a normal 8-hour work day or 40-hour work week, to which nearly all workers may be repeatedly exposed, day-after-day, without adverse effect.

[2] Threshold Limit Value—Short-term Exposure Limit (TLV-STEL)—the maximal concentration to which workers can be exposed for a period up to 15 minutes continuously without suffering from 1) irritation, 2) chronic or irreversible tissue change, or 3) narcosis of sufficient degree to increase accident proneness, impair self-rescue, or materially reduce work efficiency, provided that no more than four excursions per day are permitted, with at least 60 minutes between exposure periods, and provided that the daily TLV-TWA also is not exceeded. The STEL should be considered a maximal allowable concentration, or absolute ceiling, not to be exceeded at any time during the 15-minute excursion period.

[3] Threshold Limit Value-Ceiling (TLV-C)—the concentration that should not be exceeded even instantaneously.

Vehicle testing for gases should be conducted in basic accordance with "Carbon Monoxide Concentration Test Procedure—Society of Automotive Engineers (SAE) J 990," Report of the Automotive Emissions and Air Pollution Committee (Approved January 1968).

(c) When a mechanical condition of the vehicle is discovered which would be likely to produce a hazard to the occupants by reason of exposure to carbon monoxide, nitric oxide, or nitrogen dioxide.

Those desiring to comment on this Notice are asked to submit in writing (original and two copies) of their views, data, and arguments. All communications received will be considered before any proposal for final rulemaking is initiated.

Comments are welcome and will be available, both before and after the closing date, for examination by interested persons in the Docket Room of the Bureau of Motor Carrier Safety, Room 3402, 400 Seventh Street, SW., Washington, D.C. 20590. If it is determined to be in the public interest to proceed further, after summarizing the comments received in response to the NPRM, a Final Rule will be issued.

Note.—The FHWA has determined that this document does not contain a significant proposal according to the criteria established by the Department of Transportation under Executive Order 12044.

BILLING CODE 4910-23-M

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1056]

[Ex Parte No. MC-19 (Sub- 23)]

Practices of Motor Common Carriers of Household Goods; Investigation Into Estimating Practices

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Commission proposes to amend its regulations governing the practices of motor common carriers of household goods as they concern estimating, 49 CFR 1056.8. The proposed regulations would allow a carrier at its option to give a binding estimate for the movement of a shipper's household goods. No other written estimates would be allowed. The Commission also proposes to amend 49 CFR 1056.7, .9, .10, and .21 to conform those regulations to the modified estimating requirements.

DATES: Comments are due on or before July 18, 1979.

ADDRESSES: Send comments to Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Bruce Boyarko or David Gaynor, Office of Proceedings, Interstate Commerce Commission, Washington, DC 20423, (202) 275-7901 and 275-7904.

SUPPLEMENTARY INFORMATION: The Interstate Commerce Commission, in an interim report served April 26, 1978, proposed to bind a motor common carrier of household goods to any estimate given for the movement of a shipper's goods. The numerous comments received revealed to the Commission that alternative rules could better accomplish the purpose of the proceeding.

The Commission proposes to allow a carrier the option to give a binding estimate on the basis of constructive weight determined using the volume of the shipper's items as seen by the estimator in the home. The shipper would be charged the lower total charge determined by using the actual or the constructive weight of the shipment. The estimate would be prepared in writing and according to appropriate tariff rules. No other type of written estimate would be allowed. The text of proposed § 1056.8 and those of related regulations are contained forth in the appendix. A brief explanation of each will be set forth here:

Subsection § 1056.7(b) will be amended to eliminate the requirement of reporting in an annual performance report the number of over- and underestimates. Added to that subsection, however, is the requirement that a carrier report the number of shipments on which it misquotes applicable rates. The inclusion of this requirement is designed to provide data our staff can examine to determine if a carrier is systematically misquoting rates to obtain shipments. We would like parties to comment on the likelihood of some carriers abusing the proposed system in this fashion, and, if a likelihood is perceived, to include suggestions to remedy any abuse. In addition, the rules would require that a carrier report the percent of COD and national account shipments carried on which estimates are given, and the percent of shipments which are transported for the estimated price.

Subsection § 1056.8 as it now reads will be entirely eliminated. A new section detailing the mechanics of the binding estimate procedure will be substituted in its place.

The first part of the subsection, § 1056.8(a) will declare that the only estimate that can be given in writing will be a binding estimate, and that if a carrier offers binding estimates, it must offer them to all shippers. Estimates will be made only after a visual inspection of the goods to be transported.

The total charge to be paid will be that determined using the actual or constructive weight of the goods [§ 1056.8(b)]. Constructive weight will be determined by multiplying the volume of the items viewed in the home times a

conversion factor (in pounds per cubic foot) stated in the carrier's tariff. The estimated service price given will include all charges to be rendered to a shipper.

The tariffs of each carrier adopting this method will have to be amended. Subsection 1056.8(c) will require that every carrier adopting this method have two rules: (1) that the price to be paid is the lower price determined using the actual or constructive weight, (2) that a conversion factor of a certain number of pounds per cubic foot will be used to determine constructive weight. There will be no specified conversion factor in the rules, because the figure to be used must be determined by each carrier in its own tariffs. The Commission will be receptive to requests to adopt alternative methods of price computation that carriers may feel are better suited to their operations than is the proposed method.

The estimates given will be valid for 60 days, or less if a carrier's tariff so specifies. Subsection § 1056.8(d) requires this, as well as delivery of a copy of the estimate to the shipper. The estimate will be binding when a shipper requests service or signs an order for service. Furthermore, the subsection states upon what terms an estimate can be changed and that a written statement of any adjustment must be executed.

The proposed rules place upon a carrier certain duties with respect to any change in and misquotation of rates. A carrier would be required to confirm quoted rates and to notify a shipper of changes in applicable rates 3 days prior to the pickup date. In addition, the rules would require a carrier to extend credit to a shipper for any charges which exceed the estimated service price as a result of a misquotation of applicable rates.

Shippers will be allowed to make their own cost appraisals according to § 1056.8(f). A kit may be provided for this purpose by the carrier, but any shipper's own appraisal will not be binding.

There will not be a form prescribed by us on which every estimate may be prepared. Certain information will be required by § 1056.8(g) in every estimate, and a form of the carrier's own design shall be used. The right to prohibit the use of any form which does not comply with the rules is reserved. (The right to approve forms for an alternative method is, of course, reserved too.) The information required is essentially that stated on the form now in use. Certain conditions must be added to make the estimate an offer to contract. The conditions essentially specify the terms for making the estimate binding, a carrier's duties to confirm quoted rates, and the conditions under which the price may change.

Subsection § 1056.8(h) will limit the use of the rules on shipments when an interline is involved. Binding estimates will be allowed only when all interlining carriers give binding estimates and agree to be bound by the estimate of the originating carrier. No such estimate can be given unless all carriers have come to an agreement about this and have appropriate tariff revisions in effect.

Subsection § 1056.9(a) will be amended to require that the estimated price, if any, must be stated in the order for service. Also, since the "110-percent rule" will be eliminated, the requirement of a maximum amount to relinquish possession will be eliminated. The shipper will be required to pledge that he has shown all items to, and requested all services from the estimator.

Subsection § 1056.10 will be amended to reflect the changes in the rules.

Finally, subsection 1056.21(d) will be amended to relieve any difficulty with having more than one set of rates in affect. It is not expected that more than one rate will be in effect; but if any carrier shall try to use a two-tier rate system, the opportunity will be there to seek Commission approval.

Comments are invited on these matters. They should be submitted to Secretary, Interstate Commerce Commission, Washington, DC, 20423. There should be an original and 15 copies. All submissions will become part of the record of this proceeding, and will be open to public inspection at the Commission's office in Washington, DC, during normal business hours.

This notice of proposed rulemaking is issued under the authority of Subchapter II of Chapter 105 of the Interstate Commerce Act (49 U.S.C. §§ 10521–26) and of 5 U.S.C. §§ 552, 553, and 559 (the Administrative Procedure Act).

Issued at Washington, DC, on the 31st day of May, 1979.

By the Commission, Chairman O'Neal, Vice Chairman Brown, Commissioners Stafford, Gresham, Clapp and Christian. Commissioner Stafford dissenting. Commissioner Christian absent and not participating in the disposition of this proceeding.

H. G. Homme, Jr.,
Secretary.

Commissioner Stafford, dissenting:

After careful review of the numerous comments filed in response to our April 1978 decision, I am compelled to again dissent from the action taken by the majority. Although today's proposal does deal with certain of the legal defects inherent in the previous rule, the practical problems associated with the binding estimate are again overlooked. I share the Commission's deep concern that shippers receive an accurate assessment of their prospective transportation charges. However, I am equally concerned that these same shippers may ultimately be hurt by the long-term effect of this proposal.

Our own Bureau of Investigations and Enforcement has consistently opposed the concept of binding estimates. This rule may well be an incentive for collusion between unscrupulous carriers and shippers to negotiate individual deals to provide transportation service at an excessively low rate. Even assuming no unlawful conduct, it may be expected that in many instances the binding "lawful" rate will be established by what amounts to a process of contractual negotiation between a carrier and shipper. In effect, there will no longer be any uniform rates in the movement of household goods.

This form of rate deregulation, with its resulting diminution in regulatory safeguards over rates, raises the serious possibility that the smaller carriers will be driven out of business. The binding estimate rule may well be an invitation for some carriers to deliberately quote excessively low estimates as a means of competing for all available volumes of business. There will be an incentive to quote higher rates when demand is greater, such as during the peak moving season in the summertime and conversely, to quote lower rates at other times of the year. Likewise, major carriers could, in effect, reduce rates to undercut competition in certain territories and conversely raise rates in areas providing little competition.

Such manipulation of the "estimated rate" will thus enable certain carriers to drive smaller competitors out of business. As pointed out by the Movers' and Warehousemen's Association, the operating ratio of a large number of movers exceeds 100. Many independent movers are barely surviving. The predatory pricing that will arise from the proposed regulation will only compound their financial problems and may force them out of business. The effect of this will be less competition, decreased quality of service, and higher levels of rates to the public as a whole.

In addition to these problems, the binding estimate rule also raises serious enforcement questions. In our prior report, the Commission stated that it would take appropriate action if any carrier were to use the rule deliberately to discriminate between shippers or to prefer one class of shippers over another. However, in its most recent statement, the Bureau of Investigations and Enforcement points out the practical difficulties of enforcing proper estimating practices. If unjust discrimination or preferential treatment becomes widespread, carriers who themselves engage in such conduct will not be apt to come forward with complaints about competitors unfair or deceptive acts, for fear of retaliation. Likewise, shippers cannot be expected to volunteer information concerning specially preferential rates received by themselves as a result of questionable estimating practices on the part of carriers. Compounding these enforcement problems,

the proposed rule would eliminate the present requirement that carriers file quarterly reports on the number of over and underestimates.

Finally, I note that our previous decision devoted extensive discussion as to why national account shippers should not come under the binding estimate rule. The Commission stated that large national account shippers would be in a good position to use the binding estimate rule to exact undue preference from carriers simply by demanding that the carrier furnish low estimates in return for the shipper's agreement to tender a certain volume of business to the carrier. Many of the public comments noted the legal problems associated with this separate treatment of national account shippers. Apparently persuaded by these arguments, the majority now concludes in a one paragraph discussion that "Equality of treatment . . . is more appropriate . . ." and decides to permit carriers to offer binding estimates to employees of national account shippers. What about the potential for unlawful rebates and undue preference which the majority deemed so serious a year ago? Today's report is virtually silent on this point.

This change, however, does not eliminate still another potential discriminatory effect. It is well established that the Interstate Commerce Act precludes carriers from collecting different transportation charges for rendering the same service under substantially the same circumstances. However, under this proposal, two neighbors moving to a common destination with approximately the same household goods shipment may pay very different charges. Even apart from the legal considerations, I am convinced that consumers have a right to expect that, so long as their is rate regulation, every shipper should pay the same charge for the same service.

In sum, I fear the Commission has settled upon a short-term answer to the problem of inaccurate estimates. The binding estimate rule ignores the reality that an estimate is precisely that. It is not within the ability of a carrier to come up with an estimated charge which is identical to a charge based on the actual weight. Nevertheless, this proposal places the full burden upon the carrier. The mover must bear all the risk inherent in the estimating process, a process which this Commission itself once described as "inexact". Ex Parte No. MC-19 (Sub-No. 23), *Practices of Motor Common Carriers of Household Goods*, 125 M.C.C. 307, 315 (1976). Not only do we ignore this reality, but we have failed to address the serious discrimination and enforcement questions which will accompany the implementation of this rule.

The Interstate Commerce Commission proposes to amend certain regulations in 49 CFR § 1056 in the following manner:

1. Section 1056.7(b) would be amended by revising paragraphs (b)(3) (ii) and (iii) and by adding paragraph (b)(3)(xi).

§ 1056.7 Information for shippers.

(ii) Percentage of estimates provided to each type of account.

(iii) Percentage of shipments in each type of account which were transported for the estimated price.

* * * * *

(xi) Number of estimated shipments on which rates were misquoted.

2. Section 1056.8 would be deleted and the following section would be substituted in its place:

§ 1056.8 Furnishing estimates.

(a) *Estimates.* No motor carrier of household goods, as defined in 49 CFR 1056.1(a), shall give to a prospective shipper of household goods an estimate of a service price except in the manner specified in this section. A motor common carrier which provides estimates in the manner specified in this section must offer an estimate to each shipper of household goods who requests an estimate. Each estimate of a service price shall be made only in writing and only after a visual inspection by the carrier or its agent of the goods to be transported. Each estimate of a service price prepared in the manner specified in this section shall consititute an offer for service at a price no higher than that stated in the estimate, subject to the provisions of paragraph (d) of this section.

(b) *Computation of service price.* The service price charged for a shipment on which an estimate is furnished shall be the lower amount determined by using the actual weight of the shipment or the constructive weight of the shipments. The constructive weight of a shipment shall be the estimated volume of a shipment multipled by a conversion factor stated in a carrier's tariff in terms of pounds per cubic foot. The estimated service price of a shipment shall include all service furnished by a carrier, including accessorial and terminal service.

(c) *Tariffs.* Each motor common carrier of household goods which furnishes estimates shall publish in its tariff rules which state the basis upon which an estimate of a service price will be computed. If an estimate is computed on the basis of constructive weight, appropriate tariff rules shall state that (1) the actual price for a shipment shall be the lower amount determined by using the actual weight of a shipment or the constructive weight of the shipment, and (2) that constructive weight will be determined by multiplying the estimated volume of the shipment by a conversion factor of a certain number of pounds per cubic foot. No estimate shall be furnished by a carrier unless appropriate tariff rules are published, filed, posted, and in effect.

(d) *Conditions.* Each estimate of a service price shall be delivered in writing to a prospective shipper and a copy shall be retained by the carrier furnishing the estimate. An estimate shall be valid for not more than 60 days from (but not counting) the date a written estimate is delivered to a prospective shipper. A carrier may by tariff rule limit the period during which an estimate is valid to a specified time of less than 60 days. An estimate shall be binding upon a carrier if a shipper requests the carrier to perform the service or signs a written order for service within the specified period. If a shipper requests the carrier to perform the service or signs a written order for service within the specified period, the estimate will continue in effect until the transportation service is performed. An estimate of service price shall be subject to change only when items are added to or removed from the shipment, additional services are requested or previously requested services are cancelled, a pending rate change becomes effective, or when a charge or charges different from those originally quoted apply to the shipment. If an estimate of service price is changed, a written statement reflecting the adjusted amount shall be delivered to the shipper prior to the commencement of any additional service and a copy retained by the carrier.

(e) *Reconfirmation of rates; misquotations.* Each carrier which furnishes an estimate shall confirm rates quoted in the estimates and notify the shipper of any changes in applicable rates 3 days prior to the date the shipment is to be picked up. If tariff charges subsequently are found to differ from those quoted in the estimate as a result of a misquotation of applicable charges, a carrier shall extend credit to the shipper for any amount in excess of the originally quoted charges which is attributable to misquotation of those charges, for a period of 30 days.

(f) *Shipper cost appraisal.* A carrier may provide a shipper with a kit which contains information which will enable the shipper to make his own nonbinding appraisal of the cost of a move. An appraisal of this type will not constitute an "estimate" as that term is used in these rules. These materials shall plainly indicate that shipper's own cost appraisals are not estimates and are not binding on the carrier.

(g) *Contents of estimate.* An estimate shall be prepared in clear and legible manner. The Commission retains authority to proscribe use of any form which, upon examination, is found not to comply with the provisions of this subsection.

The following information shall be contained in each written estimate based on constructive weight.

(1) The period for which the estimate is valid;

(2) Name, address, telephone number, and I.C.C. number of the carrier, and whether the carrier or the agent is the principal party of liability for the move;

(3) Name, address, and telephone number of shipper;

(4) Origin and destination of shipment;

(5) Destination contact;

(6) Packing, loading, and delivery dates;

(7) Acknowledgement of shipper's receipt of BOp 103, public advisory number 4, and carrier's performance report;

(8) Name and number of applicable tariffs;

(9) Conversion factor (pounds per cubic foot) to be used;

(10) Constructive weight, line-haul rate, number of miles, and total service price;

(11) Valuation charges on transportation and storage;

(12) Additional charges for: (i) pickup and delivery for storage in transit; (ii) storage in transit; (iii) warehouse handling; (iv) extra pickup and delivery; (v) servicing appliances; (vi) heavy articles; (vii) containers; (viii) packing and unpacking; (ix) labor; (x) charges for stairs, elevators, long distances, et cetera; (xi) overtime; (xii) other charges.

(13) Signature of estimator;

(14) Carrier's table of measurement; and

(15) The following conditions: (i) the estimate is binding upon the carrier once the shipper requests the service or signs an order for service; (ii) the shipper shall pay the lower amount determined by using the actual or the constructive weight of a shipment; (iii) the applicable tariff rates and charges; (iv) the shipper's right to 30-days credit for any charges in excess of those estimated, if applicable charges are misquoted; (v) the estimated service price may be adjusted only when items are added to or removed from the shipment, additional services are requested or previously requested services are cancelled, a pending rate change becomes effective, or when a rate different from that originally quoted applies to the shipment; (vi) the following statement, in bold face type, located directly above the estimator's signature:

"This estimate of service price is based upon the articles shown to and the services requested of the estimator. The service price will be subject to adjustment if (1) shipper adds items to or removes items from the shipment; (2) shipper requests additional services or cancels previously requested services; (3) a pending rate change becomes effective; or (4) charges different from those originally quoted apply to the shipment."

(h) *Interline Shipments.* No estimate may be given on a shipment that will be interlined unless all interlining carriers have on file appropriate tariff provisions for the giving of estimates under this section including appropriate provisions concerning shipments to be interlined, and all interlining carriers agree to be bound by the estimate of the originating carrier.

3. Section 1056.9 would be amended by revising paragraphs (a) (9), (10), and (11).

§ 1056.9 Order for service.

(a) * * *

(9) Amount of estimated service price, if any, and method of payment of total tariff charges;

(10) Maximum amount, if any, required to be paid in cash or by certified check, money order, or approved charge card to relinquish possession of a c.o.d. shipment.

(11) If an estimate of service price is furnished, a statement located directly above the space for shipper's signature which reads: "All articles I intend to ship have been shown to the estimator, and all services I will require have been requested. I understand that if the carrier, at my request, transports additional articles or performs additional services, the carrier shall assess additional charges pursuant to its tariff on file with the Commission."

Section 1056.10 would be amended by revising paragraphs (b)(7) and (8).

§ 1056.10 Reciept or bill of lading; information thereon.

(b) * * *

(7) Amount of estimated service price, if any, and method of payment of total tariff charges.

(8) Maximum amount, if any, required to be paid in cash or by certified check, money order, or charge card (under an approved plan) to relinquish possession of a c.o.d. shipment.

Section 1056.21 would be amended by revising paragraph (d).

§ 1056.21 Uniform rates for identical services.

* * * * *

(d) The regulations in (a), (b), and (c), above shall not apply to rates applicable to the transportation of shipments of machinery which, because of its unusual nature or vale, requires the specialized handling and equipment usually employed in the moving industry, nor shall the above subsections apply to rates established in accordance with sections 1056.8 and 1056.25(g) of this chapter.

Notices

Federal Register
Vol. 44, No. 118
Monday, June 18, 1979

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Licenses and Authorizations; Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Licenses had Authorizations of the Administative Conference of the United States, to be held at 11:00 a.m., Friday, July 20, 1979 at the office of O'Melveny & Myers, 1800 M Street, NW, Suite 500 South, Washington, D.C.

The Committee will meet to discuss Professor Richard Merrill's study of regulation of carcinogens.

Attendance is open to the interested public, but limited to the space available. Person wishing to attend should notify the Office of the Chairman of the Administrative Conference at least two days in advance. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting contact David M. Pritzker (202–254–7065). Minutes of the meeting will be available on request.

Richard K. Berg,
Executive Seretary.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Programmatic Agreement Regarding the Operation and Maintenance Programs of the Tulsa District of the Corps of Engineers

AGENCY: Advisory Council on Historic Preservation.

ACTION: Notice.

SUMMARY: The Advisory Council on Historic Preservation proposes to execute a Programmatic Memorandum of Agreement pursuant to § 800.8 of the regulations for the "Protection of Historic and Cultural Resources" (36 CFR 800) with the Corps of Engineers, Tulsa District and the State Historic Preservation Officers of Texas, Arkansas, Kansas, and Oklahoma concerning the operation and maintenance programs for water resource projects in the Tulsa District. The agreement provides a system that will insure that the Corps of Engineers gives adequate consideration to historic and cultural properties in the operation and maintenance of water resource projects in order to meet the requirements of Section 106 of the National Historic Preservation Act (16 U.S.C. 470f).

COMMENTS DUE: July 18, 1979.

ADDRESS: Comments should be addressed to the Executive Director, Advisory Council on Historic Preservation, 1522 K Street, N.W., Suite 510, Washington, D.C. 20005.

FOR FURTHER INFORMATION CONTACT: Louis Wall, Chief, Western Office of Review and Compliance, Advisory Council on Historic Preservation, P.O. Box 25085, Denver, Colorado 80225, (303) 234–4946.

SUPPLEMENTARY INFORMATION: This notice of the proposed agreement invites comments from interested parties. Copies of the proposed agreement are available from either the Western Office of Review and Compliance of the Council, Denver, Colorado, or the Office of Intergovernmental Programs and Planning of the Council, Washington, D.C.

Under Section 106 of the National Historic Preservation Act (16 U.S.C. 470), the Council reviews and comments on Federal undertakings that affect properties listed or eligible for listing on the National Register of Historic Places. Section 106 requires that the head of any Federal agency having indirect or direct jurisdiction over a proposed Federal, federally assisted or licensed undertaking affecting National Register or eligible properties shall afford the Council a reasonable opportunity for comment. The Council's regulations are published at 36 CFR Part 800.

The Tulsa District of the Corps of Engineers operates and maintains 24 multi-purpose lakes (lock, dam, and reservoir systems) and the McClennen-Kerr Navigation System in Texas, Arkansas, Kansas, and Oklahoma. In the course of this work, additions to or improvements of recreation areas are made and measures to mitigate the impacts of public use and natural erosion are taken; in so doing, the Corps encounters National Register and eligible properties. Under the terms of the proposed agreement, the Corps will develop Cultural Resource Management Plans for water resource projects for the states within the Tulsa District. Such plans would contain recommendations for nomination of sites, districts, and multiple resource areas to the National Register, data recovery, preservation, interpretation, and related treatment of such property. Plans developed pursuant to the proposed agreement would be reviewed by both the appropriate State Historic Preservation Officer and the Council. The proposed agreement also provides that Corps projects covered by the agreement will be designed to avoid National Register and eligible properties unless it is not prudent and feasible to do so. In that event, the Corps, in consultation with the appropriate State Historic Preservation Officer may develop mutually acceptable mitigation measures for impacts on National Register and eligible properties. The comments of the Council will be requested in accordance with the published regulations in certain situations.

The parties to the proposed agreement believe that it provides a workable system for expediting review of actions taken by the Corps to operate and maintain water resource projects in the Tulsa District. This agreement may become a model for other Corps districts.

Robert R. Garvey, Jr.,
Executive Director.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

Office of the Secretary

Request From the Department of Housing and Urban Development for a National Voluntary Laboratory Accreditation Program for Carpet

In accordance with the procedures of the National Voluntary Laboratory Accreditation Program (NVLAP): Federal Government (15 CFR Part 7b.4(c)), the Department of Commerce publishes in this notice a request from the Department of Housing and Urban Development (HUD) to develop a laboratory accreditation program for carpet to be used in designating laboratories acceptable in the HUD/FHA Carpet Certification Program. The Use of Materials Bulletin (UM-44c), and the HUD Carpet Certification Program Procedural Handbook (HUD 4950.4) referenced in the request are available for inspection at the Office of Architecture and Engineering Standards, Room A6176, HUD Building, 451 7th Street, SW., Washington, D.C. 20410. These references are also available at all HUD Field Offices.

Any comments as to the need for this laboratory accreditation program shall be made within 60 days directly to HUD, Mr. Lynford Snell or Mr. Leslie Breden, Department of Housing and Urban Development, Federal Housing Commissioner, Washington, D.C. 20410 (202-755-6600). A copy of such comments should be sent to Mr. John W. Locke, Coordinator, NVLAP, Room 3876, U.S. Department of Commerce, Washington, D.C. 20230 (202-377-2054). Additional inquiries related to NVLAP can also be directed to Mr. Locke.

Dated: June 13, 1979.

Jordan J. Baruch,

Assistant Secretary for Science and Technology.

The Under Secretary of Housing and Urban Development

May 17, 1979.

Honorable Juanita Kreps, Secretary of Commerce, Washington, D.C. 20230.

Dear Madame Secretary: The Department of Housing and Urban Development requests, in accordance with Section 7b.4 of Title 15 of the Code of Federal Regulations, that the Departments of Commerce and Housing and Urban Development, work together to establish a laboratory accreditation program for carpet in accordance with Use of Materials Bulletin 44c, dated February 22, 1978 (copy enclosed):

The HUD Carpet Certification Program presently uses three administrators, each of whom are responsible for the approval of the laboratories they use. The effort to eliminate the duplication of approvals by these administrators and minimize the costs to both industry and government establishes the need.

Enclosed is a copy of HUD Handbook 4950.4 used in the present HUD Carpet Certification Program. The procedures for the certification of carpets were authorized under the Technical Suitability of Products Program, Section 521 of the National Housing Act of 1965.

The Department of Housing and Urban Development will submit recommended general and specific criteria to be used in accrediting carpet testing laboratories. This will include consideration for the existing carpet program procedures now being used by HUD and HUD-accepted administrators and the NVLAP criteria. We will submit these criteria for your review and evaluation by August 15, 1979. HUD reserves the right to review and determine acceptability of the formalized criteria prior to publication in the **Federal Register.**

Although this particular program is directed toward testing carpet in accordance with HUD Standard UM 44c, the testing laboratories may also benefit relative to the testing of other textile related products. This could encourage participation and funding from a variety of both government and private sector sources.

We would be in a position to support this effort with our existing personnel.

If there are additional questions or information required, please feel free to call Mr. Lynford Snell or Mr. Leslie Breden at 755-5929.

Sincerely yours,

Jay Janis.

Enclosures

BILLING CODE 3510-13-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adusting Level of Restraint for Certain Wool Apparel Products Imported From the Socialist Republic of Romania

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Restoring unused carryforward yardage in the amount of 419 dozen, previously deducted from the level of restraint established for men's and boys' wool suits in Category 443, produced or manufactured in Romania and exported to the United States during the twelve-month period which began on January 1, 1979.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773), September 5, 1978 (43 FR 39408), January 2, 1979 (44 FR 94), March 22, 1979 (44 FR 17545), and April 12, 1979 (44 FR 21843.))

SUMMARY: The Bilateral Wool and Man-Made Fiber Textile Agreement of June 17, 1977, as amended, between the Governments of the United States and the Socialist Republic of Romania provides, among other things, for the borrowing of designated percentages of yardage from the succeeding year's levels (carryforward) and deducting those amounts from the levels in the succeeding year. Such yardage amounting to 419 dozen was applied to the level of restraint for Category 443 during the agreement year which began on January 1, 1978 and was deducted from the level established for the year which began on January 1, 1979. It has been determined that the carryforward yardage was not used in 1978. Accordingly, in the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase by 419 dozen the level of restraint for wool textile products in Category 443, produced or manufactured in Romania, from 6,990 dozen to 7,409 dozen during the twelve-month period which began on January 1, 1979.

EFFECTIVE DATE: June 12, 1979.

FOR FURTHER INFORMATION CONTACT: Shirley Hargrove, Trade and Industry Assistant, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–5423).

SUPPLEMENTARY INFORMATION: On January 3, 1979, there was published in the Federal Register (44 FR 934) a letter dated December 28, 1978 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, which established import restraint levels for certain wool and man-made fiber textile products, produced or manufactured in Romania and exported to the United States during the twelve-month period which began on January 1, 1979. The letter published below restores carryforward yardage deducted from the level of restraint established for Category 443 during that twelve-month period.

Robert E. Shepherd,

Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

June 8, 1979.

Committee for the Implementation of Textile Agreements

Commissioner of Customs, Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 28, 1978 from the Chairman of the Committee for the Implementation of Textile Agreements which directed you to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of certain categories of wool and man-made fiber textile products produced or manufactured in Romania.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Wool and Man-Made Fiber Textile Agreement of June 17, 1977, as amended, between the Governments of the United States and the Socialist Republic of Romania; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed, effective on June 12, 1979 to increase the twelve-month level of restraint established in the directive of December 28, 1978 for Category 443 to 7,409 dozen.

The action taken with respect to the Government of the Socialist Republic of Romania and with respect to imports of wool textile products from Romania has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

Robert E. Shepherd,

Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

BILLING CODE 3510-25-M

DEPARTMENT OF DEFENSE

Department of the Air Force

Proposed DOD Consolidation of Cryptologic Training; Environmental Impact Analysis Process

The Air Force has begun the environmental impact analysis process to assess the potential environmental impacts associated with the consolidation of cryptologic training at Keesler Air Force Base (AFB), Mississippi.

Based upon a study conducted by the Interservice Training Review Organization (Phase III Report, Cryptologic Consolidation Study, February 2, 1979), the Deputy Secretary of Defense has determined that consolidation of cryptologic training at Keesler AFB, MS, and Navy Technical Training Center, Corry Station, FL is the most feasible and cost-effective solution and worthy of further study.

The environmental impact analysis process will consider the potential impacts on the area surrounding Keesler AFB from gaining approximately 675 military and 60 civilian manpower authorizations and an average annual student load of approximately 1,100.

The environmental impact analysis process will lead to a formal environmental assessment which will be used to determine if a draft environmental impact statement (EIS) will be prepared or if a finding of no significant impact is appropriate.

If the formal environmental assessment indicates there may be significant impact on the quality of the human environment, the Air Force will file a draft EIS with the Environmental Protection Agency and release it to the public.

If such impacts are not found, a finding of no significant impact will be prepared and released.

Any comments or questions should be directed to the Deputy for Environment and Safety, Office of the Secretary of the Air Force, Room 4C885, the Pentagon, Washington, D.C. 20330, telephone 202–697–9297.

Carol M. Rose,

Air Force Federal Register Liaison Officer.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 79-CERT-005]

Anchor Hocking Corp.; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

Take notice that on April 20, 1979, Anchor Hocking Corporation, 109 North Broad Street, Lancaster, Ohio 43130, filed an application pursuant to 10 CFR Part 595 (44 FR 20398, April 5, 1979) for a certification of an eligible use of natural gas to displace fuel oil, all as more fully set forth in the application on file with the Economic Regulatory Administration (ERA) and open to public inspection at the ERA, Docket Room 6317-B, 2000 M Street, N.W., Washington, D.C. 20461, between 8:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Anchor Hocking stated that the volume of natural gas subject to certification is 3,000 Mcf per day, and the eligible sellers are Gas Transport, Inc., 109 North Broad Street, Lancaster, Ohio 43130, and Carl E. Smith, Inc., P.O. Box 4, Sandyville, West Virginia 25275. This natural gas will be used to displace approximately 175,500 barrels of No. 6 fuel oil containing up to 2 percent of sulphur per year at Anchor Hocking's glass manufacturing plant in Salem, New Jersey. The gas will be transported by Columbia Gas Transmission Corporation, Charleston, West Virginia 25325, and by Transcontinental Gas Pipe Line Corporation, Houston, Texas 77100.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Room 6318, 2000 M Street, N.W., Washington, D.C. 20461, Attention: Mr. Finn K. Neilsen, on or before June 28, 1979.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest, and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines an oral presentation is required, further notice will be given to Anchor Hocking and any persons filing comments, and filed in the Federal Register.

Issued in Washington, D.C., on June 12, 1979.

Paul T. Burke,

Acting Assistant Administrator, Fuels Regulation, Economic Regulatory Administration.

[FR Doc. 79-18859 Filed 6-15-79; 8:45 am]

BILLING CODE 6450-01-M

[ERA Docket No. 79-CERT-023]

Georgia-Pacific Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Take notice that on May 25, 1979, Georgia-Pacific Corporation (Georgia-Pacific), P.O. Box 756, Lovell, Wyoming 82431, filed an application pursuant to 10 CFR 595 (44 FR 20398, April 15, 1979) for a certification of an eligible use of natural gas to displace fuel oil, all as more fully set forth in the application on file with the Economic Regulatory Administration (ERA) and open to public inspection at the ERA, Room 6317-B, 2000 M Street, NW., Washington, D.C. 20461, between 8:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Georgia-Pacific stated that it was requesting certification to use natural gas at its gypsum manufacturing facility at Lovell, Wyoming, and that it could purchase up to 500,000 Mcf per year of natural gas for use at that facility for five years from the Montana Power Company, 40 East Broadway, Butler, Montana 59701. This natural gas will be used to displace approximately 2,500,000 gallons per year of Number 2 fuel oil with a sulfer content range of 0.3-0.396 percent depending on the supplier, now used at the gypsum facility.

The natural gas will be transported to Georgia-Pacific's gypsum facility at Lovell, Wyoming, by Montana-Dakota Utilities Company, 400 North Fourth Street, Bismarck, North Dakota 59501.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumcstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Room 6318, 2000 M Street, NW., Washington, D.C. 20461, Attention: Mr. Finn K. Neilsen, on or before June 28, 1979.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest, and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines an oral presentation is required, further notice will be given to Georgia-Pacific and any persons filing comments, and filed in the Federal Register.

Issued in Washington, D.C., on June 12, 1979.

Paul T. Burke,

Acting Assistant Administrator, Office of Fuels Regulation, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 79-CERT-020]

Public Service Electric and Gas Co.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Take notice that on May 17, 1979, the Public Service Electric and Gas Company (Public Service) 80 Park Place, Newark, New Jersey 07101, filed an application pursuant to 10 CFR Part 595 (44 FR 20398, April 15, 1979) for a certification of an eligible use of natural gas to displace fuel oil, all as more fully set forth in the application on file with the Economic Regulatory Administration (ERA) and open to public inspection at the ERA, Docket Room 6317-B, 2000 M Street, N.W., Washington, D.C. 20461, from 8:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Public Service stated that it had entered into three separate arrangements to purchase approximately 24.1 billion cubic feet (Bcf) of natural gas for various public service electric generation facilities in New Jersey for a one-year period. The eligible sellers and transporters are as follows:

a. Seller: National Gas and Oil Corporation, 1500 Granville Road, Newark, Ohio 43065. Transporter: Texas Eastern Transmission Corporation, P.O. Box 2521, Houston, Texas 77001.
b. Seller: Equitable Gas Company, 420 Boulevard of the Allies, Pittsburgh, Pennsylvania 15219.

Transporters: Tennessee Gas Pipeline Company, P.O. Box 2511, Houston, Texas 77001; Transcontinental Gas Pipe Line Corporation, P.O. Box 1396, Houston, Texas 77001.

c. Seller: Delhi Gas Pipeline Corporation, P.O. Box 22623, Dallas, Texas 75284 (Transcontinental Gas Pipe Line Corporation Acting as Agent).
Transporter: Transcontinental Gas Pipe Line Corporation, P.O. Box 1396, Houston, Texas 77001.

This 24.1 Bcf per year of natural gas will be used to displace approximately 4 million barrels of middle distillate and residual fuel oil. Because the quantities of gas to be used at each of the New Jersey facilities of Public Service might be subject to considerable variations, Public Service requests certification without assigning specific volumes to specific generating facilities. An estimate of the distribution of the natural gas between electric generating locations is included in the application.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any persons wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Room 6318, 2000 M Street, N.W., Washington, D.C. 20461, Attention: Mr. Finn K. Neilsen, on or before June 28, 1979.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest, and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines an oral presentation is required, further notice will be given to Public Service and any persons filing comments, and filed in the Federal Register.

Issued in Washington, D.C., on June 12, 1979.

Paul T. Burke,

Acting Assistant Administrator, Fuels Regulation, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 79-CERT-021]

Long Island Lighting Co., Mineola, N.Y.; Application for Certification of the use of Natural Gas to Displace Fuel Oil

Take notice that on May 17, 1979, the Long Island Lighting Company (LILCO), 250 Old Country Road, Mineola, New York 11501, filed an application pursuant to 10 CFR Part 595 (44 FR 20398, April 15, 1979) for a certification of an eligible use of natural gas to displace fuel oil, all as more fully set forth in the application on file with the Economic Regulatory Administration (ERA) and open to public inspection at the ERA, Docket Room 6317-B, 2000 M Street, N.W., Washington, D.C., 20461, from 8:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, LILCO stated that it has an agreement with Delhi Gas Pipeline Corporation (Delhi), Fidelity Union Tower, Dallas, Texas 75201, to receive 10,000 Mcf per day for one year (3,650 MMcf) commencing with the date of initial delivery, and 40, 000 Mcf per day for a second year (14,600 MMcf).

The application also states that 3,450,000 barrels of fuel oil can be displaced by that amount of natural gas at LILCO's E. F. Barrett, Glenwood, and Far Rockaway Electric Plants for a 12-month period from May 1, 1979. The natural gas will be transported by Transcontinental Gas Pipe Line Corporation (TRANSCO), 2700 South Post Oak Road, P.O. Box 1396, Houston, Texas 77001.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning the application to submit comments in writing to the Economic Regulatory Administration, Room 6318, 2000 M Street, N.W., Washington, D.C. 20461, Attention: Mr. Finn K. Neilsen, on or before June 28, 1979.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest, and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed presentation and a statement as to why an oral presentation is necessary. If ERA determines an oral presentation is required, further notice will be given to LILCO and any persons filing comments, and filed in the Federal Register.

Issued in Washington, D.C., on June 12, 1979.

Paul T. Burke,

Acting Assistant Administrator, Fuels Regulation, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 79-CERT-023]

System Fuels, Inc.; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

Take notice that on May 30, 1979, System Fuels, Inc., (SFI), 225 Baronne Street, New Orleans, Louisiana 70112, for use by its parent companies, Arkansas Power & Light Company, Louisiana Power & Light Company, Mississippi Power & Light Company, and New Orleans Public Service Inc., and by Arkansas-Missouri Power Company, all operating electric generating companies of Middle South Utilities, Inc., filed an application pursuant to 10 CFR Part 595 (44 FR 20398, April 15, 1979) for a certification of an eligible use of natural gas to displace fuel oil, all as more fully set forth in the application. SFI's application for certification is on file with the Economic Regulatory Administration (ERA) and open to public inspection at the ERA, Docket Room 6317-B, 2000 M Street, N.W., Washington, D.C. 20461, from 8:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, SFI stated that the volume of natural gas subject to certification for use at various facilities of the above companies located in Missouri, Arkansas, Louisiana, and Mississippi, may be as much as 120,000 Mcf per day. This natural gas will be used to displace up to 25,000 barrels per day of middle distillate (including No. 2 fuel oil) and up to 20,000 barrels per day of residual fuel oil (No. 5 and No. 6) having a sulfur content of 1 percent, 1½ percent or 3 percent depending on the facilities in which the fuel oil is displaced. SFI anticipates the displacement of at least 1,500,000 barrels of middle distillate, including No. 2 fuel oil, during the next 12 months in addition to a presently undetermined quantity of residual fuel oil. SFI states it will attempt to use the natural gas to maximize the displacement of No. 2 fuel oil first, then other middle distillates, and finally, residual fuels oils (including Nos. 5 and 6).

The eligible sellers of the gas are: Channel Industries Gas Company, Houston, Texas 77001; Louisiana Intrastate Gas Corporation, Alexandria, Louisiana 71301; and Louisiana Resources Company, Tulsa, Oklahoma

74101. The gas will be transported by: United Gas Pipe Line Company, P.O. Box 1478, Houston, Texas 77001; Tennessee Gas Pipeline Company, P.O. Box 2511, Houston, Texas 77001; Florida Gas Company, P.O. Box 44, Winter Park, Florida 32790; and Arkansas Louisiana Gas Company, Arkla Building, Shreveport, Louisiana 71151.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Room 6318, 2000 M Street, N.W., Washington, D.C. 20461, Attention: Mr. Finn K. Neilsen, on or before June 28, 1979.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest, and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines an oral presentation is required, further notice will be given to SFI and any persons filing comments, and filed in the Federal Register.

Issued in Washington, D.C., on June 12, 1979.

Paul T. Burke,

Acting Assistant Administrator, Fuels Regulation, Economic Regulatory Administration.

[FR Doc. 79-18809 Filed 6-15-79; 8:45 am]

BILLING CODE 6450-01-M

Energy Supply and Environmental Coordination Act; Intention To Rescind a Prohibition Order

The Department of Energy (DOE)[1] hereby gives notice that, acting under the authority granted to it in Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended (15 U.S.C. 792(f)) and implemented by 10 CFR 303.130(b), it intends to rescind the Prohibition Order issued on June 30, 1977, to the unit named below. This action is taken in accordance with the provisions of 10 CFR Part 303, Subpart J ("Modification or Rescission of Prohibition Orders and Construction Orders") of the ESECA regulations.

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*).

Docket No.	Owner	Plant	Units	Location
OCU-0400	The Chesapeake Corp.	West Point Mill	8	West Point, Va.

The Prohibition Order, if made effective by the issuance of a Notice of Effectiveness (NOE), would have prohibited this unit from burning natural gas or petroleum products as their primary energy source.

By letter of February 6, 1979, Garland T. Edmonds, Vice President of the Chesapeake Corporation, reported to DOE that Unit 8 of the West Point Mill will soon be converted from the burning of oil to the burning of coal as its primary energy source pursuant to the terms of the outstanding Prohibition Order.

Based upon this information, DOE finds that the outstanding Prohibition Order issued to Unit 8 of the West Point Mill has attained the originally stated purpose, causing the conversion of this unit from the burning of oil as a primary energy source to the burning of coal in a manner consistent to the fullest extent practicable with existing commitments to protect and improve the environment.

In view of this accomplishment, DOE finds that further action toward making the outstanding Prohibition Order effective would not be in the public interest and accordingly, rescission of the orders is now appropriate.

Comments on DOE's intention to rescind the Prohibition Order are invited. Interested persons may submit written data, views or arguments with respect to the proposed action to the Office of Public Hearing Management, Room 2313, 2000 M Street NW., Washington, D.C. 20461 (Attn: D. Kidwell). All comments and other documents should be identified both on the outside of the envelope and on the document itself with the designation, "Proposed Rescission Order, Chesapeake Corporation's West Point Mill, Unit 8." All written comments must be received no later than June 28, 1979, in order to receive consideration. In making its decision regarding the proposed rescission action, DOE will consider all relevant information submitted to it or otherwise available to it.

Any information considered to be confidential by the person furnishing it must be so identified at the time of submission in accordance with 10 CFR Part 1004. DOE reserves the right to determine the confidential status of the information and to treat it in accordance with that determination.

Questions regarding this proposed action should be directed to DOE as follows: Steven A. Frank, ESECA Programs Division, Department of Energy, Economic Regulatory Administration, Room 7202, 2000 M Street NW., Washington, D.C. 20461 (telephone: (202) 254-8246). Written questions should be identified on the envelope and in the correspondence with the designation set out above.

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 *et seq.*) as amended by Pub. L. 95-70 and Pub. L. 95-620; Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*) as amended by Pub. L. 95-70 and Pub. L. 95-91; Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*); E.O. 11790 (39 FR 23185); E.O. 12009 (42 FR 46267).)

Issued in Washington, D.C. June 8, 1979.

Doris J. Dewton,

Acting Assistant Administrator, Office of Fuels Regulation, Economic Regulatory Administration.

[FR Doc. 79-18804 Filed 6-15-79; 8:45 am]

BILLING CODE 6450-01-M

Energy Supply and Environmental Coordination Act; Intention To Rescind a Prohibition Order

The Department of Energy (DOE)[1] hereby gives notice that, acting under the authority granted to it in Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended (15 U.S.C. 792(f)) and implemented by 10 CFR 303.130(b), it intends to rescind the Prohibition Orders issued on June 30, 1977, to the unit named below. This action is taken in accordance with the provisions of 10 CFR Part 303, Subpart J ("Modification or Rescission of Prohibition Orders and Construction Orders") of the ESECA regulations.

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*).

Docket No.	Owner	Plant	Units	Location
OCU-0004	Brown Co.	Parchment plant	9 & 10	Parchment, Mich.

The Prohibition Orders, if made effective by the issuance of a Notice of Effectiveness (NOE), would have required that this unit be designed and constructed so as to be capable of using coal as its primary energy source.

Based upon a review of the potential environmental impacts of converting the Parchment Units 9 and 10 to coal combustion, DOE is rescinding the Prohibition Orders issued under the Energy Supply and Environmental Coordination Act.

Comments on DOE's intention to rescind the Prohibition Orders are invited. Interested persons may submit written data, views or arguments with respect to the proposed action to the Office of Public Hearing Management, Room 2313, 2000 M Street, NW., Washington, D.C. 20461 (Attn: D. Kidwell).

All comments and other documents should be identified both on the outside of the envelope and on the document itself with the designation, "Proposed Rescission Order, Brown Company's Parchment, Michigan Plant, Units 9 and 10." All written comments must be received no later than June 28, 1979, in order to receive consideration. In making its decision regarding the proposed rescission action, DOE will consider all relevant information submitted to it or otherwise available to it.

Any information considered to be confidential by the person furnishing it must be so identified at the time of submission in accordance with 10 CFR Part 1004. DOE reserves the right to determine the confidential status of the information and to treat it in accordance with that determination.

Questions regarding this proposed action should be directed to DOE as follows: Steven A. Frank, ESECA Division, Department of Energy, Economic Regulatory Administration, Room 7202, 2000 M Street, NW., Washington, D.C. 20461 (telephone: (202) 254–6246). Written questions should be identified on the envelope and in the correspondence with the designation set out above.

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 *et seq.*) as amended by Pub. L. 95–70 and Pub. L. 95–620; Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*) as amended by Pub. L. 95–70 and Pub. L. 95–91; Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*); E.O. 11790 (39 FR 23185); E.O. 12009 (42 FR 46267))

Issued in Washington, D.C. June 8, 1979.

[FR Doc. 79-18605 Filed 6-15-79; 8:45 am]

BILLING CODE 6450-01-M

Energy Supply and Environmental Coordination Act; Intention To Rescind a Prohibition Order

The Department of Energy (DOE) [1] hereby gives notice that, acting under the authority granted to it in Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended (15 U.S.C. 792(f)) and implemented by 10 CFR 308.130(b), it intends to rescind the Prohibition Orders issued on June 30, 1977, to the units named below. This action is taken in accordance with the provisions of 10 CFR Part 303, Subpart J ("Modification or Rescission of Prohibition Orders and Construction Orders") of the ESECA regulations.

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*).

Docket No.	Owner	Plant	Units	Location
OCU-0000	Continental Forest Industries	Hopewell Mill	2 & 3	Hopewell, Va.
OCU-0001	do	Port Wentworth Mill	1, 2, & 3	Port Wentworth, Ga.

The Prohibition Orders, if made effective by the issuance of a Notice of Effectiveness (NOE), would have prohibited these units from burning natural gas or petroleum products as their primary energy source.

By letter of February 23, 1979, R. S. Magruder, Director of Environmental and Energy Management for Continental Forest Industries, reported to DOE that Units 2 and 3, of the Hopewell Mill have been converted from the burning of oil and gas to the burning of bark, black liquor and waste as their primary energy source pursuant to the terms of the outstanding Prohibition Orders.

Based upon this information, DOE finds that the outstanding Prohibition Orders issued to Units 2 and 3 of the Hopewell Mill have attained their originally stated purpose, causing the conversion of their units from the burning of oil and gas to bark, black liquor and waste in a manner consistent to the fullest extent practicable with existing commitments to protect and enhance the environment.

In view of this accomplishment, DOE finds that further action towards making the outstanding Prohibition Orders effective would not be in the public interest and accordingly, rescission of the orders is now appropriate.

In this same letter of February 23, 1979, Mr. Magruder reported that Units 1, 2 and 3 of the Port Wentworth Mill would soon be replaced by a new unit, designated #3 Chemical Recovery Unit, now in the final stages of construction.

In view of Continental Forest Industries ongoing modernization effort at Port Wentworth plus management plans for further future improvements which will eventually lead to an equivalent savings of 190,000 bbls of oil per year, DOE is rescinding the Prohibition Order issued under the Energy Supply and Environmental Coordination Act.

Comments on DOE's intention to rescind the Prohibition Orders are invited. Interested persons may submit written data, views or arguments with respect to the proposed action to the Office of Public Hearing Management, Room 2313, 2000 M Street, NW., Washington, D.C. 20461 (Attn: D. Kidwell).

All comments and other documents should be identified both on the outside of the envelope and on the document itself with the designation, "Proposed Rescission Orders, Hopewell Mill, Units 2 and 3, and Port Wentworth Mill, Units

1, 2 and 3." All written comments must be received no later than June 28, 1979, in order to receive consideration. In making its decision regarding the proposed rescission action, DOE will consider all relevant information submitted to it or otherwise available to it.

Any information considered to be confidential by the person furnishing it must be so identified at the time of submission in accordance with 10 CFR Part 1004. DOE reserves the right to determine the confidential status of the information and to treat it in accordance with that determination.

Questions regarding this proposed action should be directed to DOE as follows: Steven A. Frank, ESECA Division, Department of Energy, Economic Regulatory Administration, Room 7202, 2000 M Street, NW., Washington, D.C. 20461 (telephone: (202) 254–6246). Written questions should be identified on the envelope and in the correspondence with the designation set out above.

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 *et seq.*) as amended by Pub. L. 95–70 and Pub. L. 95–620; Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*) as amended by Pub. L. 95–70 and Pub. L. 95–91; Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*); E.O. 11790 (39 FR 23185); E.O. 12009 (42 FR 46267))

Issued in Washington, D.C. June 8, 1979.

Doris J. Dewton,

Acting Assistant Administrator, Office of Fules Regulation, Economic Regulatory Administration.

[FR Doc. 79-18898 Filed 6-15-79; 8:45 am]

BILLING CODE 6450-01-M

Energy Supply and Environmental Coordination Act; Intention To Rescind a Prohibition Order

The Department of Energy (DOE)[1] hereby gives notice that, acting under the authority granted to it in Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended (15 U.S.C. 792(f)) and implemented by 10 CFR 303.130(b), it intends to rescind the Prohibition Orders issued on June 30, 1977 and July 14, 1978, to the units named below. This action is taken in accordance with the provisions of 10 CFR Part 303, Subpart J ("Modification or Rescission of Prohibition Orders and Construction Orders") of the ESECA regulations.

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*)

Docket No.	Owner	Plant	Units	Location
OCU-2640	Avtex Fibers, Inc	Front Royal	1, 2, & 3	Front Royal, Va.
OCU-2640	do	do	4 & 5	Do.

The Prohibition Orders, if made effective by the issuance of a Notice of Effectiveness (NOE), would have prohibited these units from burning natural gas or petroleum products as their primary energy source.

By letter of February 7, 1979, Herbert S. Hall, Vice President of Avtex Fibers, Inc., reported to DOE that Units 1, 2, 3, 4, and 5 of the Front royal Plant have been converted from the burning of oil to the burning of coal as their primary energy source pursuant to the terms of the outstanding Prohibition Orders.

Based upon this information, DOE finds that the outstanding Prohibition Orders issued to Units 1, 2, 3, 4, and 5 of the Front Royal Plant have attained their originally stated purpose, causing the conversion of their unit from the burning of oil as a primary energy source to the burning of coal in a manner consistent to the fullest extent practicable with existing commitments to protect and improve the environment.

In view of this accomplishment, DOE finds that further action towards making the outstanding Prohibition Orders effective would not be in the public interest and accordingly, rescission of the orders is now appropriate.

Comments on DOE's intention to rescind the Prohibition Orders are invited. Interested persons may submit written data, views or arguments with respect to the proposed action to the Office of Public Hearing Management, Room 2313, 2000 M Street NW., Washington, D.C. 20461 (Attn: D. Kidwell). All comments and other documents should be identified both on the outside of the envelope and on the document itself with the designation, "Proposed Rescission Order, Avtex Fibers, Inc., Front Royal Plant, Units 1, 2, 3, 4, and 5." All written comments must be received no later than June 28, 1979, in order to receive consideration. In making its decision regarding the proposed rescission action, DOE will consider all relevant information submitted to it or otherwise available to it.

Any information considered to be confidential by the person furnishing it must be so identified at the time of submission in accordance with 10 CFR Part 1004. DOE reserves the right to determine the confidential status of the information and to treat it in accordance with that determination.

Questions regarding this proposed action should be directed to DOE as follows: Steven A. Frank, ESECA Programs Division, Department of Energy, Economic Regulatory Administration, Room 7202, 2000 M Street NW., Washington, D.C. 20461 (telephone: (202) 254–6246). Written questions should be identified on the envelope and in the correspondence with the designation set out above.

BILLING CODE 6450-01-M

Energy Supply and Environmental Coordination Act; Intention To Rescind a Prohibition Order

The Department of Energy (DOE)[1] hereby gives notice that, acting under the authority granted to it in Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended (15 U.S.C. 792(f)) and implemented by 10 CFR 303.130(b), it intends to rescind the Prohibition Orders issued on June 30, 1977, to the units named below. This action is taken in accordance with the provisions of 10 CFR Part 303, Subpart J ("Modification or Rescission of Prohibition Orders and Construction Orders") of the ESECA regulations.

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*)

Docket No.	Owner	Plant	Units	Location
OCU-1258	A. E. Staley Manufacturing Co.	Decatur plant	19 & 20	Decatur, Ill.

The Prohibition Orders, if made effective by the issuance of a Notice of Effectiveness (NOE), would have prohibited these units from burning natural gas or petroleum products as their primary energy source.

By letter of February 23, 1979, W. P. Hagnebach, Director of Environmental Sciences for A. E. Staley Manufacturing Company, reported to DOE that Units 19 and 20, of the Decatur Plant will soon be converted from the burning of oil to the burning of coal as their primary energy source pursuant to the terms of the outstanding Prohibition Orders.

Based upon this information, DOE finds that the outstanding Prohibition Orders issued to Units 19 and 20 of the Decatur Plant have attained their originally stated purpose of assisting meeting the essential needs of the United States, for fuels by causing the conversion of these units from the burning of oil as a primary energy source to the burning of coal in a manner consistent to the fullest extent practicable with existing commitments to protect and enhance the environment. In view of this accomplishment, DOE finds that further action towards making the outstanding Prohibition Orders effective would not be in the public interest and accordingly, rescission of the orders is now appropriate.

Comments on DOE's intention to rescind the Prohibition Orders are invited. Interested persons may submit written data, views or arguments with respect to the proposed action to the Office of Public Hearing Management, Room 2313, 2000 M Street, NW., Washington, D.C. 20461 (Attn: D. Kidwell).

All comments and other documents should be identified both on the outside of the envelope and on the document itself with the designation, "Proposed Rescission Order, A. E. Staley Manufacturing Company, Units 19 and 20." All written comments must be received no later than June 28, 1979, in order to receive consideration. In making its decision regarding the proposed rescission action, DOE will consider all relevant information submitted to it or otherwise available to it.

Any information considered to be confidential by the person furnishing it must be so identified at the time of submission in accordance with 10 CFR Part 1004. DOE reserves the right to determine the confidential status of the information and to treat it in accordance with that determination.

Questions regarding this proposed action should be directed to DOE as follows: Steven A. Frank, ESECA Programs Division, Department of Energy, Economic Regulatory Administration, Room 7202, 2000 M Street, NW., Washington, D.C. 20461 (telephone: (202) 254-6248). Written questions should be identified on the envelope and in the correspondence with the designation set out above.

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 *et seq.*) as amended by Pub. L. 95-70 and Pub. L. 95-620; Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*) as amended by Pub. L. 95-70 and Pub. L. 95-91; Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*); E.O. 11790 (39 FR 23185); E.O. 12009 (42 FR 46267))

Issued in Washington, D.C. June 8, 1979.

BILLING CODE 6450-01-M

Energy Supply and Environmental Coordination Act; Intention To Rescind a Prohibition Order

The Department of Energy (DOE)[1] hereby gives notice that, acting under the authority granted to it in Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended (15 U.S.C. 792(f)) and implemented by 10 CFR 303.130(b), it intends to rescind the Prohibition Orders issued on June 30, 1977, to the units named below. This action is taken in accordance with the provisions of 10 CFR Part 303, Subpart J ("Modification or Rescission of Prohibition Orders and Construction Orders") of the ESECA regulations.

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*)

Docket No.	Owner	Plant	Units	Location
OCU-1278	Kennecott Copper Corp.	Utah power plant	1, 2, 3, & 4	Salt Lake City, Utah

The Prohibition Orders, if made effective by the issuance of a Notice of Effectiveness (NOE), would have prohibited these units from burning natural gas or petroleum products as their primary energy source.

By letter of February 7, 1979, J. C. Larson, Special Project of the Utah Copper Division, reported to DOE that the affected units of the Utah Power Plant are burning coal as their primary energy source pursuant to the terms of the outstanding Prohibition Orders.

Based upon this information, DOE finds that the outstanding Prohibition Orders issued to Units 1, 2, 3, and 4 of the Utah Plant have attained their originally stated purpose of assisting the essential needs of the United States for fuels by the burning of coal in a manner consistent to the fullest extent practicable with existing commitments to protect and enhance the environment. In view of this accomplishment, DOE finds that further action toward making the outstanding Prohibition Orders effective would not be in the public interest and accordingly, rescission of the orders is now appropriate.

Comments on DOE's intention to rescind the Prohibition Orders are invited. Interested persons may submit written data, views or arguments with respect to the proposed action to the Office of Public Hearing Management, Room 2313, 2000 M Street, NW., Washington, D.C. 20461 (Attn: D. Kidwell). All comments and other documents should be identified both on the outside of the envelope and on the document itself with the designation, "Proposed Rescission of the Kennecott Copper Corporation, Units 1, 2, 3, and 4." All written comments must be received no later than June 28, 1979, in order to receive consideration. In making its decision regarding the

proposed rescission action, DOE will consider all relevant information submitted to it or otherwise available to it.

Any information considered to be confidential by the person furnishing it must be so identified at the time of submission in accordance with 10 CFR Part 1004. DOE reserves the right to determine the confidential status of the information and to treat it in accordance with that determination.

Questions regarding this proposed action should be directed to DOE as follows: Steven A. Frank, ESECA Programs Division, Department of Energy, Economic Regulatory Administration, Room 7202, 2000 M Street, NW., Washington, D.C. 20461 (telephone: (202) 254–6246). Written questions should be identified on the envelope and in the correspondence with the designation set out above.

BILLING CODE 6450-01-M

Energy Supply and Environment Coordination Act; Intention To Rescind a Prohibition Order

The Department of Energy (DOE) [1] hereby gives notice that, acting under the authority granted to it in Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended (15 U.S.C. 792(f)) and implemented by 10 CFR 303.130(b), it intends to rescind the Prohibition Order issued on June 30, 1977, to the unit named below. This action is taken in accordance with the provisions of 10 CFR Part 303, Subpart J ("Modification or Rescission of Prohibition Orders and Construction Orders") of the ESECA regulations.

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*).

Docket No.	Owner	Plant	Unit	Location
OCU-3066	Westvaco	Charleston plant	5	Charleston, S.C.

The Prohibition Order, if made effective by the issuance of a Notice of Effectiveness (NOE), would have prohibited this unit from burning natural gas or petroleum products as their primary energy source.

By letter of February 5, 1979, David L. Luke III, President of Westvaco, reported to DOE that Unit 5 of the Charleston Plant will soon be converted from the burning of oil to the burning of coal as its primary source pursuant to the term of the outstanding Prohibition Order.

Based upon this information, DOE finds that the outstanding Prohibition Order issued to Unit 5 of the Charleston Plant has attained its originally stated purpose of assisting the essential needs of the United States for fuels by causing the conversion of this unit from the buring of oil as a primary energy source to the burning of coal in a manner consistent to the fullest extent practicable with existing commitments to protect and enhance the environment. In view of this accomplishment, DOE finds that further action towards making the outstanding Prohibition Order effective would not be in the public interest and accordingly, rescission of the order is now appropriate.

Comments on DOE's intention to rescind the Prohibition Order are invited. Interested persons may submit written data, views or arguments with respect to the proposed action to the Office of Public Hearing Managment, Room 2313, 2000 M Street, NW., Washington, D.C. 20461 (Attn: D. Kidwell). All comments and other documents should be identified both on the outside of the envelope and on the document itself with the designation, "Proposed Rescission Order, Westvaco's Charleston Plant, Unit 5." All written comments must be received no later than June 28, 1979, in order to receive consideration. In making its decision regarding the proposed rescission action, DOE will consider all relevant information submitted to it or otherwise available to it.

Any information considered to be confidential by the person furnishing it must be so identified at the time of submission in accordance with 10 CFR 1004. DOE reserves the right to determine the confidential status of the information and to treat it in accordance with that determination.

Questions regarding this proposed action should be directed to DOE as follows: Steven A. Frank, ESECA Programs Division, Department of Energy, Economic Regulatory Administration, Room 7202, 2000 M Street, NW., Washington, D.C. 20461 (telephone: (202) 254–6246). Written questions should be identified on the enevelope and in the correspondence with the designation set out above.

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 *et seq.*) as amended by Pub. L. 95–70 and Pub. L. 95–620; Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*) as amended by Pub. L. 95–70 and Pub. L. 95–91; Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*); E.O. 11790 (39 FR 23185); E.O. 12009 (42 FR 46267))

Issued in Washington, D.C. June 8, 1979.

BILLING CODE 6450-01-M

Energy Supply and Environmental Coordination Act; Intention To Rescind a Prohibition Order

The Department of Energy (DOE) [1] hereby gives notice that, acting under the authority granted to it in Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended (15 U.S.C. 792(f)) and implemented by 10 CFR 303.130(b), it intends to rescind the Prohibition Orders issued on June 30, 1977, to the units named below. This action is taken in accordance with the provisions of 10

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*).

Docket No.	Owner	Plant	Units	Location
OCU-1512	E. I. du Pont de Nemours & Co.	Seaford plant	2 & 3	Seaford, Del.

The Prohibition Orders, if made effective by the issuance of a Notice of Effectiveness (NOE), would have prohibited these units from burning natural gas or petroleum products as their primary energy source.

By letter of February 9, 1979, Mark J. Caplan, of the Legal Department of E. I. du Pont de Nemours & Company, reported to DOE that Units 2 and 3 of the Seaford Plant are burning coal as their primary energy source pursuant to the terms of the outstanding Prohibition Orders.

Based upon this information DOE finds that the outstanding Prohibition Orders issued to Units 2 and 3 of the Seaford Plant have attained their originally stated purpose of assisting in meeting the essential needs of the United States for fuels by causing the burning of coal as a primary energy source in a manner consistent with existing commitments to protect and enhance the environment. In view of this accomplishment, DOE finds that further action towards making the outstanding Prohibition Orders effective would not be in the public interest and accordingly, rescission of the orders is now appropriate.

Comments on DOE's intention to rescind the Prohibition Orders are invited. Interested persons may submit written data, views or arguments with respect to the proposed action to the Office of Public Hearing Management, Room 2313, 2000 M Street, NW., Washington, D.C. 20461 (Attn: D. Kidwell). All comments and other documents should be identified both on the outside of the envelope and on the document itself with the designation, "Proposed Rescission Order, E. I. du Pont de Nemours and Company's Seaford Plant, Units 2 and 3." All written comments must be received no later than June 28, 1979, in order to receive consideration. In making its decision regarding the proposed rescission action, DOE will consider all relevant information submitted to it or otherwise available to it.

Any information considered to be confidential by the person furnishing it must be so identified at the time of submission in accordance with 10 CFR Part 1004. DOE reserves the right to determine the confidential status of the information and to treat it in accordance with that determination.

Questions regarding this proposed action should be directed to DOE as follows: Steven A. Frank, ESECA Division, Department of Energy, Economic Regulatory Administration, Room 7202, 2000 M Street, NW., Washington, D.C. 20461 (telephone: (202) 254-6246). Written questions should be identified on the envelope and in the correspondence with the designation set out above.

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 *et seq.*) as amended by Pub. L. 95-70 and Pub. L. 95-620; Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*) as amended by Pub. L. 95-70 and Pub. L. 95-91; Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*); E.O. 11790 (39 FR 23185); E.O. 12009 (42 FR 46267))

Issued in Washington, D.C., June 8, 1979.

BILLING CODE 6450-01-M

Energy Supply and Environmental Coordination Act; Intention To Rescind a Prohibition Order

The Department of Energy (DOE)[1] hereby gives notice that, acting under the authority granted to it in Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended (15 U.S.C. 792(f)) and implemented by 10 CFR 303.120(b), it intends to rescind the Prohibition Order issued on June 30, 1977, to the unit named below. This action is taken in accordance with the provisions of 10 CFR Part 303, Subpart J ("Modification or Rescission of Prohibition Orders and Construction Orders") of the ESECA regulations.

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*).

Docket No.	Owner	Plant	Unit	Location
OCU-1710	Union Carbide Corp.	Institute Plant	12	Institute, W. Va.

The Prohibition Order, if made effective by the issuance of a Notice of Effectiveness (NOE), would have prohibited these units from burning natural gas or petroleum products as their primary energy source.

By letter of February 7, 1979, A. Bruce Burns of the Union Carbide Corporation, reported to DOE that Unit 12 at the Institute Plant has been converted from the burning of coal as their primary energy source pursuant to the terms of the outstanding Prohibition Order.

Based upon this information, DOE finds that the outstanding Prohibition Order issued to Unit 12 of the Institute Plant has attained its originally stated purpose of assisting the essential needs of the United States for fuels by causing the conversion of this unit from the burning of oil as a primary energy source to the burning of coal in a manner consistent to the fullest extent practicable with existing commitments to protect and enhance the environment. In view of this accomplishment, DOE finds that further action towards making the outstanding Prohibition Order effective would not be in the public interest and accordingly, rescission of the orders is now appropriate.

Comments on DOE's intention to rescind the Prohibition Order are invited. Interested persons may submit written data, views or arguments with respect to the proposed action to the Office of Public Hearing Management, Room 2313, 2000 M Street NW., Washington, D.C. 20461 (Attn: D. Kidwell). All comments and other documents should be identified both on the outside of the envelope and on the document itself with the designation, "Proposed Rescission Order, Union Carbide Corporation's Institute Plant, Unit 12." All written comments must be received no later than June 28, 1979, in order to receive consideration. In making its decision regarding the proposed rescission action, DOE will consider all relevant information submitted to it or otherwise available to it.

Any information considered to be confidential by the person furnishing it must be so identified at the time of

submission in accordance with 10 CFR Part 1004. DOE reserves the right to determine the confidential status of the information and to treat it in accordance with that determination.

Questions regarding this proposed action should be directed to DOE as follows: Steven A. Frank, ESECA Division, Department of Energy, Economic Regulatory Administration, Room 7202, 2000 M Street NW., Washington, D.C. 20461 (telephone: (202) 254–6246). Written questions should be identified on the envelope and in the correspondence with the designation set out above.

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 *et seq.*) as amended by Pub. L. 95–70 and Pub. L. 95–620; Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*) as amended by Pub. L. 95–70 and Pub. L. 95–91; Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*); E.O. 11790 (39 FR 23185); E.O. 12009 (42 FR 46267))

Issued in Washington, D.C. June 8, 1979.

Golden Gate Petroleum; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice of a Proposed Remedial Order which was issued to the Golden Gate Petroleum, 465 California Street, San Francisco, California 98104.

This Proposed Remedial Order charges Golden Gate Petroleum with pricing violations in the amount of $965,727.00, connected with the resale of residual fuel oil during the time period November 1, 1973 through August 31, 1975, in the States of California, Nevada and Arizona.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from Jack L. Wood, District Manager of Enforcement, 111 Pine Street, San Francisco, CA 94111, phone 415/556–7200. On or before July 3, 1979, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, 2000 M Street NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193 of the DOE Regulations.

Issued in Washington, D.C., on the 8th day of June 1979.

Jack L. Wood,

District Manager of Enforcement, Western District, Economic Regulatory Administration.

Action Taken on Consent Orders

AGENCY: Economic Regulatory Administration.

ACTION: Notice of Action Taken on Consent Orders.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice that Consent Orders were entered into between the Office of Enforcement, ERA, and the firms listed below during the month of May 1979. These Consent Orders concern prices charged by retail motor gasoline dealers allegedly in excess of the maximum lawful selling price for motor gasoline. The purpose and effect of these Consent Orders is to bring the consenting firms into present compliance with the Mandatory Petroleum Allocation and Price Regulations and they do not address or limit any liability with respect to the consenting firms' prior compliance or possible violation of the aforementioned regulations. Pursuant to the Consent Orders, the consenting firms agree to the following actions:

1. Reduce prices for each grade of gasoline to no more than the maximum lawful selling price;

2. Post the maximum lawful selling price for each grade of gasoline on the face of each pump in numbers and letters not less than one-half inch in height; and

3. Properly maintain records required under the aforementioned regulations.

For further information regarding these Consent Orders, please contact Mr. Herbert M. Heitzer, District Manager of Enforcement, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, telephone number (215) 597–3870.

Action Taken on Consent Orders

AGENCY: Economic Regulatory Administration.

ACTION: Notice of Action Taken on Consent Orders.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice that Consent Orders were entered into between the Office of Enforcement, ERA, and the firms listed below during the month of May 1979. The Consent Orders represent resolutions of outstanding compliance investigations or proceedings by the DOE and the firms which involve a sum of less than $500,000 in the aggregate, excluding penalties and interest. For Consent Orders involving sums of $500,000 or

more. Notice will be separately published in the Federal Register. These Consent Orders are concerned exclusively with payment of the refunded amounts to injured parties for alleged overcharges made by the specified companies during the time periods indicated below through direct refunds or rollbacks of prices.

For further information regarding these Consent Orders, please contact Mr. Herbert M. Heitzer, District Manager of Enforcement, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, telephone number (215) 597–3870.

Firm name and address	Refund amount	Product	Period covered	Recipients of refund
Gladwin & Lane Inc., 224 Elm St., Westfield, Mass. 01085.	$45,000	No. 2 oil	Nov. 1, 1973 to Apr. 30, 1974.	Retail accounts.

Issued in Philadelphia on the 6th day of June 1979.

Herbert M. Heitzer,

District Manager of Enforcement.

BILLING CODE 6450-01-M

Issuance of Interim Remedial Orders for Immediate Compliance

The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice that Interim Remedial Orders for Immediate Compliance (IROICs) were issued by the Office of Enforcement, ERA, to the firms listed below during the month of May 1979. These IROICs concern prices charged by retail motor gasoline dealers in excess of the maximum lawful selling prices for motor gasoline. To prevent further irreparable harm to the public interest which might result if these firms continued to charge prices the lawfulness of which could not be justified, these IROICs were issued in accordance with 10 C.F.R. 205.199D and ordered the firms to come into compliance with legal requirements by taking the following actions:

1. Reduce prices for each grade of gasoline to no more than the maximum lawful selling price;

2. Post the maximum lawful selling price for each grade of gasoline on the face of each pump in numbers and letters not less than one-half inch in height; and

3. Properly maintain records required under the Mandatory Petroleum Allocation and Price Regulations, Title 10, Code of Federal Regulations.

In the alternative, these firms were ordered to come forth within five days with support for the lawfulness of the maximum lawful selling prices they otherwise contend are appropriate.

For further information regarding these IROICs, please contact Mr. Herbert M. Heitzer, District Manager of Enforcement, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, telephone number (215) 597–3870.

Issuance of Interim Remedial Orders for Immediate Compliance

The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice that Interim Remedial Orders for Immediate Compliance (IROICs) were issued by the Office of Enforcement, ERA, to the firms listed below during the month of May 1979. These IROICs concern the modifying of normal business practices so as to result in the violation of the provisions of the Mandatory Petroleum Allocation and Price Regulations, Title 10, Code of Federal Regulations. To prevent further irreparable harm to the public interest which might result if these firms continued their course of conduct, these IROIC's were issued in accordance with 10 CFR 205.199D and ordered the firms to come into compliance with legal requirements by taking the following actions:

1. Cease and desist from employing any form of discriminatory practices as set forth in 10 CFR 210.62(b); and

2. Conform its business practices to those practices followed by the firm during its base period.

In the alternative, these firms were ordered to come forth within five days with support for the lawfulness of the practices they otherwise contend are appropriate.

For further information regarding these IROICs, please contact Mr. Herbert M. Heitzer, District Manager of Enforcement, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, telephone number (215) 597–3870.

Federal Energy Regulatory Commission

[Docket No. CP78-256]

Algonquin LNG, Inc.; Informal Conference

June 8, 1979.

Take notice that an informal conference in the above-captioned causes will be held on June 28, 1979, at 10:00 a.m. in Hearing Room F at the Interstate Commerce Commission, 12th and Constitution Avenue N.W., Washington, D.C. 20004. All parties should be prepared to discuss the

technical aspects and possible settlement of the proposals. All persons are invited to attend, but advised that mere attendance and/or participation in this conference's discussions will not serve to make the same persons formally parties to these proceedings.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. ER79-405]

Arkansas Power & Light Co.; Filing

June 11, 1979.

The filing Company submits the following:

Take notice that on June 1, 1979, Middle South Services (Services), acting as agent for Arkansas Power & Light Company (AP&L), tendered for filing a letter Agreement dated January 29, 1979, between AP&L and Oklahoma Gas & Electric Company (OG&E) for transmission services through the System of AP&L of 150mW of capacity and associated energy from OG&E to Gulf States Utility Company (GSU).

AP&L requests an effective date of January 1, 1979, and therefore requests waiver of the Commission's notice requirements. AP&L further states that the rate for this transmission service has previously been approved in docket No. ER77-535 and that no additional facilities will be required.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before July 2, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. ER79-411]

Central Hudson Gas & Electric Corp.; Filing

June 11, 1979.

Take notice that Central Hudson Gas & Electric Company on June 1, 1979, tendered for filing Schedule A applicable to actual charges for 1978 to Consolidated Edison Company of New York pursuant to the Rock Tavern Substation Agreement dated December 29, 1972.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before July 3, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket No. ER79-399]

The Cleveland Electric Illuminating Co.; Filing of Changes in Rates and Charges

June 11, 1979.

The filing Company submits the following:

Take notice that The Cleveland Electric Illuminating Company (CEI on May 31, 1979, tendered for filing Revised Service Schedule B—Firm Power Service to its Rates Schedule FERC No. 12, containing revised rates and charges applicable to CEI's firm power service to the City of Cleveland, and Revised Sheet No. 6 to its FERC Electric Tariff, Original Volume No. 1, for transmission service, containing revised rates and charges applicable to customers under CEI's Tariff. CEI proposed to place the Revised Service Schedule B to its Rate Schedule FERC No. 12 and Revised Sheet No. 6 to its FERC Electric Tariff, Original Volume No. 1 into effect as of August 1, 1979. The revised rates and charges would increase revenues from sales under Service Schedule B to Rate Schedule FERC No. 12 by $3,194,000 based on calendar year 1979. CEI is unable to project revenues from its Tariff for transmission service.

CEI states that it expects to realize a rate of return from service under Service Schedule B of only 1.76 percent for calendar year 1979 under the presently effective Supplement No. 2 to Rate Schedule FERC No. 12. The proposed rates contained in Revised Service Schedule B to Rate Schedule FERC No. 12 have been designed to enable CEI to have the opportunity to earn a rate of return of 6.07 percent, whereas the proposed rates contained in Revised Sheet No. 6 to CEI's Electric Tariff Original Volume No. 1 would allow an opportunity of earning 5.99 percent.

CEI states that a copy of the appropriate portions of the filing has been served upon CEI's customers and the Public Utilities Commission of Ohio.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rule of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before July 2, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. ER79-413]

The Connecticut Light and Power Co.; Purchase Agreement

June 11, 1979.

The filing Company submits the following:

Take notice that on June 1, 1979, The Connecticut Light and Power Company (CL&P) tendered for filing a proposed Purchase Agreement with Respect to Various Gas Turbine Units dated March

20, 1979 between (1) CL&P and The Hartford Electric Light Company (HELCO), and (2) Central Vermont Public Service Corporation (CVPS).

CL&P states that the Purchase Agreement provides for a sale to CVPS of a specified percentage of capacity and energy from five gas turbine generating units during the period from April 1, 1979 to November 30, 1979, together with related transmission service.

CL&P requests that the Commission, pursuant to Section 35.11 of its regulations, permit the rate schedule filed to become effective on April 1, 1979.

CL&P states that the Capacity Charge for the proposed service was a negotiated rate. The monthly Transmission Charge is equal to one-twelfth of the annual average cost of transmission service on the Northeast Utilities (NU) system determined in accordance with Section 13.9 of the New England Power Pool (NEPOOL) Agreement and the uniform rules adopted by the NEPOOL Executive Committee. The monthly Transmission Charge is determined by the product of (i) the transmission charge rate ($KW/month), and (ii) the number of kilowatts of winter capability which CVPS is entitled to receive, reduced to give due recognition of the payments made by CVPS for transmission services on intervening systems. The Variable Maintenance charges were derived from historical costs and the Additional Maintenance Charge is twice the Variable Maintenance Charge.

HELCO has filed a certificate of concurrence in this docket.

CL&P states that copies of this rate schedule have been mailed or delivered to CL&P, Hartford, Connecticut, HELCO, Hartford, Connecticut, and CVPS, Rutland, Vermont.

CL&P further states that the filing is in accordance with Part 35 of the Commission's Regulations.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before July 3, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket No. ER79-400]

Duke Power Co.; Supplement to Electric Power Contract

June 11, 1979.

The filing Company submits the following:

Take notice that Duke Power Company (Duke Power) tendered for filing on June 1, 1979 a supplement to the Company's Electric Power Contract with the Town of Dallas. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FERC No. 254.

Duke Power further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for the following contract demand: Delivery Point No. 2 of 3,000 Kw.

Duke Power indicates that this supplement also includes an estimate of sales and revenue for twelve months immediately preceding and for the twelve months immediately succeeding the effective date. Duke Power proposes an effective date of August 20, 1979.

According to Duke Power copies of this filing were mailed to the Town of Dallas and the North Carolina Utilities Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before July 2, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP79-12]

El Paso Natural Gas Co.; Certification of Settlement Agreement

June 8, 1979.

Take notice that June 5, 1979, the Presiding Administrative Law Judge certified a stipulation and agreement which resolves all issues in this proceeding, except that of tax normalization, which has been set for hearing.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, and should serve the same on all parties to this proceeding. Comments are due by June 22, 1979. All comments will be considered by the Commission in determining the appropriate action to be taken. Copies of the agreement are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket No. ER79-407]

Empire District Electric Co.; Filing

June 11, 1979.

The filing Company submits the following:

Take notice that the Empire District Electric Company on June 1, 1979, tendered for filing proposed changes in its FERC Electric Service Tariff, Volume No. One. The proposed changes would increase revenues from present jurisdictional sales and service to the City of Monett, Missouri by $481,444 based on the 12-month period ending February 28, 1978.

The presently effective rates are based on contractual agreement made up to eleven years ago. Since that time Empire has experienced substantial increase in all elements of its cost, including fuel, labor, interest, taxes and construction to provide additional capacity and meet environmental requirements.

Copies of this filing were served upon the public utility's jurisdictional

customers and the Missouri Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol St., N.E., Washington, D.C. 20426, in accordance with Paragraph 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before July 2, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket No. ER79-416]

Florida Power & Light Co.; Amendment to Agreement To Provide Specified Transmission Service

June 8, 1979.

The filing Company submits the following:

Take notice that Florida Power & Light Company (FPL) on June 4, 1979, tendered for filing an amendment to an agreement executed only by it, entitled "Amendment Number Three To Agreement To Provide Specified Transmission Service Between Florida Power & Light Company and City of Homestead." Under the Amendment, FPL is modifying certain terms and conditions not affecting rates concerning the transmission of power and energy by FPL for the City of Homestead (City) as is required by the City in the implementation of its interchange agreements with other utility systems in Florida.

FPL requests an effective date for this Agreement if no later than 60 days after the date of filing. FPL states that a copy of the filing was served on the Utilities Director of the City of Homestead, Florida.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 29, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket No. RP79-75]

Gas Research Institute; Annual Application

June 8, 1979.

Take notice that on June 4, 1979, Gas Research Institute (GRI) filed its third annual application, including its updated five-year R&D plan, requesting advance approval of its 1980-1984 Five-Year R&D Plan and, specifically, of its 1980 R&D Program and the funding thereof, pursuant to the Natural Gas Act and the Commission's Regulations thereunder, particularly 18 CFR 154.38(d)(5).

The first GRI application, dealing with GRI's First Five-Year R&D Plan and initial R&D Program was filed on March 11, 1977, and approved by the Commission in Opinion No. 11, *Opinion and Order Approving the Initial Research, Development and Demonstration Program of Gas Research Institute,* Docket No. RM77-14, issued March 22, 1978. In Opinion No. 11, the Commission found GRI to be a "RD&D organization" within the meaning of Section 154.38(d)(5) of the Commission's Regulations. The Commission approved GRI's initial application with the understanding that GRI will review, annually, and update its five-year plan and funding requirements for presentation to the Commission together with annual applications for advance approval pursuant to the Commission's Regulations.

The second GRI application, dealing with GRI's 1979-1983 Five-Year R&D Plan and 1979 R&D Program, was filed on June 30, 1978 and approved by the Commission in Opinion No. 30, *Opinion and Order Approving The Gas Research Institute's 1979 Research and Development Program,* Docket No. RP78-76, issued September 21, 1978.

The Commission's Regulations state that the principal tests for the adequacy of the proposed application shall be the following guidelines:

1. Evidence that GRI's RD&D objectives have been clearly established.

2. Evidence that the plan evolves from these RD&D objectives and adequately utilizes the viewpoints of scientific, engineering, industry, economic, consumers and environmental interests.

3. Evidence that an effective mechanism exists and is used for coordinating this research and development plan with other relevant efforts of national scope.

4. Evidence that the program and plan are well conceived and have a reasonable chance of benefiting the ratepayer in a reasonable period of time, having due regard to the basic, exploratory or applied nature of each submitted RD&D project.

5. Evidence that whatever achievements may result, including the knowledge gained or technology developed from the RD&D effort, if any, will accrue to the benefit of the sponsoring jurisdictional companies and their customers.

GRI states that its third application follows the principles considered by the Commission in Opinion Nos. 11 and 30 and *Order No. 566, Order Prescribing Changes in Accounting and Rate Treatment for Research, Development and Demonstration Expenditures,* Docket No. RM78-17, issued June 3, 1977. In its third application GRI seeks advance approval for its 1980 R&D Program which proposes that $54,745,000 be collected during the twelve (12) months ending December 31, 1980 to support R&D activities in five technical areas, i.e., Supply, Economics and Systems Analysis, Environment and Safety, Efficient Utilization and Basic Research and to cover the cost of Planning and Administration. Applicant states that its application was filed in accordance with the provisions of Order No. 566 which requires "RD&D organizations" to submit, annually, a five-year program plan at least 180 days prior to the commencement of the five-year program plan, which is scheduled to commence on January 1, 1980.

GRI states that the proposed unit cost of GRI's 1980 R&D Program is 5.0 mills per Mcf or equivalent to become effective January 1, 1980. This General R&D Funding Unit is proposed to be applied to the services included in GRI's Program Funding Services in 1980 which include jurisdictional, direct sale and intrastate volumes of GRI's members and which are estimated to be 10,854 Bcf.

GRI's filing was accompanied by workpapers providing detail about its application. These workpapers are available for inspection in the Commission's Office of Public Information.

The Appendix to GRI's application contains a list of GRI members and state regulatory commissions which were

served with a copy of GRI's application on June 4, 1979. Such members and commissions are hereby permitted to participate in this proceeding as intervenors and need *not* file formal petitions to intervene or notices of intervention.

Any other person desiring to be heard or to make any protest with reference to said application should, on or before June 25, 1979, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, a comment, protest, or petition to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure and the Regulations under the Natural Gas Act (18 CFR 1.8, 1.10). All comments or protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein, other than those listed in the Appendix who are automatically entitled to participate, must file a petition to intervene in accordance with the Commission's Rules.

Additionally, take notice that a Commission staff report on GRI's filing will be served on all parties and filed with the Commission as a public document on July 23, 1979. Also, in accordance with a working agreement between the FERC and the Under Secretary of Energy, Department of Energy (DOE), the Energy Research Advisory Board (ERAB) of DOE will provide FERC with an advisory review of the GRI's application. The FERC has requested that ERAB comment on the following: (1) GRI management of its R&D program; (2) Coordination of GRI program with DOE and other gas R&D efforts; (3) The substance and adequacy of GRI's R&D program. The ERAB's report will be filed with the Secretary of Energy, who upon approval, will transmit the report to FERC. The report will be filed with FERC and accompany the staff report. We shall further provide for the filing of additional comments by all parties concurrently with Staff's and ERAB's report on July 23, 1979. Comments on Staff's and ERAB's report by all parties except GRI shall be filed August 13, 1979. Reply comments by GRI shall be filed on August 27, 1979.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. ER79-404]

Idaho Power Co.; Filing

June 11, 1979.

The filing Company submits the following:

Take notice that on June 1, 1979, the Idaho Power Company tendered for filing summary of sales made under the company's 1st Revised FERC Electric Tariff, Volume No. 1 (Supersedes Original Volume No. 1) during April, 1979, along with cost justification for the rate charged.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before July 2, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. ER79-402]

Illinois Power Co.; Filing

June 11, 1979.

Take notice that Illinois Power Company on May 31, 1979 tendered for filing Modification No. 1 dated May 3, 1979 to the Interconnection Agreement dated January 14, 1975 with the City of Springfield, Illinois. Illinois Power indicate that Modification No. 1 revises the reservation charges for Short Term Firm Power, Short Term Non-Firm Power and Maintenance Power and revises the energy charge for Emergency Energy.

Illinois Power requests waiver of the Commission's notice requirements to allow for an effective date of June 1, 1979.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before July 2, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket No. ER79-403]

Illinois Power Co.; Filing Amendment No. 5

June 11, 1979.

The filing Company submits the following:

Take notice that on June 1, 1979, Illinois Power Company ("Illinois Power") tendered for filing proposed Amendment No. 5, dated May 1, 1979, to the Interchange Agreement, dated March 15, 1973, between Iowa-Illinois Gas and Electric Company ("Iowa-Illinois") and Illinois Power Company.

Illinois Power indicates that this filing is made for an increase for Short-Term Firm Capacity and Short-Term Non-Firm Power reservation charges.

Ilinois Power states that a copy of the filing was served upon Iowa-Illinois, the Illinois Commerce Commission, and the Iowa State Commerce Commission.

Any person desiring to be heard or to protest said filing should file comments or protests with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with Sections 1.8 or 1.10) of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such comments or protests should be filed on or before July 2, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket No. GP 79-19]

Montana-Dakota Utilities Co.; Protest and Petition for Relief

June 4, 1979.

Take notice that on May 16, 1979, Holly Sugar Corporation (Holly), P.O. Box 1052, Colorado Springs, Colorado 80901, filed in Docket No. GP 79-19 a protest of the actions of Montana Dakota Utilities Co. (MDU) and petition for relief pursuant to §§ 1.6 and 1.7 of the Commission's Rules of Practice and Procedure (18 CFR 1.6 and 1.7) and § 281.110 of the Interim Curtailment Rule issued pursuant to the Natural Gas Policy Act of 1978 (NGPA), all as more fully set forth in the protest and petition which are on file with the Commission and open to public inspection.

Holly is a manufacturer of sugar, operating several plants at which sugar is processed from sugarbeets, among them one situated near the Town of Worland, Washakie County, Wyoming, and one near Sidney, Richland County, Montana. Holly states that MDU has furnished natural gas at the Sidney and Worland plants under negotiated industrial interruptible contracts and that until 1978, it used natural gas at said plants as its sole energy source except for negligible quantities of oil, the required stand-by fuel, during peak load interruptions.

In 1978 MDU instituted an allocation plan (the Plan) and Holly alleges that at MDU's instance, several of MDU's major customers, including Holly, entered into a stipulation and agreement, approving the Plan, by the terms of which an order of priority was established and customers with lowest priority (4) agreed to a program the effect of which would be to reduce their annual consumption each year thereafter by 20 percent cumulatively. Standard contracts thereafter were offered such customers on a fiscal year July 1–June 30 basis. By agreement, dated June 1, 1978, for the term July 1, 1978–June 30, 1979, Holly states that it was restricted to 40 percent of its base year (1976) consumption of priority 4 usage as defined in the Plan. The plan is pending before the Commission.

Holly asserts that in comments filed April 2, 1979, pursuant to a conference in Docket No. RP76-91 to consider the effect of the NGPA upon current curtailment plans, MDU stated:

"Since the volumetric limitations under the present contracts serve as a cap through June 30, 1979, MDU believes it is in harmony with the intent of the Commission's interim rule to maintain the same "cap" for the remaining four months during which the Interim Curtailment Rule is to be in effect—i.e., July 1, 1979 through October 31, 1979.

Consequently, new contracts embracing the period July 1, 1979 through October 31, 1979 will establish volumetric limitations at the present level, which is 40 percent of requirements, that is during that four-month period, the contract volume will be 4/12 of 40 percent of Base Period Requirements.

Holly states that reflecting such intention, MDU wrote Holly on April 30, 1979, as follows:

Section 2.2(a) of our FERC Gas Tariff, First Revised Volume No. 1, requires that Montana-Dakota Utilities Co. shall notify all customers whose base period requirements cannot be completely met, of the percent of service which such customer will receive during the following Supply Year. In compliance with that requirement, we wish to advise you that for the Supply Year 1979–80 (beginning July 1, 1979, and ending June 30, 1980), the curtailment rate will be eighty percent (80%) of your Priority 4 Base Period Requirements as contained in the tariff. You will, therefore, be allotted twenty percent (20%) of the Priority 4 base period requirement volume plus one hundred percent (100%) of the Priority 2 base period requirement for the 1979–80 Supply Year.

A new contract covering the 1979–80 Supply Year, setting forth the new volumes allotted to your plant, will be prepared and submitted to you in the near future. The new contract will incorporate the effect of exemptions or special conditions legally imposed by regulatory bodies, if any, which may affect the volumes applicable to your plant.

Holly alleges that, as an agricultural producer, it is entitled to priority 2 treatment under the U.S. Department of Agriculture's Interim Rule issued pursuant to Section 401 of the NGPA, but that, in reaching a contrary conclusion on April 2, 1979, that its present contract represents a "cap," MDU reasoned as follows:

Section 281.107(c)(1) provides that MDU's supply obligation is:

"• • • the *lesser* of:

"(i) the volume certified by the Secretary of Agriculture as essential agricultural volumetric requirements and calculated under 7 CFR § 2900.4"; or

"(ii) the volume which may be delivered by the interstate pipeline to the direct sale customer without causing the interstate pipeline to exceed any volumetric limitations set out in the contract between the interstate pipeline and such direct sale customer (without regard to any contract provision which would otherwise restrict delivery because of supply or capacity shortage of the interstate pipeline)."

Again, it is clear that the volumetric requirements calculated under Agriculture's rule exceed the volumetric limitations under the present contracts (*i.e.*, 40 percent of Base Period Requirements). Hence, under the Commission's rule, the volumetric limitations set forth in the contracts are a "cap" on MDU's supply obligation to essential agricultural use establishments. Accordingly, there is no authority for or requirement under the Commission's rule that "adjustments" exceed such limitation.

Holly contends that the problem with the above reasoning is that § 281.107(c)(1) refers only to "*the* contract" (emphasis added) and that *the* contract between it and MDU expires June 30, 1979. Holly maintains that after that, there is no reason for denying it the right to seek priority 2 volumetric entitlement unless Holly has subjected itself to some further contractual limitation by MDU in the meantime, which Holly states, it has not and will not do. Holly asserts that without executing such a contract, it may get no gas and that either it must abandon its rights to full entitlement under Section 401 of the NGPA by signing a new restrictive agreement for the coming season with a 20 percent "cap" or it must abandon its rights to service altogether.

Holly protests MDU's action in offering it, as of July 1, 1979, either a contract restricting it to 20 percent of its priority 4 usage or nothing at all, as either (or both) a misconstruction of the Interim Rules or an abandonment of its facilities servicing Holly without requisite approval of the Commission as mandated by Section 7(b) of the Natural Gas Act.

Holly prays that the Commission issue a declaratory order clarifying the following issues:

(1) regarding the aforementioned reference to "the contract," in the Interim Rule, whether such reference refers to unsigned future as well as currently effective contracts between supplier and customer or to currently effective curtailment plans regardless of the existence of individual contracts between supplier and customer;

(2) whether MDU's Plan, aforementioned, is a currently effective curtailment plan;

(3) whether MDU's Plan aforementioned, represents "the contract" referred to in the Interim Rule;

(4) whether MDU's action in offering Holly only a contract as of July 1, 1979 containing volumetric limitations in accordance with the Plan represents an abandonment under Section 7(b) of the Natural Gas Act; and

(5) whether MDU is authorized by Section 401 of the NGPA and the Interim Rule to offer Holly a new contract allowing it only 20 percent of its base period entitlement or whether MDU should offer Holly a contract containing the full volumetric limits to which it would have been entitled had the Plan not been instituted.

Based on the Commission's clarification of the foregoing, Holly prays that the Commission issue its order to MDU, requiring MDU to offer Holly, as of July 1, 1979, contracts at both its Worland and Sidney plants with volumetric limits of natural gas no less than its full base year entitlement.

Any person desiring to be heard or to make any protest with reference to said petition should on or before June 15, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-18781 Filed 6-15-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. GP79-21]

Montana-Dakota Utilities Co.; Petition for Declaratory Order

June 4, 1979.

Take notice that on May 16, 1979, The Great Western Sugar Company (Great Western), 1530 16th Street, Denver, Colorado 80217, filed in Docket No. GP79-21 a petition pursuant to Section 1.7(c) of the Commission's Rules of Practice and Procedure (18 CFR 1.7(c)) for a declaratory order with regard to the interpretation by Montana-Dakota Utilities Co. (MDU) of § 281.107(c)(1)(ii) of the Commission's Interim Curtailment Rule issued pursuant to the Natural Gas Policy Act of 1978 (NGPA) and stating that a pipeline's supply obligation to a direct essential agricultural user under § 281.107(c)(1)(ii) is determined by the full contractual volumes without regard to any limitation thereon resulting from curtailment, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Great Western owns and operates two factories, one located in Billings, Montana, and the other in Lovell, Wyoming, which use natural gas furnished by MDU in connection with the processing of sugar beets into refined sugar and dried beet pulp for use as a livestock feed. As such, Great Western asserts, it qualifies as an essential agricultural user or natural gas under the regulations issued by the Secretary of Agriculture pursuant to the authority delegated under Section 401 of the NGPA.

Great Western states that MDU has filed tariff sheets as part of its FERC Gas Tariff to provide on an interim basis a plan for the delivery of natural gas for essential agricultural and high priority uses in accordance with Section 401 of the NGPA and that § 281.107(c)(1) as incorporated into MDU's tariff provides as follows:

(c) *Essential agricultural supply obligation.*

(1) *Direct essential agricultural supply obligation.*

The direct essential agricultural supply obligation of an interstate pipeline for a particular curtailment period with respect to an essential agricultural user which is a direct sale customer of the interstate pipeline is the lesser of:

(i) the volume certified by the Secretary of Agriculture as essential agricultural volumetric requirements and calculated under 7 CFR § 2900.4; or

(ii) the volume which may be delivered by the interstate pipeline to the direct sale customer without causing the interstate pipeline to exceed any volumetric limitations set out in the contract between the interstate pipeline and such direct sale customer (without regard to any contract provision which would otherwise restrict delivery because of supply or capacity shortage of the interstate pipeline).

Great Western asserts that in comments on the impact of NGPA submitted in Docket No. RP76-91, MDU noted that one of the Commission criteria for determining the volumetric entitlement of large direct essential agricutural users was the volumes certified by the Secretary of Agriculture and that MDU observed that under the Secretary's rule

> * * * the volumetric requirements certified are the *higher* of (1) the highest volume of gas actually used during the most recent three years (corrected to include amounts of process (fn. omitted) and feedstock gas not used because of curtailment or plant shutdown) or (2) the maximum volume the customer would be entitled to purchase under MDU's curtailment plan *in effect on February 28, 1979.* Because the large volume * * * customers had, during the past three years, contracts representing various reduced levels of service (*i.e.*, below full 'Base Period Requirements' as set forth in the Tariff), it is apparent that the actual volumes of gas used (corrected for feedstock and process gas not used because of curtailment) will produce the higher calculation of requirements under Agriculture's rule, *i.e.*, the requirements calculated under (1) will exceed the volumetric limitations specified in the contracts in effect February 28, 1979." (Emphasis in original) (App., p. 5)

Great Western then indicates that further quoting the provision of Section 281.107(c)(1)(ii) set out *supra*, p. 2, MDU then went on to state (App., p.6):

* * * it is clear that the volumetric requirements calculated under Agriculture's rule exceed the volumetric limitations under the present contracts (*i.e.*, 40 percent of Base Period Requirements). Hence, under the Commission's rule, the volumetric limitations set forth in the contracts are a "cap" on MDU's supply obligation to essential agricultural use establishments. Accordingly, there is no authority for or requirement under the Commission's rule that "adjustments" exceed such limitation.

Since the volumetric limitations under the present contracts serve as a cap through June 30, 1979, MDU believes it is in harmony with the intent of the Commission's interim rule to maintain the same "cap" for the remaining four months during which the Interim Curtailment Rule is to be in effect—*i.e.*, July 1, 1979 through October 31, 1979.

Consequently, new contracts embracing the period July 1, 1979 through October 31, 1979 will establish volumetric limitations at the present level, which is 40 percent of requirements, that is during that four-month period the contract volume will be ⅓ of 40 percent of Base Period Regulations.[1]

Great Western submits that MDU's interpretation of Section 281.107(c)(1)(ii) as imposing a "cap" limiting its obligations to essential agricultural users to 40 percent of base period requirements grossly misconstrues the force and thrust of that provision. Great Western further submits that there is no basis for MDU's position that the volumetric limitations of 40 percent of base period requirements contained in its present contracts would continue in effect for the four months remaining after June 1979 that the Commission's Interim Rule is to be effective; to the contrary, Great Western alleges, the present contracts expire June 30, 1979, and new contracts are required for the post-June 30 period. Similarly unjustified, Great Western contends, is MDU's asserted belief that maintenance of the same "cap" for the post-June 30 period would be "in harmony with the intent of the Interim Rule," since there is nothing in the Interim Rule suggesting a Commission purpose that the same volumetric limitation levels be maintained from period to period within the time frame covered by the Rule. In any case, Great Western contends, assuming *arguendo* that, as MDU urges, the Commission intends the post-June 30 period to be treated the same as the prior period, MDU's conclusion that the 40 percent base period requirement operates as a volumetric limitation upon its obligations to direct essential agricultural users such as Great Western is belied by the parenthetical phrase in § 281.107(c)(1)(ii) "without regard to any other provision which would otherwise restrict delivery because of supply or capacity shortage of the interstate pipeline."

Great Western states that in line with certain curtailment provisions in MDU's tariff, the contracts which MDU's customers enter into with MDU annually expressly provide the level of curtailment which MDU determines for the oncoming year beginning July 1, and, thus, MDU's annual contracts with Great Western not only make clear that they were being entered into in a curtailment context, but the total volumes specifically provided were patently a predetermined percentage of Great Western's agreed-upon base period requirements. Great Western submits that since the 40 percent of base period requirements provided in MDU's contracts with its category 4 customers is an integral part of MDU's curtailment plan purported based on the gas supply shortage on the MDU system, it is clear that under the parenthetical phrase in § 281.107(c)(1)(ii) the 40 percent limitation is to be disregarded in determining volumetric limitations for the purpose of that Section.

Accordingly, Great Western petitions the Commission to issue an order declaring that a pipeline supply obligation to a direct essential agricultural user under Section 281.107(c)(1)(ii) is determined by the full contractual volumes without regard to any limitation thereon resulting from curtailment.

Any person desiring to be heard or to make any protest with reference to said petition should on or before June 15, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-18782 Filed 6-15-79; 8:45 am]

BILLING CODE 6450-01-M

[1] The 40 percent calculation applies only to the Base Period Requirements in the category being curtailed, namely, Priority 4.

[Docket No. ER79-415]

Montana Power Co.; Filing

June 8, 1979.

The filing Company submits the following: Take notice that on June 4, 1979, The Montana Power Company (Company) tendered for filing Supplement No. 2, dated May 8, 1979, to the Agreement For Purchase of Power between the Company and Big Horn County Electric Cooperative, Inc. (Rate Schedule FERC No. 40).

The Company states that Supplement No. 2 to the Agreement for Purchase of Power incorporates the Company's Rate Schedules REC-78 and REC-79, which were previously filed with the Commission in *The Montana Power Company*, Docket No. ER78-515. Supplement No. 2 also modifies the contract demand and indemnity provisions of the Agreement for Purchase of Power. The Company has proposed to make Supplement No. 2 to the Agreement for Purchase of Power effective on August 3, 1979.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 29, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

The applications for determination in these proceedings together with a copy or description of other materials in the record in which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of those final determinations may, in accordance with 18 CFR 275. 203 and 18 CFR 275. 204, file a protest with the Commission on or before July 3, 1979. Please reference the FERC Control Number in any correspondence concerning a determination.

Kenneth F. Plumb,
Secretary.

[FR Doc. 79-18804 Filed 6-15-79; 8:45 am]
BILLING CODE 6450-01-M

[Docket No. E-9161]

Nantahala Power and Light Co.; Order Determining Fuel Clause Revenues for Purposes of Compliance, Ordering Refunds, and Terminating Proceeding

Issued June 8, 1979.

In a series of orders previously issued in this docket by the Federal Power Commission (FPC) and this Commission,[1] Nantahala's proposed purchased power adjustment clause was rejected. However Nantahala was permitted to retain out of the purchased power clause revenues the amounts to which it would have been entitled under a fuel cost adjustment clause conforming to the Commission's applicable regulations (18 CFR 35.14) set forth in Order No. 517. Nantahala claimed that of a total of $34,270 collected under the purchased power clause in this docket, it was entitled to retain $32,936 as representing the amount it allegedly would have recovered under a conforming fuel clause. Nantahala was required to document its claimed fuel clause revenue entitlement.

On August 21, 1978, Nantahala submitted calculations purportedly documenting its claim to the $32,936. On August 31, 1978, the town of Highlands, North Carolina, one of Nantahala's wholesale customers and an intervenor, filed a protest to Nantahala's proposed documentation alleging that the amount claimed by Nantahala was excessive and unjustified under the Commission's fuel clause regulations. Highlands' protest was joined by Nantahala's cooperative customers who are also intervenors in the proceeding. On September 29, 1978, Nantahala responded to the intervenors' objections. It acknowledged the merit of certain of Highlands' objections and submitted revised calculations resulting in a substantial reduction in its claim from $32,936 to $12,646. On October 27, 1978, Highlands filed a protest to Nantahala's recalculation, claiming that the company still had not complied with the Commission's fuel clause regulations. Highlands requested the Commission to consider reopening the proceeding to determine whether Nantahala should be required to refund all amounts collected under the purchased power adjustment clause. In the event the Commission were unwilling to do so, Highlands requested that Nantahala be required to refund all amounts collected in excess of the $12,646 claimed by Nantahala in its revised compliance filing.

On October 30, 1978, the Commission staff submitted comments in response to Nantahala's revised documentation. The staff provided detailed calculations showing that under the Commission's regulations Nantahala was entitled to a maximum of only $9,663. The staff requests the Commission to order

[1] Orders issued February 7, 1977; March 20 1978; and July 20, 1978.

refunds of all amounts collected by Nantahala in excess of $9,663 and to terminate the proceeding. On November 13, 1978, Highlands responded to the staff's comments. Highlands alleges that the staff's calculations do not precisely meet the requirements of the fuel clause regulations, but that refund of the amounts determined by the staff would be preferable to continued litigation of this cause.

Upon review, the Commission finds that the staff's calculations provide a reasonable and proper basis for determining Nantahala's refund obligation in this docket. The Commission further finds that the staff's calculations conform to the fuel clause regulations as nearly as may reasonably be required within the limits of available data, including the billing data relating to Nantahala's power purchases from TVA, and that such calculations provide a fair, reasonable, and accurate measure of the fuel costs associated with Nantahala's TVA purchases. Therefore in accordance with the staff's recommendation, Nantahala's refunds shall be established by reference to the calculated fuel clause revenue figure of $9,663.

The Commission orders: (A) On or before July, 3, 1979, Nantahala shall refund to its wholesale customers all amounts collected in this docket under its purchased power adjustment clause in excess of $9,663, together with interest at the rate of 9 percent per annum. Within 10 days thereafter, Nantahala shall submit a statement showing the calculation of refunds and interest paid.

(B) Upon compliance by Nantahala with ordering paragraph (A) above, this proceeding shall be terminated.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. ER79-398]

Northern Indiana Public Service Co., Notice of Tariff Change and Supplements to Service Agreements

June 8, 1979.

The filing company submits the following: Take notice that on May 21, 1979, Northern Indiana Public Service Company (NIPSCo) tendered for filing First Revised Sheet No. 3 to its FERC Electric Service Tariff—Third Revised Volume No. 1 which has been revised to include an additional delivery point for Kosciusko County Rural Electric Membership Corporation—Webster South. Northern Indiana Public Service Company also tendered for filing the following:

Exhibit B-12, a supplement to the Service Agreement between NIPSCo and Kosciusko County Rural Electric Membership Corporation, which covers the supply of electric energy for resale at a delivery point located in Tippecanoe Township, Kosciusko County, Indiana.

Copies of this filing were served upon all customers receiving electric service under NIPSCo's FERC Electric Service Tariff—Third Revised Volume No. 1 and the Public Service Commission of Indiana.

Any person desiring to be heard or to protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 25, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of those final determinations may, in accordance with

18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before July 3, 1979. Please reference the FERC Control Number in any correspondence concerning a determination.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. ER79-410]

Puget Sound Power & Light Co.; Filing

June 11, 1979.

Take notice that Puget Sound Power & Light Company on June 1, 1979 tendered for filing First Revised Exhibits A and B Superseding Original Exhibits A and B. Puget Sound indicates that these Revised Exhibits represent cost support data to reflect increases in the actual costs of the Company's coal-fired generating resources.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure [18 CFR 1.8, 1.10]. All such petitions or protests should be filed on or before July 3, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. ER78-514]

Superior Water, Light & Power Co.; Motion To Withdraw Application

June 11, 1979.

Take notice that Superior Water, Light and Power Company (Superior) on March 15, 1979 tendered for filing a motion to withdraw its application for a rate increase.

On July 28, 1978 Superior tendered for filing a proposed revised Rate Schedule W-7 to the applicable to Dahlberg Light and Power Company. By order dated August 31, 1978 the Commission suspended the effectiveness of Superior's revised Rate Schedule W-7 until December 7, 1978, after which it became effective subject to refund; the Commission ordered that a hearing be held with respect to the proposed rates.

Superior indicates that it no longer wants to pursue its proposed rate increase through the hearing process and would like to withdraw its application. Superior states that upon Commission approval of this motion Superior would refund to Dahlberg the excess revenues collected since December 7, 1978 under the proposed Rate Schedule W-7, together with interest at 9% per annum, and would reinstate Rate Schedule W-6.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before July 2, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[Docket No. ER79-412]

Union Electric Co.; Revised Service Schedule

June 11, 1979.

The filing Company submits the following:

Take notice that on May 24, 1979 Union Electric Company (Union) tendered for filing Second Amendment and Third Revised Schedule II to the Interchange Agreement dated April 11, 1967 between Union and Missouri Public Service Company.

Union indicates that said agreements provide for revisions in certain rates under said Interchange Agreement.

Union requests an effective date of August 1, 1979 for the Amendment and revised Schedule.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before July 3, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. GP 79-28; API No. 03-071-10126]

U.S. Geological Survey (Mid-Continent Area) Section 108 NGPA Determination Regarding Federal 31 No. 1-12 Well; Preliminary Finding

Issued June 7, 1979.

On April 26, 1979, the Oil and Gas Supervisor for the Mid-Continent Area of the U.S. Geological Survey submitted to the Federal Energy Regulatory Commission (Commission) a notice of determination that the Federal 31 No. 1-12 Well met all the requirements of a stripper well under section 108 of the Natural Gas Policy Act of 1978 (NGPA) and Commission regulations implementing that section. The Commission published notice of the determination on May 7, 1979.

Section 108 of the NGPA provides that the rate of natural gas production from a stripper well shall not exceed an average of 60 Mcf per production day. Section 271.804(a) of the Commission's regulations stipulates that for purposes of determining the rate of production from a well for which a stripper well determination is sought, the total volume of natural gas produced from the well shall constitute its daily production, regardless of whether the well is completed in more than one interval.

The well completion report submitted with this determination indicates that the well is a dual completion. However, the production records submitted are applicable to production from only one of the producing levels. Accordingly, the materials accompanying the determination fail to provide figures reflecting the total volume of gas produced from the well.

On the basis of our review submitted with this determination, the Commission hereby makes a preliminary finding, pursuant to 18 CFR 275.202(a)(1)(i), that the determination submitted by the Oil and Gas Supervisor, Mid-Continent Area, U.S. Geological Survey, that the Federal 31 No. 1-12 Well qualifies as a section 108 stripper well, is not supported by substantial evidence in the record on which the determination was made.

By direction of the Commission.

Kenneth F. Plumb,
Secretary.

[Docket No. ER79-401]

Virginia Electric Power Co.; Filing

June 11, 1979.

Take notice that the Virginia Electric and Power Company (VEPCO), on June 1, 1979 tendered for filing a request for a new delivery point for the Prince George Electric Cooperative designated Bacons Castle Delivery Point. VEPCO requests an effective date of May 4, 1979 and therefore requests waiver of the Commission's notice requirement.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with § 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before July 2, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket No. ER79-409]

Washington Water Power Co.; Filing

June 8, 1979.

The filing Company submits the following:

Take notice that on June 1, 1979, The Washington Water Power Company (Washington) tendered for filing copies of Letter Agreements between Washington and San Diego Gas & Electric Company, Pacific Gas and Electric Company and Southern California Edison Company. Washington states that these Letter Agreements apply to the delivery of energy from Washington that is surplus to its immediate needs.

Washington further states that a portion of the energy delivered could be returned to Washington, at its request, prior to December 31, 1979. Washington indicates that the rate at which the energy is purchased will be the rate set forth in Washington's rate schedule FPC No. 88 (Wholesale Nonfirm Energy For Export), the applicable price under said rate schedule to be agreed upon before such energy is scheduled.

Washington proposes an effective date of March 1, 1979, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 29, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to

intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

FEDERAL COMMUNICATIONS COMMISSION

FM and TV Translator Applications Ready and Available for Processing

Adopted: June 11, 1979.

Released: June 12, 1979.

By the Chief, Broadcast Facilities Division.

Notice is hereby given pursuant to §§ 1.572(c) and 1.573(d) of the Commission's Rules, that on July 27, 1979, the TV and FM translator applications listed in the attached Appendix below will be considered ready and available for processing. Pursuant to §§ 1.227(b)(1) and 1.591(b) of the rules, an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on July 26, 1979, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and submitted for filing at the offices of the Commission in Washington, D.C., by the close of business on July 26, 1979.

Any party in interest desiring to file pleadings concerning any pending TV FM translator application, pursuant to Section 309(d)(1) of the Communications Act of 1934, as amended, is directed to § 1.580(i) of the rules, which specifies the time for filing and other requirements relating to such pleadings.

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

[FCC 79-332]

Commission Orders Return to Substantial Compliance Standard in Evaluating Ascertainment Showings

June 18, 1979.

The Commission has modified the standard that will be applied in evaluating ascertainment surveys of community problems, needs and interests made in conjunction with the filing of applications for new AM, FM, and TV stations. The modification was made in conjunction with the Report and Order in *Revised Procedures for the Processing of Contested Broadcast Applications*, General Docket No. 79-137, FCC 79-331, adopted on June 1, 1979.

In 1971, the Commission adopted the *Primer on Ascertainment of Community Problems by Broadcast Applicants*, 27 FCC 2d 650 (1971), as a "statement intended to clarify and provide guidelines as to Commission policies and requirements." 27 FCC 2d at 651. The Commission said that it was striving for "a degree of flexibility" and that "[g]uidelines that are too specific may result in too rigid an approach." *Id.* In subsequent adjudications, the Commission articulated a policy of "substantial compliance" with the Primer guidelines. *E.g., Greenfield Broadcasting Corp.*, 30 FCC 2d 774 (1971); *The Evening News Association*, 35 FCC 2d 366 (1972); *New Broadcasting Corp.*, 37 FCC 2d 662 (1972); *The Outlet Co.*, 38 FCC 2d 355 (1972); *RadiOhio, Inc.*, 38 FCC 2d 721 (1972); *Mahoning Valley Broadcasting Corp.*, 39 FCC 2d 52 (1972).

However, in 1974, the Commission in examining an ascertainment survey which did not include consultations with leaders of a significant interest group in the community to be served, concluded, as provided in Question and Answer 16 of the *Primer*, that the applicant's ascertainment survey was defective. *Voice of Dixie, inc.*, 45 FCC 2d 1027, *recon. denied*, 47 FCC 2d 526 (1974).

Following the Decision in *Voice of Dixie*, greater emphasis has been placed on strict compliance with all provisions of the Primer, which has fostered unnecessary litigation and time-consuming delays in the processing of broadcast applications by overemphasizing the importance of even trivial variations from the Primer's supposedly flexible guidelines. Ascertainment showings have become the source of much nitpicking in competitive multiparty cases, even though matters of decisional significance were not at issue. The continuation of such an approach is incompatible with the Commission's keen desire, as expressed in the new *Report and Order*, to streamline and expedite application processing.

For these reasons, we have determined that the practice of requiring strict compliance with the Primer on ascertainment should no longer be the criterion for passing upon the adequacy of an applicant's showing in this regard. Rather, we will return to the previous body of precedent which identified substantial compliance as being sufficient.

Although the Commission has previously recognized that "substantial compliance" is an imprecise term and that its meaning must be established based on experience gained in processing applications and in the light of the purposes and policies that the particular regulatory program seeks to effect (see *CATV of Rockford, Inc.*, 30 FCC 2d 10 (1972), the Commission believes that the above-cited cases and other prior processing experience provide sufficient guidance to the processing staff and the public as to how the term will again be construed in ascertainment examinations.

The revised standard will be applicable immediately at all levels of the adjudicatory process and to all pending applications (contested and uncontested) and proceedings where ascertainment questions arise.

Action by the Commission June 1, 1979. Commissioners Ferris (Chairman), Lee, Quello, Washburn and Fogarty, with Commissioner Brown concurring and issuing a statement.

Federal Communications Commission.

William J. Tricarico,
Secretary.

Concurring Statement of Commissioner Tyrone Brown

Re: *Revised Procedures for the Processing of Contested Broadcast Applications; Amendments of Part 73 of the Commission's Rules*

I fully support the thrust of the Commission's action in adopting revised rules and procedures to expedite the processing of contested broadcast applications for new facilities. By adopting the recommendations of the Contractor's Report we will, in substance, simplify and shorten the current cut-off list procedures; eliminate the sending of "deficiency letters" as part of the processing procedures, except where the staff needs further information; restrict the pre-designation voluntary amendment of applications; eliminate the current provision for predesignation issue pleadings; and require pleadings affecting issues to be filed with the Administration Law Judge after designation.

I applaud the efforts and results of the Contractor, Max Paglin, who has performed yeoman's work and has produced a truly important procedural reform embodied in one of the best written documents I have seen in my tenure as a Commissioner. The current procedures encourage delay and waste of Commission and party resources and also have an adverse impact on applicants and petitioners who do not possess deep pockets. The procedural changes the Contractor recommends can be expected to ameliorate these problems and make a substantial dent in our current backlog of applications for new broadcast facilities. I endorse this part of the "Paglin Report" without reservation.

The second portion of the Contractor's Report causes me some concern and is the impetus for this concurring statement. Under

the revised "procedures" adopted today, the Commission changes the groundrules for handling the review of applicants' community ascertainment and financial qualifications showings. Under the new procedures, applicants need only make a threshold showing of substantial compliance with FCC policies and rules to pass initial Commission muster.

Several points are worth emphasizing. First, the procedures and polices we have adopted today apply only to applications for *new* broadcast facilities against which mutually-exclusive applications or petitions to deny are filed. Except to the extent certain filing deadlines are conformed, no changes are intended in the procedures or policies applied to renewal applications.

Second, the requirement of a threshold showing of "substantial compliance" for *financial* showings causes me little concern because the adequacy of such showings is fairly easy to determine and we have been applying a "substantial compliance" test. However, the same is not the case with ascertainment.

At least since the decision in *Voice of Dixie, Inc.* 45 FCC 2d 1027, *recon. denied*, 47 FCC 2d 526 (1974), the Commission has applied a "strict compliance" test to measure the adequacy of ascertainment showings submitted by applicants for new facilities. The procedures adopted today purport to return to the pre-*Voice of Dixie* "substantial compliance" test as a measure of the adequacy of an applicant's ascertainment showing. Based upon the comments made on the Paglin proposals and my understanding of the standards applied before the *Voice of Dixie* case, I would have no problem with reversing that case and returning to a policy of "substantial compliance." In my opinion, the real purpose of ascertainment is to require that broadcasters have contact and dialogue with their communities. The mechanistic approach to ascertainment, and therefore the nit-picking approach to challenging ascertainment, serve no real purpose. Thus substantial compliance with the purpose of ascertainment should be all that we need require.

However, we must make clear what we mean by substantial compliance. There may be some confusion about the standard to be applied by our staff and in the adjudicative process in determining whether there has been substantial compliance. This is so because, while the test is intended to be that applied before the *Voice of Dixie* decision, the Report and Order adopted today suggests otherwise in at least one passage. In adopting the Contractor's recommendation (with minor modifications) we noted that:

"The test to be used regarding the showing required to reopen the question of the adequacy of the ascertainment survey, by way of motion to enlarge issues, will be limited to *misrepresentation* or *gross omission* of some *decisionally significant* area which would make the survey *totally unacceptable*." (Par. 54; emphasis added).

My initial opinion was that this standard for *review* of the staff's action was one which would permit acceptance of ascertainment showings only minimally complying with the *Primer* and other Commission policies. For if the staff determined that the application substantially complied with our policies (a determination in which "only the applicant and the staff are involved") even if it did not, it seemed to me that a review standard requiring a showing of "misrepresentation or gross omission of some decisionally significant area which would make the survey totally unacceptable" in most instances precluded any further examination of the showing.

However, to the extent that that language suggested a standard other than that which existed prior to *Voice of Dixie*, it is not so intended by the Commission. In discussion at the meeting at which we adopted this Report the staff assured us that the review standard permitted an ALJ to enlarge issues if a showing was made that the applicant's ascertainment survey did not substantially comply with our policies. And the tests for substantial compliance are those applied before the *Voice of Dixie* case. (See *Report and Order*, note 9). Also reassuring are subsequent passages in the Report and Order at paragraph 54: "[W]e will return to the previous body of precedent which identified substantial compliance as being sufficient. These criteria shall be applied *at all levels of the adjudicative process* * * *" (emphasis added).

I am also concerned that insufficient notice was given to interested parties about the change in the Commission's policy regarding the acceptability of ascertainment showings. The focus of the Report and the discussions both outside and within the Commission have been on the procedural aspects of the Report and the efforts to ameliorate the backlog in applications for new broadcast facilities. Since the procedural changes as well as the Commission's reversal of the *Voice of Dixie* policy apply to petitions to deny new applications, I considered urging the Commission to submit the Report for further public comment with a special emphasis put on the ascertainment issue.

I am persuaded, however, that the backlog situation in processing our new applications compels us to move as quickly as possible and that we have technically complied with all notice and comment requirements. Moreover, those interested groups which have not commented in this proceeding but might have done so if it were clear that a change in the ascertainment compliance standard was intended, still have an opportunity to comment by filing for reconsideration of the Commission's action.

One final point. The changes made today are procedural in nature and are not intended to eliminate the substantive ascertainment requirements or the procedural requirements of the *Primer*. *Primer on Ascertainment of Community Problems by Broadcast Applicants*, 27 FCC 2d 650 (1971). Nor are they intended to denigrate the requirement of substantial compliance with the *Primer*. Finally they are not intended to affect the ascertainment showings required of renewal applicants who are subject to the renewal *Primer*. *Ascertainment of Community Problems by Renewal Applicants*, 57 FCC 2d 246 (1975), *recon. granted in part*, 61 FCC 2d 1 (1976). The Commission is looking into the substance of ascertainment and the *Primer* requirements in another proceeding. I am sure the Commission intends the staff to apply the existing rules in the interim, and interested parties should be guided accordingly.

BILLING CODE 6712-01-M

GENERAL SERVICES ADMINISTRATION

[Temporary Regulation D-63]

Federal Property Management Regulations

Subject: Delegation of Authority.

1. *Purpose.* This regulation delegates authority to the Secretary of Labor to appoint uniformed guards employed by the Department of Labor as special police to provide law enforcement services at Job Corps Centers on property under exclusive Federal legislative jurisdiction. These facilities are located at Edinburg, Indiana; Morganfield, Kentucky; Excelsior Springs, Missouri; Edison, New Jersey; Astoria, Oregon; McKinney, Texas; and San Marcos, Texas.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended, and the Act of June 1, 1948 (62 Stat. 281), as amended, authority is hereby delegated to the Secretary of Labor to appoint uniformed guards as special police to enforce Federal law in protecting life and property and preserving the peace at Job Corps Centers under exclusive Federal jurisdiction as cited above.

b. The Secretary of Labor may redelegate this authority to any officer or employee of the Department of Labor.

c. This authority shall be exercised in accordance with the limitations and requirements of the above cited acts and the policies, procedures, and controls prescribed by the General Services Administration.

4. *Effect on other directives.* Temporary Regulation D-61 dated August 28, 1977, is revoked.

Dated: June 5, 1979.

Paul E. Goulding,
Acting Administrator of General Services.

BILLING CODE 6820-23-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Resources Administration

Advisory Council and Subcommittee Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory bodies scheduled to meet during the month of July 1979:

Name: National Guidelines, Goals, Priorities, and Standards Subcommittee of the National Council on Health Planning and Development.
Date and Time: July 12, 1979, 10:00 a.m.–12:00 Noon.
Place: Hubert H. Humphrey building, Conference Rooms 703A–705A, 200 Independence Avenue, SW., Washington, D.C. 20201.
Open for entire meeting.

Purpose. The objectives of the National Guidelines, Goals, Priorities, and Standards Subcommittee are to study the experience nationwide in the public and private sectors with the adoption and/or adjustment of the National Guidelines for Health Planning and their impact and recommend changes as appropriate; study the experience of the Health Systems Agencies and State Health Planning and Development Agencies nationwide in implementation of high priority goals and sub-goals and their impact; advise the Council in identifying additional high priority goals and sub-goals; investigate and coordinate information on demonstrations underway by provider, reimbursement, regulatory, labor, industry, and community groups on sub-goals, such as those on alcoholism and prevention; study, investigate and identify research needs appropriate to the formulation, adjustment and refinement of the National Guidelines, and study and develop improved indicators to assess the impact of the Guidelines or the need for revisions; and recommend to the Council on the need for further development and/or revision of the National Guidelines.

Agenda. Status reports on ongoing studies related to Guidelines development. Report on the Emergency Medical Service policies in California, and discussion of site visit plans for the Subcommittee

* * * * *

Name: Technology and Productivity Subcommittee of the National Council on Health Planning and Development.
Date and Time: July 12, 1979, 3:00 p.m.–5:00 p.m.
Place: Hubert H. Humphrey Building, Conference Rooms 723A–727A, 200 Independence Avenue, SW., Washington, D.C. 20201.
Open for entire meeting.

Purpose. The objective of the Technology and Productivity Subcommittee is to advise the full Council on matters related to the productivity of the health care delivery system and to the implications of new medical technology for the organization, delivery and equitable distribution of health care services. "Technology" includes the drugs, devices and medical and surgical procedures used in medical care and the organizational and supportive systems within which such care is delivered. "Productivity" is the efficiency with which health care is delivered.

The Subcommittee is to deliberate and to make recommendations to the full Council on matters chosen from among those brought to it by Council members, HEW staff and advisory committees, other Federal departments, congressional committees and staff, provider groups and the public at large. The Subcommittee in addition will study and investigate the current needs for assistance of HSAs and SHPDAs in the area of evaluating productivity improvement and new medical technology, help transmit concerns of HSAs and SHPDAs to appropriate Federal agencies, and review the current resources both within the Federal Government and among the educational, research and other developmental agencies for providing needed assistance to HSAs and SHPDAs. In addition, it will review technology assessment activities within the Department in order to assure they are relevant to the needs of the HSAs and are useful in the development and implementation of national standards, goals, and guidelines, and for the establishment of priorities with those goals.

Agenda: The Subcommittee will review the productivity monographs for distribution to the Council.

* * * * *

Name: Implementation and Administration Subcommittee of the National Council on Health Planning and Development.
Date and Time: July 12, 1979, 4:30 p.m.—6:30 p.m.
Place: Hubert H. Humphrey Building, Conference Rooms 703A–705A, 200 Independence Avenue, SW., Washington, D.C. 20201.
Open for entire meeting.

Purpose. The objective of the Implementation and Administration Subcommittee is to study and make recommendations on the implementation and administration of Titles XV and XVI of the Public Health Service Act. Specific areas for the Subcommittee's consideration are (1) the impact of HEW's implementation/administration on the effectiveness of Health Systems Agencies and State Health Planning and Development Agencies; (2) the effectiveness of the interrelationships between health planning agencies and HEW, Central and Regional Offices; (3) the timing and strategy of implementation and of the dissemination and distribution of regulatory and technical material; (4) how to better meet the needs of HSAs and SHPDAs; and (5) the review of the Council's responsibilities under section 1122 of the Social Security Act.

Agenda. The Subcommittee will continue consideration of work program priorities, including consumer participation, consider a section 1122 case, and other issues.

* * * * *

Name: National Council on Health Planning and Development.
Date and Time: July 13, 1979, 8:45 a.m.–3:00 p.m.
Place: Main Auditorium, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, D.C. 20201.
Open for entire meeting.

Purpose. The National Council on Health Planning and Development is responsible for advising and making recommendations with respect to (1) the development of national guidelines under section 1501 of Pub. L. 93–641, (2) the implementation and administration of Title XV and XVI of Pub. L. 93–641, and (3) an evaluation of the implications of new medical technology for the organization, delivery and equitable distribution of health care services. In addition, the Council advises and assists the Secretary in the preparation of general regulations to carry out the purposes of section 1122 of the Social Security Act and on policy matters arising out of the implementation of it, including the coordination of activities under that section with those under other parts of the Social Security Act or under other Federal or federally assisted health programs. The Council considers and advises the Secretary on proposals submitted by the Secretary under the provisions of section 1122(d)(2) that health care facilities or health maintenance organizations be reimbursed for expenses related to capital expenditures notwithstanding that under section 1122(d)(1) there would otherwise be exclusion of reimbursement for such expenses.

Agenda. Status reports on the Health Planning Legislation, Council

Subcommittee Work Activities, and the Bureau of Health Planning and Agencies activities. The development of the Massachusetts State Health Plan, a case study. Follow-up of previous Council discussions on HMO policy and employment issues on closure and conversion programs.

Anyone requiring information regarding the subject Council should contact Mrs. S. Judy Silsbee, Executive Secretary, National Council on Health Planning and Development, Room 10-27, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782. Telephone (301) 436-7175.

Agenda items are subject to change as priorities dictate.

Dated: June 12, 1979.

James A. Walsh,

Associate Administrator for Operations and Management.

BILLING CODE 4110-69-M

Office of the Secretary

Protection of Human Subjects; HEW Support of Human In Vitro Fertilization and Embryo Transfer: Report of the Ethics Advisory Board

AGENCY: Department of Health, Education, and Welfare.

SUMMARY: Departmental regulations governing the protection of human subjects prohibit the support of research involving human *in vitro* fertilization until the Ethics Advisory Board has advised the Secretary as to its ethical acceptability. In 1977, the Department received an application for support of such research which was forwarded to the Board for review early in 1978. Following the birth of a baby conceived by means of *in vitro* fertilization in England, the Secretary directed the Board to broaden its study of the individual research proposal to include the scientific, ethical, legal and social aspects of human *in vitro* fertilization and embryo transfer in general. This report is the product of that study. The Department has decided to publish the report of the Board and to solicit public comment before making any determination on the sensitive issues involved.

ADDRESS: Written comments, data, views, arguments, and inquiries concerning the report and conclusions of the Ethics Advisory Board may be sent to: Mr. F. William Dommel, Jr., Office for Protection from Research Risks, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014.

Please arrange comments by conclusion number in order to facilitate analysis. Additional copies of this notice may be obtained by writing to the same address. All comments received will be available for inspection in Room 203, Westwood Building, 5333 Westbard Avenue, Bethesda, Maryland, weekdays (Federal holidays excepted) between the hours of 8 a.m. and 4:30 p.m.

DATES: To assure full consideration, all comments should be submitted on or before August 17, 1979. After receipt and review of such comments, the Department will take appropriate action based upon its consideration of this report and the relevant comments submitted.

Dated: June 8, 1979.

Joseph A. Califano, Jr.,

Secretary of Health, Education, and Welfare.

ETHICS ADVISORY BOARD

Department of Health, Education, and Welfare

Report and Conclusions: HEW Support of Research Involving Human in Vitro Fertilization and Embryo Transfer

May 4, 1979.

Ethics Advisory Board

Chairman: James C. Gaither, J.D.

Vice Chairman: David A. Hamburg, M.D.

Sissela Bok, Ph.D., Lecturer in Medical Ethics, Harvard University.

Jack T. Conway, Senior Vice President, United Way of America, Washington, D.C.

Henry W. Foster, M.D., Professor and Chairman, Department of Obstetrics and Gynecology, Meharry Medical College.

James C. Gaither, J.D., Cooley, Godward, Castro, Huddleson and Tatum, San Francisco, California.

David A. Hamburg, M.D., President, Institute of Medicine, National Academy of Sciences, Washington, D.C.

Donald A. Henderson, M.D., Dean, School of Hygiene and Public Health, Johns Hopkins University.

Maurice Lazarus, Chairman, Finance Committee, Federated Department Stores, Inc., Boston, Massachusetts.

Richard A. McCormick, S.T.D., Professor of Christian Ethics, Kennedy Institute for the Study of Reproduction and Bioethics, Georgetown University.

Robert F. Murray, M.D., Chief, Division of Medical Genetics, College of Medicine, Howard University.

Mitchell W. Spellman, M.D., Dean for Medical Services and Professor of Surgery, Harvard Medical School.

Daniel C. Tosteson, M.D., Dean, Medical School, Harvard University.

Agnes N. Williams, LL.B., Potomac, Maryland.

Eugene M. Zwelback, M.D., Surgeon in Private Practice, Omaha, Nebraska.

Ethics Advisory Board Staff

Professional Staff

Charles R. McCarthy, Ph.D., Staff Director.
Barbara Mishkin, M.A., Deputy Staff Director.
F. William Dommel, Jr., J.D., Special Assistant to the Staff Director.
Roy Branson, Ph.D., Ethics.

Support Staff

Roberta Garfinkle, Committee Assistant.
Erma L. Pender.
Coral M. Sweeney.
Eleanor S. Yago.

Special Consultants

Philip Halpern, J.D., Legal Consultant to the Chairman.

B. The Design of the Research.
C. The Consent of Sperm and Ovum Donors.
D. The Status of the Early Human Embryo.
E. Potential Adverse Consequences of the Research.
III. Clinical Applications of *In Vitro* Fertilization and/or Embryo Transfer: Technical and Ethical Issues.
A. The Need for and Potential Benefits of *In Vitro* Fertilization and Embryo Transfer.
B. The Need for and Adequacy of Prior Laboratory and Animal Research.
C. Risks of Procedures.
D. The Consent of Sperm and Ovum Donors.
E. The Status of the Early Human Embryo.
F. Potential Adverse Consequences of Clinical Applications.
G. Questions of Allocation.
IV. Legal Issues Surrounding Human *In Vitro* Fertilization and Embryo Culture, and Embryo Transfer.
A. Existing Federal and State Law Applicable to Human *In Vitro* Fertilization and/or Embryo Transfer.
B. Constitutional Issues.
C. Criminal Law.
V. Review of Public Attitudes.
A. Responses Received by the EAB.
B. Public Opinion Surveys.
C. List of Public Witnesses.
VI. Summary and Conclusions.

Preface

Current regulations of the Department of Health, Education, and Welfare (HEW) prohibit the support of research involving the fertilization of a woman's egg (ovum) outside her body (*in vitro* fertilization) until the Ethics Advisory Board has advised the Secretary as to its ethical acceptability. In 1977, the Department received an application for support of such research and, after it has been approved from a scientific point of view, forward it to the Board. At its meeting in May 1978, the Board agreed to review the research proposal.

Over the summer, the announcement of the birth of a baby following *in vitro* fertilization in England aroused great public interest; it appears that a number of couples are ready and eager to avail themselves of such procedures in order to overcome infertility. Therefore, in September, Secretary Califano asked the Board to broaden its consideration of the pending application to include the scientific, ethical, legal and social issues surrounding human *in vitro* fertilization and embryo transfer in general.

This report is the result of over a half a year of study during which the Board asked scholars and experts in the fields of reproductive science, ethics, theology, law and the social sciences, to prepare reports and discuss the issues with Board members in public meetings. In addition, the Board held a series of eleven public hearings throughout the country in which private individuals, professional societies and public interest groups had an opportunity to present their views. The Board also received over 2,000 pieces of correspondence including letters, postcards and formal testimony, all of which were copied and distributed to each of the members.

Chapter I of the report provides background information about the human reproductive process and research involving *in vitro* fertilization and embryo transfer. Chapter II explores the technical and ethical issues surrounding such research in humans and Chapter III addresses the technical and ethical issues surrounding the use of the procedures in clinical practice. Chapter IV presents a review of the legal issues, and Chapter V summarizes public attitudes as presented to the board and as determined by recent public opinion polls. The Board's conclusions are set forth in Chapter VI.

The Board hopes that its deliberations and conclusions will be useful to the Secretary and staff of the Department in making decisions regarding the support and conduct of research involving human *in vitro* fertilization and embryo transfer.

* * * * *

An appendix containing papers prepared for the Board by scholars in the fields of reproductive science, ethics, theology, law, statistics, and social policy will be available through the U.S. Government Printing Office. Ordering information may be obtained from the Ethics Advisory Board, Westwood Building, Room 125, 5333 Westbard Avenue, Bethesda, Maryland 20016, telephone (301) 496-7776.

Chapter I—Background

A. *The Normal Human Reproductive Process*

Through long years of painstaking study reproductive biologists have been able to acquire significant information concerning the human reproductive process. The gathering of data on this process has presented formidable obstacles, since fertilization and the earliest days of embryonic development occur within the woman's body where, for both technical and ethical reasons, they are not readily accessible for scientific study.

According to the best available evidence, for the average couple the performance of the human reproductive system is only partially "efficient." That is, not every meeting of sperm and ovum results in the production of a viable embryo. One study estimates that in 10% of the cases where human ova are exposed to sperm, fertilizaiton fails to occur. When fertilization does occur, the rate of embryonic loss during the first week is estimated to be 10% and in the second week an additional 32%. According to this study, only 37% of human zygotes survive to be delivered subsequently as live infants.[1] Statistical surveys of the length of time generally required to establish a pregnancy seem to lend support to these estimates.[2]

These relatively high rates of embryonic loss are due in part to external environmental factors which impede continued embryonic development and in part to chromosomal or genetic abnormalities in the embryo itself. The exact proportion of embryonic loss due to each of these factors in unknown. However, one study estimates that perhaps 50% of the embryonic loss subsequent to successful fertilization is due to chromosomal aberrations.[3] Thus, natural selection against most embryos with serious chromosomal abnormalities seems to occur during pregnancy, particularly during the first eights weeks following fertilization.

B. *Previous Research With and Application of in Vitro Fertilization and/or Embryo Transfer*

1. General.—In previous research with humans and other species three major techniques have been employed: (a) *in vitro* fertilization without subsequent transfer of the embryo to the uterus of a female: (b) *in vitro* fertilization followed by embryo transfer; and (c) embryo transfer following fertilization by mating or artifical insemination. Only the first and second techniques have been employed with human beings.

For *in vitro* fertilization (in either the first or second cases listed above) a method must be found for harvesting ova from the female and for brining the ova into contact with sperm from the male in the laboratory setting. In human beings ova are usually secured from the female by means of a surgical procedure called laparoscopy. A needle is passed through the woman's navel and brought into proximity to one or both of her ovaries. Through visual sighting follicles containing mature ova are located, and the ova are removed from the follicles by means of the needle. Human females normally produce only one mature ovum per menstrual cyle; however, if certain hormones ar administered early in a given menstrual cycle, multiple ova are produced which can then be harvested during a single laparoscopic procedure.

Following the successful harvesting of ova, the ova and sperm from a male are placed in a laboratory medium where ova and sperm complete maturation and fertilization occurs. The early embryo is then transferred to a different laboratory medium for subsequent growth. In the first case noted above the embryo is retained in culture in the laboratory setting. In the second case the embryo is transferred to the uterus of a female—either the female donor of the ova or another female whose hormonal cycle is at approximately the same stage as the cycle of the donor female. If the transfer is successful, implantation and subsequent development of the embryo occur in the uterus of the recipient female.

In the third case fertilization occurs *in vivo* in the animal, either through mating or through artificial insemination. The ova may be either those of the inseminated female or those of a donor. Following fertilization but prior to implantation, the resulting embryo or embryos are removed from the reproductive tract of the female and are transferred to the reproductive tract(s) of one or more recipient females. If the transfer is successful, implantation and

subsequent embryonic development occur in the recipient female(s).

In summary, the following combinations of *in vitro* fertilization and/or embryo transfer are possible:

i. *In vitro* fertilization without embryo transfer

ii. *In vitro* fertilization and subsequent embryo transfer

a. Transfer to the uterus of the donor

b. Transfer to the uterus of one or more other females

iii. *In vivo* fertilization and subsequent embryo transfer

a. Fertilization by means of mating

b. Fertilization by means of artificial insemination

c. Ova of the mated or inseminated female

d. Donor ova introduced into the female prior to fertilization.

2. Research and Applications with Animal Species.—a. Nonprimate Laboratory Animals. Successful laboratory experiments with embryo transfer of early rabbit embryos predated by almost 70 years the first successful experiment with *in vitro* fertilization. In 1890 Walter Heape—working in Cambridge, England—succeeded in transferring two embryos from an Angora doe rabbit which had been mated with an Angora buck into the oviduct of a Belgian hare doe which had itself mated several hours before. Six offspring were born to the Belgian hare doe, of which two were clearly Angoras.[4] A similar technique was applied to cultured mouse blastocysts in 1958 by Anne McClaren and John D. Biggers. Some of the offspring grew to adulthood and reproduced naturally to yield a second generation.[5]

Between 1930 and 1959 many investigators sought to imitate the process of embryonic development in the laboratory setting by means of *in vitro* fertilization. However, the researchers failed to devise sufficiently stringent criteria to demonstrate that early embryonic development was indeed the result of fertilization of ova by sperm rather than the effect of laboratory manipulation of the unfertilized ovum. (Severe trauma to the ovum, *e.g.*, puncture or electric shock, can in some cases induce cell division without fertilization. In 1959, however, M. C. Chang of the Worcester Foundation in Massachusetts succeeded in documenting *in vitro* fertilization in the rabbit by taking sperm from male rabbits with specific traits not present in the female ovum donor. The presence of the male traits in the offspring (following embryo transfer and subsequent development) provided unequivocal proof that the sperm had indeed transmitted genetic information to the offspring.[6]

Since 1933 there have been 5 published studies of embryo transfer following *in vivo* fertilization in rabbits, 3 in rats, and 1 in mice.[7] From 1959 to the present, 13 papers (including Chang's initial paper) on *in vitro* fertilization followed by embryo transfer in rabbits have been published, 8 papers on the same procedure in mice, and 1 in rats. In 3 of those studies, 1 on rats and 2 on rabbits, abnormal offspring were reported; however, the causes of the abnormalities are unknown.[8]

Many studies in experimental embryology do not include embryo transfer as a component; rather, they involve various types of laboratory investigation of the early embryo—whether produced by *in vivo* or *in vitro* fertilization. These non-transfer studies examine such topics as mechanisms of normal and abnormal fertilization; the earliest stages of embryonic development; causes of abnormality in early embryos; and the effect of various environmental factors, *e.g.*, radiation, freezing, and various chemicals, on fertilization and early development.[9] Research techniques employed in the study of these topics include fertilization *in vitro*; *in vitro* culture of early embryos to and beyond the blastocyst stage; the fusion of embryonic cells with other cells; the infection of embryonic cells with viruses; the introduction of various changes (chemical or temperature changes, for example) into the embryonic environment; biochemical studies of embryonic cells; and microscopic analysis of embryonic cells.[10]

The technique of superovulation—that is, the administration of a hormone which induces the female to produce a larger than usual number of ova—has sometimes been employed in conjunction with *in vitro* fertilization. Superovulation has been studied rather extensively in rabbits. In one controlled comparison of normally ovulated and superovulated oocytes (total number = 536) 60.1% of embryos obtained following superovulation and 54.6% of those obtained following normal ovulation developed into normal young.[11] In contrast, several other studies in rabbits, as well as in mice, have concluded that an increase in the incidence of chromosomal aberrations occurs following superovulation.[12]

The effects of freezing mammalian embryos have also been studied in considerable detail. The most studied species is the mouse. In one study mouse embryos stored at −195° C for 369 days were cultured and transferred after having been frozen and thawed. The freezing process caused some cellular damage, as evidenced by the fact that a smaller percentage of frozen embryos survived than did unfrozen controls. However, previously frozen offspring were normal and grew and reproduced at the same rate as control animals. The second-generation progeny of the frozen embryos were also normal.[13]

b. Farm Animals. In research with farm animals—particularly, cows, horses, sheep, goats, and pigs—the primary emphasis has been on application rather than on the development of basic knowledge. For this reason, more work has been done on embryo transfer following *in vivo* fertilization than on *in vitro* fertilization itself. Research both with *in vitro* fertilization and with embryo transfer is dwarfed by the use of artificial insemination for commercial breeding purposes: with the aid of artificial insemination no fewer than 100,000,000 cattle have been produced in the United States alone.[14]

Relatively little laboratory research with *in vitro* fertilization or with *in vivo* fertilization using donated ova has been performed in farm animals. Five successful studies in cattle, three in sheep, and one in pigs have been reported.[15]

In contrast, embryo transfer following *in vivo* fertilization of the female's own ova has been widely employed, primarily in cattle, during the past five years. Indeed, thousands of progeny have been produced by this method. Techniques for recovering early embryos from the female following fertilization include both surgical and nonsurgical means. Offspring from embryo transfer appear to be normal, although no carefully controlled study of the outcome of pregnancy has been undertaken.[16]

Two additional techniques which can be employed in conjunction with *in vitro* fertilization and/or embryo transfer have been studied in farm animals. In two studies efforts were made to evaluate the overall quality of early cattle embryos by examining them for compactness, symmetry, and density. These subjective qualitative assessments were successful in predicting differential rates of subsequent pregnancy.[17] A second technique which has been employed experimentally with cattle embryos is the determination of sex through removing cells from the trophoblastic layer of the early embryo. However, many embryos are damaged in the process of sex determination.[18]

c. Non-Human Primates. Relatively little research on *in vitro* fertilization and/or embryo transfer has been performed with non-human primates. Three studies beginning with that of Gould and associates in 1973[19] and continuing with the work of Dukelow and Kuehl[20] have demonstrated fertilization *in vitro* with the squirrel monkey. *In vitro* fertilization studies with the Olive baboon and the rhesus monkey have not yet provided definitive proof that fertilization has in fact occurred. However, in 1976 D. C. Kraemer and associates reported the successful transfer of an embryo from an Olive baboon to a synchronized female following *in vivo* fertilization.[21] Similarly, in 1977 J. H. Marston and associates reported a successful embryo transfer from one oviduct to the other in a female rhesus monkey after *in vivo* fertilization.[22]

The meager data from primate research may reflect technical and funding limitatons on the one hand, or a lack of interest or incentive on the other. Gould has noted that primate research is expensive and that the competition for research funds is a limiting factor. He further observes that investigators may be confronting "as yet unidentified problems regarding the culture requirements for successful maintenance on nonhuman primate gametes *in vitro*."[23] By contrast, Sackett and Smith have expressed confidence that there would be no problem in obtaining a sufficient number of primates to undertake research in this area; further, they report that reliable normative data regarding fertilization, pregnancy, and early development exist against which to measure deviations from the norm resulting from *in vitro* fertilization and embryo transfer.[24]

3. Research and Applications in Humans.—Most successful human research has been concentratred on achieving *in vitro* fertilization and on culturing early human embryos in the laboratory. Efforts at clinical application of *in vitro* fertilization and embryo transfer to overcome infertility were notably unsuccessful until the latter half of 1978 and early 1979 when the delivery of three apparently healthy infants following these procedures was announced.

The first well documented achievement of *in vitro* fertilization with human gametes was reported in 1970 by R. G. Edwards, P. C. Steptoe, and J. M. Purdy.[25] Since 1970 there have been seven additional scientific reports of successful *in vitro* fertilization—four by R. G. Edwards and his colleagues,[26] two by A. Lopata and associates in Australia,[27] and one by Soupart and Strong in the United States.[28] No details concerning the apparently successful *in vitro* fertilization in Calcutta, India, have been published.

Embryo transfer in humans has been attempted only following *in vitro* fertilization. A total of three reports of such efforts have appeared in the scientific literature, one by the Australian group (in 1973),[29] and two by Edwards and Steptoe (in 1976 and 1978).[30] The first attempt led to raised levels of human chorionic gonadotropin in the maternal blood, but implantation was not documented. The second resulted in an ectopic pregnancy in one of the woman's Fallopian tubes. As is well known, the third reported attempt culminated in the birth of a female infant. In oral presentations to scientific meetings, Edwards and Steptoe have reported the birth of a second healthy child, a male, as well as the occurrence of spontaneous abortions in two additional pregnancies initiated by means of *in vitro* fertilization and embryo transfer. The four pregnancies reported by Edwards and Steptoe followed 32 attempts at embryo transfer.[31] In addition, the birth of a female child in India following *in vitro* fertilization and embryo transfer has been reported in the press.[32]

The potential risks of several aspects of human *in vitro* fertilization and embryo transfer have received some discussion in the scientific literature. The technique of superovulation is frequently (though not necessarily) employed in efforts to recover multiple oocytes for *in vitro* fertilization. One report indicates that the technique of superovulation may be associated with higher rates of a chromosomal abnormality (trisomy) in humans.[33] Similarly, evidence from research with mice suggest that too-high a concentration of sperm around the ovum *in vitro* may result in its fertilization by multiple sperm and thus lead to another type of abnormality (triploidy) in the embryo.[34]

In vitro fertilization techniques may also bypass a natural screening process to which sperm are subjected in human reproduction *in vitro*. There is some evidence to indicate that the female reproductive tract selectively eliminates many abnormal sperm. In one study of the human Fallopian tube, for example, it was demonstrated that few morphologically abnormal sperm reach the site of fertilization.[35] Similar observations have been made in studies of mice.[36] the extent of this risk, as well as the two types of risks noted in the preceding paragraph, is unknown.

Two other theoretical sources of risk to human embryos have not been documented in research performed to date: The risk of inducing point mutation or teratogenic effects in the early embryo.[37] The mammalian embryo is highly resistent to environmental insults. Massive insults generally kill rather than merely damage the preimplantation embryo.

These five types of potential risks in humans are, at present, either theoretical or hypothesized on the basis of rather limited data. In addition, even if superovulation or *in vitro* fertilization were to produce a chromosomally or genetically abnormal embryo, there is only a low probability that such an embryo would develop to term. The natural process by which most abnormal early embryos are lost during the early weeks of pregnancy would presumably be operative following *in vitro* fertilization, as well.

C. *The First Phase of the Ethical Debate*

Within the American context, the public debate concerning ethical aspects of *in vitro* fertilization was initiated by biologist James Watson. In an extended statement presented in January 1971 to the Panel on Science and Technology of the House Committee on Science and Astronautics, Watson expressed concern that research advances in human *in vitro* fertilization and the cloning of frogs could in the future lead to attemps to clone human beings.[38] Watson's views were given wide circulation through being excerpted in the May 1971 issue of Atlantic magazine.[39]

An essay defending *in vitro* fertilization appeared in *Nature* in May 1971—the same month that Watson's comments were published in the *Atlantic*. The *Nature* essay, written by British biologist R. G. Edwards and American lawyer David Sharpe, indicated potential benefits of *in vitro* fertilization research and advocated interdisciplinary consultation as the best method for social monitoring of the research.[40]

In late 1971 and the first half of 1972, ethical critiques of *in vitro* fertilization were eloquently presented by biologist-philosopher Leon Kass and theologian Paul Ramsey. The essays of Ramsey and Kass, published in leading medical and public-policy journals, questioned the means being employed in *in vitro* fertilization research and voiced concern about the potential future applications of the research.[41-43] In announcing that it would publish the Ramsey essay, the *Journal of the American Medical Association*

editorially called for a moratorium on human *in vitro* fertilization research.[43]

From mid-1972 to early 1974 relatively little ethical analysis of *in vitro* fertilization was published. A Ciba Foundation symposium on "The Law and Ethics of AID and Embryo Transfer" was held in 1972.[44] In an invitational symposium published in the November 1973 issue of the *Journal of Reproductive Medicine*, several authors—including veterinarian Benjamin Brackett, ethicist Joseph Fletcher, and physicians Luigi Mastroianni and Landrum Shettles—presented sharply divergent viewpoints.[45] In addition, the Committee on the Life Sciences and Social Policy of the National Research Council, whose executive secretary was Leon Kass, completed a detailed technology assessment of *in vitro* fertilization in 1973. Publication of the report was delayed until 1977.[46]

In 1974 the ethical discussion of *in vitro* fertilization seemed to revive. Biologist R. G. Edwards published an extensive survey of medical, ethical, and legal questions surrounding the technique. Edwards devoted particular attention to answering the ethical objections which had previously been raised by Kass and Ramsey.[47] During the same year Joseph Fletcher published *The Ethics of Genetic Control.* In this work Fletcher affirmed the value, indeed the superiority, of numerous genetic and reproductive technologies, including *in vitro* fertilization, as compared with the conventional method of human reproduction.[48]

Between the publication of the National Research Council's technology assessment in 1973 and the middle of 1978 little new ethical literature on *in vitro* fertilization appeared. The first phase in the ethical debate in *in vitro* fertilization thus concluded with a pause. Not until the birth of a child conceived with the aid of the technique did the pause end and the second phase of the ethical debate begin.

D. *The Evolution of HEW Involvement*

HEW involvement in setting guidelines for research involving *in vitro* fertilization and/or embryo transfer has resulted in the publication of three documents: A "draft working document of proposed policy" (November 16, 1973);[49] a set of proposed regulations (August 23, 1974);[50] and final regulations (August 6, 1975).[51] It is perhaps worthy of note that the questions of fetal research, research with pregnant women, and research involving children received substantially greater attention in the three HEW documents than did the issue of *in vitro* fertilization. This differential allocation of attention accurately reflected the public-policy setting of 1973, when fetal research, in particular, was a matter of significant public controversy. The relative de-emphasis of *in vitro* fertilization in the HEW guidelines also reflected the view that successful embryo transfer in humans was not likely to be technically feasible in the near future.

The successive versions of HEW guidelines and rules published between 1973 and 1975 tended toward less detail in their stipulations and toward a greater emphasis on a review procedure for proposed research with human *in vitro* fertilization and/or embryo transfer. The 1973 draft policy stipulated that:

1. "Care must be taken not to bring human ova fertilized *in vitro* to viability * * *"
2. "All proposals for research involving human *in vitro* fertilization must be reviewed by the Ethical Review Board."
3. "No research involving the implantation of human ova fertilized in the laboratory into recipient women should be supported until the appropriate scientific review boards are satisfied that there has been sufficient work in animals (including sub-human primates) to demonstrate the safety of the technique. It is recommended that this determination of safety include studies of natural born offspring of the products of *in vitro* fertilization."
4. "No implantation of human ova fertilized in the laboratory should be attempted until guidelines are developed governing the responsibilities of the donor and recipient 'parents' and of research institutions and personnel."[52]

In August 1974, subsequent to the passage of legislation establishing the National Commission for the Protection of Human Subjects but prior to the Commission's first meeting, HEW published proposed rule-making on research with several specific groups of human subjects. This document responded to comments on the November 16, 1973 preliminary draft regarding *in vitro* fertilization research, clarified the definition of a fetus, and suggested issues to be considered by the Ethical Advisory Board in its review of any proposed HEW supported research involving human *in vitro* fertilization or embryo transfer. In this 1974 document "fetus" was defined to include "both the product of *in vivo* conception and the product of *in vitro* fertilization which is subsequently implanted in the donor of the ovum."[53] With respect to unimplanted human embryos, the 1974 rules proposed no specific guidelines.

However, the 1974 HEW document recommended that the Ethical Advisory Board take into account certain issues in reviewing research proposals involving *in vitro* fertilization and/or embryo transfer:

With respect to the fertilization of human ova *in vitro*, it is expected that the Board will consider the extent to which current technology permits the continued development of such ova, as well as the legal and ethical issues surrounding the initiation and disposition of the products of such research.

With respect to implantation of fertilized human ova, it is expected that the Board will consider such factors as the safety of the technique (with respect to offspring) as demonstrated in animal studies, and clarification of the legal responsibilities of the donor and recipient parent(s) as well as the research personnel.[54]

In August 1975, Hew responded to the National Commission's report and recommendations concerning fetal research. Since the Commission had not specifically addressed the issue of research involving *in vitro* fertilization and/or embryo transfer, HEW chose not to promulgate substantive regulations governing such research. It did, however, clearly reiterate a procedural requirement:

(e) No application or proposal involving human *in vitro* fertilization may be funded by the Department or any component thereof until the application or proposal has been reviewed by the Ethical Advisory Board and the Board has rendered advice as to its acceptability from an ethical standpoint.[55]

The effect of this review requirement between August 1975 and September 1977, when the Ethics Advisory Board was appointed by HEW Secretary Califano, was to place a *de facto* moratorium on all HEW supported human research involving *in vitro* fertilization and/or embryo transfer.

Chapter II—Laboratory Research Involving Human In Vitro Fertilization and/or the Culture of Early Human Embryos: Technical and Ethical Issues

The technical and ethical issues surrounding *in vitro* fertilization using human gametes depend, to some extent, on whether or not the procedure is performed with the intent of transferring the resulting embryos to women for further development. The discussion in this chapter relates to *in vitro* fertilization of human ova when there is no intention of transferring the product to establish a pregnancy. Chapter III deals with human *in vitro* fertilization performed with the specific intent of initiating a pregnancy.

These two chapters focus primary attention on technical and ethical issues as presented to the Ethics Advisory Board in papers prepared by its consultants. Thus, they do not summarize the primary scientific and ethical publications concerning *in vitro* fertilization and/or embryo transfer.

In one of the papers prepared at the request of the Board, LeRoy Walters surveyed the ethical literature on *in vitro* fertilization published through August 1978.[1] This survey noted that most of the ethical discussion on *in vitro* fertilization has concentrated on clinical applications of the technique (the topic of Chapter III) rather than on laboratory research with early human embryos (the topic of the present chapter). Central issues in the ethical literature on basic research with human embryos included the moral status of the early embryo, the need for such research, and the potential long-term consequences of the research. According to the same survey, commentators on ethical issues in the application of *in vitro* fertilization and/or embryo transfer discussed, among other topics, the need for *in vitro* fertilization as a method for overcoming infertility, the adequacy of prior laboratory and animal research, the risks of *in vitro* fertilization and embryo transfer to the ovum donor as well as to potential offspring, and the appropriateness of allocating scarce health care resources to the clinical application of such techniques. Many of these issues recurred in the papers presented to the Board, which are systematically reviewed in this and the following chapter.

A. The Goals and Potential Benefits of the Research. As noted in the preceding chapter many studies in experimental embryology do not include embryo transfer as a component. Several possible goals of laboratory research with human embryos have been identified:

1. Developing or testing more adequate contraceptives; [2]

2. Determining causes of infertility; [3]

3. Investigating the circumstances leading to the development of hyatidiform moles and their potential transformation into malignant tumors; [4]

4. Evaluating the effect of noxious agents or teratogens on the early embryo by means of an *in vitro* screening system; [5]

5. Studying the mechanisms by which chromosomal abnormalities are produced; [6] and

6. Investigating the totipotential cells of very early embryos to increase understanding of normal and abnormal cell growth and differentiation.[7]

One additional potential goal of human *in vitro* fertilization and embryo culture is more controversial and therefore merits more detailed comment. R.V. Short suggests that a kind of *in vitro* assessment (or "toxicology testing") study might be performed to determine whether *in vitro* fertilization produces a higher incidence of embryonic abnormalities than the conventional *in vivo* method of human reproduction. In Short's view, if *in vitro* fertilization techniques do in fact lead to an excess of embryonic abnormalities, it would be preferable to discover that excess in the laboratory rather than at the time of amniocentesis or birth. Short argues that such a controlled *in vitro* study would also provide information concerning the probable success rate of *in vitro* fertilization.[8]

Several objections can be raised to such a proposal, as Short himself observes. First, there would be little basis for comparison following such a laboratory study since data concerning the incidence of abnormalities, particularly chromosomal abnormalities, in early human embryos following *in vivo* fertilization are quite limited. In fact, the totality of *in vivo* information relating to human preimplantation ova and embryos is "confined to 15 specimens, 9 recovered from the oviduct and 6 from the uterus." [9] At least two replies to this objection can be made. First, James Schlesselman notes that one can extrapolate statistically from three major studies of the incidence of chromosomal abnormalities following *in vivo* fertilization [10] that the natural incidence of such abnormalities in humans is between 395 per 1,000 and 477 per 1,000 at the time of implantation; prior to implantation the incidence of such abnormalities is presumably somewhat higher.[11] Schlesselman concludes that a 40–50% chromosomal abnormality rate in human embryos following *in vivo* fertilization is a reasonable baseline against which to compare the results of *in vitro* fertilization. A second reply is proposed by Short himself, who suggests that one could perform a controlled study of the actual incidence of embryonic defects following *in vivo* fertilization by flushing early embryos from the reproductive tracts of consenting volunteer research subjects. Short concedes that this aspect of the proposed risk-assessment study would present both medical and ethical difficulties of its own.[12]

A second possible objection to Short's proposal for a laboratory risk-assessment study is that it is unnecessary. This objection can take one of two forms. Schlesselman notes that for every 1,000 chromosomal abnormalities which are present in implanted blastocysts, only 5 to 7 survive to the point of live birth. Thus, 99.3% to 99.5% of chromosomally abnormal fetuses are eliminated *in vivo* through spontaneous abortion or fetal death. It follows, therefore, that even a doubling in the incidence of chromosomal abnormalities following *in vitro* fertilization—assuming that the technique or ancillary medical treatment did not facilitate the survival of abnormal embryos—would yield only an additional 6 to 7 chromosomally abnormal fetuses, which could, in Schlesselman's view, be detected by means of prenatal diagnosis and selectively aborted.[13]

An alternative argument against the necessity of Short's proposed risk-assessment study can be based on the essays of Biggers, who asserts that for the investigation of most questions concerning human reproduction a suitable animal model can be found. In his view, women should not be subjected to research risks and valuable human ova and embryos should not be used in research unless there is no reasonable alternative to a study in humans.[14]

Biggers' position suggests a final issue to be considered under the rubric of goals and potential benefits of the research: How

stringent a standard should be set with respect to the *need* for laboratory research on human *in vitro* fertilization and embryo transfer? There are three possible answers to this question. The least stringent standard would be that benefits can be expected from the human research. A somewhat more stringent standard would be that human research should hold out the prospect of more significant or more reliable benefits than research employing animal models.[15] The most stringent standard would require that the promised benefits of human research be achievable *only* through research using human gametes and early human embryos.

B. The Design of the Research. Biggers emphasizes that research on human *in vitro* fertilization and embryo culture, since it involves human volunteers, "should only be undertaken if efficiently designed experiments of adequate size are possible." [16] In his view, this stipulation may require that collaborative trials be conducted. Schlesselman's discussion of appropriate sample size for answering specific questions regarding human *in vitro* fertilization illustrates both the complexity of the design issue and the essential role of the biostatistician in helping to plan laboratory research with human gametes and embryos.[17]

C. *The Consent of Sperm and Ovum Donors.* Most discussion of the consent question for laboratory studies of *in vitro* fertilization has focused on the ovum donor. In most cases ova are harvested from women with intact ovaries by means of laparoscopy. The donation of ova may be associated with receiving hormones to induce superovulation and/or to mature the ova *in vivo* prior to harvest. In some cases ova are harvested at the same time that a tubal ligation is performed. There is unanimous agreement that the informed consent of ovum donors must be secured in advance of their participation as research subjects.[18] In addition, the particular vulnerability of infertility patients, who are dependent on the health professions for assistance in achieving pregnancy and who nonetheless may be asked to serve as ovum donors, has been noted in the literature on the consent question.[19]

Less thoroughly discussed are the issues of consent by semen donors and the use of ova excised from ovarian tissue removed for clinical reasons. Consent by semen donors might be particularly difficult to secure if semen were secured from a sperm bank rather than from a prospectively recruited donor. The view expressed in one published assessment of *in vitro* fertilization is that prior consent should be secured from all males whose sperm are to be used for *in vitro* fertilization.[20]

The harvesting of ova from excised ovarian tissue may prove to be inefficient from a purely practical standpoint unless hormone treatments are administered in advance of surgery. Prior consent to such hormone treatment would presumably be secured. However, even if ova were harvested from such tissue, without the previous administration of hormone to the female patient, gradually evolving general standards with respect to the use of human tissues for research purposes[21] would seem to suggest the necessity for securing the patient's consent to the use of her ova in laboratory research.

D. *The Status of the Early Human Embryo.* Two primary objections to laboratory research with human *in vitro* fertilization and embryo culture have been raised. The first is that such research is incompatible with the respect that is due to early human embryos. The second is that the potential adverse consequences of the research outweigh the potential benefits. These two objections will be discussed in the present and the succeeding section of this chapter.

The shape of the embryonic status question differs somewhat in the laboratory research context and the clinical context. As Leon Kass points out, many human embryos which would be studied in the laboratory would have been created solely for research purposes.[22] The major alternative would be to perform laboratory studies on untransferred embryos remaining after the fertilization of multiple ova and the transfer of only one to the uterus. However, from a research design standpoint total reliance on the use of untransferred embryos would seem to exclude research on the fertilization process and on the earliest stages of embryonic development.

At least three distinguishable answers to the embryonic-status question in the research context have been proposed. Kass himself, impressed by the continuities in embryonic and fetal development and by the potential viability of the early human embryo if it is transferred at the proper time, argues (1) that embryos ought not be deliberately created for research purposes[23] and (2) that no invasive or manipulative research should be performed on already-existing human embryos.[24] Any other policy would, according to Kass, symbolize the belief that early human embryos are "things or mere stuff." [25]

A second position on the embryonic-status is presented by Charles Curran, who argues that:

> From my ethical perspective truly human life is present two to three weeks after conception or shortly after the implantation of the embryo. Hence experimentation after that time and attempts to culture embryos *in vitro* beyond this stage raise insurmountable ethical problems.[26]

However, even for research involving the earliest stages of embryonic life Curran asserts that "[t]he nature of the matter involved in the research calls for respect and economy avoiding unnecessary waste." [27]

A similar position is articulated by Clifford Grobstein who suggests that "human cells, tissues and organs that have no reasonable prospect of possessing or developing sentient awareness" are "human materials rather than human beings or persons." Grobstein notes that "there are established practices for dealing with and disposing of human materials, practices that take into account the special status they have, having originated as human." [28] Grobstein's position is characterized as being similar rather than identical to Curran's for two reasons. First, it is not clear that Curran would extend his principle of respect to include non-embryonic human organs, tissues, or cells. Second, the criterion of possessing a potential for sentience seems not to be a part of Curran's position on embryonic status. Indeed, one could construe this criterion broadly to include all preimplantation embryos since, as Kass notes, they could be transferred, implanted, and develop to maturity; or one could interpret the criterion narrowly to exclude all preimplantation embryos since it is infeasible, given the current state of medical technology, to culture human embryos *in vitro* beyond the blastocyst stage.

A third position on embryonic status, represented by Samuel Gorovitz, adopts sentience (rather than the potential for sentience) as the primary criterion for determining the moral status of the human embryo or fetus in Gorovitz's view:

> The status of the embryo is not equivalent to that of a person, a child, an infant, or a fetus—at least a fetus from the point of development of the capacity for even primitive sentience.[29]

If by "primitive sentience" Gorovitz means the capacity to respond to sensory stimuli, then the transition from embryonic to fetal status (at the eighth week of gestation) or, at the latest, the tenth gestational week of fetal development would seem to mark the transition from nonprotected to protected status.[30] In fact, however, Gorovitz notes that he would draw the

line of acceptability somewhat conservatively, that is, "rather close to the point where cell differentiation begins, rather far from the capacity for independent survival." [31]

A possible reason for the multiplicity of viewpoints on the status of the human embryo is suggested by Gorovitz. In his view, questions like embryonic status or the appropriate criteria of death are not matters of fact which can be clarified through appropriate research programs. Rather, these questions provide the occasion for individuals to make decisions and for societies to establish policies.[32] In contrast, while Kass does not directly address the fact/decision distinction, he clearly regards the discontinuity of fertilization and the continuity fo the embryonic development which follows as factual considerations which lead ineluctably to certain moral conclusions.[33]

E. *Potential Adverse Consequences of the Research.* Concerns about adverse consequences of laboratory research with human *in vitro* fertilization and embryo culture have been focused in three areas: (1) The same types of research *procedures* that have been performed with nonhuman mammalian embryos may be performed with human embryos; (2) certain undesirable technological or clinical *applications* may arise from such research; and (3) the research may have a desensitizing or dehumanizing *effect on investigators.*

Kass outlines some of the scientific procedures which in his view are likely to be applied in the future to human embryos:

1. Culture beyond the blastocyst stage;
2. Formation of hybrids or chimeras (intra-specific and inter-specific);
3. Gene, chromosome, and plasmid insertion, excision, or alteration;
4. Nuclear transplantation or cloning; and
5. The freezing of embryos.[34]

Kass ventures this prediction because, in his view, the same arguments which can be advanced to justify, for example, the simpler and earlier procedures proposed by Pierre Soupart can without *logical* contradiction be extended to the more ambitious and later procedures outlined above. Among these justifiying principles are the following:

1. "It is desirable to learn as much as possible about the process of fertilization, growth, implantation, and differentiation of human embryos and about human gene expression and its control.
2. "It would be desirable to acquire improved techniques for enhancing conception and implantation, for *preventing* conception and implantation, for the treatment of genetic and chromosomal abnormalities, etc.
3. "Finally, only research using human embryos can answer these questions and provide these techniques.
4. "There should be no censorship or limitation of scientific inquiry or research."[35]

Without specifically advocating the types of experiments which Kass regards as undesirable, Gorovitz adopts a general position which could in principle allow him to approve such experiments. If one extrapolates from Gorovitz's views on embryonic status, one concludes that he would approve any type of research procedure on the human embryo, provided only that the research terminated prior to the onset of embryonic or fetal sentience and that other canons of research ethics (consent of gamete donors, appropriate research design, etc.) were carefully followed.[36] Gorovitz explicitly accepts Kass's formal point that the justifying arguments for such research should be carefully formulated, in order to avoid the "slippery slope." [37] However, his material principle of drawing the dividing line at the point of sentience rather than fertilization or implantation seems, at least, to lead Gorovitz to approve as potentially beneficial the experiments which Kass regards as negative consequences of laboratory research with preimplantation embryos.

A specific research technique, interspecies fertilization using human sperm or ova, has provoked considerable discussion and therefore merits brief further comment. Cross-fertilization raises both conceptual and ethical questions. Conceptually, is fertilization research involving the use of only human sperm or human ova and the culture of the resultant hybrid embryo *human research?* Ethically, Kass regards such research as an adverse consequence of intraspecific *in vitro* fertilization. On the other hand, Short, while acknowledging that interspecific fertilization carries with it undertones of a novel type of genetic manipulation,[38] argues that technical and ethical hedges could be constructed to prevent what he regards as the major potential adverse consequence of such research—namely, any effort to transfer the hybrid embryo into the uterus of a human or animal female for further development.

A second type of potential adverse consequence identified by some critics of human *in vitro* fertilization and embryo culture concerns possible applications of the research rather than the research procedures themselves. Kass suggests that the research might lead to the *banking of human ova or embryos for commercial purposes.*[39] In the literature on this topic several other potential adverse consequences are noted: the cloning of human beings, the creation of human/animal hybrids, and the development of devices which would allow for the extracorporeal gestation, or ectogenesis, of human embryos and fetuses.[40] Without commenting specifically on these potential developments, Gorovitz expresses reservations about the wedge argument in its predictive (as distinguished from its logical) form. He also expresses confidence in the collective capacity of human beings to exercise good judgment, citing as examples public policy on abortion, appropriate treatment of newborn infants, the treatment of irretrievably comatose patients, and the setting of limits on the freedom of scientific inquiry.[41]

In an earlier essay on *in vitro* fertilization and cloning Leon Kass identified a third general type of potential adverse consequence which might result from laboratory research involving human embryos. According to Kass, one should "be concerned about the effects on the attitude toward and respect for human life engendered in persons who are engaged in such practices." [42] No other author has commented on the possibly dehumanizing effects on the researcher of human *in vitro* fertilization and embryo culture. It is probable that authors like Curran and Gorovitz would link the dehumanization question to the issue of embryonic or fetal status, arguing that only research on embryos which have developed beyond the two-to-three week stage (Curran) or to the point of sentience (Gorovitz) would show disrespect for the human embryo or fetus and that only research which manifested such disrespect would be likely to desensitize the researcher.

Chapter III—Clinical Applications of in Vitro Fertilization and/or Embryo Transfer: Technical and Ethical Issues

A. The Need for and Potential Benefits of In Vitro Fertilization and Embryo Transfer

The major potential benefit to be derived from clinical applications of *in vitro* fertilization and embryo transfer is that it may enable some otherwise-infertile women to conceive and bear children. Most commentators on the clinical use of *in vitro* fertilization and embryo transfer view the alleviation of infertility, particularly in the context of heterosexual marriage, as a desirable goal.[1] In opposition to this majority position, however, Stanley Hauerwas argues that even within marriage, resort to *in vitro* fertilization as a method to overcome infertility reflects an undue emphasis on the importance of biological parentage.[2]

There are at least two senses in which the *need* for this potential benefit has been discussed. First, how many women who wish to bear children are infertile because of blocked Fallopian tubes? Second, of these infertile women, how many need *in vitro* fertilization and embryo transfer in the sense that they have no alternative means for producing children of their own?

Precise data on the extent of need in these two senses are unavailable. Rough estimates of the upper limits of need in the United States are provided by Biggers:

> There are 60 million women reproductively active in the USA; seven percent of couples are infertile, and a third of these are infertile because of sterility of the wife. Thus, there are 1,400,000 sterile women in the population. Pathology of the oviduct accounts for 40 percent of the cases so that there are about 560,000 women with diseased oviducts.[3]

The major alternative to *in vitro* fertilization and embryo transfer for women is one of several surgical procedures available for repairing blocked oviducts: Salpingolysis, resection and reanastomosis, fimbrioplasty, and tubal implantation. According to a recent survey, the rates of term pregnancy following the first three of these procedures are 40-50%, 25–40%, and 10–25% respectively.[4] Thus, at least 280,000 U.S. women with tubal obstruction are not likely to achieve pregnancy by surgical methods alone. Of these women, an unknown number may also suffer from ovarian and/or uterine dysfunction and thus may be incapable of producing offspring even with the aid of *in vitro* fertilization and embryo transfer.[5] An additional adjustment in the estimate of the "need" for *in vitro* fertilization would be required if one were to consider women who had previously elected sterilization by tubal ligation but who later desire to become pregnant.

While the alleviation of infertility among couples is generally regarded as the major potential benefit of clinical *in vitro* fertilization and embryo transfer, some witnesses and some commentators in the literature have identified what they regard as additional benefits. Sid Leiman regards the surrogate-motherhood role as closely analogous to that of a wet nurse and therefore sees no ethical objection to extramarital involvement in gestation in cases in which intramarital reproduction is physically impossible.[6] In his writings on this topic R. G. Edwards mentions sex preselection as an additional potential benefit of clinical *in vitro* fertilization and embryo transfer.[7] Other potential benefits cited by various authors are pre-transfer screening for abnormalities,[8] re-transfer repair of defects,[9] and extracorporeal gestation.[10] The potential consequences enumerated in this paragraph are not universally judged to be beneficial, however, as Section F below illustrates.

B. The Need for and Adequacy of Prior Laboratory and Animal Research

Three major types of studies have been proposed as precursors to clinical applications of *in vitro* fertilization and embryo transfer: (1) Laboratory research on human sperm, ova, and embryos without embryo transfer, as described in Chapter 2, Section A above; (2) feasibility and safety studies in non-primate species; and (3) feasibility and safety studies in primates. Reservations have been expressed by some witnesses about each of these types of preliminary research.

Laboratory research with human sperm, ova, and embryos has been advocated most vigorously by R. V. Short. Short presents four arguments for a risk-assessment program based on such laboratory studies:

> 1. It would be better to discover an increased incidence, of abnormal embryos and/or low success rate "in the test tube rather than in the long-suffering female patient."

2. Laboratory tests could establish whether fertilization errors leading to potentially malignant trophoblastic tumors occur with *in vitro* fertilization.

3. Although chromosomally abnormal fetuses could be detected by amniocentesis, the discovery of such an affected fetus would confront an infertile couple with an agonizing decision; perhaps the decision would be viewed as a choice between having a handicapped child and no child at all.

4. Laboratory tests could establish whether the lack of the natural screen against defective sperm which is provided by the female reproductive tract leads to an increase in the number of abnormal embryos produced *in vitro*.[11]

Four possible lines of objection to the type of risk-assessment study proposed by Short are suggested by the testimony of other witnesses. Biggers notes that large numbers of human ova would need to be collected and used in such studies in order to attain statistical significance and that the research would therefore involve a substantial number of women acting as donors.[12] Second, even if risk-assessment studies with human sperm, ova, and embryos were considered a necessary preliminary step, it can be argued that such studies would not be sufficient, since they would not detect the subtle types of mental or developmental deficits which might be discovered in a carefully conducted study of primates.[13] (As will be noted below, Short regards primate studies as too time-consuming.[14]) Third, in Biggers' view, there is already sufficient evidence from laboratory studies with rats, mice, and rabbits and from the use of embryo transfer in farm animals to justify the conclusion that *in vitro* fertilization and embryo transfer do not produce a significant increase in the number of abnormal offspring. On this view, the conduct of laboratory studies as proposed by Short is unnecessary.[15] A final type of objection to risk-assessment studies with human gametes and embryos can be derived from Schlesselman's essay—namely, that the efficiency of the human female reproductive system in screening against chromosomally abnormal embryos is so high (99.3% to 99.5%) that proceeding directly to embryo transfer in humans would probably not lead to a significantly higher number of abnormal fetuses (presumably detected by amniocentesis) or handicapped offspring. According to Schlesselman, the primary result of an increase in the number of embryonic chromosomal abnormalities would be an increased rate of spontaneous abortion.[16]

A second proposal is to perform feasibility and safety studies in non-primate species of laboratory animals, *e.g.*, the mouse and the rabbit. Mastroianni, a proponent of prior studies in both primate and non-primate species, asserts that:

> * * * Extensive work in the laboratory animal should be a necessary prerequisite before proceeding with clinical trials. Statistically valid proof in animals that present techniques predictably produce normal offspring has not as yet been presented. Successful uterine transfer of *in vitro* fertilized ova has been accomplished in only two laboratory species.[17]

Short's position is in part similar to that of Mastroianni. In his view, the results of research with laboratory animals "although somewhat inadequate, are on the whole encouraging. The high abnormality rate in the rat experiment [conducted by Toyoda and Chang [18]] was probably not due to the *in vitro* procedure at all (Chang, personal communication) but nevertheless the experiment should be repeated." [19]

Kass indicates his agreement with the "cautious" position of Luigi Mastroianni, Benjamin Brackett, and R. V. Short that:

> * * * The risks for humans have not been sufficiently assessed, in large part because the risks in animals have been so poorly assessed (due to the small number of such births and to the absence of any *prospective* study to identify and evaluate deviations from the norm).[20]

Two objections have been raised regarding studies with non-primate laboratory animals. First, Barton Childs observes that most animal species are so inbred that it would be invalid to extrapolate from the results of *in vitro* fertilization studies, even in large numbers of laboratory animals, to the probable result of clinical applications in humans, who are outbred.[21] Second, in Biggers' view the results of studies with various laboratory animals and of the use of the procedures in farm animals already provide sufficient evidence of safety.[22]

A third possible objection to further studies with non-primate animals is implicit in the Sackett proposal: subtle mental deficits caused by *in vitro* fertilization might not be detected in non-primate animals.[23] Fourth and finally, Schlesselman's calculations concerning the low probability of producing abnormal human offspring following *in vitro* fertilization and embryo transfer [24] can be viewed as an argument against performing further risk-assessment studies with laboratory animals.

A third proposal for preliminary risk-assessment studies is advanced by Sackett. He recommends the conduct of a two-year trial in the pigtail monkey which would include (1) *in vitro* fertilization with some embryos transferred back to the donors of the ova and some transferred to other females, (2) a study of the incidence of abnormalities in products of *in vitro* fertilization, and (3) an assessment of learning abilities and development in the offspring of *in vitro* fertilization.[25] Gould advocates the use of another primate model, the squirrel monkey, for risk-assessment studies.[26]

Several objections have been or can be lodged against the proposal to perform primate risk-assessment studies. Short comments on the time-investment required:

> Whilst it would be helpful to have primate data, the constraints inherent in studying this problem in primates mean that it would be several years before adequate information would be forthcoming, and it would seem wrong to hold up progress until the information was available.[27]

Childs echoes this objection.[28] Second, as noted above, Childs argues that all non-human species are relatively or strictly inbred, so that the range of genetic variability present in humans cannot be duplicated in non-human species.[29] Two other general objections are also applicable to proposed primate research: (1) The studies already performed in several non-primate species provide sufficient evidence concerning risks (Biggers [30]), and (2) abnormal human embryos resulting from *in vitro* techniques are likely to be spontaneously aborted (Schlesselman [31]).

In summary, there is a clear division of opinion within the scientific and ethical communities concerning the need for and adequacy of prior laboratory and animal research. The extent of the disagreement is unclear because not all of the expert witnesses have discussed the three alternative risk-assessment strategies outlined above. In particular, few experts have had the opportunity to comment specifically on the Short and Sackett proposals.

The following positions, however, have been stated with clarity. Biggers regards further risk-assessment studies of any kind as unnecessary. Childs, while acknowledging the reassurance that further animal studies might provide, argues that such studies could never provide conclusive evidence. Short, Mastroianni, Kass, Sackett, and Gould *agree* that further risk-assessment studies should be performed but *disagree* on what kind of studies would be most feasible and appropriate. Short advocates the performance of *in vitro* studies with human sperm and ova and the replication of a single rat study; he

opposes primate studies on grounds of infeasibility and the amount of time required. Mastroianni and Kass support the performance of additional studies in animals, presumably in both primates and non-primates. Sackett and Gould regard non-primate risk-assessment studies as insufficient for drawing conclusions concerning primates and therefore recommend the conduct of primate research. In a word, there is majority support among the expert witnesses for some type of additional risk-assessment study but only minority support for any particular kind of study.

In addition, the data and calculations presented by Schlesselman may be relevant to the entire risk-assessment question. Schlesselman's thesis, which has not been commented on by proponents of risk-assessment studies, is that the probability of producing chromosomally-abnormal infants by means of clinical applications of *in vitro* fertilization and embryo transfer is quite low because of the human female's highly-efficient natural screen against chromosomally-abnormal embryos.

A little-discussed aspect of the risk-assessment debate is the kind of model (regarding proof of safety) which the protagonists have in mind. This model, in turn, can have important implications for the burden of proof issue. If one accepts the drug-testing model, as Short does, then the burden of proof is on investigators to demonstrate that the techniques of *in vitro* fertilization and embryo transfer are safe.[32] (It should be noted that, in a published essay, R. G. Edwards accepts the drug-tested model but argues that the results to date in several species of non-primate laboratory animals constitute sufficient proof of safety.[33]) On the other hand, if one adopts a surgery model, as Gorovitz does, than one can argue that the clinician is free to adopt new techniques unless opponents can demonstrate that prohibition of the techniques is justified.[34]

C. Risks of Procedures

1. Risks to Potential Offspring. The major sources of potential risk to offspring from *in vitro* fertilization and embryo transfer have been briefly outlined in Chapter 1, Section B.[35] In general, the surgical procedure of embryo transfer seems to occasion the least concern, in part perhaps because of the widespread use of embryo transfer following natural fertilization in farm animals.[36] The conditions under which the early embryo is cultured are also not a matter of primary concern, since the early mammalian embryo is known to be highly resistant to damage from environmental insults.[37] The major potential sources of damage to the early embryo are related to either the development of ova, the selection of sperm, the fertilization process, or the freezing of gametes or embryos. Specifically, potential sources of damage are the following:

a. Superovulation, sometimes employed prior to *in vitro* fertilization, may be correlated with an increase in the incidence of a chromosomal abnormality (trisomy) in embryos.[38]

b. The quality of sperm reaching and fertilizing the ovum *in vitro* may differ from the quality of sperm fertilizing the ovum in the Fallopian tube, since the female reproductive tract selects against some types of abnormal sperm.[39]

c. The quantity of sperm reaching the ovum simultaneously *in vitro* may break down the usual block to fertilization by multiple sperm; a polyploid embryo may result.[40]

d. The use of freezing techniques to preserve gametes or embryos may produce mutations.[41]

The precise extent to which each of these theoretical sources of risk is likely to be realized in human clinical applications of *in vitro* fertilization and embryo transfer cannot be estimated with certainty. The data and calculations of Schlesselman suggest that even if an excess of chromosomally abnormal embryos were produced by *in vitro* techniques, only a small proportion (less than 10%) would develop to term because of the natural process by which most such embryos are lost early in gestation. Whether the ancillary medical treatment associated with *in vitro* fertilization and embryo transfer would enhance the survivability of chromosomally abnormal embryos is unknown, as Schlesselman acknowledges.[42] Similarly, if subtler genetic (as distinguished from chromosomal) abnormalities were to result from *in vitro* techniques, the abnormal embryos might not be affected by the natural screening process described by Schlesselman.

Judgments about the *acceptability* of various levels of risk to offspring diverge. Kass would require that such risks be equivalent to or less than those of natural reproduction.[43] Curran adopts a similar (although perhaps slightly less stringent) position, arguing that the risks of the *in vitro* fertilization and transfer procedures to the offspring ought to be "about the same as in the normal process."[44] On the other hand, Bigger notes that there is an estimated three percent additional risk of abnormality in offspring suggested by animal studies, and suggests that such an added risk would be acceptable, particularly in light of the fact that some couples who receive genetic counseling are not deterred from procreation by a twenty-five percent risk of genetically-abnormal offspring.[45]

Schlesselman explicitly raises the question: To what are the risks of human *in vitro* fertilization being compared? His answer is that the women and embryos being used for comparison should have the same medical history relevant to their infertility as those undergoing *in vitro* fertilization and embryo transfer.

2. Risks to donors. Most discussion of risks to donors has focused on risks to the women donating ova. The following sources of risk have been identified:

a. Hormonal treatment of the women, sometimes employed to induce superovulation; this treatment can lead to ovarian hyperstimulation or ovarian cysts.[46]

b. Laparoscopy, a surgical procedure generally performed under general anesthesia; this procedure may have to be repeated.[47]

c. Ectopic pregnancy, a potential danger if the embryo fails to implant in the uterus.[48]

d. Careful monitoring of any resulting uterine pregnancy, often including amniocentesis.[49]

e. The possibility of a higher-than-average rate of embryo loss or spontaneous abortion.[50]

These risks are considered to be comparable to the risks faced by female infertility patients, in general, and by women who undergo surgery for the correction of blocked Fallopian tubes, in particular.[51]

D. The Consent of Sperm and Ovum Donors

The issue of informed consent by sperm and oocyte donors was not addressed by the expert witnesses who testified before the Board. In the literature, however, there is unanimous agreement that the informed consent of the would-be mother and presumably of both parents must be secured. Several specific items of information have been identified by various commentators as being material to the decision of the couple and therefore requiring disclosure:

a. The availability of potentially effective alternative therapies, *e.g.*, surgical reconstruction of the Fallopian tubes.[52]

b. The anticipated need for repeated laparoscopies.

c. The low probability of success.

d. The likelihood that the primary beneficiaries of the research will be other couples rather than the research participants themselves.[53]

e. The sources of the gametes to be used in the attempted *in vitro* fertilization (*i.e.*, a guarantee that only the sperm and ova of the couple will be employed).[54]

f. The disposition to be made of sperm, ova, and embryos not used in the transfer attempt.[56]

In the literature on informed consent, several commentators have remarked that infertility patients may be strongly influenced by their desperate desire to have children.[56] On the other hand, R.G. Edwards notes that many candidates for *in vitro* fertilization and embryo transfer are professional persons or their wives. Edwards expresses confidence that the patients seeking this therapy are fully capable of understanding and consenting to its procedures.[57]

E. The Status of the Early Human Embryo

The question of embryonic status in the clinical context differs to some extent from the same question in the laboratory-research context. Perhaps the most obvious difference is that in the clinical context there is at least a possibility that each embryo "created" will be transferred to the uterus, will implant, and will develop to the point of viability. Because of this difference in probabilities, as well as the directly-therapeutic intention present in the clinical context, most expert witnesses on ethical issues surrounding *in vitro* fertilization and embryo transfer viewed the status of the early embryo as less problematic in the clinical situation.

For persons who regard the embryo as deserving of respect or protection from the time of fertilization there are two major concerns: (1) Loss of embryos following transfer, and (2) the disposition of untransferred embryos. Kass argues that there is no qualitative difference between embryonic loss following natural reproduction and that which follows *in vitro* fertilization.[58] The second issue is somewhat more complex, however, since, as Kass notes, the "surplus" embryos can be transferred to women other than the donor, used for laboratory research purposes, or allowed to die.[59] A fourth possibility, not mentioned by Kass, would be to freeze the untransferred embryos, perhaps for later transfer to the same donor. Among the first three possibilities, Kass expresses a clear preference for allowing untransferred embryos to die. In his view, this choice is most compatible with concerns about lineage (which would argue against transfer to other women) and about the respect which is owed to early human embryos.[60] Curran's position on the discard of embryos is similar to that of Kass, although Curran adds the note that discards and losses should be minimized insofar as possible.[61]

A potential method for reducing the number of untransferred embryos is suggested by both Kass and Leiman:[62] Ova could be fertilized one at a time, and any additional ova could be stored, perhaps by freezing, for future attempts at *in vitro* fertilization and embryo transfer. A possible objection to this one-at-a-time procedure is that if fertilization failed to occur, embryo transfer might be delayed until the next menstrual cycle.

An issue not discussed by the expert witnesses and only hinted at in the literature on *in vitro* fertilization is the disposition of grossly abnormal embryos. Some have argued that to decide that such embryos should not be transferred is the first step toward deciding which fetuses (or persons) are not worthy to live.

Finally, some witnesses such as Gorovitz and Short do not explicitly consider the issue of embryonic status in the clinical context. However, if one extrapolates from their views on embryonic status in general or on laboratory research with early embryos, one can conclude with some confidence that they would regard the embryonic loss following embryo transfer and the discard of untransferred embryos as ethically acceptable.

F. Potential Adverse Consequences of Clinical Applications

Two types of potential adverse consequences of *in vitro* fertilization and embryo transfer have been identified: (1) Adverse consequences for the family; and (2) other adverse consequences. Kass notes that even if the initial aim of clinical applications is to assist married couples to bear children of their own, the techniques employed provide "the *immediate* possibility" of egg donation (egg from donor, sperm from husband), embryo donation (egg and sperm both from outside the marriage), and foster pregnancy (another woman carrying the pregnancy to term).[63] In Kass's view, there will be a strong demand for such extramarital uses of the clinical procedures—a demand which, if fulfilled, will further compromise "the virtues of family, lineage, and heterosexuality" or weaken "the taboos against adultery and even incest."[64]

Responses to the thesis that clinical uses of *in vitro* fertilization and embroyo transfer will weaken the family have taken two forms. The first, represented by Gorovitz, is to argue that the demand for labratory-assisted methods of reproduction in general will be limited and that other technological innovations (*e.g.*, modern contraceptive techniques) will have a much more significant adverse impact on the family.[65] A second kind of response, briefly developed by Leiman, is to deny that surrogate motherhood is necessarily detrimental to the family, if this novel method of becoming a parent is resorted to for good reasons (*e.g.*, if a couple would otherwise be unable to have a child).[66]

Other potential consequences considered adverse by some expert witnesses and commentators include:

a. The development of commercial ovum and embroyo banks.[67]

b. The genetic selection or manipulation of early embroyos.[68]

c. The transfer of nuclei from adult individuals to early embroyos, or cloning.[69]

d. Extracorporeal gestation, or bringing an embroyo all the way to viability in the laboratory.[70]

As noted in Section A of the present chapter, the second and fourth consequences in this list are regarded by some commentators as potential benefits of clinical *in vitro* fertilization and embryo transfer. Few have advocated that commercial ovum and embroyo banks be created or that human beings be cloned. Some commentators (for example, Gorovitz) have advanced the procedural suggestion that each potential consequence of *in vitro* fertilization and embryo transfer be carefully evaluated from the standpoint of both likelihood and probable impact.[71]

G. Questions of Allocation

Three general positions on the allocation issue can be distinguished. The first, represented by Biggers, is that applied laboratory research directed toward improving techniques for testing infertility by means of *in vitro* fertilization and embryo transfer should receive high priority—or, at least, that it should receive a higher priority than basic laboratory research involving human gametes and embroyos. The primary rationale for this position is Biggers' view that the supply of human ova available for research purposes is extremely limited and should devoted either to directly clinical purposes or to answering questions that cannot be satisfactorily resolved by studying laboratory animal.[72]

A second position, represented by Leiman[73] and Curran,[74] is that the federal government should support the clinical application of *in vitro* fertilization and embyro transfer. Leiman regards involuntary infertility as an extremely serious problem.

The rabbis put it this way, some fifteen centuries ago. Four are considered as if they

were dead; the poor, the diseased, the blind, and the childless.[75]

In his view, the public funding of medical means for overcoming infertility (for example, through Medicaid) is entirely appropriate. Indeed, Leiman argues that:

> It would be a sad commentary on the American ethos if federal funds could be used for the taking of human life, that is, therapeutic abortion, but not the creation of human life, that is, therapeutic conception.[76]

Although Kass disagrees with this second position; he presents an additional argument which some have used to support it:

> * * * As he who pays the piper calls the tune, Federal support would make easy the Federal regulation and supervision of this research.[77]

In contrast, a third position on allocation is that Federal funds should not be spent for *in vitro* fertilization and embryo transfer in clinical practice. Hauerwas, Gorovitz, and Kass all take this position, although for somewhat different reasons. In Hauerwas' view, the importance of being pregnant or of bearing a child that is genetically "one's own" has been overstated. Therefore the substantial investment of public funds to develop these anti-infertility techniques, particularly in light of other "immense needs of our society," (for example, the provision of an effective clotting factor for hemophiliacs) is inappropriate.[78] While he may not share Hauerwas' views on parenthood, Gorovitz agrees with his sense of priorities.

> In the competition for support, the burden of making a convincing case should rest with the proponent of a given line of work. With forty million Americans having no adequate access to decent health care, with thousands of children born annually without prospect of a family to nurture them, with veneral disease—a major cause of infertility—on the rise, it is implausible that research into making IVF more readily and reliably available should be a project of high priority concern. It isn't so much the harm or risk it involves as the plainly greater importance of addressing more fundamental and widespread problems of health and the delivery of health care.[79]

Kass presents three arguments for assigning a low priority to clinical applications of *in vitro* fertilization and embryo transfer. First, in agreement with Hauerwas and Gorovitz, he asserts that other health-related needs are more pressing. Kass goes on to argue that even within the sphere of infertility research, other approaches will be more cost-effective:

> * * * With money for research as limited as it is, research funds targeted for the relief of infertility should certainly go first to epidemiological and preventive measure—especially where the costs of success in the high-technology cure are likely to be *great*.[80]

Second, according to Kass, the non-financial costs of developing these technologies—that is, their potential adverse consequences—also militate against assigning their development a high priority.[81] Finally, Kass notes that a substantial number of American citizens are opposed on moral grounds to research on, or application of, *in vitro* fertilization in humans. In his view, these citizens would strenuously—and legitimately—object to any use of their taxes to promote human *in vitro* fertilization and embryo transfer.[82]

Chapter IV—Legal Issues Surrounding Human In Vitro Fertilization, Embryo Culture, and Embryo Transfer

Two papers written for the Board examined the legal issues surrounding human *in vitro* fertilization; one was prepared by Dennis Flannery and his colleagues at the Washington law firm of Wilmer, Cutler and Pickering, the other was written by Barbara Katz, Office of Legal Affairs, University of Colorado Medical Center. The discussion which follows reflects the legal analysis and conclusions presented by the two papers; in any areas where they differed, the differences are noted. Four main topics are addressed: (A) Existing law that might be applicable to human *in vitro* fertilization and embryo transfer; (B) Constitutional questions raised either by the use, or by restrictions imposed on the use, of the techniques; (C) possible implications for tort liability; and (D) criminal law.

A. Existing Federal and State Law Applicable to Human in Vitro Fertilization and/or Embryo Transfer

1. *Federal law.* The only existing federal control of human *in vitro* fertilization is a regulation of the Department of Health, Education, and Welfare:

> No application or proposal involving human *in vitro* fertilization may be funded by the Department or any component thereof until the application or proposal has been reviewed by the Ethical Advisory Board and the Board has rendered advice as to its acceptability from an ethical standpoint.[1]

In its notice of proposed rulemaking entitled "Protection of Human Subjects: Proposed Policy" issued August 23, 1974, the Department indicated the kind of issues it expected the Ethics Advisory Board to consider:

> With respect to the fertilization of human ova *in vitro*, it is expected that the Board will consider the extent to which current technology permits the continued development of such ova, as well as the legal and ethical issues surrounding the initiation and disposition of such products of research.
>
> With respect to implantation of fertilized human ova, it is expected that the Board will consider such factors as the safety of the technique (with respect to offspring) as demonstrated in animal studies and clarification of the legal responsibilities of the donor and recipient parent(s) as well as the research personnel.[2]

Two other general requirements of HEW regulations are presumably applicable to research involving human *in vitro* fertilization, as well. All such research conducted or supported by the Department must be reviewed by a local Institutional Review Board (IRB);[3] in addition, studies involving human *in vitro* fertilization should not be conducted or supported by HEW unless "appropriate studies on animals and nonpregnant individuals have been completed."[4]

Moreover, the Department interprets the National Research Act as authorizing (if not requiring) IRB review of human research not funded by HEW at any institution which receives a grant or contract involving human subjects under the Public Health Service Act.

> The Secretary shall by regulation require that each entity which applies for a grant or contract under this Act for any project or program which involves the conduct of biomedical or behavioral research involving human subjects submit in or with its application for such grant or contract assurances satisfactory to the Secretary that it has established (in accordance with regulations which the Secretary shall prescribe) a board (to be known as an 'Institutional Review Board') to review biomedical and behavioral research involving human subjects conducted at or sponsored by such entity in order to protect the rights of the human subjects of such research.[5]

However, the standards to be employed by the local Institutional Review Board in reviewing non-federally funded human research are not specified by the statute.

2. *State law.* No state has enacted legislation or promulgated regulations directly governing human *in vitro* fertilization and/or embryo transfer. Such laws or regulations could affect the conduct of research involving *in vitro* fertilization within particular jurisdictions, especially since the federal regulations governing such research specifically do not preempt state or local law in this sphere:

> Nothing in this subpart shall be construed as indicating that compliance with the procedures set forth herein will in any way render inapplicable pertinent State or local laws bearing upon activities covered by this subpart.[6]

The types of existing law which provide the closest analogies to human *in vitro* fertilization and/or embryo transfer are state statutes or court decisions concerning (a) artificial insemination and (b) research involving human fetuses.

Within the context of family law, the issue of artificial insemination, especially artificial insemination with donor sperm (AID), has received

legislative or judicial attention in approximately one-third of the states. Case law concerning AID has focused primary attention on whether AID is equivalent to adultery and thus, whether children conceived as a result of AID are legitimate. (Legitimacy has implications both for inheritance rights and for claims to paternal support.) The general trend of recent case law, particularly in California and New York, has been toward the view that AID does not constitute adultery and that children conceived as a result of AID are legitimate.[7] Nineteen states have enacted legislation regarding one or more aspects of artificial insemination; many of the statutes include a requirement for prior written consent by both husband and wife.[8] However, in the remaining states, the legal status of children conceived following AID is left in doubt.

A second area of state legislative interest—research with live human fetuses—is also at least partially analogous to research involving human *in vitro* fertilization. Approximately sixteen states have enacted statutes governing fetal research. The primary focus of all such statutes is the permissibility of research on the fetus (1) following implantation and (2) before, during, or after induced abortion. however, the language of at least one state statute on fetal research may be sufficiently broad to encompass, as well, research involving unimplanted early human embryos.[9]

B. Constitutional Issues

1. *Preliminary Distinctions.* Federal or state action may be found unconstitutional if it infringes upon a fundamental right of United States citizens and the government cannot demonstrate (1) that the law is necessary to protect a "compelling state interest" and (2) that it does not go beyond what is necessary to protect those interests.[10] If, on the other hand, a governmental action restricts individual activities in ways that do not infringe a fundamental right, then the government need only show that its action is rationally related to a constitutionally permissible purpose.[11] Thus, a critical question regarding human *in vitro* fertilization—whether in the laboratory or the clinical context—will be whether individuals proposing to employ, or seeking access to, the technique can be said to be asserting a fundamental legal right. This, in turn, determines whether the government will be required to justify its regulation of human *in vitro* fertilization by demonstrating a compelling state interest that it seeks to protect or only by demonstrating a rational basis for its action.

A second distinction is also important: the distinction between a governmental restriction of an activity, on the one hand, and a governmental decision not to fund the activity, on the other. In 1977, in a case challenging the constitutionality of restrictions on the use of Medicaid funds for abortions, the United States Supreme Court held that a governmental restriction of the use of public funds to support the exercise of a fundamental right does not, by itself, constitute impermissible interference with the exercise of that right.[12] The Court concluded that the existence of a fundamental right "implies no limitation on the authority of a state to make a value judgment [to discourage the exercise of that right] and to implement that judgment by the allocation of public funds." [13] As applied to the question of *in vitro* fertilization, that language suggests that a governmental decision to restrict either laboratory research or clinical applications of the technique would need stronger justification than would a decision not to provide funds for such activities.

2. *Clinical Applications of In Vitro Fertilization and Embryo Transfer.* Constitutional principles affecting reproductive activity are more fully articulated than those relating to basic laboratory research. Therefore, it is useful to examine the rights pertaining to reproductive choices before attempting to analyze what rights might be implicated in government regulation of basic laboratory research.

The argument for a constitutional right to reproduce by means of *in vitro* fertilization would rest on the right to privacy as related to procreation, the marital relationship, and contraception. In 1942, in a decision striking down Oklahoma's compulsory sterilization law, the Supreme Court held that individuals have a right to be free from unwarranted governmental interference with procreative capabilities. (*Skinner* v. *Oklahoma*) [14] This might be termed "the right to procreation." [15] A second constitutionally protected area is the privacy of the marital relationship. This was recognized in a 1965 decision (*Griswold* v. *Connecticut*) invalidating a Connecticut statute forbidding the use of contraceptives by married couples. There, the Court said:

> The entire fabric of the Constitution and the purposes that clearly underlie its specific guarantees demonstrate that the rights to marital privacy and to marry and raise a family are of similar order and magnitude as the fundamental rights specifically protected . . . . The fact that no particular provision of the Constitution explicitly forbids the State from disrupting the traditional relation of the family—a relation as old and as fundamental as our entire civilization—surely does not show that the Government was meant to have the power to do so.[16]

The privacy interests recognized in Griswold were expanded in later cases to include "the right of the individual, married or single, to be free from governmental intrusion into matters so fundamentally affecting a person as the decision whether to bear or beget children." [17]

The extent to which any individual's access to *in vitro* fertilization will be viewed as involving a fundametal right will depend upon how closely analogous it is to the rights recognized by the Supreme Court. Thus, for example, a married couple with no alternative means for having a child of their own could claim that restriction of access to *in vitro* fertilization is interference with the fundamental right of marital privacy and with their right to choose whether, and in what manner, to achieve procreation. Since these rights are reasonably analogous to those recognized by the Court in *Skinner*, *Griswold*, and *Eisenstadt*, the argument might well be persuasive. If the Court agreed with the view that the rights in this instance are fundamental, the government would have to demonstrate a compelling state interest to justify interfering with the exercise of those rights.

On the other hand, an unmarried woman who wished to utilize *in vitro* fertilization followed by embryo transfer to another (sorrogate) mother, in order to have a genetic child of her own without the expense and inconvenience of pregnancy, would have a much weaker case. There would be neither marital privacy nor a procreative capacity, in the normal sense, to protect. Thus, courts might well find the right asserted to be less than fundamental, and the government would have to show only a rational basis for restricting the exercise of that "right".

Several grounds for prohibiting or limiting access to clinical applications of *in vitro* fertilization could be advanced. First, a state or the federal government might argue that this reproductive technique inevitably involves the loss of human embryos. Accordingly, a government might enact legislation to protect early human embryos. Such a law might pass the rational basis test but might not withstand constitutional challenge by individuals who could assert a fundamental right to access to *in vitro* fertilization.[18]

A second possible basis for state intervention in the clinical applications of *in vitro* fertilization would be the government's interest in fostering marriage and discouraging illegitimacy. This rationale might be proffered, for example, in support of a law restricting publicly funded *in vitro* fertilization and emryo transfer to married couples.[19] This is little room for doubt that such a funding limitation would be found constitutionaly permissable; it is not clear, however, whether courts would uphold an outright prohibition on the access of single persons to *in vitro* fertilization and embryo transfer.[20]

Third, a government might prohibit or limit access to clinical applications of *in vitro* fertilization in order to preclude institutional or individual genetic planning or manipulation. It is been suggested that the potential social impact of a large-scale genetic program might justify governmental regulation, but that interference with the genetic planning of individual families would have to be justified by a compelling state interest.[21]

Fourth, a state or the federal government might conclude that the use of surrogate or host mothers in connection with clinical *in vitro* fertilization would create insuperable legal problems that would justify a prohibition of such activities—perhaps on the ground that service as a surrogate mother is an unacceptable form of employment.[22] In the opinion of Flannery and associates such a prohibition would probably withstand legal challenge on both "rational basis" and "compelling state interest" grounds.[23]

Finally, if clinical applications of *in vitro* fertilization should appear to present health risks to mother or offspring which are substantially greater than those usually associated with conception and childbirth, then a state or the federal government might well decide to prohibit or limit access to this reproductive technique. Whether such a state intervention would withstand constitutional challenge would depend in part on the probability and magnitude of the risks involved.[24]

In addition to making basic decisions regarding the regulation of access to clinical applications of *in vitro* fertilization, the states and the federal government may wish to establish policies on such related matters as the legal status of children who are produced by means of *in vitro* fertilization and embyro transfer, the role of attending physicians in decisions regarding implantation and abortion, and record-keeping requirements.[25]

3. *Laboratory Research Involving In Vitro Fertilization and/or Embryo Culture*—a. *Constitutional bases for asserting a right to perform or participate in laboratory research involving in vitro fertilization and/or embyro culture.* Two major constitutional arguments could be advanced in support of basic laboratory research involving human *in vitro* fertilization. The first is freedom of inquiry, or the right of scientists to perform their research without governmental interference. This argument can be asserted most vigorously in defense of research conducted without the assistance of government funding. The second is the right of individual's to dispose of their genetic material as they see fit.

In a recent report, the National Commission for the Protection of Human Subjects of Biomedical and Behavorial Research expressed the view that although the Supreme Court might recognize a First Amendment right to seek new ideas or knowledge (i.e., a "right to research")[26], that must be distinguished from a right to be free from regulations governing the manner in which research may be conducted.[27]

> • • • [T]he state may not interfere with the researcher's choice of the end or topic of research, but it may regulate only the methods used in the research, in order to protect interests in health, order and safety with which unrestricted research might conflict. Such restrictions are valid if they are reasonably related to protection of non-speech interests and are not so vague and over broad that they chill the exercise of protected speech.[28]

Accepting the National Commission's distinction between the goal and the manner of research as valid, then the applicability of this putative right to basic research involving human *in vitro* fertilization is problematic, since it is the manner of achieving the knowledge—that is, through the creation and study of human embryos—that is most likely to be the target of governmental regulation.[29]

A second constitutional argument in support of laboratory research involving human *in vitro* fertilization focuses attention on the rights of potential gamete donors to dispose of their reproductive cells in whatever manner they see fit. According to this view, donors have a "constitutionally protected fundamental privacy right to control the use and manipulation of their own genetic materials.[30] Such a privacy right is clearer, however, in cases involving contraception or abortion than in the case of genetic materials donated for basic laboratory research. Once the materials are outside the body of the donor, any personal rights of privacy regarding their use become attenuated.[31]

b. *Constitutional bases for governments' prohibiting or refusing to fund laboratory research involving human in vitro fertilization.* If the analysis of the preceding section is accepted, than it would appear that no fundamental constitutional right to perform or participate in basic research involving *in vitro* fertilization is likely to be found. In the absence of such a right, the government could, if it wished, prohibit *in vitro* fertilization research if it had a rational basis for doing so. A prohibition would most probably be based on the view that the creation, study, and destruction of early human embryos is inconsistent with the dignity which should be accorded to forms of potential human life. Even if a fundamental right to conduct or participate in such research did exist, the government could still decline to support it with public funds. Such a refusal could be based on an administrative determination that other areas of research would be more useful to the government.[32]

If research with early human embryos were to involve embryo transfer and subsequent implantation, the current HEW regulations governing fetal research would apply, since the "fetus" is defined as the embryo "from the time of implantation."[33] State statutes regarding fetal research might or might not apply, depending on their formulation.

In addition to deciding whether to prohibit or to support laboratory research involving human *in vitro* fertilization, states or the federal government might wish to formulate standards governing the conduct of such research, if the research is permitted. For example, regulations to protect the health of ovum donors or to set standards for protecting the dignity of potential human life might be adopted. Moreover, a government might require that gamete donors consent in advance to the use of their reproductive cells in research involving *in vitro* fertilization. These procedural regulations, designed to achieve a rational governmental purpose, should be constitutionally permissible.[34]

C. Liability for Injuries

The federal government might be liable for injuries arising from *in vitro* fertilization in research programs conducted or supported by HEW. This section explores three questions: (1) Whether such suits would be barred by the doctrine of sovereign immunity; (2)

what causes of action might be considered valid; and (3) whether a program could be established to provide compensation for such injuries.

1. *Sovereign immunity.* Under the Federal Tort Claims Act, the United States is liable for the "negligent or wrongful" acts or omissions of its employees while they are acting within the scope of their employment.[35] Exceptions to such liability include acts or omissions that are within an agency or officer's "discretionary duty" (as, for example, a decision to initiate a particular research program).[36] Whether the doctrine of sovereign immunity would bar a suit for damages arising within an HEW-conducted or supported research program involving *in vitro* fertilization would depend upon:

1. Whether the investigator is considered a federal "employee." (Does this category include, for example, grantees or contractors in HEW-funded research programs?)

2. Whether the alleged wrong occurred because of the employee's exercise of protected "discretionary functions" at the policy level or through a failure to exercise due care in a particular program at the operational level.

3. Whether the employee's act fell within an exception to liability under the Federal Tort Claims Act.

The Board's legal consultants suggest that the United States, but not individual investigators, would probably be liable for any negligence of subordinate HEW officers or employees who design or conduct a particular research program involving in vitro fertilization. If the conduct violated existing HEW regulations, even the discretionary exception would not prevent liability.[37]

2. *Possible causes of action*—a. *Actions on behalf of the child.* Two kinds of suits might be brought on behalf of a child born alive with handicaps following *in vitro* fertilization and embryo transfer. First, a suit might be brought on the basis of prenatal or even preconception injuries sustained by the child. (Preconception injuries might be claimed if, for example, laboratory procedures involving the gametes were thought to have given rise to the damage.) The plaintiff in such a suit would face the difficult task of demonstrating a causal connection between the procedures of *in vitro* fertilization or embryo transfer and the child's injuries.[38]

Alternatively, a "wrongful life" suit might be brought on behalf of a child born alive but handicapped following *in vitro* fertilization and embryo transfer. Such a suit would claim that it would be better for a child not to be born at all than to be born in a damaged condition. With one exception,[39] the courts have refused to recognize "wrongful life" as a valid ground for recovery of damages. This refusal appears to stem from a reluctance or inability to assign a monetary value to either impaired existence or nonexistence as a basis for recovery.[40] Even if "wrongful life" were accepted as a valid cause of action in principle, the plaintiff would still face the challenge of showing a causal connection between the procedures employed and the child's injuries.[41]

b. *Actions to compensate the parents.* Two distinct types of suit might be brought under this general heading. First, it might be claimed that negligently-caused damage to a child conceived by means of *in vitro* fertilization had caused the parents economic loss and/or emotional distress. Courts have held that the following "wrongful birth" suits stated a valid cause of action:

1. The mother of a severely deformed child brought suit against her physician for his failure to diagnose rubella during pregnancy.[42]

2. Parents brought suit against a physician for failing to diagnose a pregnancy in time to allow the woman to secure an abortion.[43]

3. A pharmacist was sued for mistakenly filling a prescription for the contraceptive Norinyl with a different drug, Nardil, when the woman subsequently became pregnant.[44]

4. A couple brought suit against a physician whose sterilization of the husband failed to prevent the wife's conception of a subsequent child.[45]

If a "wrongful birth" suit were brought because of the birth of a handicapped child following *in vitro* fertilization, the plaintiff would face the difficulties of demonstrating causation which have been alluded to in the preceding paragraphs.[46]

A second possible cause of action which might be brought by would-be parents on their own behalf is an action for the "wrongful death" of a hoped-for child. All states currently allow actions for wrongful death caused by prenatal injuries if the death occurs following live birth. In addition, many states allow recovery for the prenatal death of a viable fetus.[47] The question raised by *in vitro* fertilization and embryo transfer is whether the theory of "wrongful death" would be extended by the courts to cover preimplantation human embryos.

Under a somewhat different legal theory—one which focused on the destruction of the would-be parents' property rather than on the "wrongful death" of an early embryo—a New York jury recently awarded $50,000 for emotional distress following the intentional destruction of a culture containing gametes from the husband and wife.[48] In the opinion of Flannery and associates, it is unlikely that the courts will ultimately extend the concept of "wrongful death" to include the intentional destruction of a preimplantation embryo.[49] According to Katz, suits charging physician negligence in the unintentional death of an embryo or fetus conceived with the aid of *in vitro* fertilization are also unlikely to succeed because of the experimental character of the procedure and because of the absence of a clear standard of due care.[50]

3. *Compensation for injury.* In part because traditional tort concepts seem inapplicable to research involving *in vitro* fertilization and/or embryo transfer, Katz proposes the establishment of a federal compensation fund to provide monetary redress in the event of injury associated with such research.[51] In her view, the rationale for creation of such a fund is that society has a substantial interest in establishing a program of human *in vitro* fertilization research and therefore has an obligation to the human subjects who may be injured as a result of their participation in such a program. Any injury which is not clearly unrelated to participation in the *in vitro* fertilization program would be compensable. The amount of compensation would be determined by calculating the monetary requirements for making the situation of a damaged child or mother equal to that of a normal person, insofar as such calculation is possible. The compensation fund would be financed through premiums paid by researchers or their institutions, by adding a surcharge to hospital bills, or by allocating general revenues to this purpose. The plan would include financial incentives to encourage the exercise of due care by investigators and institutions.

D. Criminal Law

The primary question of criminal law that might arise is whether the act of allowing preimplantation human embryos to die or killing them would constitute the crime of feticide, a species of homicide. After surveying developments in English and American jurisprudence, Katz concludes that the destruction of preimplantation human embryos is not likely to fall within either homicide or feticide statutes.[52]

As noted above, however, state statutes enacted to regulate research involving human fetuses may be broad enough to include research involving preimplantation human embryos. For example, one state statute defines the "human conceptus" as "any human organism, conceived either in the human

body, or produced in an artificial environment other than the human body, from fertilization through the first 265 days thereafter." [53]

The statute continues:

> Whoever uses or permits the use of a living human conceptus for any type of scientific, laboratory research or other experimentation except to protect the life or health of the conceptus, or except as herein provided, shall be guilty of a gross misdemeanor.[54]

In summary, aside from HEW regulations governing research supported by the Department, and a very few broadly written state statutes prohibiting research on the human fetus, no state or federal laws apply to human *in vitro* fertilization. However, Supreme Court decisions recognizing a fundamental right to privacy in marital relations and reproductive activity suggest that married couples might successfully assert a right of access to *in vitro* fertilization and embryo transfer as a means of bearing their own children. The government would have to demonstrate a compelling state interest (*e.g.*, protecting the health and safety of mothers and offspring) to justify restricting such access. The government need not, however, provide federal support for such procedures. In the research context, the government may regulate the manner in which research is conducted, especially if the research is supported by funds and it involves human subjects. Questions about legal responsibility for the care of the offspring cannot be answered with clarity. Analogous statutory and case law in the field of artificial insemination suggests that the law in this area is confused, at best. Similarly, questions about liability and compensation for injuries to the mothers and offspring need to be addressed.

Chapter V.—Review of Public Attitudes

A. Responses Received by the EAB

Between September 15 and December 15, 1978, the Ethics Advisory Board held eleven public hearings on the question of federal support of research involving human *in vitro* fertilization (IVF) in order to afford an opportunity for members of the public to present their views. In all, several thousand hearing notices were sent to professional organizations, public interest groups, universities, clergy, and individuals. Everyone who requested to appear was heard; 179 individuals presented testimony in hearings in Bethesda (Maryland), Boston, Seattle, San Francisco, Atlanta, Kansas City, Detroit, Philadelphia, Denver, Dallas and New York City. Eighteen people preferred to submit formal written testimony in lieu of oral presentation. In addition, the Board received over 2000 letters and postcards, some of which were forwarded from President Carter and Secretary Califano.

Transcripts of all formal presentations (both oral and written) have been distributed to members of the Board and are available to the general public from the National Technical Information Service (NTIS). All of the correspondence received by the Board has been duplicated and distributed to members; copies are on file at the office of the EAB and are available for public inspection.

In the arguments and presentations made to the Board, it was evident that many people did not distinguish between basic research involving laboratory fertilization of human ova (IVF) on the one hand, and the subsequent transfer of the resulting embryos to establish a pregnancy, on the other. Thus, some of the arguments both for an against "*in vitro* fertilization" referred only to one or another of the procedures under consideration by the Board. At the public hearings, it was often possible to elicit clarification by asking whether a person's statement was intended to apply to both the basic research and the clinical application; this was not the case with respect to written communications. Summaries of the arguments are presented below.

1. *Arguments in favor of Federal Funding.* Although there were, of course, many variations on the theme, most of the arguments in favor of federal support of IVF focused on either the risks and benefits of IVF or the rights of investigators and infertile couples: (a) The scientific benefits to be gained; (b) the need for federal regulation; (c) the necessity to evaluate and to reduce the risks inherent in the procedure and the reliance of such research on federal suppport; (d) freedom of inquiry for scientists; (e) freedom of reproductive choice for infertile couples; and (f) the rights of infertile couples to some return on their taxes paid for general health and welfare.

The majority of individuals who favor federal funding for research involving human IVF stressed the benefits it would produce for the general welfare (*e.g.*, understanding and correcting infertility, preventing birth defects, understanding certain hereditary diseases, furthering the search for a cure for cancer, improving our knowledge of early fetal development, and developing better methods of contraception). A number of witnesses stated that there are many scientific procedures that can be used for either the benefit or the detriment of mankind; but the possibility for abuse does not in and of itself make their development morally wrong. Many responded to the concern regarding "discards" by noting that fertilized eggs are often lost in the natural process of reproduction. Some stated that it is morally irrelevant whether embryo loss occurs naturally or in a laboratory. Other individuals pointed out that zygote wastage may eventually be eliminated. For example, it may be possible to extract only one ovum at a time, as suggested by Dr. Steptoe (on Meet the Press), once the techniques of fertilization and embryo transfer are improved. Moreover, some public witnesses stated that once the technique of freezing the embryos is perfected, fertilized eggs that are not transferred immediately may be preserved for later attempts at implantation.

Numerous witnesses expressed concern about the possible risks of embryo transfer procedures already being performed in the private sector. A few stressed the need to hold investigators accountable for their actions; others urged federal support of the activities in order to apply regulations to assure that they will be conducted in a responsible manner. They thought that if the government were to fund research and adopt regulations governing the experimentation, investigators receiving non-government money would follow the government regulations.

Some stressed the need for government support to assure greater exploration of animal models and to encourage basic research in human IVF so that the safety and efficacy of the procedure can be evaluated before clinical application of embryo transfer is permitted. A related argument was that if research is permitted, scientists may be expected to improve the technique of *in vitro* fertilization and embryo transfer so that risks to mother and offspring will be substantially reduced.

Several individuals stressed the responsibility of the government to assure freedom of inquiry. Others urged the government to educate the public about the significance of new scientific discoveries to the public. They were concerned that the development of federal policy with such profound implications might be influenced by a public unnecessarily alarmed by inaccuracies and misinterpretations.

The last set of arguments in favor of federal funding related to the rights of infertile couples as taxpayers and the corresponding duties of the government. A number of individuals felt that since childless couples have paid taxes that subsidize the costs of contraception and childbearing, as well as education and welfare, for other people's children, the government has an obligation to assist them by supporting research and services relevant to their reproductive needs. Some argued that it is the government's responsibility to ensure freedom of choice for women by making both alternatives—raising a family or remaining childless—available to all couples.

It was stated that at the present time, adoption is not a viable alternative for childless couples. The waiting list for infants is very long and the cost for international adoption is exhorbitant and limited. There was additional testimony, however, that even if adoption procedures could be improved, problems would remain; adoption does not satisfy the very strong desire to bear one's own child. Some even suggested that the unfulfilled desire to bear children threatens the mental health of women and the stability of marriages. They argued that infertility is a disorder requiring medical intervention, and that the government has a responsibility to make such health care available to all citizens. Since the government funds therapeutic abortions when bearing a child would threaten the life or health of the mother, they noted, the government ought to fund "therapeutic conception" as well. Some elaborated on this argument, stating that government funding is necessary to assure that the option of having a child through *in vitro* fertilization is available to poor women as well as to those who are able to purchase the option in the private sector.

2. *Arguments Opposed to Federal Funding.* In general, the arguments against federal support of IVF and embryo transfer stemmed from five major concerns: (a) The moral status of the embryo; (b) questions of safety; (c) funding priorities; (d) decreasing ability to limit more objectionable procedures; and (e) detrimental social and psychological effects on offspring, family and physicians.

The most frequently articulated argument against federal funding of IVF was based on the moral status of the fertilized egg and embryo. Proponents of this argument believed that human life should be respected from the moment of fertilization. They argued that deliberately to create human life merely for experimental purposes with no intent or expectation of sustaining such life is immoral.

Since many fertilized eggs are discarded in the normal process of procreation some proponents of this position said that they might not oppose *in vitro* fertilization research if a technique could be perfected that would allow the investigators to extract and fertilize only one egg, or freeze for later transfer the embryos which could not be implanted immediately. Others stated that even if such a technique were perfected, it would still be unethical to fund *in vitro* fertilization research because of the immorality of interfering with the natural process of human reproduction.

Many individuals expressed concern about proceeding with embryo transfer in humans without further data concerning its safety. They believed that more should be known about the probability of producing defective embryos. They also thought it important to gain more information concerning level of risk to the women undergoing the procedures. Among opponents of federal funding on the grounds of safety were those who thought that people have a right to take risks by volunteering for research conducted in the private sector, but that it is unethical for the government to approve and support IVF and embryo transfer in humans before the risks and benefits have been more fully evaluated.

A large number of persons opposed government funding of IVF and embryo transfer because they believe it is not an important national priority. Various other needs were suggested as having greater claims upon government funds. A favorite alternative was research to develop methods of preventing and treating disorders (such as pelvic infectious diseases) that result in the tubal occlusion giving rise to demands for IVF. Others indicated that funds would be better spent in improving fertility control and in learning to prevent or treat birth defects and genetic abnormalities. Still others stressed society's responsibility toward those children already in existence who have been abused or abandoned. Programs encouraging adoption should have higher priority than IVF. There were also those who believed it

inappropriate to fund IVF when the majority, they were certain, opposed such research on deeply-felt ethical or religious grounds. The government should not spend public money for experiments so clearly in conflict with the basic commitments of many of the citizens.

Some expressed a fear that approving policies that permit researchers consciously to intend human life to die *in vitro* could lead to an inability to draw barriers to policies that allowed more obviously objectionable occasions for humans to end the life of other humans. Some proponents of this argument believed that the selective destruction of undesirable fertilized eggs might contribute to the creation of a eugenic program controlled by some officially condoned elite. There was even the fear that barriers would fall to the creation of half-animal, half-human hybrids or chimeras.

A variety of harmful consequences to the psychological and social well-being of those involved in IVF were cited as reasons for not funding such research. Fears were expressed that children born through *in vitro* fertilization would initially be subject to considerable notoriety and be unable to escape a continuing stigma. There was concern that IVF might endanger the family by reducing the human act of reproduction to an artificial or mechanical laboratory procedure. An even greater threat to the family would be the possible use of surrogate mothers and extra-marital donors of genetic material. This set of reasons for opposing government funding of IVF included the dehumanizing of scientists and doctors involved in the research who must dispose of the human embryos. Another possible consequence cited as a reason for opposing funding was the possible exploitation of uneducated, poor and minority women.

B. *Public Opinion Surveys*

Since the birth of Louise Brown on July 25, 1978, both the Gallup and Harris survey organizations have conducted polls providing the clearest indication available of United States public opinion concerning IVF. The Gallup survey included reactions of both men and women. The Harris survey, conducted August, 1978 for *Parents* magazine, polled 1,501 representatively selected American women. Both polls revealed that majority opinion favors IVF. However, most women in the Harris survey wanted IVF prohibited until further testing had established its safety, and they opposed federal funding of research on IVF.

Gallup reported that 60% of both men and women "favored" the operation. Of persons who could fully explain the procedure, 75% approved, indicating that more knowledge of IVF led to greater acceptance. Approval was even higher among the women in the Harris poll. Eighty-five percent said that the procedure should be an option for couples otherwise unable to have children.

As to whether Americans would be willing to avail themselves of the operation, the two polls reported that a majority would do so. Gallup found 53% of Americans generally would undergo the procedure. Harris reported that 58% of women of childbearing age would consider using IVF. More specifically defined groups among childbearing women produced even more favorable attitudes: 61% of younger women, age 18–39, approved of IVF, as did 66% of the women actually planning to have children.

While most women in the Harris survey approved of IVF as a legitimate option, when they were asked if they couldn't have children would they prefer adoption or IVF, more than twice as many chose adoption (57%) as IVF (21%). Furthermore, a healthy majority (63%) wanted IVF to be banned as standard medical practice until further research had determined whether the operation increased the likelihood of birth defects. (Only 24% wanted IVF available immediately.) Interestingly, although most women wanted further testing of IVF, half (50%) opposed federal funding of such research.

Public Witnesses

Atlanta, Georgia

Catherine S. Amos, O.D., Private Citizen, Birmingham, Alabama.
Mrs. Barbara Holmes, Adoption Consultant, Department of Human Resources, State of Georgia, College Park, Georgia.
Joseph P. Williams, M.D., Private Citizen, Athens, Georgia.

Josef Seifert, Ph.D., Associate Professor of Philosophy and Director of Graduate Philosophy Program, University of Dallas, Irving, Texas.
J. Patrick McCarty, M.D., University of Texas, Southwestern Medical School, Dallas, Texas.
L. Russell Malinak, M.D., Baylor college of Medicine, Houston, Texas.
Mr. Louis A. Shone III, Private Citizen, Dallas, Texas.

Denver, Colorado

Vicar James Cotter, Bethlehem Lutheran Church, Lakewood, Colorado.
Virgil Dechant, Supreme Knight, Knights of Columbus, Aurora, Colorado, (Testimony presented by William Small).
Caroline Reutter, M.D., Women's Medical Association.
Frank Morrise, Contributing Editor, The Wanderer, St. Paul, Minnesota.
Angeline D. Heaton, M.D., President, American Medical Women's Association, Colorado Commission on Women, Denver, Colorado.
George Betz, M.D., School of Medicine, Professor of Obstetrics & Gynecology, Denver, Colorado.
Earl F. Dodge, President, Colorado Right to Life Committee, Denver, Colorado.
Father Gerald Sullivan, Catholic Social Services, Casper, Wyoming.
Dr. Thomas C. Washburn, University of Colorado Medical Center, Denver, Colorado.
Joseph D. McInerney, Center for Education in Human and Medical Genetics, Boulder, Colorado.
Reverend Alex Lukens, Jr., Episcopal Priest and Hospital Chaplain.
Rand L. Kannenberg, Private Citizen, Colorado Springs, Colorado.
Andrew D. Keller, Private Citizen, Longmont, Colorado.
Richard P. Francis, Ph.D., Professor of Ethics, University of Colorado, Colorado Springs, Colorado.
A. D. Lodwick, Private Citizen, Denver, Colorado.
Father Nicholas Persech, Dean of Theology School at St. Thomas Seminary, Denver, Colorado.
Ruth Dolan, President, Denver Metro Chapter of Colorado Right to Life Committee, Denver, Colorado.
Barbara Zibbidee, Private Citizen, Greeley, Colorado.
Carol Lees, Private Citizen, Denver, Colorado.
Jerry Durnford, Private Citizen, Denver, Colorado.
Mary Rita Urbish, Colorado Right to Life, Denver, Colorado.
Janet Foster, Private Citizen, Denver, Colorado.

Detroit, Michigan

Diane Fagelman, Private Citizen, Pontiac, Michigan.
Father Walter A. Markowicz, Archdiocese of Detroit, Detroit, Michigan.
David Favre, Professor of Law, Detroit College of Law, Detroit, Michigan.
Sister Betty Gaies, Office of Health Affairs, Diocese of Lansing, Lansing, Michigan.
Dr. Hans A. Schieser, Associate Professor of Education, DePaul University, Chicago, Illinois.
David Thompson, Private Citizen, Detroit, Michigan.
Judy Jones, Private Citizen, Farmington Hills, Michigan.
Frank Teskey, Regional Director, Catholics United for Faith, Royal Oak, Michigan.
Patricia Nixon, President, Educational Center for Life Values, Birmingham, Michigan.
Tom Evans, M.D., Chairman, Department of Obstretics and Gynecology, Wayne State University, Detroit, Michigan.

Kansas City, Missouri

Helen Froesman, Archdiocese of Kansas City, Kansas City, Kansas.
Mrs. Jane Clark, Private Citizen, Overland Park, Kansas.
Mr. Kevin Conley, Private Citizen, Kansas City, Kansas.
Mrs. Ginger Drybread, Private Citizen, Olathe, Kansas.
Right Reverend Jerome Hanus, Abbot, Order of St. Benedict, Conception Abbey, Conception, Missouri.
Carolyn Harris, Diocesan Council of Catholic Women, Kansas City, Missouri.
Linda J. Borman, Private Citizen, Council Bluffs, Iowa.
Mr. Norman Bettis, PRO-Family Forum, Kansas City, Missouri.
Ann O'Donnel, R.N., Missouri Citizen for Life, St. Louis, Missouri.
Reverend Alberts S. Morzczewski, O.P., Ph.D., President, Pope John XXIII, Medical-Moral Research and Education Center, St. Louis, Missouri.
Fred Bolton, Pro-Life and Life Advocates of Wyandotte County, Kansas City, Kansas.
Shirley Woods, Saint Peters Pro-Life Group, Kansas City, Kansas.
Sister Aerab Pottinger, Embryologist, St. Mary's Hospital, Kansas City, Missouri.
Mary Miller, Chairperson, Eastern Kansas, Right to Life.
Mr. Terry Richards, Private Citizen, Kansas City, Kansas.

Philadelphia, Pennsylvania

Councilman James J. Tayoun, Philadelphia, Pennsylvania.
Dr. William Mellman, Professor and Chairman, Department of Human Genetics, University of Pennsylvania, Philadelphia, Pennsylvania.
Edward Wortham, Ph.D., Assistant Professor of Biological Sciences, Old Dominion University, Norfolk, Virginia.
Brother Patrick Ellis, President, LaSalle College, Philadelphia, Pennsylvania.
Edward Stemmler, M.D., Dean, School of Medicine, University of Pennsylvania, Philadelphia, Pennsylvania.
Mrs. Peter Hoffman, Private Citizen, Wallingford, Pennsylvania.
Mr. Sam A. Banks, President, Dickinson College, Carlisle, Pennsylvania.
Mrs. Patricia Provost, Private Citizen, Bryn Mawr, Pennsylvania.
Mrs. Adelaide Bracalenti, Private Citizen, Woodlyn, Pennsylvania.
Ms. Donna Draus, Private Citizen, Philadelphia, Pennsylvania.
Emanuel Heigelman, D.O., Private Citizen, Philadelphia, Pennsylvania.
Mr. Ronald Zukin, Private Citizen, Westchester, Pennsylvania.
Mrs. Ann Schecter, Private Citizen, Bala Cynwyd, Pennsylvania.
Joseph Gambescia, M.D., St. Agnes Hospital, Philadelphia, Pennsylvania.
Carl Startk, M.D., Mayor, Wytheville, Virginia.
Mrs. Eileen Meyers, Co-Chairman, Stop ERA in Pennsylvania, Cornwells Heights, Pennsylvania.
Ms. Malana Petite, Women Ad Hoc Health Commission, Philadelphia, Pennsylvania.
David E. Price, M.D., Special Assistant to Provost and Director of Research Programs, Johns Hopkins School of Medicine, Baltimore, Maryland.
Reverend James J. McCartney (on behalf of), Warren T. Reich, Ph.D., Georgetown University School of Medicine, Washington, D.C.
Deborah DeBardeleben, President, L.I.F.E. America, Quanyville, Pennsylvania.
Mr. J. P. Stanton, Director, Pennsylvania Right to Life, Jenkintown, Pennsylvania.
Mr. Harold W. Luebes, Administrator, Children's Hospital of Pittsburgh, Pittsburgh, Pennsylvania.
George Isajiw, M.D., Private Citizen, Upper Darby, Pennsylvania.
Mr. Robert Korsan, Private Citizen, Philadelphia, Pennsylvania.
Jay W. MacMorae, M.D., Chairman, Commission of Medicine, Religion and Bioethnics, Pennsylvania Medical Society, Lemoyne, Pennsylvania.
Dr. Donald Self, Bioethicist & Director of Human Values in Medicine, Eastern Virginia Medical School, Norfolk, Virginia.
P. Apostolidis, M.D., Clinical Associate Professor of Gynecology at Jefferson Medical College, Philadelphia, Pennsylvania.
John M. Levinson, M.D., President-Elect of the Delaware Obstetrical Society, Wilmington, Delaware.
Mr. Gizzi, Private Citizen, Mawhaw, New Jersey.

Gino Pappola, M.D., President, International Federation of Catholic Medical Associations, Philadelphia, Pennsylvania.
Ms. Katherine Gillet, Private Citizen, Philadelphia, Pennsylvania.
Reverend Francis Meehan, Archdiocese of Philadelphia, Philadelphia, Pennsylvania.
Allen Enders, Ph. D., Researcher, 5University of California, Davis, California.
Raymond Dennehy, Ph. D., Department of Philosophy, University of San Francisco, San Francisco, California.
Donna Daenti, M.D., University of California, San Francisco, California.
Ann K. Brothers, Ph. D., Assistant Professor, Department of Zoology, University of California, Berkeley, California.
Mary Anne Schwab, Legislative Information Chairman, National Council of Catholic Women, San Francisco, California.
Diane Coleman, Private Citizen, San Francisco, California.
David Schaeffer, Private Citizen, San Francisco, California.
Edward E. Wallach, M.D., Director, Obstetrics and Gynecology, Pennsylvania Hospital & Professor, Obstetrics and Gynecology, University of Pennsylvania School of Medicine, Philadelphia, Pennsylvania.
Francis Felice, Professor of Biology, University of San Francisco, Deacon, Archdiocese of San Francisco, San Francisco, California.
Philip Martin, Private Citizen, San Francisco, California.
Deborah Streeter, Private Citizen, Berkeley, California.
Mr. Paul Herbert, Private Citizen, San Francisco, California.
Judy Johnson, Private Citizen, San Francisco, California.
Leonie Watson, M.D., National Doctors for Life, San Francisco, California.
Mitchell S. Golbus, M.D., University of California, San Francisco, California.
Roger A. Pederson, Ph. D., Professor of Radiobiology, University of California Medical Center, San Francisco, California.
Robert Glass, Ph. D., University of California, Berkeley, California.
Ms. Nancy Fund, Research Associate, Health Services, Research, Stanford Univrsity.
Mrs. Norge Humeniuk, Private Citizen, Mills Valley, California.
Evelyn Eaton, Ph. D., Sociology (free-lance).
Mrs. Arlene Kessler, Private Citizen, Oakland, California.
David Galvin, Private Citizen, Oakland, California.
Mr. Robert Kessler, Private Citizen, Oakland, California.
Ms. Lois Bogarot, Private Citizen, Redwood City, California.
Bruce Hilton, Ph. D., National Center for Bioethics, Berkeley, California.
Lynn Szwabinsky, Private Citizen, Concord, California.
George Maloff, M.D., Pro-Life Medical Association of California, San Francisco, California.

Seattle, Washington

Dr. Lawrence Karp, Associate Professor of Obstetrics and Gynecology, University of Washington, Seattle, Washington.
Lois Lundquist, Private Citizen, Issaquah, Washington.
Joan Ramos, Private Citizen, Seattle, Washington.
Reverend Stanley Stefancic, East Shore Unitarian Church, Bellevue, Washington.
Janice Rowe, Private Citizen, Seattle, Washington.
Robert E. McIntosh, M.D., Private Citizen, Seattle, Washington.
Margaret K. Ose, Private Citizen, Mercer Island, Washington.
Dale Beasley, Department of Science, St. Philomena School, Des Moines, Washington.
Mrs. Cynthia Bortz, Program Assistant, Department of Obstetrics & Gynecology, University Hospital, Seattle, Washington.
Connie Miller, Private Citizen, Seattle, Washington.
Lex Motti, M.D., Virginia Mason Hospital, Seattle, Washington.
Donald E. Moore, M.D., Assistant Professor and Director, Division of Reproductive Endocrinology and Infertility, University Hospital, Seattle, Washington.
Dr. Richard M. Soderstrom, Past President of the American Association of Laparoscopy, Seattle, Washington.

Individuals Who Submitted Written Testimony in lieu of Oral Presentation

Rev. Joseph C. Frisch, Ph.D., S.T.D., Philosophy Department, College of Saint Teresa, Winona, Minnesota.
Nancy J. Schmitt, Adoption Research Council, Potomac, Maryland.
Michael A. Gobeen, Private Citizen, Kalamazoo, Michigan.
Perry Stearns, M.D., Wayne County Department of Health, Eloise, Michigan.
Susan L. Heine & John D. Heine, Private Citizens, Annandale, Virginia.
Dona B. Morris, Private Citizen, Arlington, Virginia.
Rev. Charles McConnell, Salem Bible Fellowship Church, Allentown, Pennsylvania.
Connie Brewer, Private Citizen, La Mirada, California.
Amitai Etzioni, Director, Center for Policy Research, Professor of Sociology, Columbia University, New York, New York.
James H. Sammons, M.D., Executive Vice-President, American Medical Association, Chicago, Illinois.
John Hoaglund, Private Citizen, Newport News, Virginia.
Maureen E. Webb, Assistant Professor in Biological Science, Holy Name College, Oakland, California.
Walter Funk, Chairman, Department of Health, West Chester State College, West Chester, Pennsylvania.
Laurence B. McCullough, Ph.D., Assistant Professor, College of Medicine, Texas A & M University, College Station, Texas.
Dr. William R. Cunnick, President, American Social Health Association, Palo Alto, California.
Mary Stirling, Private Citizen, Mountaintop, Pennsylvania.
Paul Ramsey, Professor of Religion, Princeton University, Princeton, New Jersey.
Dolores R. Lear, Private Citizen, Kansas City, Missouri.

Chapter VI—Summary and Conclusions

It is now technically possible to fertilize a human egg outside the body of a woman and then transfer the fertilized egg (sometimes called a blastocyst or preimplantation embryo) back into the woman to establish a pregnancy. For some women, *in vitro* fertilization may be the only way to bear children of their own. It does not appear, however, that the procedure for achieving pregnancy by this means is yet very effective; the best available data indicate that a number of attempts have been necessary before a pregnancy in a particular woman can be established, if at all. In addition, many questions remain as to the safety of the procedure for the offspring. Nevertheless, there is reason to believe that clinics may soon be established, both in this country and abroad, where *in vitro* fertilization and embryo transfer will be offered as "therapy" for infertile couples.

The Board is required by HEW regulations to review research proposals involving human *in vitro* fertilization and advise the Secretary as to their "acceptability from an ethical standpoint." [1] This phrase is broad enough to include at least two interpretations: (1) "Clearly ethically right" or (2) "ethically defensible but still legitimately controverted." In finding that research involving human *in vitro* fertilization is "acceptable from an ethical standpoint" the Board is using the phrase in the second sense; the Board wishes to emphasize that it is *not* finding that the ethical considerations against such research are insubstantial. Indeed, concerns regarding the moral status of the embryo and the potential long-range consequences of this research were among the most difficult that confronted the Board.

In its deliberations on human *in vitro* fertilization, the Board confronted many ethical, scientific and legal issues. Among the more difficult were the following: (A) The moral status of the embryo; (B) the safety and efficacy [2] of the procedure; (C) the potential long-range adverse effects of such research; and (D) the appropriateness of Departmental support.

[1] 45 CFR 46.204(d).
[2] By "efficacy" the Board means not only whether the procedure can be done but also how efficient it is, e.g., the number of procedures required to achieve the desired result.

A. After much analysis and discussion regarding both scientific data and the moral status of the embryo, the Board is in agreement that the human embryo is entitled to profound respect; but this respect does not necessarily encompass the full legal and moral rights attributed to persons. In addition, the board noted the high rate of embryo loss that occurs in the natural process of reproduction. It concluded that some embryo loss associated with attempts to assist otherwise infertile couples to bear children of their own through *in vitro* fertilization be regarded as acceptable from an ethical standpoint, under certain conditions, as more fully described below.

B. The Board is concerned about still unanswered questions of safety for both mother and offspring of *in vitro* fertilization and embryo transfer; it is concerned, as well, about the physical and mental health of the children born following such a procedure and about their legal status. Many women have told the Board that in order to bear a child of their own they will submit to whatever risks are involved. The Board believes that while the Department should not interfere with such reproductive decisions, it has a legitmate interest in developing and disseminating information regarding safety and health so that fully informed choices about reproduction can be made.

C. A number of fears have been expressed with regard to adverse effects of technological intervention in the reproductive process: fears that such intervention might lead to genetic manipulation or encourage casual experimentation with human embryos, or bring with it the use of surrogate mothers, cloning, or the creation of genetic hybrids. Some have suggested that such research might also have a dehumanizing effect on investigators, the families involved, and society generally. (See Chapter III of this report.)

Although the Board recognizes that there is an opportunity for abuse in the application of this technology as other technologies, it concluded that a broad prohibition of research involving human *in vitro* fertilization is neither justified nor wise. Among the developments warned against by some who testified before the Board, a few (*e.g.*, the cloning of human beings and the creation of animal/human hybrids) are of uncertain or remote risk. Other possible developments, such as the use of surrogate mothers, may be contained by regulation or legislation. Other abuses may be avoided by the use of good judgment based upon accurate information of the type collected by the Board and now being disseminated in this report. Finally, where reproductive decisions are concerned, it is important to guard against unwarranted governmental intrusion into personal and marital privacy.

D. The question of Federal support of research involving human *in vitro* fertilization and embryo transfer was troublesome for the Board in view of the uncertain risks, the dangers of abuse and because funding the procedure is morally objectionable to many. In weighing these considerations, the Board noted that the procedures may soon be in use in the private sector and that Departmental involvement might help to resolve questions of risk and avoid abuse by encouraging well-designed research by qualified scientists. Such involvement might also help to shape the use of the procedures through regulation and by example. The Board concluded that it should not advise the Department on the level of Federal support, if any, of such research; but it concluded that Federal support, if decided upon after due consideration of all that is at issue, would be acceptable from an ethical standpoint.

Evidence presented to the Board indicates that human *in vitro* fertilization and embryo transfer techniques may, in the near future, be employed throughout the world in both research and clinical practice settings. The Board believes that data from these activities as well as related types of animal research should be collected, analyzed and, when appropriate, given wide public dissemination. Accordingly, the Board recommends in conclusion #4 below, that the Department take the primary initiative in carrying out these functions.

Having carefully weighed diverse ethical points of view and a broad base of scientific considerations regarding human *in vitro* fertilization and embryo transfer, the Board has concluded that: (1) The Department should consider support of more animal research in order to assess the risks to both mother and offspring associated with the procedures; (2) the conduct of research involving human *in vitro* fertilization designed to establish the safety and effectiveness of the procedures is ethically acceptable under certain conditions; (3) Departmental support of such research would be acceptable from an ethical standpoint, although the Board did not address the question of the level of funding, if any, which such research might be given; (4) the Department should take the initiative in collecting, analzing and disseminating data from both research and clinical practice involving *in vitro* fertilization throughout the world; and (5) model or uniform laws should be developed to define the rights and responsibilities of all parties involved in such activities.

Finally, the Board is aware of the possibility of research that involves the collection and culture of early human embryos in the laboratory which have been fetilized naturally rather than *in vitro*. The ethical aspects of such research, which appears to bear a close resemblance to research involving *in vitro* fertilization, have not been examined by the Board. Therefore it has not reached a conclusion concerning the ethical acceptability of these procedures. However, the Board intends to consider in the near future the need for setting standards for such research.

Conclusion (1).—The department should consider support of carefully designed research involving *in vitro* fertilization and embryo transfer in animals, including nonhuman primates, in order to obtain a better understanding of the process of fertilization, implantation and embryo development, to assess the risks to both mother and offspring associated with such procedures, and to improve the efficacy of the procedure.

Discussion: As indicated in Chapter III of the Board's report, available scientific data do not indicate clearly either the relative safety or the efficacy of procedures of *in vitro* fertilization and embryo transfer. Some scientists have suggested that *in vitro* fertilization may result in a higher incidence of abnormal embryos than is associated with the normal reproductive process, although there are no animal data that clearly demonstrate such an effect. Neither are there data that demonstrate an absence of increased abnormality in embryos following *in vitro* fertilization. The Board feels that additional data should be gathered that might indicate whether abnormal embryos are more likely to result and, if so, whether there is a significant increase in the risk of abnormal offspring actually being born following such procedures.

Experts appearing before the Board agreed that there has been insufficient controlled animal research designed to determine the long-range effects of *in vitro* fertilization and embryo transfer. The lack of primate work is particularly noteworthy in view of the opportunity provided by primate models for assessing subtle neurological, cognitive and developmental effects of such procedures. The Board has been advised that controlled studies of embryo

transfer following *in vitro* fertilization in animals, designed to include developmental assessments, may be feasible and may permit more confident estimates of the risk to human offspring associated with such procedures.

Information regarding the effectiveness of the procedures for *in vitro* fertilization and embryo transfer is also lacking. It does not appear possible to predict with reliability the number of laparoscopies and embryo transfers that might be required, or the likelihood of success of the procedure for any couple, given the fact that, to date, only three successes have been reported in humans, and that very limited information is available concerning this work. Such data as are available suggest that any woman hoping to bear a child through *in vitro* fertilization is likely to face numerous unsuccessful procedures and delays with no assurance of achieving her goal.

Careful research with animal models might provide a more accurate estimate of the chances of achieving a successful pregnancy. It might also reduce the inconvenience and risk to women of undergoing multiple procedures to establish a pregnancy by improving techniques for recovering ova, identifying embryonic abnormalities and achieving implantation. It is often the case in medicine that, even after therapies are already being applied to humans, investigations continue in animals in order to test further or to improve their safety and effectiveness. The Board believes that the Department should consider support of well-designed animal studies whether or not human research or clinical trials are also in progress.

Conclusion (2)—The ethics advisory board finds that it is acceptable from an ethical standpoint to undertake research involving human *in vitro* fertilization and embryo transfer provided that:

A. If the research involves human *in vitro* fertilization without embryo transfer, the following conditions are satisfied:

1. The research complies with all appropriate provisions of the regulations governing research with human subjects (45 CFR 46);

2. The Research is designed primarily: (A) To establish the safety and efficacy of embryo transfer and (B) to obtain important scientific information toward that end not reasonably attainable by other means;

3. Human gametes used in such research will be obtained exclusively from persons who have been informed of the nature and purpose of the research in which such materials will be used and have specifically consented to such use;

4. No embryos will be sustained *in vitro* beyond the stage normally associated with the completion of implantation (14 days after fertilization); and

5. All interested parties and the general public will be advised if evidence begins to show that the procedure entails risks of abnormal offspring higher than those associated with natural human reproduction.

B. In addition, if the research involves embryo transfer following human *in vitro* fertilization, embryo transfer will be attempted only with gametes obtained from lawfully married couples.

Discussion: This conclusion relates to the ethics of conducting research involving *in vitro* fertilization in general; it does not address the question of Departmental support of such research. The purpose of this more general conclusion is to provide guidance to Institutional Review Boards and other groups who are asked to review research that will not be supported by HEW.[8] Whether or not the Department decides to provide funds for such research, the Board wishes to express its views regarding the conduct of human *in vitro* fertilization and embryo transfer, so that review groups may benefit from the deliberations of the Board as they conduct their own review of specific research proposals.

As emphasized above, the Board believes that much remains to be learned about the safety and effectiveness of these procedures before they can be considered standard, accepted medical practice. Research designed to provide reliable data regarding safety and efficacy is acceptable from an ethical standpoint if conducted within the constraints indicated above. In the case of research involving embryo transfer, the Board intends not only that the gametes be obtained from lawfully married couples but also that the embryo be transferred back to the wife whose ova were used for fertilization.

The Board also discussed research designed primarily to establish safety and efficacy but which may, in addition, obtain information of scientific importance unrelated to *in vitro* fertilization and embryo transfer. The Board believes that such research, if performed as a corollary to research designed primarily to establish safety and efficacy of *in vitro* fertilization and embryo transfer, would also be acceptable from an ethical standpoint.

Conclusion (3)—The Board finds it acceptable from an ethical standpoint for the department to support or conduct research involving human *in vitro* fertilization and embryo transfer, provided that the applicable conditions set forth in conclusion (2) are met. However, the Board has decided not to address the question of the level of funding, if any, which such research might be given.

Discussion: 1. *Departmental support.* The Board consciously adopted the language "acceptable from an ethical standpoint" to indicate the limits of its inquiry. Even though the members are aware that ethical considerations pervade decisions regarding the level, if any, of Departmental support of human *in vitro* fertilization, the Board has concluded that it lacks the resources needed to render meaningful advice with respect to such decisions. The Board, therefore, defers to established political, scientific and administrative procedures for allocating public research funds.

The Board wishes to note that such decisions have significant ethical dimensions. For example, some believe that research involving human *in vitro* fertilization should have a relatively low priority at a time when other health needs, arguably more basic in character and long-term in nature, are unmet. Others find such research objectionable either on grounds related to the moral status of the embryo or because it may lead to undesirable genetic interventions or have a long-range adverse effect. (See Chapter III of this report.) Still others believe that research on human *in vitro* fertilization and embryo transfer should have a high priority because it might help parents overcome physical obstacles to having their own children and ensure the mothers' safety and the normality of offspring.

The Board has found that these and other ethical arguments for and against public funding of research involving human *in vitro* fertilization, by themselves, are not conclusive. Instead, the Board believes that the questions of whether to fund and at what level should be made in the larger context where all relevant data and arguments—scientific, political, economic, legal and ethical—can be considered. In that context questions such as health and safety, availability of funds, and alternative research

[8] Federal law requires all institutions receiving research funds from HEW to establish an Institutional Review Board (IRB) to review biomedical and behavioral research involving human subjects. (Pub. L. 93-348). The Department, in implementing that law, requires all such research conducted at an institution to be reviewed by the IRB, whether or not the research is supported by HEW.

proposals, must be considered along with the very difficult type of ethical issues described above which arise in allocation of resources.

2. *Research without embryo transfer.* As previously noted the risks of producing abnoraml offspring are still undertermined; therefore, an important goal would be to gain as much information as possible from well-designed research on *in vitro* fertilization not involving embryo transfer in humans. The Department should conduct a careful scientific evaluation of the possibility, supported by some expert testimony before the Board, that animal research and studies involving human *in vitro* fertilization without embryo transfer, over a relatively short period, might substantially increase our knowledge concerning the possible risk of abnormal offspring as well as lead to the development of safe and more effective techniques.

3. *Research involving embryo transfer.* While initial research efforts designed to gain as much information as possible form animal studies and human research not involving embryo transfer may be desirable, the Board does not wish to discourage planning and preparation that may lead to clinical trials or other forms of research involving embryo transfer. The Department's participation in, or support of, clinical trials is often an effective method to evaluate the safety and efficacy of innovative medical procedures, particularly as the use of the procedures increases.

4. *Research for other purposes.* Potentially valuable information about reproductive biology, the etiology of birth defects, and other subjects may be revealed through research involving human *in vitro* fertilization without embryo transfer, and unrelated to the safety and efficacy of procedures for overcoming infertility. The Board makes no judgment at this time regarding the ethical acceptability of such research nor does it speculate about what research might be sufficiently compelling to justify the use of human embryos. Instead, it notes that applications for support of such research should be submitted to the Board for ethical review in accordance with 45 CFR 46.204(d).

5. *Pending Research Application.* Given the criteria specified in Conclusion (2) and incorporated in Conclusion (3) for evaluating research involving human *in vitro* fertilization, and the Board's views about Departmental support of such research, the Board recommends that the Secretary refer the pending application of Vanderbilt University back to the National Institutes of Health for a determination as to whether the proposal meets those criteria and for further review in light of the considerations set forth in this report.

Conclusion (4)—The national institute of child health and human development (NICHD) and other appropriate agencies should work with professional societies, foreign governments and international organizations to collect, analyze and disseminate information derived from research (in both animals and humans) and clinical experience throughout the world involving *in vitro* fertilization and embryo transfer.

Discussion: The Board is aware that the most valuable information regarding *in vitro* fertilization and embryo transfer is likely to come from well-controlled clincial trials. But it is expected that *in vitro* fertilization and embryo transfer will soon be performed in clinics throughout the world, sometimes without benefit of research design or experimental controls. It would be unfortunate not to have access to the information that might be gained from such clinical experience, notwithstanding the fact that well-designed investigations would be preferable. With that in mind, the Board recommends that every effort be made to collect whatever information may be elicited from practitioners in this country and abroad. NICHD should also consider suggesting to practitioners a basic protocol for collecting vital information, to which each would be encouraged to add their own observations.

The data from such clinical experience and from research conducted throughout the world should be analyzed along with that derived from animal studies so that individuals contemplating *in vitro* fertilization and embryo transfer will have access to the best information available regarding risks to both mother and offspring. Timely dissemination of the information would increase the opportunity for investigators, clinicians and prospective patients to be fully informed.

Conclusion (5)—The secretary should encourage the development of a uniform or model law to clarify the legal status of children born as a result of *in vitro* fertilization and embryo transfer. To the extent that funds may be necessary to develop such legislation, the department should consider providing appropriate support.

Discussion: The Board is concerned about the ambiguity regarding the legal status of children born following artificial insemination and a similar ambiguity that may surround the legal status of children born following *in vitro* fertilization and embryo transfer. The Board is also concerned about lack of clarity regarding the legal responsibilities of those who utilize, support, or permit use of such procedures. Because of the complexity of the legal problems involved in new techniques for human reproduction, the Board recommends that a model or uniform law be drafted that would establish with clarity the rights and responsibilities of donor and recipient "parents", of offspring and of those who participate in the process of reproduction through new technologies.

The Board urges that such a uniform or model law be drafted by the National Conference of Commissioners on Uniform State Laws, the American Law Institute, or some other qualified body. Because of the complex nature of the subject matter, however, the Board is aware that the task may be a major undertaking and suggests that the Department consider providing funds for drafting the legislation. Since the purpose is to safeguard the health and welfare of children and their families, it appears to be an appropriate project for Departmental support.

[FR Doc. 79-18825 Filed 6-15-79; 8:45 am]
BILLING CODE 4110-12-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Policy Research on Work and the Aged; Solicitation

Pursuant to Title 45, Part 63 of the Code of Federal Regulations, the Assistant Secretary for Planning and Evaluation (hereafter ASPE) is seeking applications from public and private non-profit agencies, organizations, and institutions for policy-related research projects on the work and income of the elderly and other areas relating to the economics of income transfer programs for the elderly. In particular, we are most interested in projects which relate to the following areas:

1. The labor supply of the elderly.
2. The demand for the labor of the elderly.
3. Unemployment of the elderly.
4. Effects of income transfer programs for the elderly on the savings and work behavior of the non-elderly.
5. Private programs for disability and retirement, and their interaction with public programs.
6. Macro-economic effects on income transfer programs for the elderly.

7. The income distribution of the elderly.

This list is intended to be suggestive, and applications which combine several areas or depart from all of them, are acceptable as long as they relate to the general concerns of work and income of the elderly and the economics of income transfer programs for the elderly.

A. Criteria for Evaluation

Evaluation of applications will employ the following criteria:

1. The potential usefulness of the anticipated results of the proposed project for informing the development of policy relating to the general concerns discussed above.

2. Potential usefulness of the proposed project for the advancement of scientific knowledge.

3. Clarity of statement of the objectives, methods, and anticipated results of the proposed project.

4. Appropriateness and soundness of methodology, including research design statistical techniques, choice of data, and other procedures.

5. Feasibility of the project and adequacy of the proposed resources for achievement of the objectives.

6. Qualifications and experience of personnel.

7. The record of the agency, institution, or organization, or, where appropriate, the personnel proposed for the project, in successful and timeful completion of comparable projects.

B. Applicable Regulations

The applicable regulations are:

1. "Grant Programs Administered by the Office of the Assistant Secretary for Planning and Evaluation" (45 CFR Part 63), which was published in the Code of Federal Regulations on October 1, 1976.

2. "Administration of Grants" (45 CFR Part 74), which was published in the Code of Federal Regulations on August 2, 1978.

C. Effective Date and Duration

1. Grant awards pursuant to this solicitation will be made on or about September 15, 1979.

2. In order to avoid unnecessary delays in the preparation and receipt of applications, this notice is effective immediately. Applications will be accepted no later than 45 days from issuance.

D. Statement of Funds Availability

1. ASPE has available about $165,000 for the Fiscal Year ending September 30, 1979, for the award of grants pursuant to this solicitation.

2. It is expected that between three and eight grants will be made, although the proposal review panel will retain flexibility on the size and number of grants based on the proposals received. Proposals for amounts between $5,000 and $165,000 will be acceptable.

3. Applications may be submitted for projects of several years duration, but funds awarded under this solicitation will be awarded for only one year of any project. However, proposals for multi-year projects which are accepted for first year awards will be eligible for further funding on a non-competitive basis, providing funds are available in succeeding years and projects are performing acceptably. Since there can be no guarantee of continuous funding, projects should be designed to produce significant results during the first year of performance.

E. Applications Processing

1. Grant applications will be reviewed and awards made by an interagency panel of HEW staff, possibly augmented, if appropriate, by outside experts.

2. Applicants will be judged as to eligibility and, if eligible, as to priority of awards, *strictly according to the criteria for evaluation* set forth in paragraph A of this Solicitation. Priority will be given to applicants who, in the judgement of the panel, best meet these criteria. The relative weighting of the criteria are as follows:

Criterion	Weight (points)
1	15

4	25
5	10
6	25
7	5
Total	100

3. Applications judged to be below an acceptable level of any criterion will be classified as conditionally unacceptable, regardless of overall point standing.

4. Applications should be as brief and concise as is consistent with communication to the reviewers.

5. The first chapter of each proposal should be a brief (no more than five pages) overall summary description of the project. The summary description should briefly address how the proposed project would be responsive to each of the seven criteria listed in paragraph A of this Solicitation.

Applicants should make certain that the seven criteria are fully addressed in the proposal since failure to satisfy even one criterion could seriously weaken or even invalidate a proposal.

6. Nothing in this Solicitation should be construed as committing ASPE to dividing available funds among all qualified applicants.

F. Applications Sent by Mail

An application sent by mail will be considered to be received on time by the Grants Officer if the application was sent by registered or certified mail and and mailed not later than August 2, 1979 as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service.

G. Hand-Delivered Applications

An application to be hand-delivered must be taken to the Grants Officer at the address listed at the end of this Solicitation. Hand-delivered applications will be accepted daily between the hours of 9:00 a.m. and 5:30 p.m. (Washington, D.C., time), except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 5:30 on the closing date.

H. Disposition of Applications

1. *Approval, disapproval, or deferral.* On the basis of the review of an application, ASPE will either (a) approve the application in whole or in part, for such amount of funds and subject to such conditions as he deems necessary or desirable for the completion of the approved project, (b) disapprove the application, or (c) defer action on the application for such reasons as lack of funds or a need for further review.

2. *Notification of disposition.* ASPE will notify the applicants in writing of the disposition of their applications. A signed notification of grant ward will be issued to notify the applicant of an approved project application.

I. Application Instructions and Forms

Questions concerning the preceding information, coppies of application forms, and applicable regulations shall be obtained from, or submitted to: Grants Officer, Office of the Assistant Secretary for Planning and Evaluation, Department of Health, Education, and welfare, Room 457F, Hubert H. Humphrey Building, 200 Independence Ave., S.W., Washington, D.C. 20201.

Dated: June 12, 1979.

Benjamin W. Heineman, Jr.,

Assistant Secretary for Planning and Evaluation.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Receipt of Petition for Federal Acknowledgment of Existence as an Indian Tribe

June 8, 1979.

This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Pursuant to 25 CFR 54.8(a) notice is hereby given that the

Tchinouk Indians, c/o Mrs. Karleen F. McKenzie, 5621 Altamont Drive, Klamath Falls, Oregon 97601.

has filed a petition for acknowledgment by the Secretary of the Interior that the group exists as an Indian tribe. The petition was received by the Bureau of Indian Affairs on May 16, 1979. The petition was forwarded and signed by Karleen F. McKenzie.

This is a notice of receipt of petition and does not constitute notice that the petition is under active consideration. Notice of active consideration will be by mail to the petitioner and other interested parties at the appropriate time.

Under Section 54.8(d) of the Federal regulations, interested parties may submit factual or legal arguments in support of or in opposition to the group's petition. Any information submitted will be made available on the same basis as other information in the Bureau of Indian Affairs' files.

The petition may be examined by appointment in the Division of Tribal Government Services, Bureau of Indian Affairs, Department of the Interior, 18th and C Streets, N.W., Washington, D.C. 20242.

Rick Lavis,

Deputy Assistant Secretary—Indian Affairs.

BILLING CODE 4310-84-M

National Park Service

Ozark National Scenic Riverways Advisory Commission; Meeting

Notice is hereby given in accordance with Pub. L. 89-483 that a meeting of the Ozark National Scenic Riverways' Advisory Commission will be held on Friday, July 13, 1979, at 10:00 a.m. (CDT) at the Riverways' Headquarters on U.S. Highway 60 in Van Buren, Missouri.

The Commission was established by Public Law 88-492 to meet and consult with the Secretary of the Interior on general policies and specific matters related to the administration and development of the Ozark National Scenic Riverways.

The members of the Commission are:

Dr. Oscar Hawksley, Warrensburg, Missouri (Chairman).
Mr. David Rust, Cabool, Missouri.
Mr. H. C. Daniel, Van Buren, Missouri.
Mr. Carlton E. Bay, Salem, Missouri.
Mr. William Hall, Kansas City, Missouri.
Mr. Henry F. Leupke, Jr., St. Louis, Missouri.
Mr. Edward Hodge, Eminence, Missouri.

The purpose of this meeting is to discuss with the Commission and to receive its input regarding the public involvement phase of the General Management Plan for the Riverways.

The meeting will be open to the public. Any member of the public may file with the Commission prior to the meeting a written statement concerning the matters to be discussed. Persons wishing further information concerning the meeting or who wish to submit written statements, may contact Arthur L. Sullivan, Superintendent, Ozark National Scenic Riverways, P.O. Box 490, Van Buren, Missouri 63965, telephone area code 314-323-4236. Minutes of the meeting will be available for public inspection four weeks after the meeting at Ozark National Scenic Riverways headquarters in Van Buren, Missouri.

Dated: June 7, 1979.

J. L. Dunning,

Regional Director, Midwest Region.

BILLING CODE 4310-70-M

MINIMUM WAGE STUDY COMMISSION

Commission Meeting

June 13, 1979.

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the cancellation of the following Commission meeting:

Name: Minimum Wage Study Commission.
Date: July 10, 1979.

Original notification of this meeting appeared in the May 30 Federal Register.

Next meeting of the Commission will be held Tuesday, August 14, 1979.

All communications regarding this Commission should be addressed to: Mr. Louis E. McConnell, Executive Director, 1430 K St. St. NW, Suite 500, Washington, D.C. 20005, (202) 376-2450.

Louis E. McConnell,

Executive Director.

BILLING CODE 4510-23-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-131]

Veterans Administration Medical Center; Proposed Renewal of Amended Facility Licenses

The United States Nuclear Regulatory Commission (the Commission) is considering renewal of Amended Facility License No. R-57, issued to the Veterans Administration Medical Center (the licensee), for operation of the TRIGA type nuclear reactor located in Omaha, Nebraska.

The renewal would extend the expiration date of Amended Facility License No. R-57 to June 24, 1989, in accordance with the licensee's timely application for renewal dated May 10, 1979.

Prior to renewal of the license, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By July 18, 1979, the licensee may file a request for a hearing with respect to renewal of the subject facility operating license and any person whose interest may be affected by this proceeding and

who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary of the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the renewal action under consideration. A petitioner who fails to file such a supplement which satisfied these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. by the above date. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for renewal dated May 10, 1979, as may be supplemented by further submittals, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C.

Dated at Bethesda, Maryland this 9th day of June 1979.

For the Nuclear Regulatory Commission.

Robert W. Reid,

Chief, Operating Reactors Branch #4, Division of Operating Reactors.

[FR Doc. 79-18595 Filed 6-15-79; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-329, 50-330]

Consumers Power Co. (Midland Plant, Units 1 and 2); Evidentiary Hearing (Remand Proceeding)

June 12, 1979.

Please take notice that pursuant to the provisions of the Prehearing Conference Order entered in this proceeding on May 3, 1979, an evidentiary hearing will be held on July 2–27, 1979 at the U.S. Nuclear Regulatory Commission Hearing Room; located at 4350 East/West Highway, Bethesda, Maryland 20014, 5th Floor; commencing at 9 a.m., local time.

As set forth in our Prehearing Conference Order of May 3, 1979, the following issues will be the subject of the evidentiary hearing:

Issue No. 1

Whether there was an attempt by parties or attorneys to prevent full disclosure of, or to withhold relevant factual information from the Licensing Board in the suspension hearings (ALAB–458, 7 NRC 155, 172 fn. 64 177, fn. 87).

Issue No. 2

Whether there was a failure to make affirmative full disclosure on the record of the material facts relating to Dow's intentions concerning performance of its contract with Consumers.

Issue No. 3

Whether there was an attempt to present misleading testimony to the Licensing Board concerning Dow's intentions.

Issue No. 4

Whether any of the parties or attorneys attempted to mislead the Licensing Board concerning the preparation or presentation of the Temple testimony.

Issue No. 5

What sanctions, if any, should be imposed as a result of affirmative finds on any of the above issues.

It is so ordered.

For the Atomic Safety and Licensing Board.

Dated at Bethesda, Maryland this 12th day of June 1979.

Marshall E. Miller,

Chairman.

BILLING CODE 7590-01-M

[Docket No. 50-321]

Georgia Power Co., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 66 to Facility Operating License No. DPR–57 issued to Georgia Power Company, Oglethorpe Electric Membership Corporation, Municipal Electric Association of Georgia, and City of Dalton, Georgia, which revised Technical Specifications for operation of the Edwin I. Hatch Nuclear Plant, Unit No. 1 (the facility) located in Appling County, Georgia. The amendment is effective as of its date of issuance.

This amendment revises the Technical Specifications to allow the count rate on the Source Range Monitor channels to drop below 3 counts per second when the entire core is removed or reloaded.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 11, 1979, (2) Amendment No. 66 to License No. DPR-57, and (3) The Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Appling County Public Library, Parker Street, Baxley, Georgia 31513. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 12th day of June 1979.

For the Nuclear Regulatory Commission.

Thomas A. Ippolito,

Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc. 79-18827 Filed 6-15-79; 8:45 am]
BILLING CODE 7590-01-M

[Docket No. 50-466 CP]

Houston Lighting & Power Co.; Supplementary Notice of Intervention Procedures

On December 28, 1973, there was published at 38 Federal Register 35521 a notice that Houston Lighting & Power Co. had filed an application with the Atomic Energy Commission for a permit to construct Allens Creek Nuclear Generating Station, Units 1 and 2 (station) at a site in southern Austin County, Tex., west of the Brazos River and about 45 miles west of the center of Houston. The notice provided that petitions for leave to intervene in the proceeding could be filed by January 24, 1974. The only petition filed was by the attorney general of the State of Texas.

A hearing was held on the application by an Atomic Safety and Licensing Board (Licensing Board) on March 11 and 12, 1975. Following that hearing the applicant notified the Licensing Board that its plans for the construction of the station were indefinitely deferred. The Licensing Board, notwithstanding, issued a partial initial decision (LBP-75-66, 2 NRC 770, 1975) in which certain findings of fact were made, and in which it was concluded at page 812 that the findings "have demonstrated no reason why the (station) site is not a suitable location for nuclear reactors of the general size and type proposed * * *". The Appeal Board's memorandum and order of December 9, 1975, ALAB-301, 2 NRC 353, in affirming the Licensing Board's partial initial decision, stated that those findings by the Licensing Board in its partial initial decision are subject to later revision should further developments or new information so warrant.

On August 19, 1977, the applicant advised the Board that it wished to resume licensing of only one of the two units previously planned and that it had amended its preliminary safety analysis report to show only one unit at the same site. The amendments also included (among others) changes in plant layout and orientation, changes in the circulating water intake and discharge structures, and a reduction in the size of the cooling lake from 8,250 to 5,120 acres. These new plans for the proposed station may raise concerns that did not exist with respect to the former ones.

This Atomic Safety and Licensing Board (Board) issued on May 31, 1978, a "Notice of Intervention Procedures".[1] As thereafter amended on September 11, 1978,[2] the notice invited the filing of new petitions to intervene but indicated that they had to be limited in scope to contentions which either (1) arose from proposed changes in plant design; or (2) were based upon evidence or information not available prior to the issuance of ALAB-301 in December, 1975.

Some thirty-three petitions for leave to intervene were filed in response to the notices of May 31 and September 11, 1978, of which three were granted by the Board; the balance were denied either because the contentions therein did not fall within the permissible scope of contentions or for other reasons.[3] On consideration of appeals from the Board's determination on these petitions, the Appeal Board reversed and remanded as to petitioners who were denied intervenor status on grounds that their contentions fell outside the permissible scope of issues.[4] The Appeal Board found that the notices of May 31, and September 11, 1978, were "too restrictive."

In denying Applicant's "Motion for Reconsideration of ALAB-535" and the "NRC Staff's Motion for Clarification of ALAB-535" the Appeal Board left unanswered the question whether a new notice of hearing was required.[5]

In a subsequent Memorandum and Order, however, the Appeal Board noted the risk inherent in proceeding under the corrected notices and instead "left [it] to the Board below and to the Applicant and Staff to determine for themselves whether, in the totality of circumstances, it is worthwhile for them to assume any risks which may inhere in continuing to proceed under the [corrected notice]."[6]

For the reasons set forth above, the Board believes that it is in the public interest to issue this supplemental notice of intervention procedures for those members of the public who may have forborne filing of petitions for leave to intervene because of the limitations on the scope of contentions found by the Appeal Board to be "too restrictive".

Accordingly, any person (other than those persons and organizations which filed petitions for leave to intervene pursuant to the above notices of May 31 and September 11, 1978), who did not file a petition pursuant to those notices because of the restrictions on permissible contentions contained therein, and who wishes to intervene as a party to this proceeding must file a written petition for leave to intervene in accordance with the provisions of 10 C.F.R. 2.714. Such person shall state that he failed to file a petition for leave to intervene pursuant to the Board's notices of May 31 and September 11, 1978, because of the restrictions on permissible contentions contained in those notices. A petition for leave to intervene shall set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceedings, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1)

---

[1] 43 FR 23666 (May 31, 1978).
[2] 43 FR 40328 (September 11, 1978).
[3] ASLB Memorandum and Order, February 9, 1979.
[4] ALAB-535, April 4, 1979.
[5] ALAB-539, April 23, 1979.
[6] ALAB-544, May 9, 1979.

The nature of the petitioner's right under the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2011–2281 (1970) to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition must be supplemented (by the time set forth in 10 CFR § 2.714(b), as amended) by a list of the contentions, which the petitioner seeks to have litigated, with the bases for each contention set forth with reasonable specificity.

The issues in this proceeding are as set forth in the Notice of Hearing as published in the Federal Register of December 28, 1973, provided, however, absent a showing of newly discovered evidence or a material change in circumstances, the Board will not entertain issues fully considered and settled in the above mentioned hearings in this matter on March 11–12, 1975, and as to which findings were made by this Board (See LBP–75–66, 2 NRC 776 (1975), and affirmed by the Appeal Board (ALAB–301, 2 NRC 353).

A petition for leave to intervene must be filed with the Secretary of the Commission and others as specified below by July 18, 1979. A petition for leave to intervene which is filed thereafter must be justified under the factors specified in 10 CFR § 2.714(a)(1)(i)–(v).

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Any petitions shall be filed by mail or telegram addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Services Branch, or may be filed by delivery to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. Thereafter, anyone admitted as a party is required to file, pursuant to the provisions of 10 CFR § 2.708, an original and twenty (20) copies of each pleading or other document other than correspondence with the Commission, and, pursuant to 10 CFR 2.701 shall serve one copy of each such paper upon all other parties to the proceeding or upon their attorneys of record.

Papers detailing the application for a construction permit may be examined by the public at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. Copies of those same documents are also available at the Sealy Public Library, Sealy, Texas 77474.

It is so ordered.

Dated at Bethesda, Maryland this 12th day of June, 1979.

For the Atomic Safety and Licensing Board.

Sheldon J. Wolfe,

Chairman.

[Docket No. 50-220]

Niagara Mohawk Power Corp.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 32 to Facility Operating License No. DPR–63 to Niagara Mohawk Power Corporation (the licensee) which revised the Technical Specifications for operation of the Nine Mile Point Nuclear Station, Unit No. 1 (the facility) located in Oswego County, New York. The amendment is effective as of its date of issuance.

The amendment (1) extends the applicability of the safety limit on minimum reactor vessel water level by including all modes of operation and specifically including a low-low-low water level limit, (2) adds a Limiting Safety System Setting on low-low-low water level, and (3) adds a Safety Limit and Limiting Condition for Operation to require that at least two recirculation loops remain open during all modes of operation except when the reactor vessel is flooded to the level of the mainsteam line nozzle.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 29, 1979, (2) Amendment No. 32 to License No. DPR–63, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Oswego County Office Building, 46 E. Bridge Street, Oswego, New York 13126. [Docket No. 50-245]

Northeast Nuclear Energy Co., et al.; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 62 to Provisional Operating License No. DPR-21, issued to Northeast Nuclear Energy Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, and Connecticut Light and Power Company (the licensees), which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 1 (the facility) located in Waterford, Connecticut. The amendment is effective as of its date of issuance.

This amendment authorizes revisions to Appendix A Technical Specifications to ensure compliance with the fracture toughness requirements of Appendix G to 10 CFR Part 50 during heatup and cooldown operations, system hydrostatic tests and reactor core criticality.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated June 8, 1976, and supplement thereto dated July 1, 1977, (2) Amendment No. 62 to License No. DPR-21, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

[Docket No. 50-346]

The Toledo Edison Co. and the Cleveland Electric Illuminating Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 15 to Facility Operating License No. NPF-3, issued to The Toledo Edison Company and The Cleveland Electric Illuminating Company (the licensees), for operation of the Davis-Besse Nuclear Power Station, Unit No. 1 (the facility) located in Ottawa County, Ohio. The amendment is effective as of its date of issuance.

The amendment removes a satisfied condition of the license which required submission of operating reactor coolant system flow data.

The Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the licensee's letter dated January 16, 1979, (2) Amendment No. 15 to License No. NPF-3, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 5th day of June 1979.

For the Nuclear Regulatory Commission.

Robert W. Reid,

Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

BILLING CODE 7590-01-M

Three Mile Island Inquiry; Statement of Policy

June 4, 1979.

The Nuclear Regulatory Commission has instituted a Special Inquiry to review and report on the accident which took place at the Three Mile Island Nuclear Station No. 2 beginning on March 28, 1979. The primary objective of the inquiry will be to prepare a report which makes factual determinations concerning the actual events which occurred and their causes, and the actions of utility and Commission personnel before and during the accident. The inquiry will also identify areas of deficiency revealed by the accident and areas in which further investigation is warranted.

The Commission will contract with the law firm of Rogovin, Stern and Huge, Washington, D.C., to conduct the Special Inquiry. The inquiry will be headed by a Director, Mitchell Rogovin. Mr. Rogovin will have the authority to designate a staff of his choosing, including both NRC personnel, and staff and consultants from outside the Commission. It is expected that in assembling a staff, the Director will draw substantially on senior Commission staff, including Commission personnel and consultants currently engaged in conducting an interim inquiry into the matter. The Director will possess full independence in carrying out the inquiry and will be removable only for malfeasance or neglect of duty. To further such independence the Director will maintain records of all discussions bearing on the inquiry between those conducting the inquiry and any member of the Commission or a Commissioner's personal staff. The Commission will designate a senior NRC official to whom it will delegate its statutory power to conduct investigations, issue subpoenas, and administer oaths in order that these powers will be available to further the Special Inquiry. The Commission will grant to the Director access to any and

Commission that he deems necessary to conduct a full and complete inquiry, and will provide appropriate administrative support for carrying out the inquiry. It is expected that reports issued and analyses performed by other persons and organizations will be utilized where useful. It is anticipated that the Special Inquiry will take approximately six months.

The Special Inquiry represents a major phase of the Commission's evaluation of the accident and its implications. It is not intended to duplicate the efforts of the President's Commission on the Accident at Three Mile Island. It is designed instead so that the Nuclear Regulatory Commission, in order to fulfill its own regulatory responsibilities, will have the fullest possible understanding of the events at Three Mile Island, both from the technical standpoint and from the standpoint of how its regulatory processes functioned. The purpose of that evaluation is to permit the Commission to take whatever further steps may be necessary to prevent any similar accident in the future, and to improve the NRC's ability to respond to accidents.

The specific areas which the Special Inquiry will examine include the following:

—the sequence of events during the accident, what was happening to the reactor and the plant, including, where feasible, an assessment of important alternative sequences; the response of the operating personnel; radioactive releases and exposures; events at the plant before the accident that might be related to the accident.

—the history of the NRC review of the utility's application for a license to operate Three Mile Island No. 2; NRC license conditions on TMI–2 operations, including technical specifications; the operating and inspection history at TMI–2; the operating and inspection histories of other Babcock & Wilcox plants, focused on any indications of the types of problems that arose in the TMI–2 accident; a summary of NRC past consideration of such problems; the extent to which financial or tax consideration influenced conditions in the plant in any way that might have contributed to the accident; any other precursor events or analyses relevant to the accident.

—the susceptibility of Babcock & Wilcox plants to accidents; unique features of TMI–2 that may have increased or decreased the severity of the accident; other design effects related to the TMI–2 accident.

—TMI–2 operations, including training and qualifications of personnel, operating procedures and management overview; technical support to operating personnel and management.

—emergency response to the TMI–2 accident by the utility, other utilities and utility groups, and industrial organizations, including coordination with NRC and other Federal, State, and local officials, and assessment and dissemination of information.

—emergency planning by, and emergency response plans approved by, the NRC; actual emergency response to the accident by NRC, including staff, ACRS and Commissioners, on site and at headquarters; NRC coordination with Federal, State, and local officials, the utility, industry sources, and the national laboratories; NRC assessment and dissemination of information; communications and chain of command within NRC.

The Special Inquiry will also assess the possible implications of the accident at TMI–2 (including design of the facility, operations, regulatory actions, emergency preparedness) for other nuclear power plants and identify areas where further study is recommended. Based on these assessments and recommendations, the Commission will undertake such additional investigations, analyses and actions as it considers appropriate in the discharge of its responsibilities.

The Director will keep the Commission informed on a periodic basis of the progress of the inquiry. Any information of immediate public health or safety significance will be reported promptly to the Commission. The Commission emphasizes that it will take whatever regulatory action it deems necessary at any time, based on information available to it at that time. By instituting the Special Inquiry, the Commission intends no suggestion that it will withhold regulatory action with respect to identified deficiencies until the inquiry is completed.

Dated at Washington, D.C. this 13th day of June, 1979.

For the Commission.

Samuel J. Chilk,

Secretary of the Commission.

OFFICE OF MANAGEMENT AND BUDGET

Agency Forms Under Review

Background

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Federal Reports Act (44 USC, Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting reuirements before seeking OMB approval. OMB in carrying out its responsibility under the act also considers comments on the forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last list was published. The list has all the entries for one agency together and grouped into new forms, revisions, or extensions. Each entry contains the following information:

The name and telephone number of the agency clearance officer;
The office of the agency issuing this form;
The title of the form;
The agency form number, if applicable;
How often the form must be filled out;
Who will be required or asked to report;
An estimate of the number of forms that will be filled out;
An estimate of the total number of hours needed to fill out the form; and
The name and telephone number of the person or office responsible for OMB review.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. In addition, most repetitive reporting requirements or forms that require one half hour or less to complete and a total of 20,000 hours or less annually will be approved ten business days after this notice is published unless specific issues are raised; such forms are identified in the list by an asterisk (*).

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained from the agency clearance officer whose name and telephone number appear under the agency name. Comments and questions about the items on this list should be directed to the OMB reviewer or office listed at the end of each entry.

If you anticipate commenting on a form but find that time to prepare will

prevent you from submitting comments promptly, you should advise the reviewer of your intent as early as possible.

The timing and format of this notice have been changed to make the publication of the notice predictable and to give a clearer explanation of this process to the public. If you have comments and suggestions for further improvements to this notice, please send them to Stanley F. Morris, Deputy Associate Director for Regulatory Policy and Reports Management, Office of Management and Budget, 726 Jackson Place, Northwest, Washington, D.C. 20503

BILLING CODE 3110-01-M

Office of Federal Procurement Policy

Subcontracting Under Federal Contracts

AGENCY: Office of Federal Procurement Policy, Office of Management and Budget.

ACTION: Changes to notice appearing in Federal Register on April 20, 1979.

Changes to April 20, 1979, Federal Register Notice

By its notice in the April 20, 1979, Federal Register, the Office of Federal Procurement Policy set forth changes to be made in the Federal Procurement Regulation and the Defense Acquisition Regulation in partial implementation of Section 211 of Public Law 95-507. This is to inform you of the following changes in that notice:

1. Under the heading "Subcontracting; Utilization of Small Business and Small Disadvantaged Business concerns (over $10,000)" the notice set forth a clause to be used in all contracts over $10,000 with stated exceptions. Paragraph (d) of that clause read:

Subcontractors shall provide a notarized statement to the contractor certifying their status as either a small business concern or a small business concern owned and controlled by socially and economically disadvantaged individuals.

In order to conform with the precise language of the statute, paragraph (d) should be changed to read:

Contractors acting in good faith may rely on written representations by their subcontractors as either a small business concern or a small business concern owned and controlled by socially and economically disadvantaged individuals.

2. Under the heading "Incentive Subcontracting Progam for Small Business and Small Disadvantaged Business (Negotiated)," the notice indicates that "determinations by the contracting officer under this paragraph may not be appealed under the Disputes Clause." This sentence is hereby deleted.

The prime contractor *may* appeal the contracting officer's determination of the dollars the prime contractor will receive under the terms of the incentive clause. However, he may *not* appeal the precise percentage inserted in the contract as the rate the Government agrees to pay with regard to "excess" subcontracting.

These changes are effective immediately.

James D. Currie,

Acting Administrator.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34—15909; File No. SR-NYSE-79-27]

New York Stock Exchange, Inc.; Self Regulatory Organization; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 97-29, 16 (June 4, 1975), notice is hereby given that on June 7, 1979 the New York Stock Exchange, Inc. (the "NYSE") filed with the Securities and Exchange Commission a proposed change to Rule 107, as follows:

NYSE's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule amendment, if approved, would eliminate subparagraph .70 from Rule 107. Subparagraph .70 states:

Unless extended by a duly authorized rule of the Exchange or an amendment to this Rule approved by the Securities and Exchange Commission pursuant to Rule 19b of the Securities Exchange Act of 1934, this Rule shall expire on July 31, 1979.

No other amendment to Rule 107 is being proposed.

NYSE's Statement of the Purpose of Proposed Rule Change

The purpose of the proposed amendment is to delete the "Sunset" provision (subparagraph .70) from Rule 107 in order to make Rule 107 a permanent rule of the NYSE.

On May 1, 1978, the Exchange adopted Rule 107, thereby creating a new category of market maker known as the Registered Competitive Market Maker (RCMM). The Exchange indicated that RCMMs would be required under the Rule to engage in a course of dealings which would contribute in a positive and significant manner to the quality of the market provided on the Exchange; that RCMMs would be obligated to stand ready to compete with the registered specialist in cash and every equity security traded on the Exchange; that Floor brokers could request bids and offers from RCMMs when the market being quoted by the specialist could, in their opinion, be improved either from the standpoint of price or depth; and that Floor Officials could call on RCMMs to assist in the market making function whenever the Floor Offical, in his professional judgement, deemed it necessary.

The Exchange concluded that because the obligations and restrictions governing RCMMs required them to contribute to the market by increasing depth and liquidity and by enhancing competition within the market making function, the claim to the market maker exemption (A) of Section 11(a)(1) was justified.

In approving Rule 107 on a temporary basis, the Commission stated that it had no information which indicate that, in practice, the proposed obligations would assure a bona fide market making function; and that it's approval of the rule was based solely on its containing adequate safeguards.

It added that the Exchange would have to justify any proposal to adopt Rule 107 on a permanent basis with specific data and statistics demonstrating that RCMMs have acted in a manner which qualifies them as market makers.[1]

Section 3(a)(38) of the Securities Exchange Act of 1934 defines a market maker as, among other things,

. . . any dealer who, with respect to a security holds himself out (by entering quotations in an inter-dealer communications system or otherwise) as being willing to buy an sell such security for his own account on regular or continuous basis.

In its approval order, the Commission discussed, at length, the relationship of the four elements of the market maker definition to the Exchange's proposed Rule 107.

The first element relates to the market making relationship between the dealer and a particular security.[2] The Commission noted that under Rule 107, the RCMM's obligation would extend to each NYSE listed stock. In order to learn the number of stocks which were subject to transactions by RCMMs, we conducted a spot check review. Included in this review were all the stocks subject to "calls" from May 1, 1978 to May 15, 1979. In addition, we calculated the number of different stocks in which RCMMs traded from May 1, 1978 to June 2, 1978 plus one week periods from July 1978 through April 1979. Based on this review, RCMMs traded in 664 different stocks.

The second element requires a dealer to "hold himself out (by entering quotations in an inter-dealer communications system or otherwise)". The Commission noted that this "would not seem to require more than an explicit agreement to take certain actions upon request, *e.g.*, to provide quotations, provided that agreement is comunicated to other persons." [3] It deemed this element to be satisfied for the temporary period by the Rule 107 "on call" requirement (i.e., RCMMs are subject to call by Floor brokers holding unexecuted customers' orders or by Floor Officials) and "competitive bid/offer" requirement (unless trading under a Rule 107 exemptive provision, an RCMM's bid or offer must "better" the market, either by narrowing the existing spread in the quotation or by adding depth).[4]

Exchange statistics show that between May 1, 1978, and April 27, 1979 RCMMs effected 87,801 trades totalling 53,541,642 shares. Of these trades, 88.58 were effected pursuant to bids or offers that "bettered" the market (28.6% in price and 59.9% in size). In response to calls by Floor brokers holding unexecuted customers' orders or by Floor Officials, RCMMs effected 811 transactions in 257 different stocks during the period.

The "holding out" standard was clearly demonstrated, for example, during the week of October 30-November 3, 1978, when the Dow Jones Industrial average fluctuated sharply (i.e. +6.15, −10.83, +35.34, −19.40 and

---

[1] Securities and Exchange Commission Release No. 14716/May 1, 1978 ("The Release") p. 12.

[2] The Commission explained that the market in a particular security in which the market maker was dealing would theoretically benefit by his participation because of the addition of greater depth, liquidity and continuity (See P. 8 of the Release).

[3] The Release p. 9.

[4] Ibid p. 10.

+5.80). During this period, RCMMs were called in to participate in difficult market situations by Floor brokers holding unexecuted customers' orders or by Floor Officials a total of 200 times.

A third element of the market maker definition requires the market maker to be willing to buy and sell the security in which he has assumed a market making role. The Commission noted that there was no explicit reference to what quantity or price must be provided; and that the RCMM's obligation to bid or offer for one round lot at a price equal to or better than the current bid or offer was sufficient for purposes of an initial experiment.[5]

Exchange statistics for the period May 1, 1978 to April 27, 1979 show that RCMMs' participation has greatly exceeded the minimal size requirement. The average size of an RCMM trade was 610 shares. The average size of a trade effected pursuant to a call was 1,005 shares. Only 2.5% of all RCMM trades effected pursuant to calls were for 100 shares.

The fourth and last element requires a market maker to be willing to buy and sell "on a regular or continuous basis." The Commission noted that this element "provides an indication of the frequency a market maker should be willing to perform in that capacity" and that "a regular market, while something less than 'continuous', should be characterized by a *bona fide* effort to provide bids or offers in a reliable manner, which could include upon request or at periodic intervals of time."[6]

Exchange statistics show that in the aggregate, RCMMs effected an average 1,886 trades per week, with an average weekly volume of 1,138,000 shares. During the week of October 30–November 3, 1978, they effected 3,342 trades with aggregate volume of 2,216,800 shares.

The availability of RCMMs to the market is illustrated by their responding to Floor Official and Floor broker calls over 800 times. In addition, the Exchange has taken steps to make RCMMs more aware of stocks that might benefit by their participation by installing blue flashing lights at all the trading posts and by maintaining a list, posted at the Information Desk, of stocks where the opening or reopening has been delayed.

As an additional means of ensuring that RCMMs' market making activities meet high standards of performance, the Exchange's Market Performance Committee has established an RCMM Subcommittee which reviews RCMM activity and makes appropriate recommendations on ways in which their performance might be improved.

Subparagraph .20 of Rule 107, permits an RCMM to liquidate at a loss anytime without regard to "tick"; and subparagraph .10 (ii) permits an RCMM to "reach across" the market and trade on "zero plus" or "zero minus" ticks, with the trend of the market, when the spread in the quotation is only the minimum variation.

The Commission determined, when it approved Rule 107, that the exemptive provisions permitting such trades were, on balance, designed to facilitate the ability of RCMMs to engage in market making activities which could contribute to the maintenance of fair and orderly markets; and that such trades pose little threat of disrupting the market or being used for manipulative purposes.[7] It noted, however, that it would be quite concerned, if, as the NYSE gained experience, it became apparent that RCMMs were utilizing the exemptive provisions for a substantial percentage of their trading activity rather than trading in a manner calculated to improve the market.[8]

Experience during the period between May 1, 1978 and April 27, 1979 demonstrates that RCMM trades utilizing the exemptive provisions are minimal. Of the 11.5 percent of all RCMM trades which were not effected pursuant to bids or offers that "bettered" the market, 9.7 percent were trades in which the RCMM "reached across" the market (i.e. traded with the existing bid or offer). The remaining 1.8 percent include trades in which the RCMM participated at the opening, in block clean-ups, arbitrage, and to offset errors.

The Commission expressed one additional concern in approving Rule 107. While it noted that the implementation of recordkeeping procedures designed to monitor the performance of RCMMs constituted a necessary first step in determining whether they are complying with their obligations, the Commission expressed concern about the accuracy and reliability of the information the NYSE obtained from RCMMs.[9]

The performance of RCMMs has been monitored by the Exchange, to insure compliance with Section 3(a)(38) of the Act and NYSE Rule 107, from May 1, 1978 to the present, by requiring that each RCMM report all transactions effected in their role as a market maker. These trades have been reviewed against the information reported in our Transaction Journal (which shows the time, price and size of each transaction and quote in every NYSE listed stock) for compliance with the aforementioned provisions and to determine the extent to which RCMMs' bettered the existing markets at the time of their order execution.

The reliability and accuracy of the information reported has been checked by comparing it with other trade data submitted by RCMMs; and by Exchange examiners in their spot check reviews of RCMM trading records. During these reviews, examiners are able to verify the times and prices of RCMM trades by checking with the contra broker to a trade, and by using the clearance and settlement sheets to reconstruct the market in particular stocks.

In conclusion, the NYSE believes that RCMMs have met each of the four elements of the market maker definition cited by the Commission; and that RCMMs have made a positive contribution to the market. They have provided the NYSE with additional liquidity at times and in situations where it was needed by responding to calls by making bids and offers of considerable size (an average of 1,000 shares per call); they have significantly added to the depth and continuity of Exchange markets by making competitive bids and offers (nearly 90 percent of their trades were effected on bids or offers that improved the market); and RCMMs have only made minimal use of the exemptive provisions of the Rule. The NYSE believes that these statistics clearly demonstrate that RCMMs act as market makers on the Exchange in accordance with Section 3(a)(38) of the Act and that Rule 107 should be approved by the Commission as a permanent rule of the Exchange. By not taking such action, the Exchange market would be deprived of the benefits described above.

NYSE's Statement of the Basis Under the Act for Proposed Rule Change

The adoption of Rule 107 on a permanent basis relates to Section 6(b)(5) of the Securities Exchange Act of 1934 in that it will: (i) aid in the protection of investors and the public interest by providing a mechanism that can aid in reducing volatile price fluctuations; and (ii) act to reduce unfair

discrimination between brokers and dealers, and as such, act to reduce unfair discrimination between customers by permitting Exchange members to effect proprietary transactions on the Exchange of a type that other broker-dealers are free to effect in the over-the-counter market.

Comments Received from Members, Participants, or others on Proposed Rule Change

The Exchange has not solicited comments regarding the proposed amendment and has received none.

Burden on Competition

The Exchange does not believe that Rule 107 imposes any burden on competition. In fact, the Exchange believes it has furthered competition between brokers and dealers.

On or before July 23, 1979, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, NW., Washington, D.C. Copies of such filings will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before July 9, 1979.

For the Commission by the Division of Market Regulation pursuant to delegated authority.

Shirely E. Hollis,

Assistant Secretary.

June 11, 1979.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[Proposed License No. 02/02-0370]

AMEV Capital Corp.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to Section 107.102 of the Regulations governing small business investment companies (13 C.F.R. 107.102 (1978)), under the name of AMEV Capital Corporation (Applicant), for a license to operate as a Small Business Investment Company under the provisions of the Small Business Investment Act of 1958, as amended, and the Rules and Regulations promulgated thereunder.

The Applicant was incorporated under the laws of the State of Delaware and it will commence operations with a capitalization of $2,500,000, which amount is to be raised through the sale of 100 percent of the Applicant's issued and outstanding shares of common stock to AMEV Holdings, Inc., which is wholly owned by N. V. AMEV, Utrecht, the Netherlands. N. V. AMEV (NVA), is an insurance and financial services company with assets of approximately $4 billion (U.S.). Its capital stock consists of 200,005,000 Dutch guilders, divided into five priority shares of 1,000 Dutch guilders. The priority shares are wholly owned and registered in the name of Stichting Belang AMEV, a Netherlands foundation managed by persons who together comprise NVA's Board of Management and Supervisory Board.

It is effectively controlled by its Board of Management consisting of the following five individuals:

Carel Constantijin Nengerman
P. J. van der Does de Willebois
* F. A. J. Smith
* J. B. J. Bollerman
* F. Roos

Mr. Nengerman and Mr. van der Does de Willebois are respectively chairman and director of the Applicant.

* N. V. AMEV, Postbus 2072, Archimedeslaan 10, Utrecht, Netherlands.

The Applicant will have its place of business at 5 World Trade Center, Suite 6281, New York, New York 10048, and it intends to conduct operations primarily in the State of New York and the Eastern and Southwestern Regions of the United States.

The Officers and Directors of the Applicant will be:

Name, Title, and Percent

AMEV Holdings Inc., sole stockholder, 5 World Trade Center, New York, New York 10048, 100 percent.
Allen R. Freedman, president, treasurer, and director, 36 Plymouth Road, Summit, New Jersey 07901.
Mary R. Broderick, secretary, 18 Clifford Avenue, Pelam, New York 10803.
Carel Constantijin Nengerman, chairman, Arnheuse Boveniveg 207, Driebergen—Rijsenburg, The Netherlands.
Pieter Joseph Fraus Maria, director, Theodoor Van Der Does de Willebois, Wilhemina Park 63, Utrecht, The Netherlands.
Joseph M. Wilker, director, 12320 Devan Drive, Silver Spring, Maryland 20904.

Matters involved in SBA's consideration of the Application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the Applicant under their management, including adequate profitability and financial soundness in accordance with the Act and SBA Regulations.

Notice is hereby given that any person may not later than July 3, 1979, submit written comments on the Applicant to the Deputy Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of the Notice shall be published by the Applicant in a newspaper of general circulation in New York, New York.

[License No. 09/09/0226]

West Coast Venture Capital; Filing of Application for Approval of Conflict of Interest Transaction Between Associates; Notice

Notice is hereby given that West Coast Venture Capital (West Coast) 10375 Bandley Drive, Cupertino, California 95014, a Federal Licensee under the Small Business Investment Act of 1958, as amended, has filed an application pursuant to Section 107.1004 of the regulations governing small business investment companies (13 CFR 107.1004 (1979)), for approval of a conflict of interest transaction.

West Coast desires to purchase 250,000 shares of Preferred Stock of Onyx Systems, Inc. (Onyx), 10375

Bandley Drive, Cupertino, California 95014, and International Memories Inc. (IMI), an Associate of West Coast will purchase 67,600 shares. West Coast's investment will be made on the same basis as IMI. Following the proposed investment, West Coast and IMI will own approximately 66 percent of Onyx's equity. This percentage will be reduced to less than 50 percent in accordance with the Small Business Administration's Rules and Regulations, and a plan to that effect will be filed within 90 days following the closing of such financing.

Prior to May 1, 1979, Mr. Gary W. Kalbach, President and General Manager of West Coast Venture Capital, Inc. (General Partner of West Coast), was Chairman of the Board of Onyx. Mr. Douglas Broyles, a 2.9 percent limited partner of West Coast and the owner of 28 percent of the Common Stock of Onyx was a member of the Board of Directors of Onyx. Mr. Dennis C. Sullivan, Counsel for West Coast was Secretary of Onyx. On May 1, 1979, Messrs. Kalbach and Broyles resigned as members of the Board of Directors of Onyx, and Mr. Sullivan resigned as Secretary of Onyx. As a result of the proposed financing, Mr. Broyles ownership of Onyx will be reduced to approximately 9 percent of Onyx's total equity. Pursuant to Section 107.3 subparagraph (g) of the Regulations, for the purpose of definition of an Associate, Messrs. Kalbach, Broyles and Sullivan within six months before or after the date on which West Coast provided assistance to Onyx, shall be deemed to have been in such relationship as of the date of West Coast's assistance, West Coast's financing of Onyx falls within the purview of Section 107.1004(b)(1) of the Regulations, and requires written approval of SBA.

Notice is further given that any person may, not later than July 3, 1979 submit written comments to SBA on the transaction. Any such comments should be addressed to: Deputy Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

BILLING CODE 4910-59-M

UNITED STATES RAILWAY ASSOCIATION

[Docket No. STP-11]

Procedural Conference

The Regional Rail Reorganization Act of 1973 ("Rail Act"), Section 305, authorizes the Secretary of Transportation to propose transactions supplemental to the Final System Plan which the United States Railway Association ("Association") certified to the Special United States District Court in March, 1976. Section 305 requires the Association to analyze any such proposal, taking into account the

comments of interested persons and statements and exhibits submitted at any public hearings which may have been held, and determine whether the proposal is (1) in the public interest and consistent with the purpose of the Rail Act and the goals of the Final System Plan, and (2) fair and equitable. If the Association makes such a determination, and the transaction is accepted by the proposed transferee, it is reviewed by the ICC. The Association must then petition the Special Court to order the transaction. In any event, the Association must publish a report of its analysis in the Federal Register within 130 days of receipt of the proposal.

On April 11, 1979, the Association received a Supplemental Transaction Proposal ("STP") from the Administrator of the Federal Railroad Administration ("Administrator"). The Administrator proposes that Conrail transfer certain rail properties in eastern Connecticut to the Providence and Worcester Co. ("P&W"), and that Conrail also relinquish to P&W its exclusive freight train trackage rights over a section of track owned by Amtrak which connects with that line. Conrail and the P&W have been negotiating the purchase of the line for two years, without being able to agree on a purchase price. The Secretary of Transportation subsequently directed the Federal Railroad Administration ("FRA") to develop the STP.

On April 20, 1979, the Association published a summary of the STP in the Federal Register (44 FR 23624) and requested comments from all interested parties. Letters requesting comments were also sent to Conrail, the P&W, affected State and local governments, shippers, all rail labor organizations, and other interested parties. To date, responses have been received from Conrail, the P&W, the State of Connecticut, the Worcester (Conn.) Area Chamber of Commerce, the Worcester Business Development Corporation, the Town of Ledyard (Conn.), and the Department of the Army. The State of Connecticut, the Worcester Chamber of Commerce and the Worcester Business Development Corporation favor the proposal, while the Town of Ledyard and the Department of the Army apparently have no preference as to who owns the line in question.

The P&W has requested that the Association hold full evidentiary hearings on the transaction, allowing their attorneys to present evidence and cross-examine Conrail witnesses; Conrail suggests that such hearings are not necessary. Before deciding what further proceedings will be conducted to develop the record the Association may require, the Association will hold a procedural conference at its offices at 955 L'Enfant Plaza North, S.W., Washington, D.C., in Room 2-500, at 10 a.m., on Monday, June 25, 1979. At the conference the Association proposes to discuss with the interested parties whether there are issues requiring that the present record be supplemented, whether hearings would be useful, and, in general, how best to proceed. The conference will be presided over by Douglas L. Siegel, Esq., appointed by the President of the Association, for that purpose. Representatives of the P&W and Conrail are requested to attend, as well as a representative of the Administrator as developer of the STP. All other persons having an interest in this matter are invited to attend the procedural conference. Those planning to attend should notify the following not later than June 22, 1979:

John G. Arlington, Special Assistant to the General Counsel, United States Railway Association, 955 L'Enfant Plaza North, S.W., Washington, D.C. 20595, Telephone (202) 755-4062.

Dated: June 13, 1979.

BILLING CODE 4810-33-M

Customs Service

Viscose Rayon Staple Fiber From Austria; Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Initiation of Investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and as a result an investigation is being initiated for the purpose of determining whether or not benefits which constitute a bounty or grant within the meaning of the countervailing duty law are granted by the Government of Austria to manufacturers or exporters of viscoserayon staple fiber. A preliminary determination will be made no later

than November 7, 1979, and a final determination no later than May 7, 1980.

EFFECTIVE DATE: June 18, 1979.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5492).

SUPPLEMENTARY INFORMATION: A petition was received in proper form on May 7, 1979, alleging that payments or bestowals, conferred by the Government of Austria upon the manufacture, production, or exportation of viscose rayon staple fiber from Austria constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303) ("the Act"). Imports covered by this investigation are classifiable under item numbers 309.4320 and 309.4325, Tariff Schedules of the United States, Annotated (TSUSA).

The petition alleges that the manufacturer of this product received preferential tax treatment based on the establishment of an export sales reserve, loans at rates lower than those otherwise commercially available, and preferential freight rates. As to a determination of whether low freight rates constitute a bounty or grant, it has been Treasury policy to consider whether this lower rate charged for export exceeds any cost differentials involved and/or whether such rates are below the cost of providing the service.

Pursuant to section 303(a)(4) of the Act (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not any bounty or grant is being paid or bestowed within the meaning of the statute within 6 months of the receipt, in satisfactory form, of a petition alleging the payment of a bounty or grant, and a final decision within 12 months of the receipt of such a petition.

Therefore, a preliminary determination on this petition will be made no later than November 7, 1979, as to whether or not alleged payments or bestowals conferred by the Government of Austria upon the manufacture, production, or exportation of the above described merchandise constitute a bounty or grant within the meaning of section 303 of the Act. A final determination will be issued no later than May 7, 1980.

An investigation under the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*) involving the same product has recently resulted in a notice of "Final Discontinuance of Antidumping Investigation", which was published in the Federal Register of December 11, 1978 (43 FR 57999).

This notice is published pursuant to section 303(a)(3) of the Act, as amended (19 U.S.C. 1303(a)(3)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order No. 101-5, May 16, 1979, the provisions of Treasury Department Order 165, Revised, November 2, 1954, and § 159.47(c) of the Customs regulations (19 CFR 159.47(c)), insofar as they pertain to the initiation of a countervailing duty investigation by the Commissioner of Customs, are hereby waived.

Robert H. Mundheim,

General Counsel of the Treasury.

June 8, 1979.

Surety Companies Acceptable on Federal Bonds: Termination of Authority

Notice is hereby given that the certificate of authority issued by the Treasury to American Reserve Insurance Company, Providence, Rhode Island, under Sections 6 to 13 of Title 6 of the United States Code, to qualify as an acceptable surety on Federal bonds, is hereby terminated effective May 21, 1979. The company was last listed as an acceptable surety on Federal bonds at 43 FR 28693, June 30, 1978.

With respect to any bonds currently in force with American Reserve Insurance Company, bond-approving officers of the Government should secure new bonds with acceptable sureties in those instances where a significant amount of liability remains outstanding. Information concerning asserting claims against the company will be published by the Treasury Department when it becomes available.

Questions concerning this notice may be directed to the Audit Staff, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226. Telephone 202-634-5978.

D. A. Paglial,

Commissioner, Bureau of Government Financial Operations.

Dated: June 8, 1979.

BILLING CODE 4810-35-M

[Dept. Cir. 570, 1978 Rev., Supp. No. 15]

Surety Companies Acceptable on Federal Bonds: Termination of Authority

On March 31, 1979, Gulf American Fire and Casualty Company, an Alabama corporation, merged into American States Insurance Company. The companies were last listed as acceptable sureties on Federal bonds at 43 FR 28697, 28694, respectively, June 30, 1978.

Confirmation of this action has been received and filed with the Treasury. Accordingly, the certificate of authority issued to Gulf American Fire and Casualty Company, is hereby terminated as of March 31, 1979, the effective date of the merger. The surviving corporation, American States Insurance Company, an Indiana corporation, has acquired the assets and assumed the liabilities of the merged corporation. American States Insurance Company retains its certificate of authority.

Federal bond-approving officers need take no action with respect to bonds accepted prior or subsequent to the merger. They may, however, annotate their reference copies of Treasury Circular 570, 1978 Revision at page 28697 to reflect the change.

Dated: June 8, 1979.

D. A. Paglial,

Commissioner, Bureau of Government Financial Operations.

BILLING CODE 4810-35-M

Internal Revenue Service

[Delegation Order No. 156, Amdt. 9]

Delegation of Authority To Disclose Mailing Addresses

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: This Amendment authorizes certain officials of the Internal Revenue Service to disclose mailing addresses to the Commissioner of Education. The text of the delegation order appears below. This document does not meet the criteria for significant regulations set forth in paragraph 8 of the proposed

Treasury directive appearing in the Federal Register for Wednesday, May 24, 1978 (43 FR 22319).

EFFECTIVE DATE: June 13, 1979.

FOR FURTHER INFORMATION CONTACT: Howard T. Martin, TX:D, 1111 Constitution Ave., N.W., Room 1603, Washington, D.C. 20224, Telephone number 202–566–3908. (Not a Toll-Free telephone number.)

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury Directive appearing in the Federal Register for Wednesday, November 8, 1978.

Howard T. Martin,

Director, Disclosure Operations Division.

Subject: Disclosure of Mailing Address to Commissioner of Education Under IRC 6103(m)(4).

Date of Issue: June 13, 1979.

Effective Date: June 13, 1979.

Pursuant to the authority vested in the Commissioner of Internal Revenue by Treasury Department Order No. 150–37, dated March 17, 1955, authority is hereby delegated as follows:

The Deputy Commissioner; Assistant Commissioner (Taxpayer Service and Returns Processing); Deputy Assistant Commissioner (Taxpayer Service and Returns Processing); Director, Disclosure Operations Division; and, upon approval of a contractual agreement by the Director, Disclosure Operations Division or his/her delegate, the Assistant Commissioner (Data Services); Executive Assistant to the Assistant Commissioner (Data Services); Director; Service and Design Division; Director, National Computer Center; and Service Center Directors are authorized to disclose, or in specific instances, authorize the disclosure of the mailing address of any taxpayer who has defaulted on a loan made from the student loan fund established under part E of title IV of the Higher Education Act of 1965 to the Commissioner of Education, upon written request and subject to the conditions prescribed in IRC 6103(m)(4).

The authority delegated to the Deputy Commissioner, Assistant Commissioner (Taxpayer Service and Returns Processing), Deputy Assistant Commissioner (Taxpayer Service and Returns Processing); and Director, Disclosure Operations Division, may be redelegated only to the Assistant Director, Disclosure Operations Division; and Branch Chiefs and Section Chiefs, Disclosure Operations Division. The authority delegated to the Assistant Commissioner (Data Services); Executive Assistant to the Assistant Commissioner (Data Services); Director, Service and Design Division; Director, National Computer Center; and Service Center Directors may not be redelegated. The authority delegated in this order does not include authority to enter into a contractual agreement, which is contained in Delegation Order No. 100, as revised.

This Amendment Supplements paragraph 9(c) of Delegation Order No. 150. Delegation Order No. 150, issued May 19, 1976, is printed in the Federal Register dated May 21, 1976, Vol. 41, Number 100, Page 20698.

Jerome Kurtz,

Commissioner.

BILLING CODE 4830-01-M

Office of the Secretary

Portland Cement From Belgium; Antidumping: Tentative Determination to Modify or Revoke Dumping Finding

AGENCY: U.S. Treasury Department.

ACTION: Tentative Revocation of Finding of Dumping.

SUMMARY: This notice is to advise the public that it appears that portland cement, other than white, nonstaining portland cement, from Belgium, is no longer being sold to the United States at less than fair value under the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the price of the merchandise sold for exportation to the United States is less than the price of such or similar merchandise sold in the home market or to third countries. Notice is hereby given that the Department of the Treasury intends to revoke this finding. If this action is made final, the finding of dumping covering the subject merchandise from Belgium will be revoked. Interested persons invited to comment on this action.

EFFECTIVE DATE: June 18, 1979.

FOR FURTHER INFORMATION CONTACT: Al Jemmott, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202–566–5492).

SUPPLEMENTARY INFORMATION: A finding of dumping with respect to portland cement, other than white, nonstaining portland cement, from Belgium, except as to importations from the firm of Cimenteries Et Briqueteries Reunies, was published as Treasury Decision *55428* in the Federal Register on July 20, 1961 (26 FR 6511).

After due investigation, it has been determined tentatively that portland cement, other than white, nonstaining portland cement, from Belgium, is no longer being, nor likely to be, sold to the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*).

Statement of Reasons on Which This Tentative Determination Is Based

The investigation indicated that there have been no shipments of portland cement, other than white, nonstaining portland cement, from Belgium, to the United States by the firms subject to the finding for more than four years and there is no likelihood of resumption of sales at less than fair value.

Accordingly, notice is hereby given that the Department of the Treasury intends to revoke the finding of dumping with respect to portland cement, other than white, nonstaining portland cement, from Belgium.

In accordance with § 153.40, Customs Regulations (19 CFR 153.40), interested persons may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301 Constitution Avenue NW., Washington, D.C. 20229, in time to be received by his office not later than July 3, 1979. Requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than July 18, 1979. All persons submitting views or arguments should avoid repetitious and merely cumulative material, and they are reminded of the requirement to include nonconfidential summaries or approximated presentations of all confidential material.

This notice is published pursuant to § 153.44(c) of the Customs Regulations (19 CFR 153.44(c)).

Dated: June 8, 1979.

Robert H. Mundheim,

General Counsel of the Treasury.

[FR Doc. 79-18814 Filed 6-15-79; 8:45 am]

BILLING CODE 4820-02-M

[Department Circular, Public Debt Series—No. 12–79]

Treasury Notes of June 30, 1981; Series U–1981

June 14, 1979.

1. Invitation for Tenders

1. 1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $2,750,000,000 of United States securities, designated Treasury Notes of June 30, 1981, Series U–1981 (CUSIP No. 912827 JS 2). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent

of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the new securities may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities, to the extent that the aggregate amount of tenders for such accounts exceeds the aggregate amount of maturing securities held by them.

2. Description of Securities

2. 1. The securities will be dated July 2, 1979, and will bear interest from that date, payable on a semiannual basis on December 31, 1979, and each subsequent 6 months on June 30 and December 31, until the principal becomes payable. They will mature June 30, 1981, and will not be subject to call for redemption prior to maturity.

2. 2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2. 3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2. 4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2. 5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3. 1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Tuesday, June 19, 1979. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, June 18, 1979.

3. 2. Each tender must state the face amount of securities bid for. The minimum bid is $5,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11 percent. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. no bidder may submit more than one noncompetitive tender and the amount may not exceed $1,000,000.

3. 3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in Section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3. 4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3. 5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government Accounts. Tenders from others must be accompanied by a deposit of 5 percent of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3. 6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.750. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3. 7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

4. Reservations

4. 1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5. 1. Settlement for allotted securities must be made or completed on or before Monday, July 2, 1979, at the Federal

Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Thursday, June 28, 1979, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Tuesday, June 26, 1979, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the proceeding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented in the amount payable on the securities allotted.

5. 2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5. 3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5. 4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer from and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5. 5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6. 1 As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6. 2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Paul H. Taylor,

Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

[Department Circular, Public Debt Series—No. 13-79]

Treasury Notes of June 30, 1983; Series E-1983

June 14, 1979.

1. Invitation for Tenders

1. 1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $2,750,000,000 of United States securities, designated Treasury Notes of June 30, 1983 Series E-1983 (CUSIP No. 912827 JT 0). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the new securities may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities, to the extent that the aggregate amount of tenders for such accounts exceeds the aggregate amount of maturing securities held by them.

2. Description of Securities

2. 1. The securities will be dated July 2, 1979, and will bear interest from that date, payable on a semiannual basis on December 31, 1979, and each subsequent 6 months on June 30 and December 31, until the principal becomes payable. They will mature June 30, 1983, and will not be subject to call for redemption prior to maturity.

2. 2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2. 3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2. 4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2. 5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3. 1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Thursday, June 21, 1979. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Wednesday, June 20, 1979.

3. 2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed $1,000,000.

3. 3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in Section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3. 4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3. 5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5% of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3. 6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.250. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3. 7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

4. Reservations

4. 1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5. 1. Settlement for allotted securities must be made or completed on or before Monday, July 2, 1979, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Thursday, June 28, 1979, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Tuesday, June 26, 1979, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5. 2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5. 3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities

surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5. 4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5. 5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6. 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6. 2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Paul H. Taylor,

Fiscal Assistant Secretary.

BILLING CODE 7035-01-M

[Volume No. 20]

Petitions for Modification, Interpretation or Reinstatement of Operating Rights Authority

June 7, 1979.

The following petitions seek modification or interpretation or existing operating rights authority, or reinstatement of terminated operating rights authority.

All pleadings and documents must clearly specify the suffix (e.g. M1 F, M2 F) numbers where the docket is so identified in this notice.

An original and one copy of protests to the granting of the requested authority must be filed with the Commission within 30 days after the date of this notice. Such protests shall comply with Special Rule 247(e) of the Commission's *General Rules of Practice* (49 CFR 1100.247) [1] and shall include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon petitioner's representative, or petitioner if no representative is named.

MC 5296 (M1F) (notice of filing of petition to modify certificate), filed April 9, 1979. Petitioner: LACY'S EXPRESS, INC., P.O. Box 130, Pedricktown, NJ 08067. Representative: Michael R. Werner, 167 Fairfield Road, P.O. Box 1409, Fairfield, NJ 07006. Petitioner holds a motor *common carrier* certificate in MC–5296, issued October 28, 1975, authorizing transportation, over regular routes, of *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Philadelphia, PA, and Salem, NJ, serving all intermediate points: from Philadelphia across the Delaware River to Camden, NJ, then over NJ Hwy 45 to junction U.S. Hwy 130, then over U.S. Hwy 130 to Pennsville, NJ, and then over NJ Hwy 49 to Salem, and return over the same route, (2) between Westville, NJ, and Bridgeport, NJ, serving all intermediate points: from Westville over NJ Hwy 44 to Bridgeport, and return over the same route, serving in connection with routes set forth in (1) and (2) above the off-route points in Woodbury, National Park, Pedricktown, NJ, and those in Alloway, Quinton, and Lower Alloways Creed Townships, NJ. By the instant petition, petitioner seeks to modify the above authority to serve points in NJ, in lieu of the present specified off-route points.

MC 44737 (Notice of filing of petition to modify certificate), filed March 28, 1979. Petitioner: THE ANDREWS MOVING AND STORAGE COMPANY, a corporation, 4811 Van Epps Road, Cleveland, OH 44131. Representative: David A. Turano, Columbus Center, Suite 1800, 100 East Broad Street, Columbus, OH 43215. Petitioner holds motor *common carrier* certificate in MC–44737 issued October 27, 1959. MC–44737 authorizes transportation over irregular routes of *household goods* as defined by the Commission, between points in OH, on the one hand, and, on the other, points in CT, DE, IL, IN, KY, ME, MD, MA, MI, MO, NJ, NY, OH, PA., RI, VA, and DC. By the instant petition,

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

petitioner seeks to modify the authority as follows: change the territorial description to be between points in CT, DE, IL, IN, KY, ME, MD, MA, MI, MO, NJ, NY, OH, PA, RI, VA, and DC.

MC 45544 (M1F), (Notice of filing of petition to modify the territorial description), filed January 5, 1979. Petitioner: SILVER LINE, INC., 171 Commerce Rd., Carlstadt, NJ 07072. Representative: Edward L. Nehez, P.O. Box 1409, 167 Fairfield Rd., Fairfield, NJ 07006. Petitioner holds motor *common carrier certificates* in MC–45544 dated April 20, 1943 and MC–45544 Sub 1, dated March 4, 1947. MC–45544 authorizes, as pertinent, transportation, over irregular routes, of *cleaning fluid, corrugated boxes, piece goods, cut materials and trimmings, thread, sewing machines and pads, and wearing apparel,* between New York, NY, on the one hand, and, on the other, points in Hudson, Essex, Union, Middlesex, Somerset, Hunterdon, Bergen, Passaic, Morris and Warren Counties, NJ, and points in Northumberland, Northampton, Lehigh, Bucks, Carbon, Luzerne, and Schuylkill Counties, PA. MC–45544 Sub 1 authorizes transportation, over irregular routes, *wearing apparel* (not including such articles which are transported crated or on hangers), from points in Lebanon and Monroe Counties, PA, to New York, NY; and *Materials and equipment* used in the manufacture of wearing apparel and paper and paper containers used in the packing thereof, over irregular routes, from New York, NY, to points in Lebanon and Monroe Counties, PA. By this instant petition, petitioner seeks to modify the the territorial description in MC–45544 to read: "(1) between New York, NY, and points in Bergen, Passaic, Hudson, Essex, Union, Morris, Hunterdon, Warren, Middlesex, and Somerset Counties, NJ, on the one hand, and, on the other, points in PA on the east of U.S. Hwy 15; and (2) between New York, NY, on the one hand, and, on the other, points in Hudson, Essex, Union, Middlesex, Somerset, Hunterdon, Bergen, Passaic, Morris, and Warren Counties, NJ."

MC 65106 (M1F) (notice of filing of petition to modify permit), filed February 2, 1979. Petitioner: FOGLIA BROS., INC., 75 Manchester Place, Newark, NJ 07104. Representative: Robert B. Petter, The Forest Park Building, 168 Woodbridge Avenue, Highland Park, NJ 08904. Petitioner holds a *contract carrier* permit in MC–65106, issued September 5, 1972, authorizing, over irregular routes, the transportation of (1) *corn products,* between New York, NY, on the one hand, and, on the other, points in Bergen, Essex, Hudson, Passaic, and Union Counties, NJ, (2) *textile chemicals,* from New York, NY, to Hawthorne, NJ, and points in NJ within 30 miles of city hall, New York, NY, (3) *empty textile chemical* containers, from the destination points specified immediately above, to New York, NY, (4) *caustic soda,* from Passaic, NJ, to New York, NY, (5) *empty caustic soda containers,* from New York, NY, to Passaic, NJ, and (6) *paint, varnish, painters' supplies, materials, supplies* and *equipment* used by paint manufacturers, and advertising displays and materials used in connection therewith, between New York, NY, and points in Nassau and Westchester Counties, NY, on the one hand, and, on the other, Carteret and Newark, NJ. By the instant petition, petitioner seeks to add Orange County in part (6) as a radial point to be included along with the other counties in NY.

MC 102616 (Sub-904) (M1F) (notice of filing of petition to modify certificate) filed December 28, 1978. Petitioner: COASTAL TANK LINES, INC., 250 N. Cleveland-Massillon Road, Akron, OH 44313. Representative: Fred H. Daly, 1725 K Street NW., Suite 1009, Washington, DC 20006. Petitioner holds a motor *common carrier* certificate in MC–102616 Sub 904, issued October 9, 1975, authorizing transportation over irregular routes, of *chemicals* (except anhydrous ammonia, aqua ammonia, and liquid fertilizer), in bulk, from the facilities of Monsanto Company at or near Muscatine, IA, to points in the United States (except AK, HI, IA, and points in the St. Louis, MO, East St. Louis, IL commercial zone, as defined by the Commission). By the instant petition, petitioner seeks to delete the words the facilities of Monsanto Company at or near.

MC 109324 (Sub-18) (MI) (notice of filing of petition to delete restriction), filed January 9, 1979. Petitioner: GARRISON MOTOR FREIGHT, INC., P.O. Box 1278, Harrison, AR 72601. Representative: Jay C. Miner (same address as petitioner). Petitioner holds a motor *common carrier* certificate in MC 109324 (Sub–18) issued June 16, 1970, authorizing transportation, over regular routes, as pertinent, of: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), Between Springfield. Mo., and Kansas City, Kans., serving no intermediate points: From Springfield over Missouri Highway 13 to junction Missouri Highway 7 (near Clinton, Mo.), thence over Missouri Highway 7 to Harrisonville, Mo., thence over U.S. Highway 71 to junction U.S. Highway 40 (Interstate Highway 70), thence over U.S. Highway 40 (Interstate Highway 70) to Kansas City, Kans., and return over the same route. Between Springfield, Mo., and East St. Louis, Ill., serving no intermediate points: From Springfield over U.S. Highway 66 (Interstate Highway 44) to East St. Louis, and return over the same route. Between Mountain Home, Ark., and junction U.S. Highway 63 and U.S. Highway 66 (Interstate Highway 44) at Rolla, Mo., serving no intermediate points, and serving said junction as a point of joinder only: From Mountain Home over Arkansas Highway 5 to the Arkansas–Missouri State line, thence over Missouri Highway 5 to Gainesville, Mo., thence over U.S. Highway 160 to junction U.S. Highway 63, thence over U.S. Highway 63 to junction U.S. Highway 66 (Interstate Highway 44) at Rolla, and return over the same route. Restriction: The operations authorized herein are restricted against the transportation of shipments moving (1) between points in the St. Louis, Mo.-East St. Louis, Ill., Commercial Zone, as defined by the Commission, on the one hand, and, on the other, Little Rock, Ark., Memphis, Tenn., and Springfield, Mo., and the commercial zones thereof, as defined by the Commission, (2) between points in the Kansas City, Mo.-Kansas City, Kans., Commercial Zone, as defined by the Commission, on the one hand, and, on the other, Little Rock, Ark., Memphis, Tenn., and Springfield, Mo., and the commercial zones thereof, as defined by the Commission, and (3) between points in the St. Louis, Mo.-East St. Louis, Ill., Commercial Zone, as defined by the Commission, on the one hand, and, on the other, points in the Kansas City, Mo.-Kansas City, Kans., Commercial Zone, as defined by the Commission. By the instant petition, petitioner seeks to modify the above authority by deleting the restriction contained in (1) above which reads "(1) between points in the St. Louis, Mo.-East St. Louis, Ill., Commercial Zone, as defined by the Commission, on the one hand, and, on the other, Little Rock, Ark., Memphis, Tenn., and Springfield, Mo., and the commercial zones thereof, as defined by the Commission".

MC 119547 (Sub-33) (M1F) (notice of filing of petition to modify certificate), filed March 13, 1979. Petitioner: EDGAR W. LONG, INC., 3815 Old Wheeling

Road, Zanesville, OH 43701. Representative: Richard H. Brandon, 220 West Bridge Street, P.O. Box 97, Dublin, OH 43017. Petitioner holds a motor *common carrier* certificate in MC-119547 Sub 33 issued March 4, 1974, authorizing the transportation over irregular routes of *ceramic tile* and *brick facing*, (except in bulk), from Cambridge, OH, to points in the United States (except AK, HI, MD, MI, NY, PA, and WV). By the instant petition, petitioner seeks to modify the authority as follows: Substitute the words clay products for the words ceramic tile and brick facing.

MC 123233 (Sub-13) (M2F), filed March 15, 1979 (notice of filing of petition to modify certificate). Petitioner: PROVOST CARTAGE, INC., 7887 Rue Grenache, Ville D'Anjou, Quebec, Canada H1J 1C4. Representative: J. P. Vermette (same address as petitioner). Petitioner holds motor *common carrier* Certificate in MC-123233 Sub 13 issued December 13, 1977, which authorizes transportation, over irregular routes, of *chemicals, lactose, soybean oil, whiskey, explosives, tung oil, and castor oil*, in bulk, in tank or hopper-type vehicles, between ports of entry on the United States-Canada Boundary line at or near Trout River, Alexandria Bay, Rooseveltown, Ogdensburg, and Champlain, NY, Highgate Springs, Derby Line, and Norton, VT, Jackman, Van Buren, Houlton, Vanceboro, and Calais, ME, on the one hand, and, on the other, Livermore Falls, Rumford, Lincoln, Great Works, and Cumberland Mills, ME, and points in VT, NH, MA, CT, RI, NY, NJ, DE, MD, PA (except petrochemical products from points in PA), and OH (except liquid chemical wax from Cleveland, OH), restricted to the transportation of traffic originating at or destined to points in the Province of Quebec, Canada, and to the extent it authorizes the transportation of Classes A and B explosives, the certificate shall be limited in point of time to a period expiring August 9, 1982. By the instant petition, petitioner seeks to modify the authority as follows: deleting the words: "at or near Trout River, Alexandria Bay, Rooseveltown, Ogdensburg, and Champlain, NY, Highgate Springs, Derby Line, and Norton, VT, and Jackman; Van Buren, Houlton, Vanceboro, and Calais, ME".

Note.—MC-123233 (Sub-No. 13) (M1F), published November 25, 1977, is pending before the Commission.

MC 133867 (Sub-6) (M1F) (notice of filing of petition to modify permit), filed April 2, 1979. Petitioner: STARLING TRANSPORT LINES, INC., P.O. Box 1733, Fort Pierce, FL 33450. Representative: Dwight L. Koerber, Jr., 805 McLachlen Bank Building, 666 Eleventh Street, N.W., Washington, DC 20001. Petitioner holds *contract carrier* permit in MC 133867 (Sub-6), issued October 21, 1977, authorizing over irregular routes, the transportation of *frozen foods*, from Wethersfield, CT, to points in the United States (except AK, HI, and CT). Restriction: The operations authorized herein are limited to a transportation service to be performed, under a continuing contract, or contracts, with Foodways New York, Inc. By the instant petition, petitioner seeks to broaden the commodity to foodstuffs, add an additional origin point of New Paltz, NY, and restrict the origin points from the facilities of Foodways National, Inc.

MC 134467 (Sub-24) (M1F) (notice of filing of petition to modify certificate), filed February 21, 1979. Petitioner: POLAR EXPRESS, INC., P.O. Box 845, Springdale, AR 72764. Representative: Charles J. Kimball, Suite 350, Capitol Life Center, 1600 Sherman Street, Denver, CO 80203. Petitioner holds motor common carrier certificate in MC 134467 (Sub-24), issued December 28, 1978. MC 134467 (Sub-24) authorizes transportation over irregular routes of foodstuffs, from the facilities used by La Choy Food Products, a division of Beatrice Foods Co., at or near Archbold, OH, to points in AR, LA, OK, and TX, restricted to the transportation of traffic originating at the named facilities and destined to the indicated states. By the instant petition, petitioner seeks to modify the authority as follows: from the plantsites and/or storage facilities utilized by LaChoy Food Products and Beatrice Specialties Co., Divisions of Beatrice Foods Co., at or near Archbold, OH.

MC 138065 (Sub-2F) (M1F) (notice of filing of a petition to modify the territorial description), filed January 16, 1979. Applicant: LOU BOLE CARPET CARRIERS, INC., L. Davis Division, 325 Main Street, Belleville, NJ 07109. Representative: Michael R. Werner, P.O. Box 1409, 167 Fairfield Road, Fairfield, NJ 07006. Petitioner holds motor *common carrier* authority in MC 138065 (Sub-2) authorizing transportation over irregular routes of: *Floor covering*, and *materials, supplies, and equipment* used in the installation of floor covering (except commodities in bulk), between New York, NY, on the one hand, and, on the other, points in Rockland and Westchester Counties, NY, points in Fairfield County, CT, and those points in that part of New Jersey on and north of a line beginning at junction New Jersey-Pennsylvania State line and Interstate Highway 195 and extending along Interstate Highway 195 to junction New Jersey Highway 526, thence along New Jersey Highway 526 to junction New Jersey Highway 549, thence along New Jersey Highway 549 to the Atlantic Ocean. By the instant Petition, petitioner seeks to modify the territorial description to read: "between New York, NY, on the one hand, and, on the other, points in Rockland, Westchester, Orange and Putnam Counties, NY, New Milford, Ansonia, Derby, Orange and Milford, CT, points in Fairfield County, CT, and those points in that part of NJ on and north of a line beginning at junction NJ-PA line and Interstate Hwy 195 and extending along Interstate Hwy 195 to junction NJ Hwy 526, then along NJ Hwy 526 to junction NJ Hwy 549, then along NJ Hwy 549 to the Atlantic Ocean."

MC 138157 (Sub-44) (M1F) (Notice of filing of petition to modify certificate), filed January 26, 1979. Petitioner: SOUTHWEST EQUIPMENT RENTAL, INC., d.b.a. SOUTHWEST MOTOR FREIGHT, P.O. Box 9608, Chattanooga, TN 37412. Representative: Patrick E. Quinn (same address as applicant). Petitioner holds a *motor common carrier* certificate in MC 138157 (Sub-44), issued July 14, 1978, authorizing over irregular routes, the transportation of (1) *carpeting* and *yarn*, from the facilities of Berven Carpets Corp., at or near Fresno, CA, to Ridgefield Park, NJ, Franklin Park, IL, Roseville, MI, Houston, TX, Phoenix, AZ, and Cincinnati, OH, and (2) *equipment, materials*, and *supplies* used in the manufacture, production, and distribution of the commodities named in (1) above, (except in bulk, in tank vehicles) and *carpeting* and *yarn*, from points in AL, GA, PA, NC, SC, TN, and VA, to Los Angeles, CA, and the facilities of Berven Carpets Corp., at or near Fresno, CA. By the instant petition, petitioner seeks to modify in part (1) by substituting Detroit, MI, in lieu of Roseville, MI, and in part (2) by deleting the facilities of Berven Carpets Corp., at or near Fresno, CA, and substitute points in Fresno, Tulare, Merced, and Madera Counties, CA.

MC 140484 (Sub-291) (M1F) (Notice of filing of petition to modify the territorial description in a pending certificate), filed January 5, 1979. Petitioner: LESTER COGGINS TRUCKING, INC., 2871 E. Edison Ave., P.O. Box 69, Ft. Myer, FL 33901. Representative: Chester A. Zyblut, 366 Executive Bldg., 1030 Fifteenth St., NW., Washington, DC 20005. Petitioner has applied for motor

common carrier authority in MC 140484 (Sub-29), and a decision was served on April 3, 1979 granting *electric motors, electric gear motors, power transmission equipment,* and *machinery, and controllers or controller parts* and *parts and accessories therefor, elevator and elevator parts and accessories, escalator and escalator parts and accessories, weighing machinery and parts and accessories* and *tele-communication equipment and parts and accessories,* between Cleveland, OH, Mishawaka, IN, Rogersville, TN, and Lawrenceburg, KY. The above-authority is conditioned to publication in the **Federal Register.** By the instant petition, petitioner seeks to modify the above territorial description by adding Athens, Gainesville and Atlanta, GA, Madison, IN, Weaverville, NC, Spartansburg, SC, and Chicago, IL as additional points.

MC 141717 (Notice of filing of petition to modify certificate), filed December 1, 1978. Petitioner: HOWARD MOUNTAIN TRANSPORTATION CORP., 89–50 56th Avenue, Elmhurst, NY 11373. Representative: Michael K. Benimowitz, 299 Broadway, New York, NY 10007. Petitioner holds motor *common carrier* certificate in MC 141717, issued June 4, 1976. MC 141717 authorizes transportation, over irregular routes of *passengers and their baggage,* in special operations, in non-scheduled, door-to-door service, limited to the transportation of not more than in part (1) 8 passengers and, in part, (2) 6 passengers, in any one vehicle, but not including the driver thereof, and not including children under ten years of age who do not occupy a seat or seats, during in part (1) the season extending from the 15th day of May to the 30th day of September, inclusive, between New York, NY, on the one hand, and, on the other, points in Liberty, Thompson, and Fallsburg Townships, Sullivan County, and Wawarsing Township, Ulster County, NY, and in part (2) the season extending from November 1 to April 30, both inclusive of each year, between New York, NY, and Lakewood, NJ. By the instant petition, petitioner seeks to modify the authority as follows: Delete the seasonal restrictions in both parts (1) and (2).

Republications of Grants of Operating Rights; Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the **Federal Register.**

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this **Federal Register** notice. Such pleading shall comply with Special Rule 247(e) of the Commission's *General Rules of Practice* (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

MC 19311 (Sub-43F) (republication), filed April 3, 1978, previously noticed in the **Federal Register** issue of June 29, 1978. Applicant: CENTRAL TRANSPORT, INC., 34200 Mound Road, Sterling Heights, MI 48077. Representative: Elmer J. Maue, 34200 Mound Road, Sterling Heights MI 48077. A Decision of the Commission, Review Board number 1, decided March 30, 1979, and served April 6, 1979, finds that the present and future public convenience and necessity require operation by applicant, or foreign commerce, as a *common carrier* by motor vehicle, in foreign commerce only, over irregular routes, transporting *expanded plastic products* (except in bulk) from Detroit and Port Huron, MI, and Buffalo, NY, to points in Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota, Missouri, Ohio, West Virginia, and Wisconsin, those points in Pennsylvania on and west of U.S. Hwy 219, and those points in New York on and west of a line beginning at the New York–Pennsylvania State line and extending along U.S. Hwy 219 to its junction with NY Hwy 78, then along NY Hwy 78 to Lake Ontario. Applicant is fit, willing, and able properly to perform the granted service and to conform to the requirements of Title 49, Subtitle IV, U.S. Code, and the Commission's regulations. The purpose of this republication is to indicate applicant's actual grant of authority.

MC 51146 (Sub-593F) (republication), filed April 10, 1978, published in the **Federal Register** issue of July 27, 1978, and republished this issue. Applicant: SCHNEIDER TRANSPORT, INC., P.O. Box 2298, Green Bay, WI 54306. Representative: John R. Patterson, 2480 East Commercial Boulevard, Fort Lauderdale, FL 33308. A Decision of the Commission, Review Board No. 2, decided March 21, 1979, and served April 9, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier,* by motor vehicle, over irregular routes, transporting *such commodities* as are dealt in by distributors of games and toys (except commodities in bulk), between points in the United States (except AK and HI), restricted to the transportation of traffic originating at or destined to the facilities of M.W. Kasch Co., that applicant is fit, willing, and able properly to perform such service to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the territorial description.

MC 89684 (Sub-100) (republication), filed October 17, 1977, published in the **Federal Register** issue of December 22, 1977 and April 27, 1978, and republished this issue. Applicant: WYCOFF COMPANY, INC., 560 South 300 West, Salt Lake City, UT 84110. Representative: Kent W. Capener, 560 South 300 West, Salt Lake City, UT 84110. A Decision of the Commission, Review Board Number 1, decided March 5, 1979, and served March 19, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, transporting *general commodities* (except classes A and B explosives, commodities in bulk, commodities which require special equipment, and household goods as defined by the Commission), between Elko and Wendover, NV, on the one hand, and, on the other, points in Washoe, Storey, Carson City, Humboldt, Pershing, Churchill, Lander, Eureka, and White Pine Counties, NV, restricted (1) to the transportation of packages or articles each not exceeding 100 pounds in weight, and (2) against the transportation of shipments of packages or articles weighing in the aggregate more than 200 pounds from one consignor to one consignee on any one day. The purpose of this publication is to show Wendover, NV as a service point.

Note.—Applicant may tack the above authority with its present authority.

MC 116073 (Sub-365) (republication), filed September 26, 1977, published in the **Federal Register** issue of November 25, 1977, and republished this issue. Applicant: BARRETT MOBILE HOME TRANSPORT, INC., 1825 Main Ave.,

P.O. Box 919, Moorhead, MN 56560. Representative: Donald E. Cross, 918 16th Street, N.W., Ste. 700, Washington, D.C. 20006. A Decision of the Commission, Division 1, decided May 11, 1979, and served May 24, 1979, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of (1) *travel and camper trailers, fifth wheel trailers, camper and camp coaches, and motor homes*, in truckaway service, and (2) *automobiles*, in secondary movements, in truckaway service, from points in Indiana (except Fort Wayne), Ohio (except Springfield), and Michigan to points in the United States (except Alaska and Hawaii); that applicant is fit, willing, and able properly to perform the service authorized and to conform to the requirements of Title 49, sub title IV, U.S. Code (formerly the Interstate Commerce Act), and the Commission's regulations. The purpose of this republication is to modify the commodity description and the territorial description.

MC 121664 (Sub-12) (republication), filed September 25, 1975, published in the **Federal Register** issue of October 31, 1975, and republished this issue. Applicant: G. A. HORNADY, CECIL M. HORNADY and B. C. HORNADY, d.b.a., HORNADY BROTHERS TRUCK LINE, Box 846, Monroeville, AL 36480. Representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, NJ 07306. A Decision of the Commission, Division 2, decided March 1, 1979, and served March 14, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, of lumber, lumber products, and particleboard, between points in AL, GA, FL, KY, MS, and TN, restricted to the transportation of traffic which either originates at or is destined to a facility of Moore-Handley, Inc., or from a supplier of Moore-Handley, Inc., to and from construction or building sites, located in the named states. The purpose of this republication is to add "* * * from a supplier of Moore-Handley, Inc., to and from construction or building sites * * *"

MC 124211 (Sub-322F) (republication), filed April 10, 1978, previously noticed in the **Federal Register** issue of July 27, 1978. Applicant: HILT TRUCK LINE, INC., P.O. Box 988, D.T.S., Omaha, NE 68101. Representative: Thomas L. Hilt, P.O. Box 988, D.T.S., Omaha, NE 68101. A Decision of the Commission, Review Board Number 2, decided April 5, 1979, and served May 3, 1979, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, transporting *herbicides, insecticides, fertilizer, vermiculite*, and *ice-melting compounds* (except commodities in bulk, from Kenosha and Union Grove, WI, to points in the United States (except Wisconsin, Alaska, and Hawaii). Applicant is fit, willing, and able properly to perform such service and to conform to the requirements of Title 49, Subtitle IV, U.S. Code, and the Commission's regulations. The purpose of this republication is to add ice-melting compounds to the commodity description.

MC 134286 (Sub-52F) (republication), filed June 22, 1978, published in the **Federal Register** issue of August 10, 1978, and republished this issue. Applicant: ILLINI EXPRESS, INC., P.O. Box 1564, Sioux City, IA 51102. Representative: Charles M. Williams, 350 Capitol Life Center, 1600 Sherman Street, Denver, CO 80203. A Decision of the Commission, Review Board No. 4, decided March 30, 1979, and served April 6, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, transporting *meat, meat products, meat by-products*, and *articles* distributed by meat packinghouses as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from the facilities of Sioux Preme Packing Co., located at or near Sioux Center and Sioux City, IA, to points in CT, DE, ME, MD, MA, MI, NH, NJ, NY, PA, RI, TX, VT, VA, WV and DC, restricted to traffic originating at the named origins, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the territorial description.

MC 134286 (Sub-54F) (republication), filed April 5, 1978, published in the **Federal Register** issue of July 13, 1978, and republished this issue. Applicant: ILLINI EXPRESS, INC., P.O. Box 1564, Sioux City, IA 51102. Representative: Charles M. Williams, 350 Capitol Life Center, 1600 Sherman Street, Denver, CO 80203. A Decision of the Commission, Review Board No. 3, decided March 16, 1979, and served April 18, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, transporting *chemicals, acids, solvents, and edible oils* (except in bulk), (A) from (1) Chicago, IL, (2) the facilities of Hawkins Chemical Co., and Exxon Chemical Corp., at or near Minneapolis, MN, (3) the facilities of F.M.C. Corp., at or near Lawrence, KS, and Green River, WY, (4) the facilities of Olin Chemical Co., at or near Joliet, IL, (5) the facilities of Sanford Chemical Co., at or near Elk Grove Village, IL, (6) the facilities of Velsicol Chemical Co., at or near St. Louis, MO, (7) the facilities of James Varley & Son Co., at or near St. Louis, MO, (8) the facilities of BASF Wyandotte Chemical Corp., and Penwalt Corp., at or near Wyandotte, MI, (9) the facilities of Ozark-Mahoning Co., at or near Tulsa, OK, (10) the facilities of Floridin Company at or near Berkeley Springs, WV, and Quincy, FL, (11) the facilities of Ash Grove Chemical Co., at or near Springfield, MO, (12) the facilities of Lien Chemical Co., at or near Rapid City, SD, (13) the facilities of Burris Chemical Co., at or near Charleston, SC, and East Point, GA, (14) the facilities of Barnebey Cheney, at or near Columbus, OH, (15) the facilities of Cities Service Co., at or near Copperhill, TN, (16) the facilities of Ft. Recovery Industries, at or near Ft. Recovery, on, (17) the facilities of Great Lakes Chemical Corp., at or near West Lafayette, IN, (18) the facilities of Marathon Morco Co., at or near Dickinson, TX, (20) the facilities of Mazer Chemical, at or near Gurnee, IL, (21) the facilities of Quality Chemical Co., at or near Baltimore, MD, (22) the facilities of Stauffer Chemical Co., at or near Green River, WY, (23) the facilities of Westvaco Chemical Division, at or near Covington, VA, (24) the facilities of Lowe's Inc., at or near Oran, MO, (25) the facilities of P.P.G. Industries, at or near Barberton, OH, and Natrium, WV, (26) the facilities of Diamond Shamrock Chemical Co., at or near Pineesville, OH, (27) the facilities of Allied Chemical Co., at or near Wilmington and North Claymont, DE, Richmond, VA, and Syracuse, NY, (28) the facilities of E.I. DuPont, at or near Memphis, TN, (29) the facilities of Dow Chemical Co., at or near Midland and Ludington, MI, (30) the facilities of North Star Chemical, at or near Pine Bend, MN, (31) the facilities of Penwalt Corp., at or near Delaware,

OH, and (32) the facilities of Standard Milling, at or near Meta, MO, to points in IA and NE, and (B) from the facilities of Warren-Douglas Chemical Co., at or near Omaha, NE, and Sioux City, IA, to Phoenix, AZ, and points in NM, OK, and TX, restricted, in (A) and (B), to the transportation of traffic originating at the named origins and destined to the indicated destinations, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the territorial description.

MC 138126 (Sub-24F) (republication), filed March 20, 1978, published in the **Federal Register** issue of June 8, 1978, and republished this issue. Applicant: WILLIAMS REFRIGERATED EXPRESS, INC., P.O. Box 47, Old Denton Road Federalsburg, MD 21632. Representative: Chester A. Zyblut, 366 Executive Building, 1030 15th Street N.W., Washington, DC 20005. A Decision of the Commission, Review Board No. 2, decided April 17, 1979, and served May 10, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, transporting *frozen foodstuffs*, from the facilities used by Campbell Soup Company, Inc., located in DE and MD and points in that part of PA on and east of U.S. Hwy 15, to points in CT, DE, KY, MD, MA, MI, NJ, NY, OH, PA, RI, VA, WV and DC, those in TN on and east on U.S. Hwy 127, and Atlanta, GA, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. the purpose of this republication is amend the territorial description.

MC 139208 (Sub-35F) (republication), filed March 30, 1978, published in the **Federal Register** issue of July 7, 1978, and republished this issue. Applicant: F.M.S. TRANSPORTATION, INC., Box 1597, 2584 Harley Drive, Maryland Heights, MO 64043. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 11th St. N.W., Washington, DC 20001. A Decision of the Commission, Review Board No. 1, decided March 21, 1979, and served April 3, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *contract carrier*, by motor vehicle, over irregular routes, transporting *general commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), between Hatboro, PA, on the one hand, and, on the other, points in the United States (except AK, HI, and PA), under continuing contract(s) with Chromalloy American Corporation of Clayton, MO, will be consistent with the public interest and the national transportation policy. The purpose of this republication is to modify the comodity description.

MC 140484 (Sub-29F) (republication), filed February 28, 1978, published in the **Federal Register** issue of April 6, 1978, and republished this issue. Applicant: LESTER COGGINS TRUCKING, INC., 2671 East Edison Avenue, P.O. Box 69, Fort Myers, FL 33902. Representative: Chester A. Zyblut, 366 Executive Building, 1030 Fifteenth Street, N.W., Washington, DC 20005. A Decision of the Commission, Review Board Number 1, decided March 2, 1979, and served April 3, 1979, finds that the present and future public convenience and necessity require operations by applicant in the interstate or foreign commerce as a *common carrier, by motor vehicle, over irregular routes, transporting electric motors, electric gear motors, power transmission equipment, and machinery and controllers or controller parts and parts and accessories therefor, elevator and elevator parts and accessories, escalator and escalator parts and accessories, weighing machinery and parts and accessories and tele-communication equipment and parts and accessories, between Cleveland, OH, Mishawaka, IN, Rogersville, TN, and Lawrenceburg, KY*, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of Title 49, Subtitle IV, U.S. Code and the Commission's regulations. The purpose of this republication is to show Lawrenceburg, KY, as a service point in lieu of Lexington, KY.

MC 143006 (republication), filed February 7, 1977, published in the **Federal Register** issue of April 14, 1977, and republished this issue. Applicant: DORWIN TRUCKING COMPANY, INC., 3420 52nd Street East, Tacoma, WA 98443. Representative: George Kargianis, 2120 Pacific Building, Seattle, WA 98104. A Decision of the Commission, Division 2, decided May 15, 1979, and served May 18, 1979, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, transporting *cranes, steel, rubber-covered rollers, commodities*, the transportation of which because of size or weight require the use of special equipment, and *contractors' equipment and supplies*, between points in WA, on the one hand, and, on the other, points in ID, MT, OR, and WA, that applicant is fit, willing and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the commodity description.

Motor Carrier, Broker, Water Carrier and Freight Forwarder Operating Rights Applications

The following applications are governed by Special Rule 247 of the Commission's General Rules of Practice (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the **Federal Register**. Failure to seasonably file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with Section 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected.

MC 29555 (Sub-96F), filed February 1, 1979. Applicant: BRIGGS TRANSPORTATION CO., a corporation, North 400 Griggs-Midway Bldg., St. Paul, MN 55104. Representative: Carl L. Steiner, 39 S. LaSalle St., Chicago, IL 60603. To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over regular routes, transporting *general commodities*, (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between St.

Louis, MO, and LaCrosse, WI, over U.S. Hwy 61, serving the intermediate points of Keokuk, Fort Madison, Burlington, Muscatine, and DeWitt, IA, and serving the junctions of U.S. Hwys 61 and 6, U.S. Hwys 61 and 30, and U.S. Hwys 61 and 218 for the purpose of joinder only, (2) between St. Louis, MO, and Keokuk, IA, (a) over U.S. Hwy 67 to junction U.S. Hwy 136, then over U.S. Hwy 136 to Keokuk, and return over the same route, serving the intermediate point of Macomb, IL, and (b) over MO Hwy 79 to junction Hwy 79, then over IL Hwy 79 to junction IL Hwy 57, then over IL Hwy 57 to junction IL Hwy 96, then over IL Hwy 96 to junction U.S. Hwy 136, and return over the same route, serving no intermediate points, (3) between St. Louis, MO, and Rockford, IL, from St. Louis over Interstate Hwy 55 to junction U.S. Hwy 51, then over U.S. Hwy 51 to Rockford, and return over the same route, serving no intermediate points, (4) between junction U.S. Hwys 67 and 136 and Rockford, IL, from junction U.S. Hwys 67 and 136, over U.S. Hwy 67 to junction IL Hwy 2, then over IL Hwy 2 to Rockford, and return over the same route, serving the intermediate points of Dixon, Sterling, and Rock Falls, IL, (5) between St. Louis, MO, and Omaha, NE, from St. Louis, over Interstate Hwy 70 to junction Interstate Hwy 29, then over Interstate Hwy 29 to Omaha, and return over the same route, serving no intermediate points, (6) between junction U.S. Hwys 61 and 218, and Cedar Rapids, IA, over U.S. Hwy 218, serving the intermediate point of Iowa City, IA, and serving the junction of U.S. Hwys 61 and 218 for the purpose of joinder only, (7) between junction IA Hwy 38 and U.S. Hwy 61, and Cedar Rapids, IA, from junction IA Hwy 38 and U.S. Hwy 61 over IA Hwy 38 to junction Interstate Hwy 80, then over Interstae Hwy 80 to junction Interstate Hwy 380, then over Interstate Hwy 380 to Cedar Rapids, and return over the same route, serving the intermediate point of Iowa City, IA, and serving the junction of IA Hwy 38 and U.S. Hwy 61 for the purpose of joinder only, (8) between junction U.S. Hwys 218 and 34, and Des Moines, IA, from junction U.S. Hwys 218 and 34 over U.S. Hwy 34 to junction U.S. Hwy 63, then over U.S. Hwy 63 to junction U.S. Hwy 163, then over U.S. Hwy 163 to Des Moines and return over the same route, serving the intermediate points of Oscaloosa, Ottumwa, Fairfield, and Mt. Pleasant, IA, and serving the junction of U.S. Hwys 218 and 34 for purpose of joinder only, (9) between junction Interstate Hwys 70 and 35 and Des Moines, IA, over Interstate Hwy 35, serving no intermediate points, for the purpose of joinder only, (10) between junction Interstate Hwy 70 and U.S. Hwy 65 and Des Moines, IA, over U.S. Hwy 65, serving no intermediate points, for the purpose of joinder only, and (11) between junction Interstate Hwy 70 and U.S. Hwy 63, and Ottumwa, IA, over U.S. Hwy 63, serving no intermediate points, for the purpose of joinder only. (Hearing site: St. Louis, MO, Minneapolis, MN, and Des Moines, IA.)

MC 134922 (Sub-288F), filed March 23, 1979. Applicant: B. J. McADAMS, INC., Route 6, Box 15, North Little Rock, AR 72118. Representative: Bob McAdams (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *pipe fittings and pipe hangers*, from Columbia, PA, to points in AZ, CA, ID, NV, NM, OR, TX, UT, and WA. (Hearing site: Philadelphia, PA, or Washington, DC.)

Note.—Applicant states that its purpose is to replace interline service with single-line service.

Motor Carrier Transfer Proceedings

Application filed for temporary authority under Section 11349 in connection with transfer application under Section 10926 and Transfer Rules, 49 CFR Part 1132.

MC FC 78154. By application filed May 25, 1979, DARRELL MADDEN, an individual, d.b.a. DARRELL D. MADDEN TRUCKING, 2232 East Maime Eisenhower Avenue, Boone, IA 50036, seeks temporary authority to transfer a portion of the operating rights of Dakota Express, Inc., 550 East Fifth Street South, South St. Paul, MN 55075, under Section 210a(b). The transfer to Darrell Madden, an individual, d.b.a. Darrell D. Madden Trucking, of a portion of the operating rights of Dakota Express, Inc., is presently pending.

MC FC 78163. By application filed May 30, 1979, AUTOBUS VENISE (1978) LTEE, 50 McArthur Road, Valleyfield, Quebec J6S 4M5 CD, seeks temporary authority to transfer the operating rights of Venise Coach Line, Inc., 50 McArthur Road, Valleyfield, Quebec J6S 4M5, CD, under section 210a(b). The transfer to Autobus Venise (1978) LTEE, of the operating rights of Venise Coach Line, Inc., is presently pending.

Motor Carrier Board Transfer Proceedings

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include request for oral hearing, must be filed with the Commission on or before July 18, 1979. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

Finance Docket 29027F, filed April 12, 1979. Transferee: AURORA INTERNATIONAL FORWARDING, INC., 5060 Shawline Dr., San Diego, CA 92111. Transferor: COLUMBIA EXPORT PACKERS, INC., Joel Mithers, Trustee in Bankruptcy, Broadway Plaza, Suite 1702, 700 S. Flower St., Los Angeles, CA 90017. Representative: Alan F. Wohlstetter, 1700 K St. NW., Washington, DC 20006. Authority sought for purchase by transferee of the freight forwarder rights of transferor as set forth in permit No. FF–325 (Sub-No. 1), issued October 5, 1977, as follows: operations as a freight forwarder of (a) *used household goods* and *unaccompanied baggage* and (b) *used automobiles*, between points in the United states (including AK and HI), restricted in (b) above, to the transportation of export-import traffic. Transferee holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. § 11349.

Finance Docket 29041F filed May 1, 1979. Transferee: MS EXPRESS, Inc., 600 Grant St. Pittsburg, PA 15219.

Transferor: MASTER FORWARDING CORPORATION, (The Union National Bank of Pittsburgh, Successor-In-Interest), Fourth Ave. and Wood St., Pittsburgh, PA 15222. Applicants' representatives: William A. Chesnutt, 1776 F St., N.W., Washington, D.C. 20006. M. Bruce McCullough, 5700–600 Grant St., Pittsburgh, PA 15219. Authority sought for purchase by transferee of the permit held by transferor in No. FF–139, issued March 27, 1970, authorizing operations as a freight forwarder of general commodities, (1) from points in CT, MA, NJ, NY, KY, IL, and MO, to points in IN, TN, IL, WI, MN, IA, MO, AR, LA, TX, OK, KS, NE, SD, ND, and CO; (2) between points in MA, CT, PA (except Philadelphia), NJ (except Bergen, Essex, Hudson, Middlesex, Passaic, and Union Counties), and Rockland, Suffolk, Orange, Putnam, Ulster, Dutchess, and Sillivan Counties, NY, on the one hand, and, one the other, points in KY, MI, and OH; (3) between points in MI and OH, on the one hand, and, on the other, points in MD (except Baltimore), and Delware (except Wilmington), (4) from Indianapolis, IN, to points in MA, CT, DE (except Wilmington), (4) from Indianapolis, IN, to points in MA, CT, DE (except Wilmington), PA (except Philadelphia), NJ (except Bergen, Essex, Hudson, Middlesex, Passaic, Union Countries), and Suffolk County, NY; (5) from Cambridge, IN, to points in MA, CT, and Suffolk County, NY, and (6) from points in ME, MD, NH, PA, RI, and VT, to points in LA, TN, and TX. Transferee holds no authority from the Commission.

MC–FC 77575, filed March 23, 1979. Transferee: REMY MOVING & STORAGE CORP., Old Post Road, Walpole, MA 02081. Transferor: REMY MOVING & STORAGE OF MASSACHUSETTS, INC. (same as transferee). Representative: Robert J. Gallagher, 1000 Connecticut Ave., NW., Suite 1200, Washington, D.C. 20036. Authority sought for purchase by transferee of the operating rights of transferor in Certificate MC 2677, issued January 31, 1968, acquired by transferor in MC–FC 76614 under its prior name of Remy Transportation Corp., as set froth below: Household goods as defined by the Commission, between points in Massachusetts, east of the Connecticut River, including those on the west bank of the Connecticut River, on the one hand, and, on the other, points in CT, IL, ME, MD, OH, NH, NJ, NY, PA, RI, VA, VT, and DC. Transferee holds no authority from the Commission. An application for temporary authority has not been filed.

MC–FC 77930, filed November 14, 1978. Transferee: T & E TRUCKING, INC., Box 342, Clarksville, VA 23927. Transferor: CLARENCE OVERTON THOMAS, d.b.a. C. O. THOMAS TRUCKING, Route 1 Box 153, New Canton, VA 23213. Applicants' representative: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, NY 10048. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC–114949, issued March 15, 1973, as follows: *Lumber and pallets,* from Drakes Branch, VA, to points in WV, OH, MD, DE, PA, NJ, NY, and DC. *Lumber,* from Drakes Branch, VA, to Bargersville, IN, and Louisville, KY. *Lumber,* (except plywood), from Drakes Branch, VA, to points in CT, KY (except Louisville), IL, IN (except Bargersville), MI, and TN. The two commodity descriptions next above, are limited to a transportation service to be performed under continuing contract(s) with Stanley Land and Lumber Corporation, of Drakes Branch, VA. Transferee presently holds no authority from this Commission. Application has been granted for temporary authority under 49 U.S.C. § 11349.

MC–FC 78046, filed February 26, 1979. Transferor: ROBCO TRANSPORTATION, INC., P.O. Box 510, West Des Moines, Iowa 50265. Transferee: CONTINENTAL EXPRESS, INC., 486 West Eagle Lake Drive, Osseo, Minnesota 55369. Applicant's Representative: Grant J. Merritt, 4444 IDS Center, Minneapolis, Minnesota 55402. Authority sought to transfer pursuant to Section 212(b) of the Interstate Commerce Act a portion of Transferor's Certificate MC 136786, (Sub-92), issued August 18, 1977, as follows: to transport over irregular routes frozen prepared foods from Duluth, Minnesota, to points in ND, SD, NB, IA, MO, WI, IL, IN, MI, OH, PA, WV, VA, MD, DE, NJ, NY, MA, CN, RI, VT, NH, MA, and DC. Restricted to the transportation of shipments originating at the plantsites or warehouse facilities of Jeno's, Inc. at Duluth, MN, and destined to points in the above-name destination States and DC. Transferee holds no authority from the Commission and no temporary authority application has been filed.

MC–FC 78050, filed February 15, 1979. Transferee: LEONARD EXPRESS, INC., P.O. Box 23, 13 Third Street, Charleroi, PA 15022. Transferor: C. E. LIZZA, INC., P.O. Box 308, Lignoier, PA 15658. Transferee's representative: William A. Gray, 2310 Grant Building, Pittsburgh, PA 15219. Transferor's representative: David R. Gold, 200 Union Trust Building, Greensburg, PA 15601. Authority sought for the purchase of the operating rights set forth in Permit MC 48213 (Sub-18), MC 48213 (Sub-24), MC 48213 (Sub-27), MC 48213 (Sub-32), MC 48213 (Sub-33), MC 48213 (Sub-35), MC 48213 (Sub-37), MC 48213 (Sub-39), MC 48213 (Sub-41), and MC 48213 (Sub-42). Transferee presently holds no authority from this Commission. Application has been filed for temporary authority under Section 210a(b). The commodities authorized include explosives, wall covering, synthetic fiber yarn, and dry animal and poultry feeds, and the involved territory includes numerous named States.

MC FC–78058, filed March 5, 1979. Transferee: INTERNATIONAL STAGE LINES, INC., No. 6, 3150 E. 58th Ave., Vancouver, British Columbia, Canada, V5S 3S9. Transferor: VANCOUVER ISLAND COACH LINES LTD., 710 Douglas St., Victoria, British Columbia, Canada. Representative: Leslie R. Peterson, 600–890 W. Pender St., Vancouver, British Columbia, Canada, V6C 1K4. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificates MC 124233 (Sub-6 and 7), issued October 3, 1969 and August 12, 1971, respectively, as follows: *Passengers and their baggage,* in round-trip charter, and special operations in sightseeing and pleasure tours, beginning and ending at ports of entry on the United States-Canada boundary line in WA, and extending to points in AZ, CA, CO, ID, MT, NV, OR, UT, WA, and WY. *Passengers and their baggage* in the same vehicle with passengers, in one-way charter operations, from ports of entry on the United States-Canada Boundary line in WA, to points in WA. Transferee holds no authority from this Commission. Application has been filed for temporary authority under 49 U.S.C. § 11349.

MC–FC 78059, filed March 8, 1979. Transferee: MOUNTAIN WEST TRANSPORTATION CO., a corporation, 346 W. South Temple, Salt Lake City, UT 84101. Transferor: SALT LAKE TRANSPORTATION CO., a corporation, 346 W. South Temple, Salt Lake City, UT 84101. Representative: Bruce W. Shand, 430 Judge Bldg., Salt Lake City, UT 84111. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificates MC–2239 and Subs 1, 2, and 3, issued July 1, 1942, October 9, 1962, May 26, 1967, and March 28, 1972 respectively, as follows: (A) *Passengers and their*

baggage, (1) in charter operations, from Salt Lake City, UT, to points in AZ, CO, ID, MT, NV, WY, and UT within 400 miles of Salt Lake City, UT, and return, restricted to the transportation of traffic originating at the point indicated, (2) in special operations, in round-trip sightseeing or pleasure tours, originating at Salt Lake City, UT, and extending to those points in AZ, CO, ID, MT, NV, NM, OR, and WY within 400 miles of Salt Lake City, and return, and (3) in special operations, in sightseeing or pleasure tours, from Salt Lake City, UT, to West Yellowstone, MT, and from West Yellowstone, MT, to Salt Lake City, UT. (B) *Passengers and their baggage* in the same vehicle with passengers, over a regular route between Salt Lake City and Brighton, UT, serving all intermediate points. Transferee holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. § 11349.

MC–FC 78060, filed March 6, 1979. Transferee: VIKING INTERNATIONAL, INC., 1434 S.W. 137th, Seattle, WA 98166. Transferor: J & R TRUCKING, INC., 4104 83rd S.E., Mercer Island, WA 98040. Representative: James T. Johnson, 1610 IBM Bldg., Seattle, WA 98101. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificates No. MC 140313 Subs 4, 7, and 8, issued July 30, 1976, October 6, 1977, and January 10, 1978, as follows: Metal doors and metal fireplaces, from Fredericksburg, VA, to Sacramento, CA, and points in OR and WA; Metal doors, metal fireplaces and attachments and related parts of metal doors and metal fireplaces, from Fredericksburg, VA, to points in AZ and NV, and ports of entry on the U.S.-Canada Boundary in MN, MO, NY, and ND; Galvanized pipe, furnaces, furnace fittings and parts, air conditioners, and air conditioner parts, from Cincinnati, OH, to points in ID, OR, and WA. Transferee holds no ICC authority and a temporary authority application has been filed.

MC–FC 78061, filed February 8, 1979. Transferee: BLUE RIDGE LINES, LTD. 134–F LaMancha Drive, Asheville, NC 28805. Transferor: TRAILWAYS SOUTHEASTERN LINES INC., 200 Spring St., N.W., P.O. Box 56669, Atlanta, GA 30343. Representative: Edward S. Finley, Jr., P.O. Box 109, Raleigh, NC 27602. Authority sought for purchase by transferee of portions of the operating rights held by transferor in Certificate MC 61599 issued November 2, 1948, as follows: Passengers and their baggage, express, mail and newspapers in the same vehicle with passengers, between Bristol, VA–TN and Asheville, NC; between Mars Hill, NC and Marshall, NC; and between Greenville, TN and Asheville, NC, over specified regular routes, serving all intermediate points. Transferee holds no authority from the Commission. An application for temporary authority has not been filed.

MC–FC 78062, filed March 8, 1979. Transferee: CHARLES G. LAWSON TRUCKING INC., 608 Ann Drive, Brundidge, AL 36010. Transferor: LORENZ TRANSPORT AND SHIP LINES, INC., Mobile Highway, Montgomery, AL 36102. Representative: William P. Jackson, Jr., P.O. Box 1240, Arlington, VA 22210. Authority sought for purchase by transferee of the operating rights of transferor set forth in Permit MC 143185, issued June 13, 1978, as follows: Meats, meat products, meat by-products, and materials and supplies used in the manufacture of meats, meat products, meat by-products (except hides and skins and commodities in bulk, in tank vehicles), between the facilities of Frosty Land Foods International, Inc., d.b.a. Lorenz International, in Montgomery, AL, on the one hand, and, on the other, points in the United States, including Alaska, but excluding Hawaii, under contract with Frosty Lands Foods International, Inc., d.b.a. Lorenz International. Transferee holds no ICC authority. Application for temporary authority has been filed.

MC–FC 78063, filed March 2, 1979. Transferee: RUSSELL A. KARCHNER, d.b.a. RUSSELL KARCHNER TRUCKING, Box 20, Sybertsville, PA 18251. Transferor: Gervase Murphy, 105 W. Independent St., Orwigsburg, PA 17961. Representative: Keith W. Karchner, Box 130, Sybertsville, Pa. 18251. Authority sought for purchase by transferee of the operating rights of transferor set forth in Permit MC 140618, issued October 4, 1976, as follows: *Petroleum motor oil, lubricating oil, greases, and undercoating and oil additives* (except in bulk), from Congo, WV, to points in Bucks, Montgomery, Delaware, Philadelphia, Cumberland, Dauphin, Lancaster, Perry and Schuylkill Counties, PA, under contract with Penn Harris Oil Co, of Camp Hill, PA; Shollenberger Oil Co., of Pottsville, PA, and Loos & Dilworth, Inc., of Philadelphia. Transferee holds authority under MC 79700. Application for temporary authority has not been filed.

MC–FC 78064, filed March 6, 1979. Transferee: EDWARD J. STINSON, Route 1, Box 256, Glen Rose, TX 76043. Transferor: H. J. NOLL, 1014 Daisy St., Houston, TX 77012. Representative: Joe G. Fender, 711 Louisiana, Suite 1150, Houston, TX 77002. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificates MC 117836 and Subs 1, 3, 8, and 12, issued May 8, 1962, October 19, 1966, April 11, 1963, December 4, 1963, and May 30, 1978, authorizing transportation of bananas, from New Orleans, LA, to points in TX; from Galveston, TX, to Clovis and Roswell, NM, Monroe, LA, Little Rock, AR, Albuquerque, NM, and points in TX, OK, and AR; and from Houston, TX, to Albuquerque, NM. Transferee holds no ICC authority and no application for temporary authority has been filed.

MC–FC 78066, filed March 5, 1979. Transferee: DONALDSON FREIGHT DELIVERY, INC., 12891 Nelson St., Garden Grove, CA 92642. Transferor: G & H TRANSPORTATION, INC., 1501 Chapin Road, Montebello, CA 90640. Representative: Fred H. Mackensen, 9454 Wilshire Blvd., Suite 400, Beverly Hills, CA 90212. Authority sought for purchase by transferee of the operating rights of transferor in Certificate of Registration No. MC 96621 Sub 6 issued January 6, 1978, authorizing the transportation of general comodities, with exceptions, (1) between points in the Los Angeles Basin Territory; (2) between points in the San Diego Territory; (3) between the Territories above serving points on and within ten miles laterally of Interstate Highways 5 and 15; and (4) between points within the Territories in (1) and (2) above and intermediate points as defined in (3) above, on the one hand, and, on the other, Goleta, CA serving points on and within ten miles laterally of U.S. Highway 101. Transferee holds no ICC authority. Application for temporary authority has not been filed.

MC–FC 78068, filed March 12, 1979. Transferee: YUMA COUNTY TRANSPORTATION CO., 310 East Second Ave., Yuma, CO 80759. Transferor: EDWARD P. RUFF and THOMAS E. BROOKS, d.b.a. BROOKS TRANSPORTATION COMPANY, 101 Oak St., Sterling, CO 80751. Representative: Charles J. Kimball, 350 Capitol Life Center, 1600 Sherman St., Denver, CO 80203. Authority sought for purchase by transferee of a portion of the operating rights of transferor in Certificate MC 73639 issued June 27, 1974, as follows: *General commodities*, with the usual exceptions, between Sterling, CO, and Holyoke, CO serving Holyoke, CO, for purposes of joinder only, from Sterling, CO, over U.S. Highway 6 to Holyoke, CO, and return over the same route; and between

Holyoke, CO, and McCook, NE, serving Holyoke, CO, for the purpose of joinder only, and serving Imperial, NE, and all points intermediate between Imperial, NE and McCook, NE, from Holyoke, CO, over U.S. Highway 6 to McCook, NE, and return over the same route. Transferee holds authority under MC 96877 (Sub-1). Application for temporary authority has been filed.

MC–FC 78071, filed March 14, 1979. Transferee: STEEL EXPRESS, INC. 1507 Ripley St., P.O. Box 5217, Lake Station, IN 46405. Transferor: D. F. BAST, INC., P.O. Box 2288, Allentown, PA 18001. Representative: Alan Kahn, Suite 1920, 2 Penn Center Plaza, Philadelphia, PA 19102. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificate MC 6078 Sub 46, issued February 4, 1966, as follows: Iron and steel articles and equipment and supplies, used or useful in the production and distribution of such articles, between the facilities of Bethlehem Steel Corporation at Burns Harbor, Porter County, IN, on the one hand, and, on the other, points in IL, IA MI, MO, and WI. Transferee holds no authority from the Commission. Application for temporary authority has been filed.

MC–FC 78072, filed March 14, 1979. Transferee: GOVERNMENT CONTRACT SERVICES, INC., 4112 Dewmar Court, Kensington, MD 20795. Transferor: SOUTHERN MARYLAND TRANSPORTATION CO., INC. (same as transferee). Representative: Thomas M. Auchincloss, Jr., 918 16th St., N.W., Washington, D.C. 20006. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificate MC 96818 Sub 4, issued September 22, 1976, authorizing general commodities, with exceptions, between the site of the U.S. Navy Quicktrans Air Cargo System Station, Naval Air Station, Norfolk, VA, on the one hand, and, on the other, the sites of the Naval Weapons Laboratory, Dahlgren, VA, the Naval Air Station, Patuxent River, MD, the Naval Ordnance Station, Indian Head, MD, and the Naval Station, Washington, D.C., with exceptions. Transferee holds no ICC authority, and no temporary authority application has been filed.

MC–FC 78073, filed March 5, 1979. Transferee: BOLDUC-GOULET EXPRESS, INC., Old Worcester Road, P.O. Box 217, Webster, MA 01570. Transferor: HANNIGAN'S EXPRESS, INC., Barbara T. Goff, (Assignee For Benefit Of Creditors) c/o Barbara T. Goff, 1 State Street, Boston, MA 02109. Transferee's representative: George Robinson, 293 Main Street, Webster, MA 01570. Transferor's representative: Frank J. Weiner, 15 Court Square, Boston, MA 02108. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate MC 9928 issued April 22, 1960 authorizing the transportation of (1) general commodities, with usual exceptions, over regular routes, between Ware and Worcester, MA, including intermediate and specific off-route points in MA, and (2) paper, paper products, woolen cloth and dyeing supplies, pipe couplings and supplies, asbestos products, and machinery, over irregular routes, between Brookfield, MA and points in MA within 10 miles of Brookfield, on the one hand, and, on the other, points in Providence County, RI. Transferee holds authority from this Commission in Certificate MC 17764. Application has not been filed for temporary authority under Section 210a(b) (49 U.S.C. 11349).

MC–FC 78075, filed March 9, 1979. Transferee: R. M. ORMES TRANSPORTATION, Inc., 20 Atlantic Avenue, Woburn, MA 01801. Transferor: TIPTON MOVING, INC., 20 Atlantic Avenue, Woburn, MA 01801. Representative: Frank J. Weiner, 15 Court Square, Boston, MA 02108. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate MC 25280 and MC 25280 (Sub-1), issued April 17, 1972 and September 6, 1972 respectively, authorizing the transportation of household goods, (1) between points in Middlesex, Norfolk, Suffolk and Worcester Counties, MA, on the one hand, and, on the other, points in CT, ME, MA, NH, NJ, NY, PA, RI, and VT, and (2) between Brockton, MA and points within 25 miles thereof, on the one hand, and, on the other, points in MA, RI, NH, VT, NY, and CT. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC–FC 78083, filed April 2, 1979. By decision of May 2, 1979, the Motor Carrier Board approved the transfer from WATKINS MOTOR LINES, INC., 1120 West Griffin Road, Lakeland, FL, 33801, to MOTOR CARGO TRANSPORT CORP., 21 D'Shibe Terrace, Vineland, NJ, 08360, of a portion of the operating rights in Certificate MC 95540 (Sub-663), issued August 6, 1970, authorizing generally the transportation of glassware and glass containers, from and to Tuckahoe, NY, Relay, MD, Bridgeton and Salem, NJ, Auburn, Lewiston, South Paris, Buckfield, and Portland, ME, and Manchester, NH, points in Cumberland County, NJ, and points in CT, DE, MD, MA, NY, PA, RI, VA, and DC. Transferee holds no authority from the Commission. No application for temporary authority has been filed. Applicants' representatives: Charles Ephraim, Suite 600, 1250 Connecticut Ave., NW, Washington, DC 20036; Paul Daniell, 1200 Peachtree Center Gas Light Tower, 235 Peachtree St., N.E., Atlanta, GA 30303.

MC–FC 78086, filed March 15, 1979. Transferee: JOSEPH TALLERICO, 200 N. Keyser Ave., Old Forge, PA 18518. Transferor: JOSEPH GILCHRIST, 855 W. Oak St., Old Forge, PA 18518. Applicants' representative: Joseph F. Hoary, 121 S. Main St., Taylor, PA 18517. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate MC 139806, issued October 2, 1975, as follows: (1)(a) *lamps* and *lamp shades* and *wall plaques*, from the plant site of Grossinger Industries, Old Forge, PA, to points in IL, IN, OH, MI, WV, VA, MD, and NJ (except Camden and points north of and including Middlesex and Mercer Counties), (b) *parts, materials and supplies* used in the manufacture of the commodities in (1)(a) above, in the reverse direction of (1)(a) above. (2)(a) *lamp shades*, from the plant site of Hillcrest Shades, Inc., Old Forge, PA, to the destination points named in (1)(a), and (b) *materials and supplies* used in the manufacture of lamp shades, in the reverse direction of (2)(a). (3)(a) *incandescent light bulbs*, from the plant site of Pennsylvania Illuminating Corporation, Scranton, PA, to the destinations points named in (1)(a) above, and (b) *parts, materials and supplies* used in the manufacture of incandescent light bulbs, in the reverse direction of (3)(a). (4)(a) *fluorescent and incandescent lamp fixtures*, from the plant sites of Alleghany Lamp Manufacturing, Inc., and Scott Manufacturing Co., Wilkes-Barre, PA, to the destination points named in (1)(a) above, and (b) *parts, materials, and supplies* used in the manufacture of the commodities in (4)(a), in the reverse direction of (4)(a). (5)(a) *fluorescent and incandescent lamp fixtures*, from the plantsites of Globe Lighting Products, Inc., West Hazleton, PA and Fulton Lamp Manufacturing Co., Inc., Berwick, PA, to points in IL, IN, MI, OH, WV, MD (except points in the Baltimore Commercial Zone as defined by the Commission and points on the Delmarva Peninsula), and NJ (except Camden and points north of and including Middlesex and Mercer Counties), and (b) *parts,*

materials and supplies used in the manufacture of the commodities in (5)(a), in the reverse direction of (5)(a). The operations in (1) through (5) above are restricted against the transportation of commodities in bulk, and restricted to the transportation of traffic originating at the respectively named plant sites. Transferor holds authority from this Commission under MC 139331. Application has not been filed for temporary authority under 49 U.S.C. § 11349.

MC FC–78090, filed April 17, 1979. Transferee: TRAFIK SERVICES, INC., 11 Newark St., Providence, RI 02908. Transferor: PROVIDENCE–SPRINGFIELD DESPATCH, INC., 540 Huntington Ave., Providence, RI 02907. Applicants' representative: Francis P. Barrett, P.O. Box 238, Milton, MA 02187. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in certificate MC 59666, issued March 21, 1968, authorizing transportation of *General commodities*, with the usual exceptions, between Providence, RI and Holyoke, MA, serving all intermediate points and the off-route points of Ware and S. Hadley, MA, those in Providence County, RI, Hampden County, MA, and that part of Worcester County, MA south of MA Hwy 9, over specified regular routes. Transferee holds no authority from this Commission. Application has been filed for temporary authority under 49 U.S.C. § 11349.

MC–FC 78092, filed March 26, 1979. Transferee: BOBBY W. RAGLAN, doing business as TEKAMAH TRANSFER, 1414 J St., Tekamah, NE 68061. Transferor: D. K. CONKLIN, doing business as TEKAMAH TRANSFER, 1521 "O" St., Tekamah, NE 68061. Representative: Bobby W. Raglan, 1414 J St., Tekamah, NE 68061. Authority sought by transferee to purchase the operating rights of transferor as set forth in certificates MC 25198 and MC 25198 (Sub- 1), issued August 28, 1949 and December 21, 1973, respectively, as follows: *General commodities*, with the usual exceptions, between Tekamah and Omaha, NE, over U.S. Hwy 73, serving all intermediate points, and serving the off-route points of Council Bluffs, IA and Decatur, NE. *Feed, farm machinery, farm machinery parts, draintile, and building materials*, from Sioux City, IA to Tekamah, NE and points in NE within 25 miles of Tekamah. *Livestock and agricultural commodities*, between Tekamah, NE and points in NE within 25 miles thereof, on the one hand, and, on the other, points in IA. Transferee presently holds no authority from this Commission. Application has been filed for Temporary authority under 49 U.S.C. § 11342.

MC–FC 78093, filed April 2, 1979. Transferee: HERMAN L. ROSS, doing business as WYKAGYL EXPRESS, 348 S. Eighth Ave., Mount Vernon, NY 10550. Transferor: OTIS CAREY, doing business as WYKAGYL EXPRESS, 172 Morris St., New Rochelle, NY 10801. Authority sought by transferee to purchase the operating rights of transferor, as set forth in Certificate MC 105328, issued January 10, 1978, as follows: *Household goods* as defined by the Commission, between points in Westchester County, NY, on the one hand, and, on the other, points in CT, MA, NJ, NY, and PA. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. § 11349.

MC–FC 78145 filed May 17, 1979. Transferee: CAJUN CARTAGE & WAREHOUSING CORP., 1205 St. Louis Street, New Orleans, LA 70150. Transferor: C. NEAL CARSON doing business as CARSON CARRIERS, same address as transferee. Representative: Thomas N. Willess, 1000 16th Street NW., Washington, D.C. 20036. Authority sought to be purchased: operating rights of transferor set forth in certificate number MC 57946, Sub. No. 2, issued July 21, 1978, authorizing the transportation of general commodities (with usual exceptions) between New Orleans, LA and points within 10 miles of New Orleans, on the one hand, and, on the other, points in that part of Louisiana in the area bounded by a line beginning at the TX–LA State line and drawn easterly along Louisiana Highway 12 to junction U.S. Highway 190 at or near Ragley, LA, thence along U.S. Highway 190 to junction U.S. Highway 71 at or near Krotz Springs, LA, thence northerly along U.S. Highway 71 to junction U.S. Highway 167 at or near Alexandria, LA, thence northerly along U.S. Highway 167 to the Arkansas-Louisiana State line at or near Junction City, AR. Cajun Cartage & Warehousing Corp. holds no authority from this Commission. However, transferee is owned by the transferor. Temporary authority is not sought.

Finance Applications

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, of rail carriers or motor carriers pursuant to Sections 11343 (formerly Section 5(2)) or 11349 (formerly Section 210a(b)) of the Interstate Commerce Act.

An original and one copy of protests against the granting of the requested authority must be filed with the Commission on or before July 18, 1979. Such protest shall comply with Special Rules 240(c) or 240(d) of the Commission's *General Rules of Practice* (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

Each applicant states that approval of its application will not significantly affect the quality of the human environment nor involve a major regulatory action under the Energy Policy and Conservation Act of 1975.

MC–F 13927F. Authority sought to transfer to NATIONAL REFRIGERATED TRANSPORT, INC., P.O. Box 51366, Tulsa, OK 74151, a portion of the operating rights of TRANS–NATIONAL TRUCK, INC., P.O. Box 4160, Amarillo, TX, and to transfer to Trans-National Truck, Inc., a portion of the operating rights of National Refrigerated Transport, Inc. Applicants' attorney: Charles W. Singer, 2480 E. Commercial Blvd., Ft. Lauderdale, FL 33308. Operating rights sought to be transferred to National Refrigerated Transport, Inc., from Trans-National Truck, Inc., are contained in sub numbers under docket MC 133655 or portions thereof and authorize the transportation of cellulose materials and products, foodstuffs, furniture, department store merchandise, meat and meat products, printed matter materials, pulpboard and pulpboard articles, containers, advertising materials, beverages, carbon products, and various other specified commodities from, to, or between the following States: Alabama, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Vermont, Virginia, West Virginia, and District of Columbia, with various specified restrictions. Trans-National Truck, Inc., is authorized to operate from, to and between all points in the United States (except Alaska and Hawaii). Operating rights sought to be transferred to Trans-National Truck, Inc., from National Refrigerated Transport, Inc., are contained in docket MC 118159 and sub numbers thereunder or portions thereof and authorize the

transportation of foodstuffs, containers, glassware, flat glass, paper and paper products, pulpboard and pulpboard articles, meat and meat products, beverages, compounds and deodorants, tile flooring, picture frames, cleaning, bleaching, washing and scouring items, and various other specified commodities, from, to or between the following States: Alabama, Arizona, Arkansas, California, Colorado, Connnecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming and District of Columbia, with various specified restrictions. National Refrigerated Transport, Inc., is authorized to operate from, to and between all points in the United States (except Alaska and Hawaii). Trans-National Truck, Inc., and National Refrigerated Transport, Inc., are commonly controlled. No application has been filed for temporary authority under Section 210a(b).

MC–F 13990F. Authority sought for purchase by NEYRINCK BROTHERS, INC., 7140 Riga Highway, Riga, Mich. 49276, a portion of the operating rights of GRA-BELL TRUCK LINE, INC., 679 Lincoln Avenue, Holland, Mich. 49423. Applicants attorney: Aloysius B. O'Mara, 105 W. Jefferson St., P.O. Box 165, Blissfield, Mich. 49228. Operating rights sought to be purchased: common carrier authority to transport fertilizer and fertilizer materials from Toledo, Ohio to points in Michigan with no transportation for compensation on return. Approval of the proposed transaction will result in a split of vendor's authority. Vendor is authorized to transport fertilizer and fertilizer material from Toledo, Ohio to points in Michigan. Vendor proposes to retain the authority set forth in MC 113434 (Sub-26) authorizing the transportation of sauerkraut from Jonesville, Michigan to points in Ohio, Pennsylvania and Kentucky and from Fremont, Ohio to points in Pennsylvania and Kentucky as well as all other authority now held in other certificates. None of the authority being retained by transferor duplicates the authority sought to be transferred. Vendee is authorized to operate as a contract carrier in the State of OH. Application has not been filed for temporary authority under section 11349.

MC–F 13993F. Transferee: NORTH PENN TRANSFER OF CONNECTICUT, INC., Route 63 and 202, Lansdale, PA 19446. Transferor: WOOSTER EXPRESS, INC., Route 63 and 202, Lansdale, PA 19446. Applicant's Representative: JOHN W. FRAME, ICC PRACTITIONER, Box 626, 2207 Old Gettysburg Road, Camp Hill, PA 17011. authority sought for merger by transferee of the operating rights of transferor as set forth in Certificate No. MC–3598, issued March 14, 1944, MC–3598, Sub No. 4, issued June 23, 1966, MC–3598, Sub No. 5, issued November 4, 1966, MC–3598, Sub No. 6, issued July 7, 1971, MC–3598, Sub No. 7, issued November 21, 1972, and MC–3598, Sub No. 8 (originally MC–52810, acquired 8/31/77 under Docket No. MC–F 12765), as follows: (a)(1) *General commodities* (except those of unusual value, and except dangerous explosives, household goods as defined in Practices of Motor Common Carriers of Household Goods, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), between Northampton, MA, and Newark, NJ, as follows: From Northampton over US Hwy 5 to New Haven, CT, then over US Hwy 1 to Newark; from Northampton over US Hwy 5 to Springfield, MA, then over Alternate US Hwy 5 to Hartford, CT, then over CT Hwy 9 to Middletown, CT, then over CT Hwy 15 to New Haven, and then over US Hwy 1 to Newark; From Northampton to Hartford as specified above, then over US Hwy 6 to Thomaston, CT, then over CT Hwy 8 to Stratford, CT, then over US Hwy 1 to Newark; and return over these routes to Northampton. Service is authorized to and from the Off-route points of Adams and Pittsfield, MA, and points and places in MA within 12 miles of Springfield, MA: Bloomfield, Watertown, Glastonbury, Portland, New Britain, Somers, East Hampton, Sharon, Kent, New Milford, Washington, Colchester, Haddam, East Haddam, New Canaan, and Danbury, CT, Scarsdale, Freeport, Garden City, Hempstead, Lynbrook, Mineola, Rockville Center, White Plains, and Tuckahoe, NY, and points and places in the New York, NY Commercial Zone, as defined in 1 M.C.C. 665, and those in New Jersey within 20 miles of Newark, NJ, other than those in New York, NY Commercial Zone. Between Southbridge, MA and Hartford, CT: From Southbridge over MA Hwy 131 to Sturbridge, MA, then over MA Hwy 15 to the MA-CT State line, and then over CT Hwy 15 to Hartford, and return over the same route. Service is authorized to and from the off-route points of Willington, Eastford, and Thompson, CT. Between New Haven, CT and Boston, MA: From New Haven over US Hwy 1 to Boston, and return over the same route. Service is authorized to and from the off-route points of Norwich and Saybrook, CT, Brockton, Beverly, Salem, Newton, Malden, Lynn, Everett, Winchester, Arlington, Weburn, Taunton, Somerville, Cambridge, and Chelsea, MA, and points and places in Rhode Island. Between Canton, CT and Hartford, CT: From Canton over US Hwy 44 to Hartford, and return over the same route. Service is authorized to and from the off-route points of Torrington, New Hartford, and Winchester, CT. Between Hartford, CT and New Bedford, MA; From Hartford over US Hwy 6 via Manchester and Willimantic, CT to New Bedford (also from Manchester over Alternate US Hwy 6 to Willimantic), and return over the same route. Service is authorized to and from the off-route points of Plainfield, Griswold, Sterling, and Putnam, CT and Dighton, MA. Between Northampton, MA and New Haven, CT: From Northampton over MA Hwy 10 to the MA-CT State line, then over CT Hwy 10 to New Haven, and return over the same route. Between Boston, MA and Northampton, MA: From Boston over US Hwy 20 to junction MA Hwy 9, then over MA Hwy 9 to Northampton, and return over the same route. Service is authorized to and from all intermediate points on the above-specified routes. Between Boston, MA and Northampton, MA: From Boston over MA Hwy 2 to Greenfield, MA, then over US Hwy 5 to Northampton, and return over the same route. Service is authorized to and from all intermediate points between Ayer, MA and Greenfield, MA, including Ayer and Greenfield, and the off-route points of Haverhill, Lowell, Winchendon, Royalston, and Monroe, MA. Between Boston, MA and Southbridge, MA: From Boston over US Hwy 20 to Marlboro, MA, then over MA Hwy 85 to junction MA Hwy 16 at a point approximately 2 miles east of Milford, MA, then over MA Hwy 16 to Douglas, MA, then over unnumbered highway to junction MA Hwy 197 at a point approximately 2 miles northeast of Webster, MA, then over MA Hwy 197 to junction MA Hwy

131, and then over MA Hwy 131 to Southbridge, and return over the same route. Service is authorized to and from all intermediate points between Marlboro, MA and Southbridge, MA, and the off-route points of Ashland, Dudley, and Blackstone, MA. (2) *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), serving points in CT as off-route points in connection with carrier's presently authorized regular route operations in MC–3598. (3) *General Commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading). Between NY, NY and Philadelphia, PA, serving the intermediate point of Trenton, NJ, restricted to traffic moving to or from points other than New York, NY, all other intermediate points without restriction; and off-route points within ten miles of the specified portions of US Hwy 1 and US Hwy 130 (formerly NJ Hwy 25): From New York over US Hwy 1 to Philadelphia, and return over the same route. From New York over US Hwy 1 to junction of US Hwy 130 (formerly NJ Hwy 25), then over US Hwy 130 to Camden, NJ, and then across the Delaware River to Philadelphia, and return over the same route. Irregular Routes: (a) *Shirts, piece goods, pajamas, thread, trimmings, buttons, underwear, leather, paper, glass and metal frames,* between Jersey City, Newark, Elizabeth, Linden, Rahway, Perth Amboy, and Fords, NJ, on the one hand, and, on the other, New York, NY. (b) *Handkerchiefs,* from South River, NJ, to New York, NY, with no transportation for compensation on return except as otherwise authorized. (c) *Machinery, equipment,* and *supplies,* used or useful in the manufacture of shirts and handkerchiefs, from New York, NY, to Perth Amboy and South River, NJ, with no transportation for compensation on return except as otherwise authorized. (4) Regular Routes: (a) *Gummed tape,* serving the plant site of the Crowell Corporation at Yorklyn, DE, as an off-route point in connection with carrier's regular-route operations authorized herein between Philadelphia, PA and Wilmington, DE. (b) *General Commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodites in bulk, and those requiring special equipment). Between Philadelphia, PA and Wilmington, DE, serving all intermediate points: From Philadelphia over US Hwy 13 via Chester, PA to Wilmington, and return over the same route. Restriction: The service authorized is subject to the limitation that service at Wilmington, Camden, intermediate or off-route points south of Philadelphia, and points south of Camden is restricted to shipments moving over carrier's lines to or from points north of Philadelphia or points north of Camden. (5) *Irregular Routes. Food* and *foodstuffs* (except commodities in bulk, in tank vehicles), in vehicles equipped with mechanical refrigeration, from the facilities of Kraft Foods Division of Kraftco Corporation at or near Fogelsville, PA, to points in CT, MA, ME, NH, RI, and VT, with no transportation for compensation on return except as otherwise authorized. Restriction: The authority granted herein is restricted to the transportation of traffic originating at the named origin points and destined to the named destination points. (6) *Regular Routes. General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (a) serving all intermediate points on US Hwy 1 between Baltimore, MD, and junction US Hwys 1 and 222, in connection with carrier's regular-route operations authorized herein between Baltimore, MD and New York, NY. (b) Serving all intermediate points on US Hwy 40 between Baltimore, MD and junction US Hwys 40 and 222, in connection with carrier's regular-route operations authorized herein between Baltimore, MD and New York, NY. (c) Serving all intermediate points on US Hwy 1 between New Brunswick and Rahway, NJ (except Rahway), and points on US Hwy 222 between junction US Hwys 222 and 40 and junction US Hwys 1 and 222, in connection with carrier's regular-route operations authorized herein between Baltimore, MD and New York, NY. (d) Serving points in Bergen, Passaic (except Paterson and Passaic, NJ), Hudson, Essex (except Irvington, NJ), Union, Morris, and Middlesex Counties, NJ (except those located south of the Raritan River), and Nassau County, NY, Edgewood Arsenal, Aberdeen Proving Ground, MD, and Bound Brook, NJ, as off-route points in connection with carrier's regular-route operations authorized herein between Baltimore, MD and New York, NY. Restriction: The authority granted above is restricted to the transportation of traffic moving from, to, or through Aberdeen, MD, except that traffic moving from, to, or through Edgewood Arsenal or Aberdeen Proving Grounds, MD, or points in MD on US Hwys 1 and 40 may move from, to, or through Baltimore, MD, without such prior movement through Aberdeen, MD. (e) Between Baltimore, MD and Washington, DC, serving all intermediate points, and serving as off-route points Frizzelburg, MD, and points in that part of MD bounded by a line extending from Baltimore, MD, westward along US Hwy 40 to junction MD Hwy 32, then along MD Hwy 32 to junction US Hwy 140, then along US Hwy 140 to Westminster, MD, then along MD Hwy 482 to junction MD Hwy 30, then along MD Hwy 30 to MD Hwy 88, then along MD Hwy 88 to junction MD Hwy 137, then along MD Hwy 137 to Hereford, MD, then along MD Hwy 45 to Baltimore, then southeasterly along MD Hwy to Annapolis, MD, then along US Hwy 50 to Washington, DC, then along US Hwy 1 to Baltimore, MD, including all points on the indicated portions of the specified highways, and Rockville and Indianhead, MD; (f) From Baltimore over US Hwy 1 to Washington, DC, and return over the same route. (g) From Baltimore, over US Hwy 40 to junction US Hwy 29, then over US Hwy 29 to Washington, DC, and return over the same route. Restriction: The operations authorized under the 2 route descriptions immediately above are restricted to the transportation of traffic moving from, to, or through Baltimore, MD. Restriction: The authority granted under 6 (a), (b), (c), (d), (e), (f), and (g) above, shall not be severable by sale or otherwise from the irregular route authority under (7) herein. (7) *Regular Route, general commodities,* Between Baltimore, MD and New York, NY, serving the intermediate points of Rahway, NJ, and those between Rahway and New York; and the off-route points of Paterson, Passaic and Irvington, NJ. (a) From Baltimore over US Hwy 40 to junction MD Hwy 7, near Havre de Grace, MD, then over MD Hwy 7 to Elkton, MD, then over US Hwy 40 via State Road, DE to junction I–295 (formerly shown as junction US Hwy 130), then over I–295 to junction US Hwy 130, then over US Hwy 130 to junction US Hwy 1, then over US Hwy 1 to New York, and return over the same route. (b) From Baltimore over the above-specified route to State Road, DE, then over US Hwy 13 via Chester, PA to junction US Hwy 1, and then over US Hwy 1 to New York, and return over the same route. (c) From Baltimore to Chester as specified above, then across the Delaware River

to Bridgeport, NJ, then over US Hwy 130 to junction US Hwy 1, and then over US Hwy 1 to New York, and return over the same route. (d) From Baltimore over US Hwy 1 to New York, and return over the same route. From Baltimore, MD to Washington, DC, with service authorized to Washington, DC restricted to traffic moving from New York, NY. From Baltimore over US Hwy 1 to Washington, DC and return over the same route with no transportation for compensation except as otherwise authorized. *Irregular Routes. General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Aberdeen, MD, on the one hand, and, on the other, New York, NY, points on Long Island, NY, and points in NJ. Restriction: The authority granted under the commodity description next-above is subject to the following conditions: Said authority is restricted against the pickup or delivery of any traffic at Aberdeen, MD, other than that which carrier is authorized to transport under (8) herein. Said authority and that held by carrier under (7) herein from or to points in NJ and NY through Oxford and West Grove, PA, shall be construed as comprising a single operating right and shall not be severable by sale or otherwise. *General commodities* (except those of unusual value, classes A and B explosives, sand, gravel, earth, stone, household goods as defined by the Commission, and commodities requiring special equipment) between points in Harford County, MD, on the one hand, and, on the other, points in that part of MD within 60 miles of Bel Air, MD, other than Baltimore, MD, and that part of PA south and east of US Hwy 1, within 60 miles of Bel Air, MD, including points on the indicated portion of the highway specified. *General commodities* (except those of unusual value, classes A and B explosives, alcoholic liquors, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), between Baltimore, MD on the one hand, and, on the other, Quantico, VA, points in the District of Columbia, and points in MD except those in Harford County and those east of the Chesapeake Bay and south of the Chesapeake and Delaware Canal. *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), between Oxford and West Grove, PA, and points in PA within 5 miles of West Grove, on the one hand, and, on the other, points in NJ, those in NY, NY, and on Long Island, NY, those in that part of MD west of the Chesapeake Bay and on and east of US Hwy 1, and those in that part of DE north of the Chesapeake and Delaware Canal. Between Wilmington, DE, on the one hand, and, on the other, points in that part of DE and PA on and east of that portion of US Hwy 13, between Wilmington, DE and Philadelphia, PA, including Wilmington and Philadelphia. Restriction: Carrier shall not, pursuant to the irregular-route authority in (7) herein transport traffic between any points authorized in (8) herein to be served by it in regular-route operations. NORTH PENN TRANSFER OF CONNECTICUT, INC., holds no authority from this Commission. However, NORTH PENN TRANSFER, INC. owns all of the stock of NORTH PENN TRANSFER OF CONNECTICUT and is authorized to operate as a common carrier in the States of PA, DC, MD, DE, NJ, NY, MA, RI, CT, VA, NC, OH, AL, GA, FL, SC, KY, TN, WV, ME, VT, and NH. Application has not been filed for temporary authority under section 11349.

Note.—Under MC–F 12806, North Penn Transfer of Connecticut, Inc. was granted control of Wooster Express, Inc. and Baltimore-New York Express, Inc. by an order served July 27, 1977.

MC–F 13994F Authority sought for control by AMNACO, INC., 2861 South Broadway, Green Bay, Wisconsin, of CONTRACT DISTRIBUTION SYSTEM, INC., 1820 First National Bank Tower, Atlanta, Georgia 30303, and for acquisition by AL J. SCHNEIDER and DONALD J. SCHNEIDER, 2861 South Broadway, Green Bay, Wisconsin 54304, of control of such rights through the transaction. Applicant's attorney: Charles W. Singer, 2480 East Commercial Boulevard, Fort Lauderdale, Florida 33308. (Hearing site: Cleveland, OH.) U.S. TRUCK LINES, INC. OF DELAWARE holds no authority from this Commission. However, it is in control of the Transferree in the application through ownership of its capital stock. Application has not been filed for temporary authority under section 210a(b).

MC–F 13999F. Applicant (Transferee): WINTZ MOTOR FREIGHT, INC., 656 Pelham Boulevard, St. Paul, MN 55114. (Transferor): WINTZ WAREHOUSING CO., 656 Pelham Boulevard, St. Paul, MN 55114. Representative: James E. Ballenthin, 630 Osborn Building, St. Paul, MN 55102. Authority sought for purchase by Wintz Motor Freight, Inc., 656 Pelham Boulevard, St. Paul, MN 55114, of the interstate operating authority of Wintz Warehousing Company, 656 Pelham Boulevard, St. Paul, MN 55114, and for control of such rights through the transaction. Applicants' attorney: James E. Ballenthin, 630 Osborn Building, St. Paul, MN 55102. Operating rights sought to be transferred: Certificate MC 129757 (dated September 24, 1974): *Irregular Routes: Meats, meat products, dairy products, and articles distributed by meat packinghouses,* from Minneapolis, Minn., to points in Anoka (except the city of Anoka and Coon Rapids), Carver, Dakota, Hennepin (except Osseo and Brooklyn Park), Ramsey, Scott, and Washington Counties, Minn., with no transportation for compensation on return except as otherwise authorized. *Meats, and meat products, dairy products and articles distributed by meat packinghouses,* as described in Sections A, B, and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates,* 61 M.C.C. 209 and 766, from Minneapolis, Minn., to Anoka, Coon Rapids, Osseo, and Brooklyn Park, Minn., with no transportation for compensation on return except as otherwise authorized. *Restriction:* The authority granted herein shall be subject to the right of the Commission, which is hereby expressly reserved, to impose such terms, conditions or limitations in the future as it may find necessary to order to insure that carrier's operations shall conform to the provisions of section 210 of the Act. Permit MC 117681: *Irregular Routes: Ink,* in bulk, in tank vehicles, from Minneapolis, Minn., to points in North Dakota, South Dakota, Nebraska, Iowa, Wisconsin, and Minnesota, with no transportation for compensation on return except as otherwise authorized. *Restriction:* The service authorized herein is subject to the following conditions: The operations authorized herein are limited to a transportation service to be performed, under a continuing contract, or contracts, with George H. Morrill Company, Chicago, Ill. The authority granted herein shall be subject to the right of the Commission, which is hereby expressly reserved, to impose such terms, conditions or limitations in the future as it may find necessary in order to insure carrier's operations shall conform to the provisions of section 210 of the Act. The purpose of this application is to resolve all issues of common control between the applicants by vesting all interstate authority of the commonly controlled applicants in Wintz Motor Freight, Inc. Vendee is authorized to operate as a common carrier in the States of MN, WI and as a contract carrier in the States of MN, IA, ND, SD, WI. Application has not been filed for temporary authority under section 11349.

MC–F–14002F. Authority sought for control by BRAY LINES INCORPORATED, 1401 North Little Street, Cushing, OK 74023, of SUBLER TRANSFER, INC., One Vista Drive, Versailles, OH 45380, and for acquisition by BRAY CORPORATION, 1401 North Little Street, Cushing, OK 74023, of control of Subler Transfer, Inc., through the acquisition by Bray Lines Incorporated. Applicant's attorney: Edward T. Lyons, Jr., 1600 Lincoln Center Building, 1660 Lincoln Street, Denver, CO 80264. Operating rights sought to be controlled: (1) *Foodstuffs* and other specified commodities falling within the generic description of foodststuffs; (2) *Such Commodities* as are used by meat packers and other specified persons in the conduct of their business; (3) and numerous other specified commodities including, *packaged petroleum products, steel strapping* and *paper* and *paper products, carpeting* and *floor coverings, heating stoves, building materials, rubber articles, refractory products, glass, cleaning compounds* and *supplies, farm machinery* and *agricultural implements, alkalies, animal food, washing machines* and *laundry equipment,* and *metal products, automobile parts and appliances, household appliances* and *refrigeration equipment,* from, to, and between specified points or areas in CT, DE, IL, IN, IA, KS, KY, ME, MD, MA, MI, MN, MO, NE, NH, NJ, NY, OH, PA, RI, VT, VA, WV, WI and DC, with certain restrictions and limitations of points, as more specifically described in Docket MC 117883 and sub-numbers thereunder. Bray Lines Incorporated is authorized to operate as a motor common carrier in all states in the United States except AK, CT, DE, HI, ME, MD, MA, NH, NJ, NY, PA, RI, VT and DC. This notice does not purport to be a complete description of the operating rights of the carrier involved. For more information with respect to the specific authorities of applicant or the carrier to be controlled, inquiries should be made to the Commission in Washington, DC, or at its Regional Offices in Dallas, TX or Philadelphia, PA, at which complete descriptions of all pertinent authorities are on file as part of the application. Application has not been filed for temporary authority. (Hearing site: Washington, DC.)

MC–F 14003F. Applicant: ANR FREIGHT SYSTEM, INC., One Woodward Avenue, Detroit, MI 48226. Representative: Roland Rice, Esq., 501 Perpetual Bldg., 1111 E Street, N.W., Washington, DC 20004. Gwenn L. Carr, Esq., One Woodward Avenue, Detroit, MI 48226. An application of ANR Freight System, Inc., One Woodward Avenue, Detroit, MI 48226, for authority to acquire control of Associated Truck Lines, Inc., 200 Monroe North, Grand Rapids, MI 49503, accompanied by a Motion to Dismiss for want of jurisdiction. ANR Freight System, Inc., is a wholly owned subsidiary of American Natural Resources Company and, with Commission approval, owns the stock of Graves Truck Line. In addition, it has pending before the Commission an application, unopposed, in MC–F 13618 to acquire the stock of another carrier, Garrett Freight Lines. Operating rights sought to be transferred: None. The parent holding company, American Natural Resources Company, owns the stock of Associated Truck Lines (its first carrier acquisition) through an intermediate holding company, Associated Freightways, Inc. The sole purpose of the instant application is to place the stock of Associated Truck Lines, Inc. in ANR Freight System, Inc., which already owns the Graves stock and is seeking to acquire the stock of Garrett. No other change is sought. In similar cases the Commission has declined to assume jurisdiction. As

shown, a Motion to Dismiss accompanies the application.

MC–F 14004F. Authority sought for purchase by DAVID W. HASSLER, INC., R.D. #8, York, Pennsylvania 17403 of the operating rights of C. W. Bierkamp & Sons, Inc., 1821 Monroe Street, York, Pennsylvania 17404. Applicants' attorneys, S. Harrison Kahn, Jeremy Kahn, Kahn and Kahn, Suite 733 Investment Building, 1511 K Street, N.W., Washington, D.C. 20005. Operating rights sought to be purchased are those in Docket MC 111795 and MC 111795 (Sub-5), authorizing the transportation of limestone and limestone products, in bulk, from West Manchester Township, York County, Pennsylvania to points in DE, MD, and NJ, and portions of NY and VA, and from Thomasville, PA to points in DE, MD, NJ, and New York, NY. Vendee holds authority in MC 100439 and MC 100439 (Sub-4) to transport petroleum and petroleum products from Baltimore, MD, to certain points in PA and industrial asphalt from York, PA to points in Sussex County, VA. Approval of this transaction will not result in (a) dual operations; (b) splitting of operating authority; or (c) duplicating authority. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC–F14009F. Authority sought to purchase by ACE DORAN HAULING & RIGGING CO., 1601 Blue Rock Street, Cincinnati, OH 45223, of a portion of the operating rights of SUPERIOR TRUCKING COMPANY, INC., 2770 Peyton Road, N.W., Atlanta, GA 30321, and for acquisition by Richard E. Doran, Robert J. Doran and C. M. Doran of 1601 Blue Rock Street, Cincinnati, OH 45223, of control of such rights through the purchase. Applicants' attorneys are JOHN P. McMAHON, 100 East Broad Street, Columbus, OH 43215, and GUY H. POSTELL, 3384 Peachtree Road, N.E., Atlanta, GA 30326. Operating rights sought to be purchased: (1) commodities, the transportation of which because of their size and weight require the use of special equipment, and (2) self-propelled articles each weighing 15,000 pounds or more and related machinery, tools, parts and supplies, limited to the transportation of such commodities as are transported on trailers and restricted against the transportation of pipe, pipeline machinery, equipment and supplies incidental to and used in connection with the construction, operation, repair, servicing, and dismantling of pipelines and the stringing or picking up thereof, between points in Gallatin and Grant Counties, KY, on the one hand, and, on the other, points in TN. Vendee is authorized to operate as a common carrier of general commodities, size and weight commodities, and specified commodities between various points in the contiguous forty-eight states. Application has not been filed for temporary authority under section 11349. (Hearing site: Columbus, OH).

MC–F14011F. NORTH PENN TRANSFER, INC., Routes 63 and 202, Lansdale, PA 19446; NORTH PENN TRANSFER OF CONNECTICUT, INC., Routes 63 and 202, Lansdale, PA 19446; JOHN W. FRAME, ICC Practitioner, Box 626, 2207 Old Gettysburg Road, Camp Hill, PA 17011. Authority sought for merger by transferee of the operating rights of transferor as set forth in Certificate No. MC–3598, issued March 14, 1944, MC–3598, Sub No. 4, issued June 23, 1966, MC–3598, Sub No. 5, issued November 4, 1966, MC–3598, Sub No. 6, issued July 7, 1971, MC–3598, Sub No. 7, issued November 21, 1972, and MC–3598, Sub No. 8 (originally MC–52810, acquired 6/31/77 under Docket No. MC–F–12785), as follows: (A)(1) *General commodities* (except those of unusual value, and except dangerous explosives, households goods as defined in Practices of Motor Common Carriers of Household Goods, 17. M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), between Northampton, MA, and Newark, NJ, as follows: From Northampton over U.S. Hwy 5 to New Haven, CT, then over U.S. Hwy 1 to Newark; from Northampton over U.S. Hwy 5 to Springfield, MA, then over Alternate U.S. Hwy 5 to Hartford, CT, then over CT Hwy 9 to Middletown, CT, then over CT Hwy 15 to New Haven, and then over U.S. Hwy 1 to Newark; from Northampton to Hartford as specified above, then over U.S. Hwy 6 to Thomaston, CT, then over CT Hwy 8 to Stratford, CT, and then over U.S. Hwy 1 to Newark; and return over these routes to Northampton. Service is authorized to and from the off-route points of Adams and Pittsfield, MA, and points and places in MA within 12 miles of Springfield, MA; Bloomfield, Watertown, Glastonbury, Portland, New Britain, Somers, East Hampton, Sharon, Kent, New Milford, Washington, Colchester, Haddam, East Haddam, New Canaan, and Danbury, CT, Scarsdale, Freeport, Garden City, Hempstead, Lynbrook, Mineola, Rockville Center, White Plains, and Tuckahoe, NY, and points and places in the New York, NY Commercial Zone, as defined in 1 M.C.C. 665, and those in New Jersey within 20 miles of Newark, NJ, other than those in New York, NY Commerical Zone. Between Southbridge, MA and Hartford, CT: From Southbridge over MA Hwy 131 to Sturbridge, MA, then over MA Hwy 15 to the MA–CT State line, and then over CT Hwy 15 to Hartford, and return over the same route. Service is authorized to and from the off-route points of Willington, Eastford, and Thompson, CT. Between New Haven, CT and Boston, MA: From New Haven over U.S. Hwy 1 to Boston, and return over the same route. Service is authorized to and from the off-route points of Norwich and Saybrook, CT, Brockton, Beverly, Salem, Newton, Malden, Lynn, Everett, Winchester, Arlington, Weburn, Taunton, Somerville, Cambridge, and Chelsea, MA, and points and places in Rhode Island. Between Canton, CT and Hartford, CT: From Canton over U.S. Hwy 44 to Hartford, and return over the same route. Service is authorized to and from the off-route points of Torrington, New Hartford, and Winchester, CT. Between Hartford, CT and New Bedford, MA: From Hartford over U.S. Hwy 6 via Manchester and Willimantic, CT to New Bedford (also from Manchester over Alternate U.S. Hwy 6 to Willimantic), and return over the same route. Service is authorized to and from the off-route points of Plainfield, Griswold, Sterling, and Putnam, CT and Dighton, MA. Between Boston, MA and Springfield, MA: From Boston over U.S. Hwy 20 to Springfield and return over the same route. Service is authorized to and from the off-route points of Clinton, Warren, Russel, and Great Barrington, MA. Between Northampton, MA and New Haven, CT: From Northampton over MA Hwy 10 to the MA–CT State line, then over CT Hwy 10 to New Haven, and return over the same route. Between Boston, MA and Northampton, MA: – From Boston over U.S. Hwy 20 to junction MA Hwy 9, then over MA Hwy 9 to Northampton, and return over the same route. Service is authorized to and from all intermediate points on the above-specified routes. Between Boston, MA and Northampton, MA: From Boston over MA Hwy 2 to Greenfield, MA, then over U.S. Hwy 5 to Northampton, and return over the same route. Service is authorized to and from all intermediate points between Ayer, MA and Greenfield, MA, including Ayer and Greenfield, and the off-route points of Haverhill, Lowell, Winchendon, Royalston, and Monroe, MA. Between Boston, MA and Southbridge, MA: From Boston over U.S. Hwy 20 to Marlboro, MA, then over MA Hwy 85 to junction

MA Hwy 16 at a point approximately 2 miles east of Milford, MA, then over MA Hwy 16 to Douglas, MA, then over unnumbered highway to junction MA Hwy 197 at a point approximately 2 miles northeast of Webster, MA, then over MA Hwy 197 to junction MA Hwy 131, and then over MA Hwy 131 to Southbridge, and return over the same route. Service is authorized to and from all intermediate points between Marlboro, MA and Southbridge, MA, and the off-route points of Ashland, Dudley, and Blackstone, MA. (2) *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), serving points in CT as off-route points in connection with carrier's presently authorized regular route operations in MC–3598. (3) *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), Between NY, NY and Philadelphia, PA, serving the intermediate point of Trenton, NJ, restricted to traffic moving to or from points other than New York, NY, all other intermediate points without restriction; and off-route points within ten miles of the specified portions of U.S. Hwy 1 and U.S. Hwy 130 (formerly NJ Hwy 25): From New York over U.S. Hwy 1 to Philadelphia, and return over the same route. From New York over U.S. Hwy 1 to junction of U.S. Hwy 130 (formerly NJ Hwy 25), then over U.S. Hwy 130 to Camden, NJ, and then across the Delaware River to Philadelphia, and return over the same route. Irregular routes: (a) *Shirts, piece goods, pajamas, thread, trimmings, buttons, underwear, leather, paper, glass and metal frames,* between Jersey City, Newark, Elizabeth, Linden, Rahway, Perth Amboy, and Fords, NJ, on the one hand, and, on the other, New York, NY. (b) *Handkerchiefs,* from South River, NJ, to New York, NY, with no transportation for compensation on return except as otherwise authorized. (c) *Machinery, equipment,* and *supplies,* used or useful in the manufacture of shirts and handkerchiefs, from New York, NY, to Perth Amboy and South River, NJ, with no transportation for compensation on return except as otherwise authorized. (4) Regular routes: (a) *Gummed tape,* serving the plant site of the Crowell Corporation at Yorklyn, DE, as an off-route point in connection with carrier's regular-route operations authorized herein between Philadelphia, PA and Wilmington, DE. (b) *General Commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) Between Philadelphia, PA and Wilmington, DE, serving all intermediate points: From Philadelphia over U.S. Hwy 13 via Chester, PA to Wilmington, and return over the same route. Restriction: The service authorized is subject to the limitation that service at Wilmington, Camden, intermediate or off-route points south of Philadelphia, and points south of Camden is restricted to shipments moving over carrier's lines to or from points north of Philadelphia or points north of Camden. (5) *Irregular Routes. Food* and *foodstuffs* (except commodities in bulk, in tank vehicles), in vehicles equipped with mechanical refrigeration, from the facilities of Kraft Foods Division of Kraftco Corporation at or near Fogelsville, PA, to points in CT, MA, ME, NH, RI, and VT, with no transportation for compensation on return except as otherwise authorized. Restriction: The authority granted herein is restricted to the transportation of traffic originating at the named origin points and destined to the named destination points. (6) *Regular Routes. General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (a) serving all intermediate points on U.S. Hwy 1 between Baltimore, MD, and junction U.S. Hwys 1 and 222, in connection with carrier's regular-route operations authorized herein between Baltimore, MD and New York, NY. (b) Serving all intermediate points on U.S. Hwy 40 between Baltimore, MD and junction U.S. Hwys 40 and 222, in connection with carrier's regular-route operations authorized herein between Baltimore, MD and New York, NY. (c) Serving all intermediate points on U.S. Hwy 1 between New Brunswick and Rahway, NJ (except Rahway), and points on U.S. Hwy 222 between junction U.S. Hwys 222 and 40 and junction U.S. Hwys 1 and 222, in connection with carrier's regular-route operations authorized herein between Baltimore, MD and New York, NY. (d) Serving points in Bergen, Passaic (except Paterson and Passaic, NJ), Hudson, Essex (except Irvington, NJ), Union, Morris, and Middlesex Counties, NJ (except those located south of the Raritan River), and Nassau County, NY, Edgewood Arsenal, Aberdeen Proving Ground, MD, and Bound Brook, NJ, as off-route points in connection with carrier's regular-route operations authorized herein between Baltimore, MD and New York, NY. Restriction: The authority granted above is restricted to the transportation of traffic moving from, to, or through Aberdeen, MD, except that traffic moving from, to, or through Edgewood Arsenal or Aberdeen Proving Grounds, MD, or points in MD on U.S. Hwys 1 and 40 may move from, to, or through Baltimore MD, without such prior movement through Aberdeen, MD. (e) Between Baltimore, MD and Washington, DC, serving all intermediate points, and serving as off-route points Frizzelburg, MD, and points in that part of MD bounded by a line extending from Baltimore, MD, westward along U.S. Hwy 40 to junction MD Hwy 32, then along MD Hwy 32 to junction U.S. Hwy 140, then along U.S. Hwy 140 to Westminster, MD, then along MD Hwy 482 to junction MD Hwy 30, then along MD Hwy 30 to MD Hwy 88, then along MD Hwy 88 to junction MD Hwy 137, then along MD Hwy 137 to Hereford, MD, then along MD Hwy 45 to Baltimore, then southeasterly along MD Hwy 2 to Annapolis, MD, then along U.S. Hwy 50 to Washington, DC, then along U.S. Hwy 1 to Baltimore, MD, including all points on the indicated portions of the specified highways, and Rockville and Indianhead, MD. (f) From Baltimore over U.S. Hwy 1 to Washington, DC, and return over the same route. (g) From Baltimore, over U.S. Hwy 40 to junction U.S. Hwy 29, then over U.S. Hwy 29 to Washington, DC, and return over the same route. Restriction: The operations authorized under the 2 route descriptions immediately above are restricted to the transportation of traffic moving from, to or through Baltimore, MD. Restriction: The authority granted under 6 (a), (b), (c), (d), (e), (f), and (g) above, shall not be severable by sale or otherwise from the irregular route authority under (7) herein. (7) *Regular Routes, general commodities,* Between Baltimore, MD and New York, NY, serving the intermediate points of Rahway, NJ, and those between Rahway and New York; and the off-route points of Paterson, Passaic and Irvington, NJ: (a) From Baltimore over U.S. Hwy 40 to junction MD Hwy 7, near Havre de Grace, MD, then over MD Hwy 7 to Elkton, MD, then over U.S. Hwy 40 via State Road, DE to junction I–295 (formerly shown as junction U.S. Hwy 130), then over I–295 to junction U.S. Hwy 130, then over U.S. Hwy 130 to junction U.S. Hwy 1, then over U.S. Hwy 1 to New York, and

return over the same route. (b) From Baltimore over the above-specified route to State Road, DE, then over U.S. Hwy 13 via Chester, PA to junction U.S. Hwy 1, and then over U.S. Hwy 1 to New York, and return over the same route. (c) From Baltimore to Chester as specified above, then across the Delaware River to Bridgeport, NJ, then over U.S. Hwy 130 to junction U.S. Hwy 1, and then over U.S. Hwy 1 to New York, and return over the same route. (d) From Baltimore over U.S. Hwy 1 to New York, and return over the same route. From Baltimore, MD to Washington, DC, with service authorized to Washington, DC restricted to traffic moving from New York, NY. From Baltimore over U.S. Hwy 1 to Washington, DC and return over the same route with no transportation for compensation except as otherwise authorized. *Irregular Routes. General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Aberdeen MD, on the one hand, and, on the other, New York, NY, points on Long Island, NY, and points in NJ. Restriction: The authority granted under the commodity description next-above is subject to the following conditions: Said authority is restricted against the pickup or delivery of any traffic at Aberdeen, MD, other than that which carrier is authorized to transport under (6) herein. Said authority and that held by carrier under (7) herein from or to points in NJ and NY through Oxford and West Grove, PA, shall be construed as comprising a single operating right and shall not be severable by sale or otherwise. *General commodities* (except those of unusual value, classes A and B explosives, sand, gravel, earth, stone, household goods as defined by the Commission, and commodities requiring special equipment) between points in Harford County, MD, on the one hand, and, on the other, points in that part of MD within 60 miles of Bel Air, MD, other than Baltimore, MD, and that part of PA south and east of U.S. Hwy 1, within 60 miles of Bel Air, MD, including points on the indicated portion of the highway specified. *General commodities* (except those of unusual value, classes A and B explosives, alcoholic liquors, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), between Baltimore, MD on the one hand, and, on the other, Quantico, VA, points in the District of Columbia, and points in MD except those in Harford County and those east of the Chesapeake Bay and south of the Chesapeake and Delaware Canal. *General commodities*, (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), between Oxford and West Grove, PA, and points in PA within 5 miles of West Grove, on the one hand, and, on the other, points in NJ, those in NY, NY, and on Long Island, NY, those in that part of MD west of the Chesapeake Bay and on and east of U.S. Hwy 1, and those in that part of DE north of the Chesapeake and Delaware Canal. Between Wilmington, DE, on the one hand, and, on the other, points in that part of DE and PA on and east of that portion of U.S. Hwy 13, between Wilmington, DE and Philadelphia, PA, including Wilmington and Philadelphia. Restriction: Carrier shall not, pursuant to the irregular-route authority in (7) herein transport traffic between any points authorized in (6) herein to be served by it in regular-route operations. North Penn Transfer, Inc., is authorized to operate as a common carrier in the states of PA, DC, MD, DE, NJ, NY, MA, RI, CT, VA, NC, OH, AL, GA, FL, SC, KY, TN, WV, ME, VT, and NH. Application has not been filed for temporary authority under section 11349.

MC–F 14014F. Applicants: MURPHY MOTOR FREIGHT LINES, INC., 2323 Terminal Road, St. Paul, MN 55113, and BEATRICE MOTOR FREIGHT, INC., 123 Court Street, Beatrice, NE 68310. Representative: Jerry E. Hess, 2323 Terminal Road, St. Paul, MN 55113. Approval sought for a Pooling Agreement between the applicants herein for the transportation of general commodities (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Omaha, NE and Lincoln, NE, whereby Beatrice will deliver all of the parties inbound traffic to Lincoln, NE and pick up all of their outbound traffic therefrom. Tender and receipt of all such traffic will take place at the facility of Murphy Motor Freight Lines in Omaha, NE. If a hearing is deemed necessary, the applicants request that it be held in Omaha, NE.

Note.—Both parties hereto presently hold authority from the Interstate Commerce Commission to transport general commodities between Omaha and Lincoln, NE over U.S Hwy. 6. The authority of Beatrice Motor Freight may be found in MC 65019 and the authority of Murphy Motor Freight Lines may be found in MC–F 13993.

MC–F 14015. Authority sought for control by TRIMAC TRANSPORTATION GROUP LIMITED, 736 8th Avenue, S.W., Calgary, Alberta T2P 2P9, and STOTHERT HOLDINGS LTD., 736 8th Avenue, S.W., Calgary, Alberta T2P 2P9, of Municipal Tank Lines Limited, 736 8th Avenue, S.W., Calgary, Alberta T2P 2P9, and for acquisition by Trimac Limited, 736 8th Avenue, S.W., Calgary, Alberta T2P 2P9, J. R. McCaig, 736 8th Avenue, S.W., Calgary, Alberta T2P 2P9, M. W. McCaig, 736 8th Avenue, S.W., Calgary, Alberta T2P 2P9, and the estate of R. W. McCaig, 736 8th Avenue, S.W., Calgary, Alberta T2P 2P9, for control of Municipal Tank Lines Limited through the acquisition of Trimac Transportation Group Limited and Stothert Holdings Ltd. Applicants' attorneys: Richard H. Streeter and Edward K. Wheeler, 1729 H Street, N.W. Washington, D.C. 20006. Operating rights sought to be controlled: Soybean oil and soybean meal, in bulk, as a common carrier by motor vehicle, over irregular routes, from the facilities of Cargill, Inc., at or near Sidney, OH to ports of entry on the International Boundary Line between the U.S. and Canada located at points in MI and NY. Neither Trimac Transportation Group Limited nor Stothert Holdings Ltd. hold authority from this Commission. However, Trimac Transportation Group Limited controls H. M. Trimble & Sons Ltd., 736 8th Avenue, S.W., Calgary, Alberta T2P 2P9, which is authorized to operate as a common carrier in ND, AK, WA, MT, AZ, AR, WI, WY, CA, CO, IL, IA, TN, TX, KS, ID, KY, LA, UT, MN, MS, MO, NE, NV, NM, OK, OR, and SD. Trimac Transportation Group Limited and Stothert Holdings Ltd. jointly control Oil & Industry Suppliers Ltd., 736 8th Avenue, S.W., Calgary, Alberta T2P 2P9, which is authorized to operate as a common carrier in WA, OR, ID, MT, WY, ND, SD, MN, WI, UT, CO, NE, KS, IA, MO, IL, IN, NM, TX, OK and AR; and Mercury Tanklines Limited, 736 8th Avenue, S.W., Calgary, Alberta T2P 2P9, which is authorized to operate as a contract carrier between points in KY, IL, OH, MD, MI, CA, PA, NY, and VA and points on the U.S./Canada International Boundary Line in MI, NY, MN, WA, ND, and MT. Approval of control of these cariers was given by the I.C.C. in Docket MC F 9653 and MC–F 10380. An application has not been filed for temporary authority under Section 11349 (fomerly 210a(b)). Approval of this application will not significantly affect the quality of the human environment nor involve a major regulatory action under the Energy Policy and Conservation act of 1975.

MC–F 14018. Authority sought for purchase by CASAZZA TRUCKING COMPANY, d.b.a. CASAZZA TRUCKING CO., 1250 Glendale Ave., Sparks, NV., 89431, of a portion of the operating rights of WELLS CARGO, INC., 1775 East 4th Street, Reno, NV., 89512, and for acquisition by EARL CASAZZA, 1250 Glendale Ave., Sparks, NV., 89431, of control of such rights through the transaction. Applicants representative: Earl Casazza, 1250 Glendale Ave., Sparks, NV., 89431. Operating rights sought to be purchased: Petroleum and petroleum products, as described in Appendix XII to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209, in bulk, in tank vehicles, as a common carrier over irregular routes from Sparks and Fallon, NV to points in Modoc, Lassen, Plumas, Sierra, NV, Placer, Eldorado, Alpine, and Mono Counties, CA with no transportation for compensation on return except as otherwise authorized. Contaminated Shipments of the above-specified commodities, from Sparks and Fallon, NV, to points in Alameda, Contra Costa, Sacramento, and Yolo Counties, CA, with no transportation for compensation on return except as otherwise authorized. Vendee is authorized to operate as a common carrier in the States of CA and NV. Application has not been filed for temporary authority under section 11349.

MC–F 14021F. Authority sought for purchase by MISSOURI PACIFIC TRUCK LINES, INC., a Texas corporation, d.b.a. MISSOURI PACIFIC TRUCK LINES, INC., 210 North 13th Street, St. Louis, MO 63103, of certain operating rights of Missouri Pacific Railroad Company, 210 North 13th St., St. Louis, MO 63103. Applicants' representative: Robt S. Davis, Commerce Counsel, Missouri Pacific Railroad Company, 210 North 13th Street, St. Louis, MO 63103. Operating rights sought to be transferred: MC–54828 (Subs- 1 and 2) issued to the New Orleans & Lower Coast Railroad Company (NOLC) in July, 1944, and August, 1954, respectively, authorizing transportation of general commodities between New Orleans, Louisiana, and Venice, Louisiana, serving intermediate points. Service under the Certificates from their inception was provided by The Texas & Pacific Motor Transport Company under contract with NOLC and subsequently by Missouri Pacific Truck Lines. Missouri Pacific Railroad Company acquired the Certificates when the NOLC was merged into it, effective November 1, 1979. All motor carrier operations for Missouri Pacific Railroad Company are provided by its wholly owned subsidiary, Missouri Pacific Truck Lines. The railroad holds no motor carrier authority except the subject Certificates, which it acquired as incident to the NOLC merger. Since the motor carrier operations authorized by the subject Certificates have always been provided by Missouri Pacific Truck Lines or its predecessor, it has applied to the Commission for approval of the transfer of the subject Certificates from Missouri Pacific Railroad Company to Missouri Pacific Truck Lines, Inc. Service to the public will not be affected by the transfer. Application has not been filed for temporary authority under section 11349.

MC–F 14028F. Authority sought for purchase by BRIGGS TRANSPORTATION CO., North 400 Griggs-Midway Bldg., St. Paul, MN 55104, of a portion of the operating rights of SCOTT'S TRANSPORTATION SERVICE, INC. (WITTE TRANSPORTATON COMPANY, Assignor). Applicants' Attorneys: Leonard R. Kofkin, 39 South LaSalle St., Chicago, IL and William S. Rosen, 630 Osborn Bldg., St. Paul, MN 55102. Operating rights sought to be transferred are contained in MC 115554, authorizing the transportation, over irregular routes, of *General Commodities,* except those of unusual value, Class A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, between points in IA and IL within 25 miles of Rock Island, IL, including Rock Island, IL. Vendee is authorized to operate as a common carrier in the States of IL, IN, IA, OH, WI, MN, KS, KY, MO, NB, SD, CO and WY. Application has been filed for temporary authority under section 11349 of the Act.

MC–F 14029F. Transferee: J. & L. REFRIGERATED SERVICE, INC., 312 Willow Way, Lee's Summit, MO 64064. Transferor: COX REFRIGERATED EXPRESS, INC., 10606 Goodnight Lane, Dallas, Texas 75220. Representative: Brad T. Murphree, 814 Century Plaza Building, Wichita, Kansas 67202. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate MC 140033 (Sub-31) as follows: *Foodstuffs* (except commodities iin bulk) in vehicles equipped with mechanical refrigeration, from the facilities of Inland Storage Distribution Center, located at Kansas City, Kansas, to points in Oklahoma and Texas; Restricted to traffic originating at the facilities of Inland Storage Distribution Center and destined to the named states. J. & L. Refrigerated Service, Inc., holds no permanent authority from this Commission. However has received Emergency Temporary and Regular Temporary authority, MC 144435 R–1, R–4 and Sub-2 TA, none of which duplicates authority sought in this application. Application has been filed for temporary authority under section 11349.

MC–F 14030F. Authority sought for purchase by NORTHWEST TRANSPORT SERVICE, INC., 5231 Monroe Street, Denver CO 80216 of a portion of the operating rights of BRIGGS TRANSPORTATION CO., North 400, Griggs-Midway Building, St. Paul MN 55104, and for acquisition by NW Transport Service, Inc. and in turn Donn D. McMorris and Jerry D. McMorris, 5231 Monroe Street, Denver CO of control of such rights through purchase. Applicant's attorneys: David E. Driggers, 1600 Lincoln Center Building, 1660 Lincoln Street, Denver CO 80264 for transferee, and Carl L. Steiner, 39 So. LaSalle Street, Chicago IL 60603 for transferor. Operating rights sought to be transferred: Regular routes, general commodities, with usual exceptions: (1) Between Denver, Colorado, and junction of U.S. Highways No. 26 and No. 87 in Wyoming, serving all intermediate points, and the off-route points in Yoder, Lagrange, and Huntley, Wyoming: From Denver over U.S. Highway No. 85 to Torrington, Wyoming; thence over U.S. Highway No. 26 to junction U.S. Highway No. 87, and return over the same route. (2) Between Guernsey, Wyoming, and Sunrise, Wyoming, serving all intermediate points: From Guernsey over unnumbered highway to Sunrise, and return over same route. (3) Between Lingle, Wyoming, and Lusk, Wyoming, serving the intermediate point of Jay Em, Wyoming: From Lingle over U.S. Highway No. 85 to Lusk, and return over the same route. (4) Between Torrington, Wyoming, and Gering, Nebraska, serving all intermediate points and off-route points with one mile of Nebraska Highway No. 29 between Gering and Scottsbluff, Nebraska: From Torrington over U.S. Highway No. 26 to Scottsbluff, thence over Nebraska Highway No. 29 to Gering, and return over the same route. (5) Between Scottsbluff, Nebraska, and Alliance, Nebraska, serving all intermediate points: From Scottsbluff over U.S. Highway No. 26 to junction U.S. Highway No. 385, thence over U.S. Highway No. 385 to Alliance, and return

over the same route. Transferee is authorized to operate as a common carrier in AZ, CO, ID, NE, NM, UT and WY. Application has been filed for temporary authority under Section 210a(b). (Hearing site: Denver CO and Scottsbluff NE.)

MC–F 14032F. Authority sought for purchase by CHIPPEWA MOTOR FREIGHT, INC., 1000 East 41st Street, Sioux Falls, SD 57105, to purchase a portion of the operating rights of R–W SERVICE SYSTEM, INC., 20225 Goddard Road, Taylor, ML, 48180, and for acquisition of control of such rights by LEWIS INDUSTRIES, INC., 510 Northwestern Bank Bldg., Sioux Falls, SD, 57102, through the purchase. Applicants attorneys: Carl L. Steiner, 39 South LaSalle St., Chicago, IL, 60603, and Martin J. Leavitt, 22375, Haggerty Road, P.O. Box 400, Northville, MI, 48167. Operating rights sought to be transferred are as a common carrier, over irregular routes as follows: General Commodities, with the usual exceptions, between Hartford City, IN and Fort Wayne, IN. Vendee is authorized to operate as a common carrier in the States of MN, WI, IL, IN, IA, and OH. Application has not been filed for temporary authority under Section 210a(b).

MC–F 14033F. Transferee: THE DANIEL COMPANY OF SPRINGFIELD, 3725 West Division, Springfield, MO 65803. Transferor: COX REFRIGERATED EXPRESS, INC., 10606 Goodnight Lane, Dallas, TX 75220. Representative: Turner White, 910 Plaza Towers, Springfield, MO 65804. Authority sought for purchase by The Daniel Company of Springfield of a portion of the operating rights of Cox Refrigerated Express, Inc., at 10606 Goodnight Lane, Dallas, TX 75220, in Docket MC 140033, (Sub-33), issued September 12, 1978, as follows: Irregular routes: *Such merchandise as is dealt in by grocery and food business houses, in vehicles equipped with mechanical refrigeration* (except commodities in bulk, in tank vehicles). From the facilities of Kraft, Inc., at Springfield, MO, to points in AL, AR, AZ, CA, CO, FL, GA, KS, KY, LA, MS, NM, NC, OK, SC, TN, TX and VA. The certificate contains a restriction against tacking and a further restriction to traffic originating at the named origin and destined to the named destinations. Transferee presently holds Authority under its Lead Docket MC 143085 and Subs thereunder as a Common Carrier, and holds a Permit under its Lead Docket MC 139274 and Subs. Dual operations have been approved. There is presently pending an application under Section 210a(b) by Transferee seeking Temporary Authority to operate the described Authority.

MC–F 14034F. Authority sought for purchase by STAM–WIN, INC., 3700 Park East Drive, Cleveland, Ohio 44122, of operating rights and certain properties of T. T. TRANSPORT CO., 3985 Hutchinson Road, Cincinnati, Ohio 45211, and for the acquisition by LEASEWAY TRANSPORTATION CORP., 3700 Park East Drive, Cleveland, Ohio 44122, of control of said operating rights through the transaction. Applicant's Attorney, J. A. Kundtz, 1100 National City Bank Building, Cleveland, Ohio 44114. Operating rights sought to be transferred and controlled: Injection molding machines, infrared gas heaters, containers, container closures, plastic pipe and fittings, and plastic articles, from the facilities of Van Dorn Company at Cleveland and Conneaut, Ohio, Leetsdale, Pennsylvania, and Elizabeth, New Jersey, to points in CT, IL, IN, KY, MD, MI, MA, MO, NY, OH, PA, RI, VA, and WV, and materials used in the manufacture thereof in the reverse direction. Stam-Win, Inc. holds no authority from this Commission. It is controlled by Leaseway Transportation Corp. which controls certain common and contract carriers some of which are authorized to operate throughout the United States. Application has been filed for Temporary Authority under Section 210a(b).

MC–F 14037F. Transferee: GORDON FAST FREIGHT, INC., 2205 Pacific Highway East, Tacoma, WA 98422. Transferor: V & J REFRIGERATED SERVICE, INC., 3623 6th South, Seattle, WA. Representative: Michael D. Duppenthaler, 211 South Washington Street, Seattle, WA 98104. Authority sought to be controlled: *Alcoholic Beverages* (except wine, in bulk, in tank vehicles), from points in CA to points in King, Pierce, and Snohomish Counties, WA, as a *common* carrier, by motor vehicle, over irregular routes. Vendee is authorized to operate as a common carrier in WA, OR, CA, ZA, and NV. Application has been filed for temporary authority under section 11349.

MC–F 14039F. Authority sought by ALLTRANS EXPRESS U.S.A., INC., of 1335 Sixth Street, San Francisco, CA. 94107, to acquire control of MMAR TRANSPORTATION, INC., of 128 Pennsylvania Street, Kearney, NJ. 07032, through the purchase of 80% MMAR's capital stock. Applicants' attorneys: S. S. Eisen, 370 Lexington Avenue, New York, NY. 10017 and Steven L. Weiman, Suite 145, 4 Professional Drive, Gaithersburg, MD. 20760. Operating rights sought to be controlled: General commodities (except commodities in bulk, classes A and B explosives, commodities of unusual value and commodities requiring special equipment), as a common carrier over irregular routes between New York, NY, Baltimore, MD, Newark, NJ, Philadelphia, and Pittsburgh, PA, New Haven, CT, Holyoke and Boston, MA, Cincinnati, Cleveland, Dayton and Columbus, OH, St. Louis, MO, Chicago, Rockford and Peoria, IL, Milwaukee, WI, Los Angeles, San Francisco, San Diego, Fresno, Emeryville, Oakland, San Jose, Stockton and Sacramento, CA, Phoenix and Tuscon, AZ, Las Vegas and Reno, NV, Seattle and Spokane, WA, Portland, OR, and Salt Lake City, UT. Limitation: Limited to the transportation of shipments moving on bills of lading of freight forwarders as defined in section 402(a)(5) of the Interstate Commerce Act. Restriction: Restricted against the transportation of shipments (a) between Pittsburgh, PA, and Cleveland, OH; (b) from Pittsburgh, PA, and Cleveland, OH, to New York, NY, and Newark, NJ; (c) between Peoria and Chicago, IL; (d) between Cleveland, OH, Chicago, IL, and Milwaukee, WI; (e) between Salt Lake City, UT, Spokane, WA, and Portland, OR; and (f) between Los Angeles, San Francisco, San Diego, Fresno, Emeryville, Oakland, San Jose, Stockton and Sacramento, CA, Phoenix and Tuscon, AZ, Las Vegas and Reno, NV, Seattle, WA, and Portland, OR. Vendee is authorized to operate in the State of CA. Application has not been filed for temporary authority under Section 11349.

MC–F 14041F. Applicant: McLEAN TRUCKING COMPANY, 1920 West First Street, Winston-Salem, NC 27104. Representative: David F. Eshelman, P.O. Box 213, Winston-Salem, NC 27102. Authority sought by McLean Trucking Company, 1920 West First Street, P.O. Box 213, Winston-Salem, NC 27102 to merge with Wolverine Express, Inc., 1920 West First Street, P.O. Box 213, Winston-Salem, NC 27102 and Interlake Equipment Corporation of same address, both of which are now wholly owned subsidiaries of McLean Trucking Company. Operating rights sought to be merged: General commodities (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) over regular routes between named points in Michigan, including Grand Rapids, Lansing, Flint, Alma, Ludington, Traverse City, Muskegon,

Holland, Kalamazoo and other points in the southern peninsula, on the one hand, and, on the other, Toledo, OH, South Bend, IN and Chicago, IL; specified commodities over irregular routes within the above described territory. Vendee is authorized to operate as a common carrier in the States of AR, CT, DE, FL, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, NE, NH, NJ, NY, NC, OH, PA, RI, SC, TN, TX, VT, VA, WV, WI, and DC. Application has not been filed for temporary authority under Section 11345.

Note.—Wolverine Express, Inc. and Interlake Equipment Corporation have been operated as wholly owned subsidiaries of McLean Trucking Company pursuant to the decision of the Commission in Docket MC-F 13133 served on August 19, 1977. Common control may be involved.

MC-F 14042F, Transferee LADLIE TRANSPORTATION, INC., 103 East Main Street, Albert Lea, MN 56007. Transferor LTL PERISHABLES, INC., 550 East 5th Street South, South St. Paul, MN 55075. Representatives: Robert S. Lee, 1000 First National Bank Bldg., Minneapolis, MN 55402, and Donald L. Stern, Suite 610, 7171 Mercy Road, Omaha, NE 68106. Authority sought for purchase by Transferee of a portion of the operating rights of Transferor as set forth in Certificate MC 135874 (Sub-42), served January 29, 1976, as follows: *Irregular* route, *common* carrier, *Meats, meat products, meat byproducts and articles distributed by meat packinghouses* as defined in Sections A and C of Appendix I to the report in Descriptions in *Motor Carrier* Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk), from the facilities of Wilson and Co. at Albert Lea, MN, to points in IL, IA, KS and MO. Transferee has ETA, TA and permanent applications pending under MC 136758. No tacking is sought. Application is being filed for temporary authority under Section 210a(b).

Motor Carrier Alternate Route Deviations

The following letter-notices to operate over deviation routes for operating convenience only have been filed with the Commission under the Deviation Rules—Motor Carrier of Property (49 CFR 1042.4(c)(11)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules at any time, but will not operate to stay commencement of the proposed operations unless filed on or before July 18, 1979.

Each applicant states that there will be no significant effect on either the quality of the human environment or energy policy and conservation.

Motor Carriers of Property

MC 2245 (Deviation No. 10), THE O.K. TRUCKING COMPANY, 3000 E. Crescentville Rd., Cincinnati, OH 45241, filed May 2, 1979. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Indianapolis, IN over Interstate Hwy 70 to Terre Haute, IN, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Indianapolis, IN over US Hwy 136 to Danville, IL, then over US Hwy 150 to Terre Haute, IN and return over the same route.

MC 11220 (Deviation No. 42), GORDONS TRANSPORTS, INC., 184 W. McLemore Ave., Memphis, TN 38101, filed March 26, 1979. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Little Rock, AR over U.S. Hwy 65 to junction Interstate Hwy 20, then over Interstate Hwy 20 to Jackson, MS, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Little Rock, AR over U.S. Hwy 70 to Memphis, TN, then over U.S. Hwy 51 to Jackson, MS, and return over the same route.

MC 11220 (Deviation 41), GORDONS TRANSPORTS, INC., 184 W. McLemore Ave., Memphis, TN 38101, filed March 29, 1979. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Idabel, OK over US Hwy 259 to junction US Hwy 59, then over US Hwy 59 to Livingston, TX, then over TX Hwy 146 to junction US Hwy 90, then over US Hwy 90 to Houston, TX, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Idabel, OK over US Hwy 70 to Durant, OK, then over US Hwy 75 to Houston, TX, and return over the same route.

Note.—A portion of this deviation is premised on a grant of temporary authority under section 210(a)(b). If applicant's right to operate all or part of the leased authority expires, this deviation, if authorized, will likewise expire.

MC 29910 (Deviation 40), ARKANSAS-BEST FREIGHT SYSTEM, INC., P.O. Box 48, Fort Smith, AR 72902, filed April 2, 1979. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Cleveland, OH over US Hwy 480 to junction Interstate Hwy 80, then over Interstate Hwy 80 to junction Pennsylvania Hwy 153, then over Pennsylvania Hwy 153 to junction Pennsylvania Hwy 322, then over Pennsylvania Hwy 322 to Harrisburg, PA, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Cleveland, OH over US Hwy 422 to junction Ohio Hwy 8, then over Ohio Hwy 8, via Akron to Canton, OH, then over US Hwy 30 to junction Pennsylvania Turnpike, then over Pennsylvania Turnpike to junction US Hwy 11, then over US Hwy 11, to Harrisburg, PA, and return over the same route. Restrictions: Service is subject to restrictions as follows: (1) That carrier in operating over the Pennsylvania Turnpike shall handle only traffic which is moving between points in Massachusetts, Rhode Island, Connecticut, and the metropolitan area of New York, NY, including Jersey City, Newark and Elizabeth, NJ, on the one hand, and, on the other, points west of the Ohio-Indiana State Line and points in Ohio north of US Hwy 30 and Lima, OH, on US Hwy 30; or that which is moving between points south of Elizabeth, NJ, on the one hand, and, on the other, points west of the Illinois-Indiana State Line, including Gary, IN, and (2) that authority applicable shall continue only so long as carrier shall, by reason of other authority granted, be entitled or authorized to operate over other routes between the termini of the said above specified two routes.

MC 48958 (Deviation 87), ILLINOIS-CALIFORNIA EXPRESS, INC., 601 Ross St., P.O. Box 9050, Amarillo, TX 79189, filed March 29, 1979. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over deviation routes as follows: (1) From Wichita Falls, TX, over US Hwy 277 to junction Interstate Hwy 35, then over Interstate Hwy 35 to Kansas City, MO, and (2) From Wichita Falls, TX, over Interstate Hwy 35 to junction US Hwy 81, then over US Hwy 81 to junction US Hwy 50, then over US Hwy 50 to Kansas City, MO, and return

over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Wichita Falls, TX over US Hwy 287 to junction US Hwy 66, then over US Hwy 66 to junction NM Hwy 39, then over NM Hwy 39 to junction NM Hwy 58 (US 56), then over NM Hwy 58 to junction US Hwy 85, then over US Hwy 85 to junction US Hwy 6, then over US Hwy 6, to junction US Hwy 138, then over US Hwy 138 to junction US Hwy 30, then over US Hwy 30 to junction US Hwy 34, then over US Hwy 34 to junction US Hwy 73, then over US Hwy 73 to junction US Hwy 40, then over US Hwy 40 to Kansas City, MO, and return over the same route.

MC 55312 (Deviation 10) (Cancels Deviation NO. 8), CONTINENTAL TENNESSEE LINES, INC., 1785 Hwy 80 West, P.O. Box 8435, Jackson, MS 39204, filed March 28, 1979. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passengers and their baggage*, and *express*, and *newspapers* in the same vehicle with passengers, over deviation routes as follows: From Shepherdsville, KY over Interstate Hwy 65 to junction TN Hwy 25, then over TN Hwy 25 to Gallatin, TN, with the following access route: From junction US Hwy 31W and TN Hwy 109, over TN Hwy 109 to Gallatin, TN, and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property, over a pertinent service route as follows: From Shepherdsville, KY over KY Hwy 61 to Boston, KY, then over US Hwy 62 to Leitchfield, KY, then over KY Hwy 259 to junction US Hwy 31W, then over US Hwy 31W to junction KY Hwy 101, then over KY Hwy 101 to Scottsville, KY, then over US Hwy 31E to Gallatin, TN, and return over the same route.

MC 59583 (Deviation 60), THE MASON AND DIXON LINES, INC., P.O. Box 969, Kingsport, TN 37662, filed May 7, 1979. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over deviation routes as follows: (1) From Richmond, VA over Interstate Hwy 95 to Petersburg, VA, then over Interstate Hwy 85 to Henderson, NC, and (2) From Richmond, VA over Interstate Hwy 95 to Roanoke Rapids, NC and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Richmond, VA over US Hwy 60, to junction VA Hwy 24, then over VA Hwy 24 to Appamatox, VA, then over US Hwy 460 to Lynchburg, VA, then over US Hwy 29 to Greensboro, NC, then over Interstate Hwy 85 to (a) Henderson, NC, then over US Hwy 1 to Norlina, NC, then over US Hwy 158 to (b) Roanoke Rapids, NC, and return over the same routes.

MC 10343 (Deviation 26), CHURCHILL TRUCK LINES, INC., P.O. Box 250, Highway 36 West, Chillicothe, MO 64601, filed May 2, 1979. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over the deviation routes as follows: (1) From Wichita, KS, over the Kansas Turnpike to Topeka, KS and return over the same route for operating convenience only, (2) From Wichita, KS over the Kansas Turnpike to junction Interstate Hwy 35, then over Interstate Hwy 35 to Kansas City, MO, and return over the same route for operating convenience only, and (3) From Wichita, KS over Interstate Hwy 135 (formerly Interstate Hwy 35W) to junction US Hwy 50, then over US Hwy 50 to junction Interstate Hwy 35, then over Interstate Hwy 35 to Kansas City, MO, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: (1) From Wichita, KS over Kansas Hwy 15 to junction US Hwy 40, then over US Hwy 40 to junction Kansas Hwy 18, then over Kansas Hwy 18 to junction US Hwy 24, then over US Hwy 24 to Topeka, KS, and return over the same route, and (2) From Wichita, KS over Kansas Hwy 15, to junction US Hwy 56, then over US Hwy 56 to junction US Highway 50, then over US Hwy 50 to Kansas City, MO and return over the same route.

MC 111231 (Deviation No. 67), JONES TRUCK LINES, INC, 610 E. Emma Ave., Springdale, AR 72764, filed May 4, 1979. Carrier's representative: Kim D. Mann, Suite 1010, 7101 Wisconsin Ave., Washington, DC 20014. Carrier proposes to operate as a *comon carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Kansas City, MO over Interstate Hwy 35 to junction Interstate Hwy 80, then over Interstate Hwy 80 to Chicago, IL and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Kansas City, MO over US Hwy 73 to Hiawatha, KS, then over US Hwy 36 to junction KS Hwy 15E, then east over US Hwy 36 to Marysville, KS, then over US Hwy 77 to Lincoln, NE, then over US Hwy 6 to junction IL Hwy 92, then over IL Hwy 92 to junction US Hwy 34, then over US Hwy 34 to Chicago, IL, and return over the same route.

By the Commission,
H. G. Homme, Jr.,
Secretary.

Sunshine Act Meetings

Federal Register
Vol. 44, No. 118
Monday, June 18, 1979

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

	Items
Consumer Product Safety Commission	1, 2, 3, 4
Equal Employment Opportunity Commission	5
Federal Energy Regulatory Commission	6
Federal Election Commission	7
Federal Maritime Commission	8, 9
Federal Mine Safety and Health Review Commission	10
Securities and Exchange Commission	11

1

CONSUMER PRODUCT SAFETY COMMISSION.

Revised Agenda [1]

TIME AND DATE: 4 p.m., Tuesday, June 12, 1979.

LOCATION: 8th Floor Conference Room, 1111 18th St., NW., Washington, DC.

STATUS: Part open, part closed to the public.

MATTERS TO BE CONSIDERED:

A. Open to public:

1. *Briefing on Abestos in Products Other than Hair Dryers.*—The staff will brief the Commission on CPSC chronic hazards programs concerning asbestos in consumer products other than hair dryers.

B. Closed to the Public:

2. *Lead in Paint: Tee Shirts.*—The staff will brief the Commission on issues to litigation concerning enforcement of lead in paint regulations. (Closed under exemption 10: litigation)

C. Open to the Public:

3. *Hair Dryers/Abestos.*—The staff will present a review of procedures it is using in matters involving asbestos in hair dryers.

[1] Agenda revised June 12, by oral vote of the Commission to add items 2 and 3, and to close discussion of item 2 to the public. In making these changes, the Commission determined that agency business requires consideration of these matters without seven days notice.

Agenda originally approved June 8; at that time, the Commission determined that agency business requires consideration of item 1 without seven days notice.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Assistant Secretary, Suite 300, 1111 18th Street, NW., Washington, DC 20207, Telephone: (202) 634-7700.

[S-1192-79 Filed 6-14-79; 11:45 am]

2

U.S. CONSUMER PRODUCT SAFETY COMMISSION.

Revised Agenda [1]

TIME AND DATE: 10:30 a.m., Wednesday, June 20, 1979.

LOCATION: Room 456, Westwood Towers, 5401 Westbard Avenue, Bethesda, Maryland.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. *Briefing on Minorities Program.*—The staff will make recommendations on the use of Fiscal Year 1980 funds for information and education programs directed toward minority populations.

2. *Briefing on Cellulose Insulation: 27 (e) Labeling Rule.*—The staff will brief the Commission on a proposed labeling rule under section 27(e) of the Consumer Product Safety Act. This rule will address proper installation, warning of fire hazards if the insulation is installed too close to certain heat sources. The staff will brief the Commission on other cellulose insulation issues at a briefing on June 25. The Commission will consider cellulose insulation at the June 28 Meeting.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Assistant Secretary, Suite 300, 1111 18th Street NW, Washington, DC 20207, Telephone: (202) 634-7700.

3

CONSUMER PRODUCT SAFETY COMMISSION.

Agenda

TIME AND DATE: 9:30 a.m., Thursday, June 21, 1979.

LOCATION: Third Floor Hearing Room, 1111 18th Street, NW., Washington, D.C.

STATUS: Open to the public.

[1] Agenda revised June 13, 1979, with deletion of former item 2: Briefing on Rust Removers Petition, HP 79-2, which will be rescheduled.

In addition, the meeting will begin at 10:30, instead of at 10:00, as previously scheduled.

MATTERS TO BE CONSIDERED:

1. *CB Antennas: Notice and Plan.*—The Commission will consider a draft Federal Register document giving notice of CPSC's intent to develop a safety standard to address electrocution hazards associated with the erection and dismantling of Citizens Band base station antennas. The staff will also discuss the management plan for conducting the standard development process.

2. *Skateboards Petition, CP 79-2.*—The Commission will consider a petition in which the Consumer Affairs Committee, Americans for Democratic Action asks CPSC to ban skateboards.

3. *Burn Prevention Project.*—The Commission will consider a proposed one-site replication of Project Burn Prevention, and other national efforts on burn prevention. The Commission previously considered these matters at the May 17 Briefing and at the June 6 Meeting.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Assistant Secretary, Suite 300, 1111 18th Street, NW., Washington, DC 20207, Telephone: (202) 634-7700.

Agenda approved June 8, 1979.

4

CONSUMER PRODUCT SAFETY COMMISSION.

Agenda

TIME AND DATE: 9:30 a.m., Monday, June 25, 1979.

LOCATION: Third Floor Hearing Room, 1111-18th St. NW., Washington, D.C.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

Briefing on Cellulose Insulation.—The staff will brief the Commission on the final amendment to the Interim Safety Standard, and the Certification Rule for Cellulose Insulation. The Commission proposed both rules on March 8, 1979. The Commission will consider the Safety Standard, the Certification Rule, and a Labeling Rule (briefing scheduled for June 25) at the June 28 Commission Meeting.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Assistant Secretary, Suite 300, 1111-18th Street, NW., Washington, D.C. 20207, Telephone: (202) 634-7700.

Agenda approved June 8, 1979.

[S-1195-79 Filed 6-14-79; 11:45]

5

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION.

TIME AND DATE: 9:30 a.m. (eastern time), Tuesday, June 19, 1979.

PLACE: Commission Conference Room, No. 5240, on the fifth floor of the Columbia Plaza Office Building, 2401 E Street NW., Washington, D.C. 20506.

STATUS: Part will be open to the public and part will be closed to the public.

MATTERS TO BE CONSIDERED:

Open to the public:

1. Proposed designation of South Carolina Human Affairs Commission as a 706 Agency.
2. Proposed revision of interpretations of the age Discrimination in Employment Act of 1967, as amended (29 CFR 860).
3. Proposed contracts for computer analyses and expert witness services in connection with a pending court case.
4. Report on operations of the Office of Review and Appeals.
5. Report on Commission operations by the Executive Director.

Closed to the public:

1. Litigation Authorization; General Counsel Recommendations.
2. Proposed Decision in Charge TN03-1711.
3. Proposed Reconsideration of Decision in Charge 052-77-0748.

Note.—Any matter not discussed or concluded may be carried over to a later meeting.

CONTACT PERSON FOR MORE INFORMATION: Marie D. Wilson, Executive Officer, Executive Secretariat, at (202) 634-6748.

This notice issued June 12, 1979.

6

June 13, 1979.

FEDERAL ENERGY REGULATORY COMMISSION.

TIME AND DATE: 10 a.m., June 20, 1979.

PLACE: 825 North Capitol Street NE., Washington, D.C. 20426, Hearing Room A.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: Kenneth F. Plumb, Secretary, Telephone (202) 275-4166.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda, however, all public documents may be examined in the office of public information.

Power Agenda—226th Meeting, June 20, 1979, Regular Meeting (10 a.m.)

CAP-1. Project No. 2708, Monongahela Power Co., The Potomac Edison Power Co., and West Penn Power Co.
CAP-2. Project No. 2372, Pennsylvania Electric Co.
CAP-3. Project No. 1992, California Fire Mountain Lodge.
CAP-4. Docket Nos. ER79-338, ER79-337, Central Illinois Public Service Co., Kentucky Utilities, and Southern Illinois Power Cooperative.
CAP-5. Docket No. ER79-343, Florida Power Corp.
CAP-6. Docket No. ER79-334, Upper Peninsula Power Co.

Part II

Department of Housing and Urban Development

Office of Assistant Secretary for Housing—Federal Housing Commissioner

Fair Market Rents for New Construction and Substantial Rehabilitation; All Market Areas Section 8 Projects

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

[24 CFR Part 888]

[Docket No. R-79-677]

Fair Market Rents for New Construction and Substantial Rehabilitation; All Market Areas Section 8 Projects

AGENCY: Office of Assistant Secretary for Housing-Federal Housing Commissioner, Department of Housing and Urban Development (HUD).

ACTION: Proposed rule.

SUMMARY: This Proposed Rule will amend the Section 8 Fair Market Rents applicable to New Construction and Substantial Rehabilitation for all Market Areas. The Proposed Fair Market Rents are intended to reflect the changes which have occurred in the general levels of market rents for recently completed or newly constructed dwelling units within each market area since their last annual or special (interim) revision.

DATE: July 3, 1979. Comments should be filed by this deadline with the Rules Docket Clerk at the above address.

ADDRESS: Rules Docket Clerk, Office of General Counsel, Room 5218, Department of Housing and Urban Development, 451 7th Street, SW, Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT: Edward M. Winiarski, Supervisory Appraiser, Valuation Branch, Technical Support Division, Office of Multifamily Housing Development, 451–7th Street, S.W., Washington, D.C. 20410. (202) 755–5743. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: This proposed rule would establish revised section 8 Fair Market Rents applicable to new construction and substantial rehabilitation for all market areas in compliance with the requirements of section 8(c)(1) of the U.S. Housing Act of 1937 and implementing regulations that Fair Market Rents be established and published in the **Federal Register** at least annually.

These Fair Market Rents are based primarily on the levels of rental paid for recently completed or newly constructed dwelling units of modest design within each market area as determined by HUD Field Office staff. They are estimates of the rentals that prospective tenants who have income above 80 percent of the median income would be willing and able to pay for recently completed or newly constructed dwelling units of modest design. Families with incomes 80% or less of the median income for the area, with certain adjustments, may be eligible for housing assistance under the section 8 programs. The last annual revision was published June 13, 1978, effective April 1, 1978. After consideration of comments received as a result of this publication, revised rents will be published effective April 1, 1979.

The Proposed Rule includes Fair Market Rents for 0, 1, 2, 3, and 4 or more bedroom units in five structural categories (detached, semi-detached/row, walkup, elevator 2–4 story, and elevator 5+ story.) However, Departmental policy discourages construction of high-rise family projects. For the McAlester, Oklahoma market area only, Fair Market Rents are included for mobile homes.

Proposals involving combinations of structure type and unit size by bedroom count for which Fair Market Rents have not been published for effect may not be approved until publication of the applicable Fair Market Rents, first for comment and then for effect.

Interested parties are encouraged at all times to submit information and data on Fair Market Rents which will be considered in initiating revisions as needed. It has been determined that because of the immediate need to provide revised Fair Market Rents in order to meet this year's departmental Production goals for assisted housing reservations and starts, a 15-day comment period is reasonable and in the public interest. A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours at the Office of the Rules Docket Clerk at the address set forth above.

It is therefore proposed that Schedule A of Part 888 be amended as set for below.

(Sec. 7(d), Department of HUD Act (42 U.S.C. 3535(d))

Issued at Washington, D.C., on May 4, 1979.

Lawrence B. Simons,
Assistant Secretary for Housing-Federal Housing Commissioner.

Schedule A—Fair Market Rents for New Construction and Substantial Rehabilitation (Including Housing Finance and Development Agencies Program)

These Fair Market Rents have been trended ahead 2 years to allow time for processing and construction of proposed new construction and substantial rehabilitation rental projects.

Note.—The Fair Market Rents for (1) dwelling units designed for the elderly or handicapped are those for the appropriate size units, not to exceed 2-bedroom for the elderly, multiplied by 1.05 rounded to the next higher whole dollar, (2) congregate housing dwelling units are the same as for non-congregate units, and (3) single room occupancy dwelling units are those for 0-bedroom units of the same type.

Federal Register

Part III

Environmental Protection Agency

Implementation of Procedures on the National Environmental Policy Act

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 6]

[FRL 1227-6]

Implementation of Procedures on the National Environmental Policy Act

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: On November 29, 1978, the Council on Environmental Quality (CEQ) promulgated regulations establishing uniform procedures for implementing the procedural provisions of the National Environmental Policy Act. CEQ required Federal agencies to adopt appropriate procedures to supplement their regulations. As a result, EPA is proposing to amend its procedures contained in 40 CFR Part 6 to take into account this initiative.

DATE: Written comments will be received with respect to this proposed regulation. Comments must be received on or before July 18, 1979.

ADDRESS: Comments should be addressed to William N. Hedeman, Jr., Director, Office of Environmental Review (A–104), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Thomas Sheckells, Office of Environmental Review, EPA, 401 M Street SW., Washington, D.C. 20460; telephone 202/755–0790.

SUPPLEMENTARY INFORMATION:

Introduction

The National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, as implemented by Executive Orders 11514 and 11991, and the Council on Environmental Quality (CEQ) Regulations (40 CFR Parts 1500–1508) requires that all agencies of the Federal Government to the fullest extent possible carry out the provisions of NEPA by building into agency decisionmaking appropriate and careful consideration of the environmental effects of proposed actions, and avoiding or minimizing the adverse effects of these actions. The environmental impact statement (EIS) requirement under section 102(2)(C) serves as the most significant mechanism for implementing NEPA.

These regulations set forth the requirements for EPA to carry out its obligations under NEPA. CEQ in its January 19, 1979 Memorandum for NEPA Liaisons set forth strict rules for Federal agencies in developing their implementing regulations.

Specifically, in view of the President's directive to CEQ to establish a single set of regulations for government-wide NEPA implementation, CEQ has directed the Federal agencies to avoid restating or paraphrasing the CEQ Regulations, even though agencies may quote or cross-reference the CEQ regulations in their implementing procedures. Therefore, it must be made clear that EPA is proposing the following regulations with the understanding that the reader has available the policy statements and definitions contained in the CEQ Regulations. In this respect, it is noted that previous nomenclature used by EPA has been adjusted to conform with the CEQ regulations. The term "environmental assessment" as previously used by EPA is now referred to as an "environmental information document"; the term "negative declaration" is now a "finding of no significant impact"; and the term "environmental impact appraisal" is now "environmental assessment."

These regulations amend EPA regulations under 40 CFR Part 6 previously promulgated in Subparts A–H on April 14, 1975 (see 40 FR 16823) and Subpart I on January 11, 1977 (see 42 FR 2450).

Exemptions

Over the past several years there has been much controversy surrounding this Agency's preparation of EISs. Considering that the nature of EPA's activities generally concern actions protective of the environment, the Congress and the Courts have seen fit to exempt numerous EPA activities from EIS applicability.

The Congress has provided major exemptions under the Clean Water Act and the Clean Air Act. Specifically, under section 511(c)(1) of the Clean Water Act (CWA) (Pub. L. 92–500), EPA is exempt from preparing EISs under the CWA except for the issuance of new source National Pollutant Discharge Elimination System (NPDES) permits as authorized under section 402 and the provision of Federal financial assistance for the purpose of assisting the construction of publicly owned treatment works under section 201. Under section 7(c)(1) of the Energy Supply and Environmental Coordination Act of 1974 (Pub. L. 93–319), all activities under the Clean Air Act are exempt from the EIS requirements of NEPA. Further, the courts have found EPA to be exempt from the EIS requirements for regulatory actions under the Clean Air Act, the Federal Insecticide, Fungicide, and Rodenticide Act, and the Marine Protection, Research and Sanctuaries Act. In addition, the Agency has determined that EPA regulatory activities under the Resource Conservation and Recovery Act of 1976, the Toxic Substances Control Act of 1976, the Safe Drinking Water Act, and the Noise Control Act are exempt from the EIS requirements of NEPA. Nevertheless, on May 7, 1974, Administrator Russell Train decided that the Agency would voluntarily prepare EISs on certain regulatory activities in spite of the statutory and court exemptions that existed at that time. This revised regulation does not affect those voluntary EIS procedures.

Summary of Regulation

The regulations set forth below are intended to meet the requirements for Federal agency procedures under § 1507.3 of the CEQ regulations.

Subparts A thru I describe procedures for preparing required EISs. Specifically, Subpart E relates to environmental review procedures for the Wastewater Treatment Construction Grants Program of the CWA; Subpart F relates to environmental review procedures for the new source NPDES permit program; Subpart G relates to environmental review procedures for research, and development programs; Subpart H relates to environmental review procedures for solid waste demonstration projects; and Subpart I relates to environmental review procedures for EPA undertakings for construction of special purpose facilities or facility renovations.

Conformity to State Implementation Plans

In 1977, the Congress amended the Clean Air Act (CAA) (Pub. L. 95–95) to provide that no Federal agency shall (1) engage in, (2) support in any way or provide financial assistance for, (3) license or permit, or (4) approve, any activity which does not conform to an approved or promulgated state air quality implementation plan (SIP). Section 176(c) of the CAA provides that the assurance of conformity for a Federal action to a SIP is the affirmative responsibility of the head of such agency. Subpart C of these regulations sets forth new requirements for EPA to carry out its obligations under section 176(c). The Agency has expanded its notification procedures under Subpart C to provide for increased consultation opportunities between EPA and the designated lead State or local air quality

agency in the determination of an action's conformity to the SIP. These procedures will also establish a process by which the designated lead State or local agency will have an opportunity to concur or nonconcur with the EPA conformity determination. It is believed that the environmental review procedures will provide the most expeditious and complete review of an EPA action's air quality impact and conformity to a SIP.

Monitoring Responsibility

The CEQ Regulations at § 1505.3 require monitoring of grant conditions. One question that is raised by this provision is whether third parties (e.g. citizen groups) may file a lawsuit to enforce compliance with a grant condition after final payment is made for an EPA funded project. Sections 6.506 and 6.509 of this proposed rule presently provide for the imposition and monitoring of grant conditions. In these regulations and the amendments to the EPA Construction Grant Regulations (40 CFR Part 35, Subpart E), which will be proposed in the near future, EPA is considering providing for third party enforcement of such conditions. Public comment on this concept is invited.

Mandatory Hearings

Although the CEQ Regulations under 40 CFR § 1506.6(c) do not require mandatory public hearings attendant to a draft EIS, EPA is contemplating requiring such hearings for all draft EISs. These proposed regulations under § 6.409(c) presently require the responsible official to consider conducting a public hearing on a draft EIS especially when a hearing may facilitate the resolution of conflicts or significant public controversy. Your comments are solicited concerning the possibility of making draft EIS hearings mandatory.

Review Timeframe for Proposed Regulation

In view of the July 30, 1979 effective date imposed by the CEQ Regulations, EPA is allowing only 30 days for public comment on this proposed rule. Commenters are urged to meet this time deadline.

Note.—EPA has determined that because this document does not constitute a significant regulation within the meaning of Executive Order 12044, preparation of a regulatory analysis is not required.

Dated: June 8, 1979

Douglas M. Costle,

Administrator.

It is proposed to revise Part 6 to read as follows:

PART 6—PREPARATION OF ENVIRONMENTAL IMPACT STATEMENTS

Subpart A—General

Sec.
6.100 Purpose and policy.
6.101 Definitions.
6.102 Applicability.
6.103 Responsibilities.
6.104 Early involvement of private parties.
6.105 Synopsis of EIS procedures.
6.106 Deviations.

Subpart B—Content of EISs

6.200 The environmental impact statement.
6.201 Format.
6.202 Cover sheet.
6.203 Summary.
6.204 Body of EIS.
6.205 Incorporation by reference.

Subpart C—Coordination with Other Environmental Review and Consultation Requirements

6.300 General.
6.301 Historical and archeological sites.
6.302 Wetlands, floodplains, agricultural lands, coastal zones, wild and scenic rivers, fish and wildlife, and endangered species.
6.303 Air quality.

Subpart D—Public and Other Federal Agency Involvement

6.400 Initial public involvement.
6.401 Official filing requirements.
6.402 Availability of documents.
6.403 The commenting process.

Subpart E—Environmental Review Procedures for Wastewater Treatment Construction Grants Program

6.500 Purpose.
6.501 Definitions.
6.502 Applicability.
6.503 Public participation.
6.504 Limitations on actions during environmental review process.
6.505 Criteria for preparing EISs.
6.506 Environmental review process.
6.507 Limits on delegation to States.
6.508 Record of decision.
6.509 Monitoring.

Subpart F—Environmental Review Procedures for New Source NPDES Program

6.600 Purpose.
6.601 Definitions.
6.602 Applicability.
6.603 Limitations on actions during environmental review process.
6.604 Environmental review process.
6.605 Criteria for preparing EISs.
6.606 Record of decision.
6.607 Monitoring.

Subpart G—Environmental Review Procedures for Research and Development Programs.

6.700 Purpose.
6.701 Definitions.
6.702 Applicability.
6.703 Criteria for preparing EISs.
6.704 Environmental review process.
6.705 Record of decision.

Subpart H—Environmental Review Procedures for Solid Waste Demonstration Projects.

6.800 Purpose.
6.801 Applicability.
6.802 Criteria for preparing EISs.
6.803 Environmental review process.
6.804 Record of decision.

Subpart I—Environmental Review Procedures for EPA Facility Support Activities

6.900 Purpose.
6.901 Definitions.
6.902 Applicability.
6.903 Criteria for preparing EISs.
6.904 Environmental review process.
6.905 Record of decision.

Subpart A—General

§ 6.100 Purpose and policy.

(a) The National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, as implemented by Executive Orders 11514 and 11991 and the Council on Environmental Quality (CEQ) Regulations of November 29, 1978 (43 FR 55978), requires that Federal agencies include in their decision-making processes appropriate and careful consideration of all environmental effects of proposed actions, analyze potential environmental effects of proposed actions and their alternatives for public understanding and scrutiny, avoid or minimize adverse effects of proposed actions, and restore and enhance environmental quality as much as possible. The Environmental Protection Agency (EPA) shall integrate these NEPA factors as early in the Agency planning processes as possible. The environmental review process shall be the focal point to assure NEPA considerations are taken into account. To the extent applicable, EPA shall prepare environmental impact statements (EISs) on those major actions determined to have significant impact on the quality of the human environment. This part takes into account the EIS exemptions set forth under section 511(c)(1) of the Clean Water Act (Pub. L. 92-500) and section 7(c)(1) of the Energy Supply and Environmental Coordination Act of 1974 (Pub. L. 93-319).

(b) This Part establishes EPA policy and procedures for the identification and analysis of the environmental impacts of EPA related activities and the preparation and processing of EISs.

§ 6.101 Definitions.

(a) *Terminology.* All terminology used in this part will be consistent with the terms as defined in 40 CFR 1508 (the

CEQ Regulations). Any qualifications will be provided in the definitions set forth in each subpart of this regulation.

(b) The term "CEQ Regulations" means the regulations issued by the Council on Environmental Quality on November 29, 1978 (see 43 FR 55978), which implement Executive Order 11991. The CEQ Regulations will often be referred to throughout this regulation by reference to 40 CFR Part 1500 *et al.*

(c) The term "environmental review" means the process whereby an evaluation is undertaken by EPA to determine whether a proposed Agency action may have a significant impact on the environment and therefore require the preparation of the EIS.

(d) The term "environmental information document" means any preliminary written analysis prepared by an applicant, grantee or contractor describing the environmental impacts of a proposed Agency action.

§ 6.102 Applicability.

(a) *Administrative actions covered.* This part applies to the activities of EPA in accordance with the outline of the subparts set forth below. Each subpart describes the detailed environmental review procedures required for each action.

(1) Subpart A sets forth an overview of the regulation. Section 6.102(b) describes the requirements for EPA legislative proposals.

(2) Subpart B describes the requirements for the content of an EIS prepared pursuant to subparts E, F, G, H, and I.

(3) Subpart C describes the requirements for coordination of all environmental laws during the environmental review undertaken pursuant to subparts E, F, G, H, and I.

(4) Subpart D describes the public information requirements which must be undertaken in conjunction with the environmental review requirements under subparts E, F, G, H, and I.

(5) Subpart E describes the environmental review requirements for the wastewater treatment construction grants program under Title II of the Clean Water Act.

(6) Subpart F describes the environmental review requirements for new source National Pollutant Discharge Elimination System (NPDES) permits under section 402 of the Clean Water Act.

(7) Subpart G describes the environmental review requirements for research and development programs undertaken by the Agency.

(8) Subpart H describes the environmental review requirements for solid waste demonstration projects undertaken by the Agency.

(9) Subpart I describes the environmental review requirements for construction of special purpose facilities and facility renovations by the Agency.

(b) *Legislative proposals.* As required by the CEQ Regulations, legislative EISs are required for any legislative proposal developed by EPA which significantly affects the quality of the human environment. A preliminary draft EIS shall be prepared by the responsible EPA office concurrently with the development of the legislative proposal and contain information required under subpart B. The EIS shall be processed in accordance with the requirements set forth under 40 CFR 1506.8.

§ 6.103 Responsibilities.

(a) *General responsibilities.* (1) The responsible official's duties include:

(i) Requiring applicants, contractors, and grantees to submit environmental information documents and related documents and assuring that environmental reviews are conducted on proposed EPA projects at the earliest possible point in EPA's decision-making process. In this regard, the responsible official shall assure the early involvement and availability of information for private applicants and other non-Federal entities requiring EPA approvals.

(ii) When required, assuring that draft EIS's are prepared and distributed at the earliest possible point in EPA's decision-making process, their internal and external review is coordinated, and final EISs are prepared and distributed.

(iii) When an EIS is not prepared, assuring that findings of no significant impact (FNSIs) and environmental assessments are prepared and distributed for those actions requiring them.

(iv) Consulting with appropriate officials responsible for other environmental laws set forth in subpart C.

(v) Consulting with the Office of Environmental Review (OER) on action involving unresolved conflicts concerning this part or other Federal agencies.

(vi) When required, assuring that public participation requirements are met.

(2) Office of Environmental Review duties include:

(i) Supporting the Administrator in providing EPA policy guidance and assuring that EPA offices establish and maintain adequate administrative procedures to comply with this part.

(ii) Monitoring the overall timeliness and quality of the EPA effort to comply with this part.

(iii) Providing assistance to responsible officials as required, i.e., guidelines describing the scope of environmental information required by private applicants relating to their proposed actions.

(iv) Coordinating the training of personnel involved in the review and preparation of EISs and other associated documents.

(v) Acting as EPA liaison with the Council on Environmental Quality and other Federal and State entities on matters of EPA policy and administrative mechanisms to facilitate external review of EISs, to determine lead agency and to improve the uniformity of the NEPA procedures of Federal agencies.

(vi) Advising the Administrator and Deputy Administrator on projects which involve more than one EPA office, are highly controversial, are nationally significant, or "pioneer" EPA policy, when these projects have had or should have an EIS prepared on them.

(vii) Carrying out administrative duties relating to maintaining status of EISs within EPA, i.e., publication of notices of intent in the Federal Register and making available to the public status reports on EISs and other elements of the environmental review process.

(3) Office of an Assistant Administrator duties include:

(i) Providing specific policy guidance to their respective offices and assuring that those offices establish and maintain adequate administrative procedures to comply with this part.

(ii) Monitoring the overall timeliness and quality of their respective office's efforts to comply with this part.

(iii) Acting as liaison between their offices and the OER and between their offices and other Assistant Administrators or Regional Administrators on matters of agencywide policy and procedures.

(iv) Advising the Administrator and Deputy Administrator through the OER on projects or activities within their respective areas of responsibilities which involve more than one EPA office, are highly controversial, are nationally significant, or "pioneer" EPA policy, when these projects will have or should have an EIS prepared on them.

(4) The Office of Planning and Evaluation shall be responsible for coordinating the preparation of EISs required on EPA legislative proposals (see § 6.102(b)).

(b) *Responsibilities for Subpart E.* (1) *Responsible official.* The responsible official for EPA actions covered by this subpart is the Regional Administrator.

(2) *Assistant Administrator.* The responsibilities of the Office of the Assistant Administrator, as described in § 6.103(a)(3) shall be assumed by the Assistant Administrator for Water and Waste Management for EPA actions covered by this subpart.

(c) *Responsibilities for Subpart F.* (1) *Responsible official.* The responsible official for activities covered by this subpart is the Regional Administrator.

(2) *Assistant Administrator.* The responsibilities of the Assistant Administrator, as described in § 6.103(a)(3) shall be assumed by the Assistant Administrator for Enforcement for EPA actions covered by this subpart.

(d) *Responsibilities for Subpart G.* The Assistant Administrator for Research and Development will be the responsible official for activities covered by this subpart.

(e) *Responsibilities for Subpart H.* The Deputy Assistant Administrator for Solid Waste will be the responsible official for activities covered by this subpart.

(f) *Responsibilities for Subpart I.* (1) *Responsible official.* The responsible official for new construction and modification of special purpose facilities is as follows:

(i) The Chief, Facilities Management Branch, Facilities and Support Services Division, Office of Management and Agency Services, shall be the responsible official on all new construction of special purpose facilities and on all improvement and modification projects for which the Facilities Management Branch has received a funding allowance.

(ii) The Regional Administrator shall be the responsible official on all improvement and modification projects for which the regional office has received the funding allowance.

(iii) The Center Directors shall be the responsible officials on all improvement and modification projects for which the National Environmental Research Centers have received the funding allowance.

§ 6.104 Early involvement of private parties.

As required by 40 CFR 1501.2(d) and § 6.103(a)(3)(E) of this regulation, responsible officials must ensure early involvement of private applicants or other non-Federal entities in the environmental review process related to EPA grant and permit actions set forth under subparts E, F, G, and H. The responsible official in conjuction with OER shall:

(a) Prepare where practicable generic guidelines describing the scope and level of environmental information required from applicants as a basis for evaluating their proposed actions, and make these guidelines available upon request.

(b) Provide such guidance on a project-by-project basis to any applicant seeking assistance.

(c) Upon receipt of an application for agency approval, or notification that an application will be filed, consult as required with other appropriate parties to initiate and coordinate the necessary environmental analyses.

§ 6.105 Synopsis of EIS Procedures.

(a) *Responsibile Official.* the responsible official shall utilize a systematic, interdisciplinary approach to integrate natural and social sciences as well as environmental design arts in planning programs and making decisions which are subject to environmental review. The respective staffs may be supplemented by professionals from other agencies (see 40 CFR § 1501.6) or consultants whenever in-house capabilities are insufficiently interdisciplinary.

(b) *Environmental information documents.* Environmental information documents must be prepared by applicants, grantees, or permittees and submitted to EPA as required in subparts E, F, G, H, and I.

(c) *Environmental reviews.* Environmental reviews shall be conducted on the EPA activities outlined in § 6.102 above and set forth under subparts E, F, G, H and I. This process shall consist of a study of the action to identify and evaluate the related environmental impacts. The process shall include a review of any related environmental information document to determine whether any significant impacts are anticipated and whether any changes can be made in the proposed action to eliminate significant adverse impacts; when an EIS is required, EPA has overall responsibility for this review, although grantees, applicants, permittees or contactors will contribute to the review through submission of environmental information documents.

(d) *Environmental assessments.* Environmental assessments (i.e., concise public documents for which EPA is responsible) are prepared to provide sufficient data and analysis to determine whether an EIS or finding of no significant impact is required. Where EPA determines at an early stage that an EIS will be prepared, there is no need to prepare a formal environmental assessment.

(e) *Notice of intent and EISs.* When the environmental review and resulting environmental assessment indicate that a significant environmental impact may occur and significant adverse impacts can not be eliminated by making changes in the project, a notice of intent to prepare an EIS shall be published in the Federal Register, scoping shall be undertaken in accordance with 40 CFR 1501.7, and a draft EIS shall be prepared and distributed. After external coordination and evaluation of the comments received, a final EIS shall be prepared and disseminated.

(f) *Finding of no significant impact* (FNSI). When the environmental review indicates no significant impacts are anticipated or when the project is altered to eliminate any significant adverse impacts, a FNSI shall be issued and made available to the public. The environmental assessment shall be included as a part of the FNSI.

(g) *Record of decision.* At the time of its decision on any action for which a final EIS has been prepared, the responsible official shall prepare a concise public record of the decision.

(h) *Monitoring.* The responsible official shall provide for monitoring to assure that decisions on any action where a final EIS has been prepared are properly implemented. Appropriate mitigation measure shall be included in actions undertaken by EPA.

§ 6.106 Deviations.

(a) *General.* The Director, OER, is authorized to approve deviations from these regulations.

(b) *Requirements.* (1) Where emergency circumstances make it necessary to take an action with significant environmental impact without observing the substantive provisions of these regulations or the CEQ Regulations, the responsible officials shall notify the Director, OER, before taking such action. The responsible official shall consider to the extent possible alternative arrangements; such arrangements will be limited to actions necessary to control the immediate impacts of the emergency; other actions remain subject to the environmental review process. The Director, OER, after consulting CEQ, will inform the responsible official as expeditiously as possible of the disposition of his request.

(2) Where circumstances make it necessary to take action without observing procedural provisions of these

regulations, the responsible officals shall notify the Director, OER, before taking such action. If the Director, OER, determines such a deviation would be in the best interest of the Government, he shall inform the responsible official, as soon as possible, of his approval.

(3) The Director, OER, shall coordinate his action on a deviation under § 6.106(b)(1) or (2) above with the Director, Grants Administration Division, Office of Planning and Management, for any required grant related deviation under 40 CFR 30.1000.

Subpart B—Content of EISs

§ 6.200 The environmental impact statement.

Preparers of EISs must conform with the requirements of 40 CFR Part 1502 in writing EISs.

§ 6.201 Format.

The format used for EISs shall encourage good analysis and clear presentation of alternatives, including the proposed action, and their environmental, economic and social impacts. The following standard format for EISs should be used unless the responsible official determines that there is a compelling reason to do otherwise:

(a) Cover sheet
(b) Executive Summary
(c) Table of contents
(d) Introduction
(e) Purpose of and need for action
(f) Alternatives including proposed action
(g) Environmental consequences of the alternatives on the affected environment
(h) Coordination (includes list of agencies, organizations, and persons to whom copies of the EIS are sent)
(i) List of preparers
(j) Literature cited
(k) Index (commensurate with complexity of EIS)
(l) Appendices

§ 6.202 Cover sheet.

In addition to the requirements of 40 CFR 1502.11, the cover sheet shall include the name(s) and titles of the persons who were primarily responsible for preparing the EIS.

§ 6.203 Executive summary.

The executive summary shall describe in sufficient detail (10–15 pages) the critical facets of the EIS so that the reader can become familiar with the proposed project or action and its net effects. The executive summary shall focus on:

(a) The existing problem;

(b) A brief description of each alternative evaluated (including the preferred and no action alternatives) along with a listing of the environmental impacts, possible mitigation measures relating to each alternative, and any areas of controversy (including issues raised by governmental agencies and the public); and

(c) Any major conclusions.

A comprehensive summary may be prepared in instances where the EIS is unusually long in nature. In accordance with 40 CFR 1502.19, the comprehensive summary may be circulated in lieu of the EIS; however, both documents shall be distributed to any Federal, State and local agencies who have EIS review responsibilites and also shall be made available to other interested parties with request.

§ 6.204 Body of EIS.

(a) *Purpose and need.* The EIS shall clearly specify the underlying purpose and need to which EPA is responding. If the action is a request for a permit or a grant, the EIS shall clearly specify the goals and objectives of the applicant.

(b) *Alternatives including the proposed action.* In addition to 40 CFR 1502.14, the EIS shall include:

(1) *Alternatives considered by the applicant.* This section shall include a *balanced* description of each alternative considered by the applicant. These discussions shall include size and location of facilities, land requirements, operation and maintenance requirements, auxiliary structures such as pipelines or transmission lines, and construction schedules. The alternative of no action shall be discussed and the applicant's preferred alternative(s) shall be identified. For alternatives which were eliminated from detailed study, a brief discussion of the reasons for their having been eliminated shall be included.

(2) *Alternatives available to EPA.* EPA alternatives to be discussed shall include: (i) Taking an action; (ii) taking an action on a modified or alternative project; and (iii) denying the action.

(3) *Alternatives available to other permitting agencies.* When preparing a joint EIS, and if applicable, the alternatives available to other Federal and/or State agencies shall be discussed.

(4) *Other alternatives.* Description of additional reasonable alternatives not within the jurisdiction of the lead agency or any cooperating agency shall be discussed.

(c) *Environmental consequences of the alternatives on the affected environment.* The affected environment on which the evaluation of each alternative shall be based includes for example hydrology, geology, air quality, noise, biology, socioeconomics, energy, land use, and archeology/history. These subject matters shall be adapted to analyze each alternative within a project area. The discussion shall be structured so as to present the impacts of each alternative under each subject heading for easy comparison by the reader. The "no action" alternative should be described first so that the reader may relate the other alternatives to beneficial and adverse impacts related to the applicant doing nothing. Description of environmental setting for the purpose of necessary background shall be included in this discussion of the impacts of the "no action" alternative. The amount of detail in describing the affected environment shall be commensurate with the complexity of the situation and the importance of the anticipated impacts.

(d) *Coordination.* The EIS shall include:

(1) The objections and suggestions made by local, State, and Federal agencies before and during the EIS review process must be given full consideration, along with the issues of public concern expressed by individual citizens and interested environmental groups. The EIS must include discussions of any such comments concerning our actions, and the author of each comment should be identified. If a comment has resulted in a change in the project or the EIS, the EIS should explain the reason.

(2) Public participation through public hearings or scoping meetings shall also be included. If a hearing has been held prior to the publication of the EIS, a summary of the transcript should be included in this section. If one is to be held after the publication of the draft EIS, the date, time, place, and purpose shall be included here. Finally, if no public hearing will be held at any time, it shall be noted.

(3) In the final EIS, a summary of the coordination process, and EPA responses to comments on the draft EIS shall be included.

6.205 Incorporation by reference.

In addition to 40 CFR 1502.21, material incorporated into an EIS by reference shall be organized to the extent possible into a Supplemental Information Document and be made available for review upon request.

Subpart C—Coordination With Other Environmental Review and Consultation Requirements

§ 6.300 General.

Various Federal laws and executive orders protect specific environmental concerns. This subpart presents the central requirements of these laws and executive orders. It refers to the pertinent authority and regulatons or guidance that contain the procedures. These laws and executive orders establish review procedures independent of NEPA requirements. However, the responsible official shall coordinate to the greatest practicable extent the applicable procedures in this subpart during the implementation of the environmental review process.

§ 6.301 Historical and archeological sites.

EPA is subject to the requirements of the National Historic Preservation Act of 1966, as amended, 16 U.S.C. 470 *et seq.*, the Archeological and Historic Preservation Act of 1974, 16 U.S.C. 469 *et seq.*, and Executive Order 11593, entitled "Protection and Enhancement of the Cultural Environment." These provisions and regulations establish review procedures independent of NEPA requirements.

(a) Under section 106 of the National Historic Preservation Act and Executive Order 11593, if an EPA undertaking affects any property with historic, architectural, archeological or cultural value that is listed on or eligible for listing on the National Register of Historic Places, the responsible official shall comply with the procedures for consultation and comment promulgated by the Advisory Council on Historic Preservation in 36 CFR Part 800. The responsible official must identify properties affected by the undertaking that are potentially eligible for listing on the National Register and shall request a determination of eligibility from the Keeper of the National Register, Department of the Interior, under the procedures in 36 CFR Part 63.

(b) Under the Archeological and Historic Preservation Act, if an EPA activity may cause irreparable loss or destruction of significant scientific, prehistoric, historic or archeological data, the responsible official or the Secretary of the Interior is authorized to undertake data recovery and preservation activities. Applicable procedures are found in 36 CFR Parts 64 and 66.

§ 6.302 Wetlands, floodplains, agricultural lands, coastal zones, wild and scenic rivers, fish and wildlife and endangered species.

The following procedures shall apply to EPA administrative actions in programs to which the pertinent statute or executive order applies.

(a) *Wetlands protection.* Executive Order 11990, Protection of Wetlands, requires Federal agencies conducting certain activities to avoid, to the extent possible, the adverse impacts associated with the destruction or loss of wetlands and to avoid support of new construction in wetlands if a practicable alternative exists. EPA's Statement of Procedures on Floodplain Management and Wetlands Protection (January 5, 1979) requires EPA programs to determine if proposed actions will be in or will affect wetlands. If so, the responsible official shall prepare a floodplains/wetlands assessment, which will be part of the environmental assessment or environmental impact statement. The responsible official shall either avoid adverse impacts or minimize them if no practicable alternative to the action exists.

(b) *Floodplain management.* Executive Order 11988, Floodplain Management, requires Federal agencies to evaluate the potential effects of actions they may take in a floodplain to avoid, to the extent possible, adverse effects associated with direct and indirect development of a floodplain. EPA's Statement of Procedures on Floodplain Management and Wetlands Protection (January 5, 1979), requires EPA programs to determine whether an action will be located in or will affect a floodplain. If so, the responsible official shall prepare a floodplain/wetlands assessment. The assessment will become part of the environmental assessment or environmental impact statement. The responsible official shall either avoid adverse impacts or minimize them if no practicable alternative exists.

(c) *Agricultural lands.* It is EPA's policy to consider the protection of the Nation's environmentally significant agricultural lands from irreversible conversion to uses which result in its loss as an environmental or essential food production resource. Before undertaking an action, the responsible official shall determine whether there are significant agricultural lands in the planning area. If significant agricultural lands are identified, direct and indirect effects of the undertaking on the land shall be evaluated and adverse effects avoided or mitigated, to the extent possible, in accordance with EPA's Policy to Protect Environmentally Significant Agricultural Lands (September 8, 1978).

(d) *Coastal Zone Management.* The Coastal Zone Management Act, 16 U.S.C. 1451 *et seq.*, requires that all Federal activities in coastal areas be consistent with approved State Coastal Zone Management Programs, to the maximum extent possible. If an EPA action may affect a coastal zone area, the responsible official shall assess the impact of the action on the coastal zone. If the action significantly affects the coastal zone area and the State has an approved coastal zone management program, a consistency determination shall be sought in accordance with procedures promulgated by the Office of Coastal Zone Management in 15 CFR 930.

(e) *Wild and Scenic Rivers.* Under the Wild and Scenic Rivers Act, 16 U.S.C. 1274 *et seq.*, a Federal agency may not assist, through grant, loan, license or otherwise, the construction of a water resources project that would have a direct and adverse effect on rivers designated as wild and scenic under Section 3 of the Act or those designated as having potential for inclusion under Section 5 of the Act. The responsible official shall determine whether there are any designated rivers in the planning area. If so, the responsible official shall consult with the Department of Interior or Department of Agriculture to determine whether the action has a direct and adverse impact on a river or river segment. If the action has a direct and adverse impact, the impact shall be avoided. No action may be taken if the adverse effect cannot be avoided. Applicable consultation procedures are found in Section 7 of the Act.

(f) *Fish and Wildlife Protection.* The Fish and Wildlife Coordination Act, 16 U.S.C. 661 *et seq.*, requires federal agencies involved in actions that will result in the control or structural modification of any natural stream or body of water for any purpose, to take action to protect the fish and wildlife resources which may be affected by the action. The responsible official shall consult with the Fish and Wildlife Service and the appropriate State agency to ascertain the means and measures necessary to mitigate, prevent and compensate for project-related losses of wildlife resources and to enhance the resources. Reports and recommendations of wildlife agencies should be incorporated into the environmental assessment or environmental impact statement. Consultation procedures are detailed in 16 U.S.C. 662.

(g) *Endangered Species Protection.* Under the Endangered Species Act, 16 U.S.C. 1531 *et seq.*, Federal agencies are prohibited from jeopardizing threatened or endangered species or adversely modifying habitats essential to their survival. The responsible official shall identify all designated endangered or threatened species or their habitat that may be affected by an EPA action. If listed species or their habitat may be affected, formal consultation must be undertaken with the Fish and Wildlife Service or the National Marine Fisheries Service, as appropriate. If the consultation reveals that the EPA activity will adversely affect a listed species or habitat, mitigation measures must be undertaken. Applicable consultation procedures are found in 50 CFR 402.

§ 6.303 Air Quality.

(a) The Clean Air Act, as amended in 1977, 42 U.S.C. 7476(c), requires all Federal projects, licenses, permits, plans, and financial assistance activities to conform to any State Air Quality Implementation Plan (SIP) approved or promulgated under section 110 of the Act. For proposed EPA actions that may significantly affect air quality, the responsible official shall assess the extent of the direct or indirect increases in emissions and the resultant change in air quality.

(b) If the action has a significant direct or indirect adverse impact on air quality, the responsible official shall consult with the State or local agency or agencies, designated by the Governor as having the lead responsibility for SIP development and implementation, to ascertain the conformity of the action to the SIP, including compliance with all applicable emission limitations or standards. The determination of conformity by the responsible official shall certify that the growth of direct and indirect emissions is allowable as a component of the SIP's emission growth increment for areas where national ambient air quality standards have not been attained; or if a case-by-case offset approach is included in the SIP for such areas, that any necessary offsets have been obtained; and that the EPA action complies with all other provisions and requirements of the SIP, whether for attainment or nonattainment areas.

(c) The responsible official shall submit the conformity determination to the designated lead State or local agency for its concurrence. The action shall not be approved by the responsible official if the designated lead State or local agency does not concur with the conformity determination until all objections have been resolved. Lack of response from the designated lead State or local agency within 45 days of the request for a conformity concurrence will be interpreted by the Responsible official to mean that the lead agency concurs with the conformity determination. No action may be taken if it is determined by the responsible official that such action would not be in conformity with an approved SIP.

Subpart D—Public and Other Federal Agency Involvement

§ 6.400 Initial public involvement.

(a) *General.* EPA shall make diligent efforts to involve the public in the environmental review process consistent with program regulations and EPA policies on public participation. The responsible official shall ensure that public notice is provided for, in accordance with, 40 CFR 1506.6(b) and shall ensure that public involvement is carried out in accordance with EPA Public Participation Regulations, 40 CFR Part 25, and other applicable EPA public participation procedures.

(b) *Publication of notices of intent.* As soon as practicable after its decision to prepare an EIS and before the scoping process, the responsible official shall send the notice of intent to interested and affected members of the public and shall request the OER to publish the notice of intent in the **Federal Register.** The scoping process should be initiated as soon as practicable in accordance with the requirements of 40 CFR 1501.7. Participants in the scoping process shall be kept informed of substantial changes which evolve during the EIS drafting process.

(c) *Public meetings or hearings.* Public meetings or hearings shall be conducted consistent with Agency program requirements. There shall be a presumption that a scoping meeting will be conducted whenever a notice of intent has been published. The responsible official shall consider holding a public hearing on a draft EIS especially when a hearing may facilitate the resolution of conflicts or significant public controversy.

(d) *Findings of no significant impact.* The responsible official shall allow for sufficient public review of a FNSI before it becomes final. The FNSI and attendant publication must state that interested persons disagreeing with the decision may submit comments for consideration by EPA. EPA shall not take administrative action on the project for at least thirty (30) calendar days after release of the FNSI and may allow more time for response. The FNSI shall be made available to the public in accordance with the requirements of 40 CFR 1506.6.

§ 6.401 Official filing requirements.

(a) *General.* OER is responsible for the conduct of the official filing system for EISs. This system was established as a central repository for all EISs which serves not only as means of advising the public of the availability of each EIS but provides a uniform method for the computation of minimum time periods for the review of EISs. OER publishes a weekly notice in the **Federal Register** listing all EISs received during a given week. The 45 day and 30 day review periods for draft and final EISs, respectively, are computed from the Friday following a given reporting week. Pursuant to 40 CFR section 1506.9, responsible officials shall comply with the guidelines established by OER on the conduct of the filing system.

(b) *Minimum time periods.* No decision on EPA actions shall be made until the later of the following dates:

(1) Ninety (90) days after the date established in § 6.401(a) above from which the draft EIS review time period is computed.

(2) Thirty (30) days after the date established in § 6.401(a) above from which the final EIS review time period is computed.

(c) *Filing of EISs.* All EISs, including supplements, must be officially filed with OER. Responsible officials shall transmit each EIS in five (5) copies to the Director, Office of Environmental Review, EIS Filing Section (A–104). OER will provide CEQ with one copy of each EIS filed. No EIS will be officially filed by OER unless assurances have been made that the EIS has been made available to the public. OER will not accept unbound copies of EISs for filing.

(d) *Extensions or waivers.* The responsible official may independently extend review periods. In such cases, the responsible official shall notify OER as soon as possible so that adequate notice may be publised in the weekly **Federal Register** report. OER upon a showing of compelling reasons of national policy may reduce the prescribed review periods. Also, OER upon a showing by any other Federal agency of compelling reasons of national policy may extend prescribed review periods, but only after consultation with the responsible official. If the responsible official does not concur with the extension of time, OER may not extend a prescribed review period more than 30 days.

(e) *Recission of filed EISs.* The responsible official shall file EISs with

OER no later than they are transmitted to commenting agencies and made available to the public. The responsible official is required to reproduce an adequate supply of EISs to satisfy these distribution requirements prior to filing an EIS. If the EIS is not made available, OER will consider retraction of the EIS or revision of the prescribed review periods based on the circumstances.

§ 6.402 Availability of documents.

(a) *General.* The responsible official will ensure sufficient copies of the EIS are distributed to interested and affected members of the public and are made available for further public distribution. EISs, comments received, and any underlying documents should be available to the public pursuant to the provisions of the Freedom of Information Act (5 U.S.C. 552(b)), without regard to the exclusion for interagency memoranda where such memoranda transmit comments of Federal agencies on the environmental impact of the proposed actions. To the extent practicable, materials made available to the public shall be provided without charge; otherwise, a fee may be imposed which is not more than the actual cost of reproducing copies required to be sent to another Federal agency.

(b) *Public information.* Lists of all notices of intent, EISs, and FNSIs prepared by EPA shall be maintained by OER for the public. Each responsible official will maintain a similar monthly status report for all environmental documents prepared. In addition, OER will make available for public inspection copies of EPA EISs; the responsible official shall do the same for any prepared EIS.

§ 6.403 The commenting process.

(a) *Inviting comments.* After preparing a draft EIS and before preparing a final EIS, the responsible official shall obtain the comments of Federal agencies, other governmental entities and the public in accordance with 40 CFR 1503.1. If the OER determines that a draft EIS is so inadequate as to preclude meaningful analysis, the responsible official shall prepare and circulate a revised draft of the appropriate portion.

(b) *Response to comments.* The responsible official shall respond to comments in the final EIS in accordance with 40 CFR 1503.4.

§ 6.404 Supplements.

(a) *General.* The responsible official shall consider preparing supplements to draft and final EISs in accordance with 40 CFR 1502.9(c). A supplement shall be prepared, circulated and filed in the same fashion (exclusive of scoping) as draft and final EISs.

(b) *Alternative procedures.* In the case where the responsible official wants to deviate from existing procedures, OER shall be consulted. OER shall consult with CEQ on any alternative arrangements.

Subpart E—Environmental Review Procedures for Wastewater Treatment Construction Grants Program

§ 6.500 Purpose.

This subpart amplifies the procedures described in Subparts A through D with detailed environmental review procedures for the wastewater treatment works construction grants program under Title II of the Clean Water Act.

§ 6.501 Definitions.

(a) "Step 1 grant" means a project for preparation of a facilities plan as described in 40 CFR 35.930–1.

(b) "Step 2 grant" means a project for preparation of construction drawings and specifications as described in 40 CFR 35.930–1.

(c) "Step 3 grant" means a project for erection and building of a publicly owned treatment works as described in 40 CFR 35.930–1.

(d) "Step 2 plus Step 3 grant" means a project which combines the grants set forth in § 6.501 (b) and (c) above.

§ 6.502 Applicability

(a) *Administrative actions covered.* This subpart applies to the administrative actions listed below (except as provided in § 6.502(c) below):

(1) Approval of a facilities plan; and

(2) Award of grant assistance for a project involving step 2 or step 3 when the responsible official determines that significant change has occurred in the project or its impact from that described in the facilities plan.

(b) *Administrative actions excluded.* The actions listed below are not subject to the requirements of this subpart:

(1) Approval of State priority lists;

(2) Award of a step 1 grant;

(3) Approval or award of a section 206 planning grant;

(4) Award of grant assistance for a step 2 or step 3 project unless the responsible official determines that significant change has occurred in the project or its impact from that described in the facilities plan;

(5) Approval of issuing an invitation for bids or awarding a construction contract;

(6) Actual physical commencement of building or erection;

(7) Award of a section 206 grant for reimbursement;

(8) Award of a grant increases unless the responsible official determines that significant change has occurred in a project or its impact as described in the approved facilities plan; and

(9) Awards of training assistance under section 109(b) the Clean Water Act;

(10) Approval of an ICR system or user charge system.

(c) *Consultation during the environmental review process.* When there are overriding considerations of cost or impaired program effectiveness, the responsible official may award a step 2 or step 3 grant for a discrete segment of the project plans or construction before the environmental review is completed. The project segment must be noncontroversial, necessary to correct water quality or other immediate environmental problems and cannot, by its completion, foreclose any options being considered in the environmental review. The remaining portion of the project shall be evaluated to determine if an EIS is required. In applying the criteria for this determination, the entire project shall be considered, including those parts permitted to proceed. In no case may these types of grant assistance for step 2 or step 3 projects be awarded unless both the OER and CEQ have been consulted, a FNSI has been issued on the segments permitted to proceed at least 30 days prior to grant award, and the grant award contains a specific agreement prohibiting action on the segment of planning or construction for which the environmental review is not complete. The responsible official will consult with OER, who will consult with CEQ.

§ 6.503 Public participation.

(a) *General.* It is EPA policy that optimum public participation be achieved during the environmental review process as deemed appropriate by the responsible official under 40 CFR Part 25 and implementing provisions of Part 35, Subpart E of this Chapter. Compliance with Part 25 and implementing provisions constitutes compliance with public participation requirements under this part.

(b) *Full-scale public participation.* In accordance with 40 CFR 35.917–5, the responsible official shall assure that a full-scale public participation program shall be undertaken where EPA prepares or requires the preparation of

an EIS during the facility planning process.

(c) Public participation activities undertaken in connection with the environmental review process should be coordinated with the facility planning public participation program wherever possible.

(d) The responsible official may institute such additional NEPA-related public participation procedures as he deems necessary during the environmental review process.

§ 6.504 Limitations on actions during environmental review process.

No administrative action under § 6.502(a) shall be taken until the environmental review process has been completed except as provided under § 6.502(c) above. The responsible official shall ensure compliance in accordance with 40 CFR 1506.1 and subparts A, C, and D of this regulation, and all policies, guidance and regulations adopted to implement the regulations of the Clean Air Act under 42 U.S.C. 7616.

§ 6.505 Criteria for preparing EISs.

The responsible official shall assure that an EIS will be issued when he determines that any of the following conditions exists:

(a) The treatment works will induce significant changes (either absolute changes or increases in the rate of change) in industrial, commercial, agricultural, or residential land use concentrations or distributions. Factors that should be considered in determining if these changes are significant include but are not limited to: the vacant land subject to increased development pressure as a result of the treatment works; the increases in population which may be induced; the faster rate of change of population; changes in population density; the potential for overloading sewage treatment works; the extent to which landowners may benefit from the areas subject to increased development; the nature of land use regulations in the affected area and their potential effects on development; and deleterious changes in the availability or demand for energy.

(b) Where the treatment works or collector system will have significant adverse effects on wetlands, including indirect effects, or any major part of the treatment works will be located on wetlands.

(c) Where the treatment works or collector system will significantly affect the habitat of wildlife on the Department of Interior's or a State's threatened and endangered species lists, or the treatment works will be located on the habitat.

(d) Implementation of the treatment works or plan may directly cause or induce changes that significantly:

(1) Displace population;

(2) Deface an existing residential area;

(3) Adversely affect a floodplain; or

(4) Adversely affect significant amounts of prime or unique agricultural land, or agricultural operations on this land as defined in EPA's Policy to Protect Environmentally Significant Agricultural Land.

(e) The treatment works will have significant adverse effects on parklands, other public lands or areas of recognized scenic, recreational, archaeological, or historic value.

(f) The treatment works may directly or through induced development have a significant adverse effect upon local ambient air quality, local ambient noise levels, surface or groundwater quality or quantity, fish, wildlife, and their natural habitats.

(g) The treated effluent is being discharged into a body of water where the present classification is too lenient or is being challenged as too low to protect present or recent uses, and the effluent will not be of sufficient quality to meet the requirements of these uses.

(h) The environmental impact of the treatment works is likely to be highly controversial.

When full-scale public participation is required under 40 CFR 35.917–5(c), the responsible official shall consider preparing an EIS.

§ 6.506 Environmental review process.

Consistent with 40 CFR 1501.2, EPA shall integrate the environmental review process throughout the construction grants program facilities planning process (Step 1). Critical decisionmaking points and the scope of review recommended include:

(a) *Award of a facilities planning grant (Step 1).* Prior to award of Step 1 assistance, or within no more than 30 days thereafter, EPA may review, or request that the State review, if the program is delegated under section 205(g) of the Clean Water Act, the existence of environmentally sensitive areas in the facilities planning area. This review is intended to be brief and concise, drawing on existing information and knowledge of EPA, State agencies, regional planning agencies, areawide water quality management agencies, and grantees. This review may be used to determine the scope of the environmental information document prepared by the grantee. It may also be used to make an early determination of the need for an EIS. Whenever possible, this initial review should be discussed at the first conference held with the potential grantee.

(b) *Mid-course reviews.* A review of environmental information developed by the grantee should be conducted whenever meetings are held to assess the progress of facilities plan development. These meetings should ideally be held after completion of the majority of the environmental information document, but before a final alternative is selected. When the program is delegated, the State shall forward to EPA the required environmental information documents as early as possible to enable EPA to make decisions with respect to the need for an EIS. Although the decision whether to prepare an EIS must be made before a facilities plan can be approved, a decision to prepare an EIS is encouraged earlier during the facilities planning process. Following any mid-course review meeting, EPA should inform interested parties as to the following:

(1) The preliminary nature of the agency's position on preparing an EIS;

(2) The relationship between the facilities planning and environment review processes;

(3) The desirability of further public input; and

(4) A contact person for further information.

(c) *Review of completed facilities plan.* EPA, or the State, when the program is delegated, shall review any completed facilities plan with particular attention to the environmental information document and its utilization in the development of alternatives and the selection of a final alternative. An adequate environmental information document must be an integral part of any facilities plan submitted to EPA or to a State. For those States where the review of facilities plans has been delegated, State personnel will be required to prepare a preliminary environmental assessment which serves as an adequate basis for EPA's decision to issue a FNSI or an EIS. The environmental assessment shall cover all potentially significant environmental impacts and related factors. Each of the following subjects shall be critically reviewed to identify potentially significant environmental concerns to be addressed in the environmental assessment:

(1) *Description of the existing environment.* For the delineated facilities planning area, the existing environmental conditions relevant to the analysis of alternatives or

determinations of the environmental impacts (especially indirect) of the proposed action shall be considered. The description may include those environmental factors potentially affected by the alternatives under consideration, such as: surface and groundwater quality; water supply and use; general hydrology; air quality; noise levels, energy production and consumption; land use trends; population projections; wetlands, floodplains, coastal zones and other environmentally sensitive areas; historic and archaeological sites; other related Federal or State projects in the area; plant and animal communities which may be affected, especially those containing threatened or endangered species.

(2) *Description of the future environment without the project.* The relevant future environmental conditions shall be described. The no action alternative must be adequately evaluated.

(3) *Purpose and need.* This should include a summary discussion and demonstration of the need for wastewater treatment in the facilities planning area, with particular emphasis on existing public health or water quality problems and their severity and extent.

(4) *Documentation.* Sources of information used to describe the existing environment and to assess future environmental impacts should be clearly referenced. These sources should include regional, State and Federal agencies with responsibility or interest in the types of impacts listed in section 6.505(a)(1) above and in subpart C.

(5) *Evaluation of alternatives.* This discussion shall include a comparative analysis of feasible alternatives (including the no action alternative) throughout the study area. The alternatives shall be screened with respect to capital and operating costs; significant direct and indirect environmental effects; physical, legal or institutional constraints; and compliance with regulatory requirements. Special attention should be given to long term impacts, irreversible impacts and induced impacts such as development. The reasons for rejecting any alternatives shall be presented in addition to any significant environmental benefits precluded by rejection of an alternative. The analysis should consider, when relevant to the project:

(i) Flow and waste reduction measures, including infiltration/inflow reduction;

(ii) Appropriate water conservation measures;

(iii) Alternative locations, capacities, and construction phasing of facilities;

(iv) Alternative waste management techniques, including treatment and discharge, wastewater reuse, land application, and individual systems;

(v) Alternative methods for management of sludge, other residual materials, including utilitization options such as land application, composting, and conversion of sludge for marketing as a soil conditioner or fertilizer.

(vi) Improving effluent quality through more efficient operation and maintenance;

(vii) Appropriate energy reduction measures;

(viii) Multiple use, including recreation and education.

(6) *Environmental consequences.* Relevant direct and indirect impacts of the proposed action shall be considered, giving special attention to unavoidable impacts, steps to mitigate adverse impacts, any irreversible or irretrievable commitments of resources to the project and the relationship between local short term uses of the environment and the maintenance and enhancement of long term productivity. The significance of land use impacts shall be considered, based on the analysis required under Appendix A to 40 CFR Part 35, Subpart E. Any specific land use controls (including grant conditions and areawide waste treatment management plan requirements) should be identified and referenced. In addition to these items, the responsible official may require that other analyses and data, which are needed to satisfy environmental review requirements, be included with the facilities plan. Such requirements should be discussed during initial conference with potential grantees or mid-course review meetings. The responsible official also may require submission of supplementary information either before or after award of grant assistance for a step 2 project or before a step 3 project if needed for compliance with environmental review requirements. Requests for supplementary information shall be made in writing.

(7) *Steps to minimize adverse effects.* (i) This section shall describe structural and nonstructural measures, if any, in the facilities plan, or additional measures identified during the review, to mitigate or eliminate significant adverse effects on the human and natural environments. Structural provisions include changes in facility design, size, and location; non-structural provisions include staging facilities as well as developing and enforcing land use regulations and environmental protection regulations.

(ii) The responsible official may not award step 2 or step 3 grant assistance if the grantee has not made, or agreed to make, pertinent changes in the project, in accordance with determinations made in a FNSI or EIS. He may condition a grant to ensure that the grantee will comply, or seek to obtain compliance, with such environmental review determinations. The conditions shall address secondary impacts to the extent deemed appropriate by the responsible official.

(d) *Environmental review.* The environmental review shall apply the criteria under § 6.505 above. If deficiencies exist in the environmental information document, the environmental assessment or other supporting documentation, they shall be identified in writing by EPA and must be corrected before the determination whether an EIS is required can be made and the plan approved. This review shall be conducted by the responsible official and based on any of the following:

(1) A complete facilities plan and environmental information document, whenever review of facilities plan has not been delegated;

(2) The grant applicant's environmental information document and the preliminary environmental assessment prepared by the State for a State which has been delegated authority for facilities plan review; or

(3) Other documentation, deemed necessary by the responsible official or submitted by a State with delegated review authority, adequate to make an EIS determination by EPA.

(e) *Finding of no significant impact.* If, after completion of the environmental review, a determination is made that an EIS will not be required, the responsible official shall prepare and distribute a FNSI in accordance with § 6.104 and Subpart D. The FNSI will be based on EPA's independent review and environmental assessment which will either be incorporated into or attached to the FNSI. Once a FNSI and environmental assessment have been prepared for the facilities plan for a certain area, grant awards may proceed without preparation of additional FNSIs, unless the responsible official has determined that the project has changed significantly from that described in the facilities plan.

(f) *Environmental assessment.* A decision not to prepare an EIS must be substantiated by an environmental assessment. It shall as a minimum be a

concise document which provides sufficient data and analysis for determining that the alternative proposed in the facilities plan will not have significant impacts upon the human environment.

(1) In the case where the responsible official reviews the complete facilities plan, the environmental assessment shall be prepared based on that review and the review of the environmental information document and any other data deemed appropriate.

(2) Where EPA has delegated review authority to a State, the EPA environmental assessment may be based on and reference either the State's environmental assessment or the other supporting documentation used by the responsible official.

(g) *Notice of intent.* If, after completion of the environmental review, or subsequent to any of the steps described in § 6.506 (a), (b), or (c) above, a determination is made that an EIS will be required, the responsible official shall prepare and distribute a Notice of Intent in accordance with § 6.104 and Subpart D.

(h) *Scoping.* As soon as possible, but not later than 30 days after the publication of the Notice of Intent, the responsible official will convene a meeting of affected Federal, State and local agencies, the grantee and other interested parties (e.g. Advisory Group members under 40 CFR 25.7) to determine the scope of the EIS. A notice of this scoping meeting will meet the requirements of subpart D. As part of the scoping meeting EPA will as a minimum:

(1) Determine the scope and the significant issues to be analyzed in depth in the EIS;

(2) Identify those issues which are not significant;

(3) Determine what information is needed from cooperating agencies or other parties;

(4) Discuss the method for EIS preparation and the public participation strategy;

(5) Identify consultation requirements of other environmental laws, in accordance with subpart C; and

(6) Determine the relationship between the EIS and the completion of the facilities plan and any necessary coordination arrangements between the preparers of both documents.

(i) *EIS Method.* EPA shall prepare the EIS by any one of the following means:

(1) Directly by its own staff;

(2) By contracting directly with a qualified consulting firm; or

(3) By utilizing a joint EIS process, whereby the grantee contracts directly with a qualified consulting firm. In this instance, the following selection requirements shall be fulfilled:

(i) A Memorandum of Understanding shall be developed between EPA, the grantee, and where possible the State, outlining the responsibilities of each party and their relationship to the EIS consultant.

(ii) EPA shall approve evaluation criteria to be used in the consultant selection process.

(iii) EPA shall review and approve the selection process.

(iv) EPA shall approve the consultant selected for EIS preparation.

(v) The detailed Scope of Work prepared by the EIS consultant must be approved by EPA.

(vi) The EIS consultant shall execute a disclosure statement prepared by EPA indicating that the consultant has no financial or other interest in the outcome of the project.

(4) By adopting after independent evaluation by the responsible official a grantee's facilities plan and NEPA-related information to the extent that the facilities plan and NEPA-related information adequately address relevant environmental issues, when the responsible official determines under § 6.505 that an EIS should be issued. This procedure shall be utilized only when a decision to issue an EIS is made on the basis of the information obtained or circumstances arising after a grantee has substantially completed its facilities plan.

§ 6.507 Limits on delegation to States.

(a) *General.* In cases where the authority for facilities plan review has been delegated to the State under Section 205(g) of the Clean Water Act, EPA shall, as a minimum, retain the following responsibilities:

(1) The determination of whether or not to prepare an EIS shall be solely that of EPA. EPA may consider a State's recommendation, but the ultimate decision under NEPA shall not be delegated.

(2) Findings of No Significant Impact and the environmental assessment shall be approved, finalized and issued by EPA.

(3) Notices of Intent shall be prepared and issued by EPA.

(b) *Elimination of duplication.* The responsible official shall assure that maximum efforts are undertaken to minimize duplication within the limits described under §§ 6.506 and 6.507(a) above. In carrying out requirements under this subpart, maximum consideration should be given to eliminating duplication in accordance with 40 CFR section 1506.2, where there are State or local procedures comparable to NEPA, and entering into Memoranda of Understanding with a State concerning workload distribution and responsibilities for implementing the facilities planning process.

§ 6.508 Record of decision.

(a) *General.* When a final EIS has been issued, the responsible official shall prepare a record of decision in accordance with 40 CFR 1505.2 prior to the approval of the facilities plan.

(b) *Mitigation measures.* The record of decision shall include identification of mitigation measures derived from the EIS process. Prior to the award of step 1 or step 2 grant assistance, the responsible official must ensure that effective mitigation measures are implemented by the grantee. This may be done by revising the facilities plan, initiating other steps to mitigate adverse effects, or agreeing to conditions in grants requiring actions to minimize effects. Care should be exercised if a condition is to be imposed in a grant document to assure that the applicant possesses the authority to fulfill the conditions.

§ 6.509 Monitoring.

(a) *General.* The responsible official shall ensure there is adequate monitoring of mitigation measures and other grant conditions which are identified in the final EIS and record of decision.

(b) *Enforcement.* The responsible official may consider taking the following actions consistent with 40 CFR 35.965 if the applicant fails to comply with grant conditions:

(1) Terminating or annulling the grant;

(2) Disallowing project costs related to noncompliance;

(3) Withholding of project payments;

(4) Suspending work;

(5) Finding the grantee to be nonresponsible or ineligible for future Federal assistance or for approval for future contract awards under EPA grants;

(6) Seeking an injunction against the grantee; or

(7) Instituting such other administrative or judicial action as may be legally available and appropriate.

Subpart F—Environmental Review Procedures for the New Source NPDES Program

§ 6.600 Purpose.

(a) *General.* This subpart provides procedures for carrying out the environmental review process for the

issuance of new source National Pollutant Discharge Elimination System (NPDES) discharge permits authorized under section 306, section 402, and section 511(c)(1) of the Clean Water Act.

(b) *Permit regulations.* All references in this subpart to the "permit regulations" shall mean Parts 122, 124, and 125 of Title 40 of the Code of Federal Regulations relating to the NPDES program.

§ 6.601 Definitions.

(a) The term "administrative action" for the sake of this subpart means the issuance by EPA of an NPDES permit to discharge as a new source.

(b) the term "third party" defines a method for preparing both EPA s environmental impact statement and the permit applicant's environmental information document by using one contractor Through a memorandum of understanding, the responsible official and the new source applicant agree 1) that the responsible official will choose a contractor and manage the contract, 2) that the permit applicant will pay for the contract service and 3) that the document produced will serve as both the environmental information document and the environmental impact statement.

§ 6.602 Applicability.

(a) *General.* The procedures set forth under subparts A, B, C and D, and this subpart shall apply to the issuance of new source NPDES permits, except for the issuance of a new source NPDES permit from any State which has an approved NPDES program in accordance with section 402(b) of the Clean Water Act.

(b) *New source determination.* An NPDES permittee must be determined a "new source" before these procedures apply New source determinations will be undertaken pursuant to the provisions of the permit regulations under 40 CFR 122.479(a) and (b) and § 124.12.

§ 6.603 Limitations on actions during environmental review process.

(a) *General.* The processing and review of an applicant's NPDES permit application shall proceed concurrently with the procedures within this subpart. Further, no administrative action shall be taken by EPA until the environmental review process is completed and the responsible official has complied with subparts A, C, and D of this regulation.

(b) *Activities of permit applicant.* Consistent with the provisions of 40 CFR 1506.1 and 40 CFR 122.47(c), the responsible official shall ensure that the applicant does not undertake activity which has environmental impact or limits the choice of alternatives before the environmental review process is completed. If activities are begun, the responsible official shall promptly notify the applicant that EPA will take appropriate action to ensure the objectives and procedures of NEPA are achieved.

§ 6.604 Environmental review process.

(a) *New source.* If EPA s initial determination under § 6.604(b) is that the facility is a new source. the responsible official shall evaluate the environmental information to determine if any significant impacts are anticipated and whether an EIS is necessary If the permit applicant requests. the responsible official shall establish time limits for the completion of the environmental review process consistent with 40 CFR 1501.8.

(b) *Information needs.* If additional information is necessary for a proper environmental review this information shall be provided by the permit applicant in an environmental information document. The responsible official shall consult with the applicant to determine the scope of an environmental information document. In doing this the responsible official shall consider the size of the new source and the extent to which the applicant is capable of providing the required information. The responsible official shall not require the applicant to gather data or perform analyses which duplicate either existing data or the results of existing analyses available to EPA. The responsible official shall keep requests for data to the minimum consistent with his responsibilities under NEPA.

(c) *Environmental assessment.* The responsible official shall prepare a written environmental assessment based, on an environmental review of either the environmental information document or any other available environmental information.

(d) *EIS determination.* (1) When the environmental assessment indicates that a significant environmental impact may occur and that the significant adverse impacts cannot be eliminated by making changes in the proposed new source project, a notice of intent shall be issued, and a draft EIS prepared and distributed. When the environmental assessment indicates no significant impacts are anticipated or when the proposed project is changed to eliminate the significant adverse impacts, a FNSI shall be issued.

(2) The FNSI together with the environmental assessment that supports the finding shall be distributed in accordance with § 6.400(d) of this regulation.

(e) *Lead agency* (1) If the environmental review reveals that the preparation of an EIS is required, the responsible official shall determine if other Federal agencies are involved with the project The responsible official shall contact all other involved agencies and together the agencies shall decide the lead agency based on the criteria set for in the 40 CFR 1501.5.

(2) If. after the meeting of involved agencies. EPA has been determined to be the lead agency the responsible official may request that other involved agencies be cooperating agencies. Cooperating agencies shall be chosen and shall be involved in the EIS preparation process in the manner prescribed in the 40 CFR 1501.6(a). If EPA has been determined to be a cooperating agency the responsible official shall be involved in assisting in the preparation of the EIS in the manner prescribed in 40 CFR 1501.6(b).

(f) *Preparation of the EIS.* (1) If EPA is the lead agency for the preparation of an EIS, the responsible official shall arrange through OER for the publication of the Notice of Intent in the **Federal Register**, distribute both the Notice of Intent and the environmental assessment and arrange and conduct a scoping meeting as outlined in 40.CFR 1501.7.

(2) If the responsible official and the permit applicant agree to a third party method of EIS preparation, the responsible official shall insure that a Notice of Intent is published and that a scoping meeting is held before the third party contractor begins work which may influence the scope of the EIS.

(3) Draft and Final EISs may be developed by several methods including preparation of the EIS entirely by EPA personnel or utilization of consultant services either retained by the responsible official or retained through a third party agreement between the responsible official and the applicant.

(i) A third party agreement for the preparation of an EIS may be requested by either the applicant or responsible official. Such an agreement however shall not be initiated unless both the applicant and the responsible official have agreed to its creation. Generally a third party agreement will be established prior to the development of the applicant's environmental information document and serve the purposes of this document as well as the EIS. The responsible official shall select

the consultant and shall base such selection on the consultant's objectivity, financial dependance on the third party contract, ability, and absence of conflicting interest. Third party contractors will be required to execute a disclosure statement prepared by the responsible official signifying that they have no financial or other interest in the outcome of the project.

(ii) In all cases when a third party agreement is used to prepare an EIS, the responsible official shall specify the information to be developed and shall supervise the gathering, analysis, and presentation of the information. The responsible official shall restrict requests for information from the applicant to the miminum consistent with his responsibilities under NEPA and shall insure that the applicant has sufficient opportunity to review all material prior to publication.

(4) The responsible official ensure that the final EIS and supplements thereto are introduced into the formal administrative record for any evidentiary hearing conducted relative to a permit application.

§ 6.605 Criteria for preparing EISs.

(a) *General guidelines.* (1) When determining the significance of a proposed new source's impact, the responsible official shall consider both its short term and long term effects as well as its direct and indirect effects and beneficial and adverse environmental impacts as defined in 40 CFR 1508.8.

(2) If EPA is proposing to issue a number of new source NPDES permits during a limited time span and in the same general geographic area, the responsible official shall examine the possibility of tiering EISs. If the permits are minor and environmentally insignificant when considered separately, the responsible official may determine that the cumulative impact of the issuance of all these permits may have a significant environmental effect and require an EIS for the area. Each separate decision to issue an NPDES permit shall then be based on the information in this areawide EIS.

(b) *Specific criteria.* An EIS will be prepared when:

(1) The new source will induce or accelerate significant changes in industrial, commercial, agricultural, or residential land use concentrations or distributions which have the potential for significant environmental effects. Factors that should be considered in determining if these changes are environmentally significant include but are not limited to: The nature and extent of the vacant land subject to increased development pressure as a result of the new source; the increases in population or population density which may be induced and the ramifications of such changes; the nature of land use regulations in the affected area and their potential effects on develoment and the environment; and the changes in the availability or demand for energy and the resulting environmental consequences.

(2) The new source will directly, or through induced development, have significant adverse effect upon local ambient air quality, local ambient noise levels, floodplains, surface or groundwater quality or quantity, fish, wildlife, and their natural habitats.

(3) Any major part of the new source will have significant adverse effect on the habitat of threatened or endangered species on the Department of Interior's lists of threatened and endangered species.

(4) The environmental impact of the issuance of a new source NPDES permit is likely to be highly controversial.

(5) The environmental impact of the issuance of a new source NPDES permit will have significant direct and adverse effect on a property listed in or eligible for listing in the National Register of Historic Places.

(6) Any major part of the source will have significant adverse effects on parklands, wetlands, wild and scenic rivers, reservoirs or other important bodies of water, navigation projects, or agricultural lands.

§ 6.606 Record of decision.

At the time of permit award, the responsible official shall prepare a record of decision in those cases where a final EIS was issued in accordance with 40 CFR section 1505.2 and pursuant to the provisions of the permit regulations under 40 CFR 124.61 and 124.122.

§ 6.607 Monitoring.

In accordance with 40 CFR 1505.3 and pursuant to 40 CFR 122.47(c) and 122.17 a permit applicant will sign a legally binding written agreement which requires compliance with all EIS-related requirements before construction begins and shall periodically report on the progress of any compliance actions, required by the EIS, which must extend beyond the effective date of the permit.

Subpart G—Environmental Review Procedures for Research and Development Programs

§ 6.700 Purpose.

This subpart amplifies the requirements decribed in subparts A through D by providing more specific environmental review procedures on research and development programs undertaken by the Office of Research and Development (ORD).

§ 6.701 Definitions.

The term "appropriate program official" means the official at each decision level within ORD to whom the Assistant Administrator has delegated responsibility for carrying out the environmental review process.

§ 6.702 Applicability.

The requirements of this subpart apply to administrative actions undertaken to approve intramural and extramural programs under the purview of ORD.

§ 6.703 Criteria for preparing EISs.

(a) An EIS shall be prepared by the appropriate program official when:

(1) The action will have significant adverse impacts on public parks, wetlands, floodplains, coastal zones, agricultural lands, wildlife habitats, or areas of recognized scenic or recreational value.

(2) The action will significantly deface an existing residential area.

(3) The action may directly or through induced development have a significant adverse effect upon local ambient air quality, local ambient noise levels, surface or groundwater quality and fish, wildlife or their natural habitats.

(4) The project consists of field tests involving the introduction of significant quantities of toxic or polluting agricultural chemicals, animal wastes, pesticides, radioactive materials, or other hazardous substances into the environment by ORD, its grantees or its contractors.

(5) The action involve the introduction of species or subspecies not indigenous to an area.

(6) There is a high probability of an action ultimately being implemented on a large scale, and this implementation may result in significant environmental impacts.

(7) The project involves commitment to a new technology which is significant and may restrict future viable alternatives.

(b) An EIS will not usually be needed when:

(1) The project is conducted completely within any laboratory or other facility, and external environmental effects have been minimized by methods for disposal of laboratory wastes and safeguards to prevent hazardous materials entering the environment accidentally; or

(2) The project is a relatively small experiment or investigation that is part of a non-Federally funded activity of the private sector, and it makes no significant new or additional contribution to existing pollution.

§ 6.704 Environmental review process.

Environmental review activities will be integrated into the decision levels of ORD's research planning system to assure managerial control.

(a) *Environmental information.* (1) Environmental information documents shall be submitted with all grant applications and all unsolicited contract proposals. The documents shall contain the same information required for EISs under Subpart B. Guidance on environmental information documents shall be included in all grant application kits and attached to instructions for the submission of unsolicited proposals.

(2) In the case of competitive contracts, environmental information documents need not be submitted by potential contractors since the environmental review procedures must be completed before a request for proposal (RFP) is issued. If there is a question concerning the need for an environmental information document the potential contractor should contact the official responsible for the contract.

(b) *Environmental review.*

(1) At the start of planning year, an environmental review will be performed for each program plan with its supporting substructures (work plans and projects) before incorporating them into the ORD program planning system, unless they are excluded from review by existing legislation. This review is an evaluation of the potentially adverse environmental effects of the efforts required by the program plan. The criteria in § 6.703 above shall be used in conducting this review. Each program plan with its supporting substructures which does not have significant adverse impacts may be dismissed from further current year environmental considerations with a single FNSI. Any supporting substructures of a program plan which cannot be dismissed with the parent plan shall be reviewed at the appropriate subordinate levels of the planning system.

(i) All continuing program plans and supporting substructures, including those previously dismissed from consideration, will be reevaluated annually. An environmental review will coincide with the annual planning cycle and whenever a major redirection of a parent plan is undertaken. All environmental documents will be updated as appropriate.

(ii) Later plans and/or projects, added to fulfill the mission objectives but not identified at the time program plans were approved, will be subjected to the same environmental review.

(2) The responsible official shall complete the EPA Form 5300–23 for each extramural project subject to an environmental review. For projects where the impact is virtually nonexistent, e.g. literature studies, computer studies, studies in which essentially all work is performed within the confines of the laboratory, completion of the Form 5300–23 constitutes a finding of no significant impact.

(c) *Notice of intent and EIS.* (1) If the reviews conducted according to § 6.704(b) above reveal a potential significant adverse effect on the environment and the adverse impact cannot be eliminated by replanning, the appropriate program official, shall issue a notice of intent and through proper organizational channels, shall request the Regional Administrator to assist him in the preparation and distribution of the EIS.

(2) As soon as possible after release of the notice of intent, the appropriate program official shall prepare a draft EIS in accordance with Subpart B and distribute the draft EIS in accordance with Subpart D.

(3) All draft and final EISs shall be sent through the proper organizational channels to the Assistant Administrator for ORD for approval.

(d) *Finding of no significant impact.* If an environmental review conducted according to § 6.704(b) above reveals that proposed actions will not have significant adverse environmental impacts, the appropriate program official shall prepare a FNSI.

(e) *Timing of action.* Pursuant to § 6.401(b), in no case shall a contract be awarded or intramural activity undertaken until the prescribed 30 day review period for a final EIS has elapsed. Similarly, no action shall be taken until the 30 day comment period for a FNSI is completed.

§ 6.705 Record of decision.

The responsible official shall prepare a record of decision in any case where final EIS has been issued in accordance with 40 CFR 1505.2. It shall be prepared at the time of contract or grant award or before the undertaking of the intramural activity.

Subpart H—Environmental Review Procedures for Solid Waste Demonstration Projects

§ 6.800 Purpose.

This subpart amplifies the procedures described in subparts A through D by providing more specific environmental review procedures for demonstration projects undertaken by the Office of Solid Waste (OSW).

§ 6.801 Applicability.

The requirements of this subpart apply to solid waste demonstration projects for resource recovery systems and improved solid waste disposal facilities undertaken pursuant to section 8006 of the Resource Conservation and Recovery Act of 1976.

§ 6.802 Criteria for preparing EISs.

The following criteria shall be used when reviewing a proposed EPA action to determine whether an EIS is required:

(a) *Significant environmental effects.* (1) An action with both beneficial and detrimental effects should be classified as having significant effects on the environment, even if EPA believes that the net effect will be beneficial. However, preference should be given to preparing EISs on proposed actions which, on balance, have adverse effects.

(2) When determining the significance of a proposed action's impacts, the responsible official shall consider both its short term and long term effects as well as its direct and indirect effects. Particular attention should be given to changes in land use patterns; changes in energy supply and demand; increased development in floodplains; significant changes in ambient air and water quality or noise levels; potential violations of air quality, water quality and noise level standards; significant changes in surface or groundwater quality or quantity; impacts on agricultural lands and encroachments on wetlands, coastal zones, or fish and wildlife habitat, especially when threatened or endangered species may be affected.

(3) Minor actions which may set a precedent for future major actions with significant adverse impacts or a number of actions with individually insignificant but cumulatively significant adverse impacts shall be classified as having significant environmental impacts. If EPA is taking a number of minor, environmentally insignificant actions that are similar in execution and

purpose, during a limited time span and in the same general geographic area, the cumulative environmental impact of all of these actions shall be evaluated.

(4) In determining the significance of a proposed action's impact, the unique characteristics of the project area should be carefully considered. For example, proximity to historic sites, parklands or wild and scenic rivers may make the impact significant. A project discharging into a drinking water aquifer may make the impact significant.

(5) A proposed EPA action which will have direct and significant adverse effects on a property listed in or eligible for listing in the National Register of Historic Places or will cause irreparable loss or destruction of significant scientific, prehistoric, historic or archaeological data shall be classified as having significant environmental impacts.

(b) *Controversial actions.* An EIS shall be prepared when the environmental impact of the proposed EPA action is likely to be highly controversial.

§ 6.803 Environmental review process.

(a) *Environmental information.* (1) Environmental information documents shall be submitted to EPA by grant applicants or contractors. If there is a question concerning the need for a document, the protential contractor or grantee should consult with the appropriate project officer for the grant or contract.

(2) The environmental information document shall contain the same sections specified for EIS's in subpart B. Guidance alerting protential grantees and contractors of the environmental information documents shall be included in all grant application kits, attached to letters concerning the submission of unsolicited proposals, and included with all requests for proposal.

(b) *Environmental review.* An environmental review will be conducted before a grant or contract award is made. This review will include the preparation of an environmental assissment by the responsible official; the appropriate Regional Administrator's input will include his recommendations on the need for an EIS.

(c) *Notice of intent and EIS.* Based on the environmental review if the criteria in section 6.802 above apply, the responsible official will assure that a notice of intent and a draft EIS are prepared. The responsible official may request the appropriate Regional Administrator to assist him in the preparation and distribution of the environmental documents.

(d) *Finding of no significant impact.* If the environmental review indicated no significant environmental impacts, the responsible official will assure that a FNSI is prepared.

(e) *Timing of action.* Pursuant to §6.401(b), in no case shall a contract or grant be awarded until the prescribed 30 day review period for a final EIS has elapsed. Similarly, no action shall be taken until the 30 day comment period for a FNSI is completed.

§ 6.804 Record of decision.

The responsible official shall prepare a record of decision in any case where final EIS has been issued in accordance with 40 CFR 1505.2. It shall be prepared at the time of contract or grant award.

Subpart I—Environmental Review Procedures for EPA Facility Support Activities

§ 6.900 Purpose.

This subpart amplifies the general requirements described in Subparts A through D by providing environmental procedures for the preparation of EISs on construction and renovation of special purpose facilities.

§ 6.901 Definitions.

(a) The term "special purpose facility" means a building or space, including land incidental to its use, which is wholly or predominantly utilized for the special purpose of an agency and not generally suitable for other uses, as determined by the General Services Administration.

(b) The term "program of requirements" means a comprehensive document (booklet) describing program activities to be accomplished in the new special purpose facility or improvement. It includes architectural, mechanical, structural, and space requirements.

(c) The term "scope of work" means a document similar in content to the program of requirements but substantially abbreviated. It is usually prepared for small-scale projects.

§ 6.902 Applicability.

(a) *Actions covered.* These procedures apply to all new special purpose facility construction, activities related to this construction (e.g., site acquisition and clearing), and any improvements or modifications to facilities having potential environmental effects external to the facility, including new construction and improvements undertaken and funded by the Facilities Management Branch, Facilities and Support Services Division, Office of Management and Agency Services; by a regional office; or by a National Environmental Research Center.

(b) *Actions excluded.* This subpart does not apply to those activities of the Facilities Management Branch, Facilities and Support Services Division, for which the branch does not have full fiscal responsibility for the entire project. This includes pilot plant construction, land acquisition, site clearing and access road construction where the Facilities Management Branch's activity is only supporting a project financed by a program office. Responsibility for considering the environmental impacts of such projects rests with the office managing and funding the entire project. Other subparts of this regulation apply depending on the nature of the project.

§ 6.903 Criteria for preparing EISs.

(a) *Preliminary information.* The responsible official shall request an environmental information document from a construction contractor or consulting architect/engineer employed by EPA if he is involved in the planning, construction or modification of special purpose facilities when his activities have potential environmental effects external to the facility. Such modifications include but are not limited to facility additions, changes in central heating systems or wastewater treatment systems, and land clearing for access roads and parking lots.

(b) *EIS preparation criteria.* The responsible official shall conduct an environmental review of all actions involving construction of special purpose facilities and improvements to these facilities. The following general criteria shall be used when reviewing a proposed action to determine if an EIS is required:

(1) *Significant environmental effects.*

(i) An action with both beneficial and detrimental effects should be classified as having significant effects on the environment, even if EPA believes that the net effect will be beneficial. However, preference should be given to preparing EISs on proposed actions which, on balance, have adverse effects.

(ii) When determining the significance of a proposed action's impacts, the responsible official shall consider both its short term and long term effects as well as its direct and indirect effects.

(iii) In determining the significance of a proposed action's impact, the unique characteristics of the project area should be carefully considered. For example, proximity to historic sites, parklands or wild and scenic rivers may make the impact significant. A project

dischargeing into a drinking water aquifer may make the impact significant.

(iv) A proposed EPA action which will have direct and significant adverse effects on a property listed in or eligible for listing in the National Register of Historic Places or will cause irreparable loss or destruction of significant environmental impacts.

(v) Controversial actions. An EIS shall be prepared when the environmental impact of a proposed EPA action is likely to be highly controversial.

§6.904 Environmental review process.

(a) *Environmental review.* (1) An environmental review shall be conducted when the program of requirements or scope of work has been completed for the construction, improvement, or modification of special purpose facilities. For special purpose facility construction, the Chief, Facilities Management Branch, shall request the assistance of the appropriate program office and Regional Administrator in the review. For modifications and improvements, the appropriate responsible official shall request assistance in making the review from other cognizant EPA offices.

(2) Any environmental information documents requested shall contain the same sections listed for EISs in Subpart B. Contractors and consultants shall be notified in contractual documents when an environmental information document must be prepared.

(b) *Notice of intent, EIS, and FNSI.* The responsible official shall decide at the completion of the environmental review whether there may be any significant environmental impacts. If there could be significant environmental impacts, a notice of intent and an EIS shall be prepared according to the procedures under Subparts A, B, C and D. If there are not any significant environmental impacts, a FNSI shall be prepared according to the procedures in subparts A and D.

(c) *Timing of action.* Pursuant to §6.401(b), in no case shall a contract be awarded or construction activities begun until the prescribed 30 day wait period for a final EIS has elapsed. Similarly, under §6.400(d), no action shall be taken until the 30 day comment period for FNSIs is completed.

§6.905 Record of decision.

At the time of contract award, the responsible official shall prepare a record of decision in those cases where a final EIS has been issued in accordance with 40 CFR 1505.2.

[FRL 1062-2]

Requirements for Preparation, Adoption and Submittal of Implementation Plans; Intergovernmental Consultation

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Clean Air Act, as amended, August 1977 (42 U.S.C. 7401 *et seq.*), includes new requirements for intergovernmental consultation. Section 121 of the Act requires the States to provide a process of consultation with local governments, organizations of local elected officials, and Federal land managers during certain actions under the Act. Section 174 of the Act requires Governors to designate, in consultation with local officials, lead organizations for coordinating State implementation plan (SIP) revisions for areas where carbon monoxide or ozone standards have not been attained. Section 174 also requires that State and local officials jointly determine their respective responsibilities for developing, implementing, and enforcing a SIP for such areas. The Environmental Protection Agency (EPA) is today publishing a final rule to assist States in preparing SIP revisions meeting these new requirements. The rule was proposed in the **Federal Register** on May 18, 1978 (43 FR 21466–21470). The final rule incorporates public comments received during the period May 18 to June 23, 1978, including comments received at a public hearing on June 21, 1978.

EFFECTIVE DATE: June 18, 1979.

FOR FURTHER INFORMATION CONTACT: Jerry Kurtzweg, Office of Transportation and Land Use Policy (ANR–445), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, Telephone: (202) 755–0570.

SUPPLEMENTARY INFORMATION:

Background

The Clean Air Act, as amended, August 1977 (42 U.S.C. 7401 *et seq.*), requires increased coordination and consultation among State and local officials in the achievement of national ambient air quality standards and the prevention of significant deterioration of air quality. On May 18, 1978, EPA published in the **Federal Register** (43 FR 21466–21470) a proposed rule containing requirements for intergovernmental consultation. A public hearing on these requirements was held on June 23, 1978. Public comments were received during the period May 18, 1978 through June 23, 1978.

Section 121 of the amended Act requires States to establish procedures for consulting with officials of local government and Federal land managers. Each SIP must include a satisfactory process of consultation for carrying out provisions of the Act related to requirements, including transportation controls, for nonattainment areas; air quality maintenance; preconstruction review of major stationary sources of air pollution; prevention of significant deterioration; and certain delayed compliance orders. Thus, the consultation requirement applies to both attainment and nonattainment areas and to all pollutants for which national ambient air quality standards have been established. EPA is required by the amended Act to promulgate regulations to assure adequate consultation.

Guidance describing certain consultation procedures related to Clean Air Act requirements for an air quality-transportation planning process and for prevention of significant deterioration has already been issued. In June 1978 EPA and the Department of Transportation (DOT) jointly issued "Transportation—Air Quality Planning Guidelines" that include recommendations for consultation during the development of the transportation related portion of a SIP. Final rules for the prevention of significant deterioration, including consultation requirements, were published in the **Federal Register** on June 19, 1978 (43 FR 26380–26387). These guidelines and regulations should be consulted by agencies affected by the rule being published today in the development of consultation processes.

In nonattainment areas for carbon monoxide or ozone, States are subject to additional consultation requirements under section 174 of the amended Act. States must determine jointly with local governments the division of responsibility for development, implementation, and enforcement of the air quality plans for these areas. Local governments were provided an opportunity to designate by agreement an organization to prepare the SIP revision for these nonattainment areas, if they did so by February 7, 1978. The Governor is required to either certify a locally designated organization or, if no acceptable local designation is made, to certify another state or local organization. On December 14, 1977, EPA and DOT jointly issued "Clean Air Act section 174 Guidelines" describing the process and criteria to be used for such certification. The final rule published today reflects the information contained in those guidelines.

The regulations promulgated below combine existing regulations pertaining to intergovernmental consultation in 40 CFR 51.21 and 51.58 with the new requirements in the Clean Air Act, as amended, under a new Subpart M, entitled "Intergovernmental Consultation," within Part 51. In addition, this regulation amends 40 CFR 51.61 to make the new Subpart M, where appropriate, applicable to air quality maintenance planning.

These regulations are not designed to require the replacement of existing consultation procedures. However, such procedures should be augmented or improved, where necessary, to involve affected organizations or individuals and to provide them with adequate opportunity to express their opinions and concerns during development of a SIP.

Discussion of Major Comments

Agency certification

Major substantive comments were received on the portions of the proposed regulations for agency certification under Section 174. Some commenters identified a need for provisions in the regulations to allow for changing the certified agency, particularly if requested by elected officials of local governments. EPA agrees that, in order to accommodate changes in responsibilities for plan developments, there is a need for procedures to allow a change in the agency certified. In addition, a Governor may initially have certified a State agency as the lead planning agency. Because State agencies will not be eligible for funding under section 175 of the Act, unless local officials maintain control over use of the funds, certification of an organization more directly representing local officials may prove desirable. A new § 51.241(f) has been added to allow changing the certified agency.

One commenter suggested a need for regulations to provide for certification of a lead planning agency where the status of an area changes from attainment to nonattainment for carbon monoxide or ozone. A new § 51.241(e) has been added outlining procedures that shall be used in those situations.

Another commenter suggested that, in order to assure that concerns of all participants in the agency certification

process have been addressed, EPA should circulate a description of concerns raised by participants under § 51.241(d). EPA believes that this issue deserves attention in the regulation. However, we believe that the issue is adequately addressed by making the information submitted by the Governor under § 51.241(d) available for public review in the appropriate EPA Regional Office. Language has been added to § 51.241(d) to enable such review.

Consultation Process—Objectives

Under the approach in the proposed rule, State and local governments would have the responsibility for determining the mechanisms and procedures that should be used to provide for adequate consultation. Objectives for the process were included in the proposal. Most commenters stated that they believed the objectives of the consultation process were appropriate. However, some commenters disagreed with the approach and maintained further, procedural guidance will be needed to insure that the objectives are given adequate and serious consideration. EPA has retained the proposed approach in the final rule. A process of consultation is now more specifically defined in these regulations because a satisfactory process may vary depending upon the program or action affected and upon established channels of communication within each State and local area. However, in response to comments, additional clarifying language has been added to the objectives to indicate that (1) the information and education requirement in § 51.243(a) applies to the revision of all SIP elements listed in § 51.244, and (2) the opportunity for involvement of affected governmental organizations and elected officials must be provided on a regular and frequent basis in the development of all elements of the revised SIP which affect their area.

One commenter requested clarification as to who has final authority under § 51.243(c) to resolve key issues. EPA believes that this decision should be left to the affected State and local governments developing the consultation process. Another commenter requested that requirements be included for providing information and education on such topics as planning alternatives under consideration, groups of measures that form alternative strategies, and the effects of alternatives in local areas. EPA has partially incorporated this suggestion by specifying that information must be provided on all elements listed in § 51.244. EPA believes that the more detailed guidance suggested is unnecessary given the requirements of section 172(b)(9) of the Act and the recommendations in the EPA-DOT "Transportation-Air Quality Planning Guidelines."

A number of comments addressed the scope and extent of the consultation process. One commenter noted that it would be inappropriate to involve local officials in the stationary source control portions of a SIP. Other commenters suggested that the consultation process should apply only to the substantive portions of plan revisions and that the EPA rule should not affect basic procedures and functions of local agencies (e.g., intra-agency preconstruction reviews, local governing or hearing board decisionmaking, or local rule changes). In response to these comments, EPA emphasizes that the consultation requirements do apply to stationary source review procedures, but only to affected governmental agencies and individuals. This intent has been clarified in both §§ 51.243(b) and 51.245.

One commenter suggested that the determination of the proportion of emission reductions to come from stationary and from mobile sources should be included among the key issues to be jointly resolved by State and local officials under § 51.243(c). This suggestion has been incorporated into the final rule. Other examples have also been added to help clarify the type of issues that should be jointly resolved.

Plan Elements Affected

Several commenters requested clarification of the definition of "direct" sources in § 51.244(a). In response to these comments, EPA has substituted the words "major stationary" for "direct." The exact definition of "major stationary source" will depend on the status of the area and type of planning (see, e.g., sections 169(1), 169A(g)(7), and 302(j) of the Act).

Other commenters questioned whether the affected plan elements included all the requirements in section 172, and whether the consultation process applied to all revisions in attainment and nonattainment areas. This has been clarified in a new § 51.244(g) which indicates that consultation is required during development of any measure required under Part C or Part D of the Act. A related comment suggested listing a new plan element, public participation, in § 51.244. This addition would require use of a consultation process in development of programs to adequately inform the public about the air quality planning process and involve them in the process. EPA believes that consultation in the development of public participation aspects of any of the measures or procedures listed under § 51.244 is a legitimate requirement, but that it is unnecessary to list public participation separately.

Organizations and Officials To Be Consulted

A substantial number of comments were received that pointed out that the "intergovernmental consultation" required in sections 121 and 174 of the Act does not include consultation with public interest organizations. These commenters indicated that consultation with special interest groups would be an enormous administrative burden to State and local agencies. Other commenters suggested expanding the involvement of interest groups to include private business entities and major community organizations. EPA has determined that sections 121 and 174 apply only to consultation among governmental organizations and elected officials. However, sections 109(e)(4) and 172(b)(9) of the Act, and the EPA-DOT "Transportation—Air Quality Planning Guidelines" do require public involvement in the SIP revision process. The final rule has been amended by deleting the requirement for public interest group involvement in § 51.245(e), but specifically including these groups, as well as other affected interest groups, in § 51.251(a).

One commentator emphasized the fact that the consultation process is particularly important because different State, local and areawide agencies may be responsible for development, implementation and enforcement of a SIP. Several types of governmental agencies commented that their interests and responsibilities would be affected by the SIP and that they should, therefore, be included in any consultation process established. These comments are reflected in the final regulation which has been expanded to require an opportunity for participation in the consultation process of State, local and areawide agencies with implementation or enforcement responsibilities. Agencies specifically mentioned include health planning agencies, community and economic development agencies, and manpower planning agencies. A related comment indicated that the provision for inclusion of State, local and areawide transportation planning agencies in the consultation process should be expanded to specifically include State

highway and transportation departments, as well as local transit authorities and agencies. EPA believes such specificity is unnecessary. The general reference to "transportation planning" agencies encompasses all these organizations.

Resolution of Disputes

One commenter addressed the need to include procedures to enable local officials to appeal to Federal officials to set aside a plan, or portion thereof, for lack of adequate consultation. Section 121 of the Act specifically provides that local or regional governmental agencies adversely affected by action of the Administrator approving a plan may petition for judicial review of such action on the basis of violation of the consultation requirements. However, EPA believes that procedures should be provided to encourage resolution of disputes out of court. Therefore, a new § 51.247 including such procedures has been added to the continuing consultation process regulations. Subsequent subsections have been renumbered.

Relationship With Other Programs

A major concern raised by some commenters was that the requirement for coordination with other programs is unnecessary and duplicative of existing review procedures required by Circular A–95 of the Office of Management and Budget. EPA intends that, where possible, existing procedures should be used to ensure the necessary coordination. Clarifying language has been added to §§ 51.248 (a) and (b) (§ 51.247(a) and (b) in the proposed rule) to emphasize this intent.

One commenter questioned how conflicts will be resolved under § 51.248(a) (originally § 51.247(a)) if an agency disagrees with another agency as to whether its programs substantially affect or are affected by the SIP. EPA believes State and local governments should establish appropriate mechanisms for resolving such disagreements within the framework of the consultation process (e.g., through memoranda of understanding, as indicated in § 51.248(b)).

Another agency commenting on these regulations pointed out procedural problems associated with coordination with other planning and management programs. Specifically, some transportation, solid waste, and other plans are only updated at multi-year intervals. Thus, existing plans may be outdated and consideration of planning objectives in those plans or determining conformity of those plans with the SIP may be meaningless and futile. EPA recognizes that coordination may present problems in these situations and will certainly consider these problems when reviewing the coordination procedures developed under this regulation. However, EPA believes that, in light of the conformity requirement in section 176(c) of the Act, the requirement is, nevertheless, valid and necessary. State and local government agencies, which are familiar with planning and programming schedules of affected agencies, are in a better position than EPA to develop coordination and conformity determination procedures which account for different planning cycles, yet insure the necessary coordination.

A–95 Clearinghouse Review

The major comments related to the A–95 Clearinghouse Review section of the regulation concerned who has responsibility for insuring this revew and when the review sould occur (e.g., before or after public hearings, as sections of SIP are drafted, or when the entire SIP is complete). In response to the first issue, clarifying language has been added to §51.251 (§ 51.250 in the proposed rule) indicating that the governmental organization responsible for developing the SIP is also responsible for submitting the draft plan the A–95 clearinghouse and considering comments raised during A–95 review. With respect to the timing issue, language has been added indicating that the draft plan (or portions thereof) shall be submitted to the A–95 clearinghouse either prior to or concurrent with announcement of the public hearing on the plan. EPA believes this approach is consistent with existing A–95 review procedures and will best insure timely submittal of SIP Revisions to EPA.

Discussion of Miscellaneous Comments

EPA does not agree that the proposed rule would be improved by the suggestions of some commenters and has rejected the following comments for the reasons noted.

Two commenters questioned the need for the requirements for agency certification because section 174 of the Act does not require EPA to promulgate regulations, and agency certifications have already occurred in most nonattainment areas to which the requirements in section 174 apply. No changes have been made in response to these comments because (1) certifications have not been made for all affected areas, (2) section 301(a)(1) of the Act authorizes the Administrator to prescribe such regulations as may be necessary to carry out his functions in administering the Act and (3) section 172(b)(9) of the Act requires that the SIP Revisions evidence "public, local government and State legislative involvement and consultation in accordance with section 174." The Administrator has determined that the actions and information required by these regulations are necessary in order to insure compliance with sections 172(b)(9) and 174. Furthermore, as indicated above, because of comments received, EPA has determined that the agency certification process may be a continuing one, i.e., there should be provisions for changing certifications and for making new certifications if situations change (e.g., an attainment area becomes a nonattainment area). Therefore, EPA believes these regulations are valid and necessary.

Other comments concerning the agency certification process raised issues which are beyond EPA's legal authority under the Act. For example, one commenter suggested that the regulations for implementing section 174 should apply to all lead planning organizations, and not be limited to lead agencies in carbon monoxide photochemical or oxidant nonattainment areas. Another commenter suggested that EPA set a deadline by when Governors must act on certification of locally designated lead agencies. If the Governor has taken no action by that date, EPA could consider the locally designated agency eligible for funding under section 175.

One commenter suggested that EPA place an affirmative duty on the States to encourage local designation of lead agencies, including a duty to educate local officials so that they can participate meaningfully in the designation process. EPA believes that this suggestion is adequately addressed in both section 174 of the Act and in § 51.241 (a) and (b) of this regulation which give local governments the initial opportunity to act and require the Governor to consult with local governments before certifying a lead agency.

One commenter indicated the consultation is not required under section 113 of the Act and should not be required in this regulation. However, section 121 specifically states that the consultation requirements apply to activities under section 113(d).

One commenter asked for clarification concerning the definition of "Federal land manager," particularly whether the phrase included managers of Federal facilities. This term is defined in section 302(i) of the Act and clearly does not

include Federal facility managers. Another commenter indicated that the Secretary of Agriculture has designated the Chief of the Forest Service as the Federal land manager for Forest Service lands (see 7 CFR, subtitle A, Part 2) and requested that EPA state that the Federal land manager for Forest Service lands is the Regional Forester having authority over the affected lands. EPA believes it is inappropriate to include the suggested specificity in this regulation, but believes affected agencies should be aware of this delegation of authority.

One commenter suggested that the words "and where possible" be deleted from § 51.248(a)(2)–(4) (§ 51.247(a)(2)–(4) in the proposed rule). This provision requires integration of work programs, use of common policy advisory boards, and common public participation and information programs. EPA believes that an absolute requirement would be unreasonable and might in some cases, preclude use of existing procedures for coordinating with other programs. Therefore, EPA has determined that the coordination requirement is sufficient.

One commenter indicated that A–95 review for some matters (e.g., compliance orders and new source review) would be inappropriate. Because other commenters indicated that A–95 review would be quite appropriate for such elements as preconstruction review, no change was made in the final rule.

Some comments disputed EPA's contention that the regulation will not require an appreciable increase in resources and therefore does not meet the minimum criteria for significant regulations requiring a regulatory analysis under Executive Order 12044. EPA disagrees because (1) these regulations are procedural in nature and affect mainly governmental personnel; (2) existing consultation procedures should be used, wherever possible; and (3) funds available under section 175 may be used to develop or modify the required procedures.

Final Action

The following regulations are nationally applicable. Therefore, under section 307(b)(1) of the Act, judicial review may be sought only in the U.S. Court of Appeals for the District of Columbia. Petitions for review must be filed on or before August 17, 1979.

As noted above, these regulations are procedural in nature and affect mainly governmental personnel. Because the required level of effort will not necessitate an appreciable increase in resources, these regulations do not meet the minimum criteria for significant regulations requiring a regulatory analysis as described in Executive Order 12044.

SIP revisions for nonattainment areas must be submitted to EPA by January 1, 1979. The procedures required by these regulations must be included in those plans. Therefore, the Administrator finds good cause for making these regulations effective on the date of publication.

As part of EPA's "sunset" policy, EPA will evaluate this regulation five years after the date of publication. This evaluation will assess the implementation of the regulation in terms of effectiveness, costs and benefits, and alternatives for achieving the same objectives.

Dated: May 25, 1979.

Douglas M. Costle,

Administrator.

Title 40 of the Code of Federal Regulations, Chapter I, Part 51, is amended as follows:

1. Sections 51.21 and 51.58 (b)–(h) are revoked and reserved.

2. Section 51.61, paragraph (d) is revised to read as follows:

§ 51.61 AQMA plan: Submittal format.

* * * * *

(d) AQMA plan. Applicable information required under §§ 51.52(b), 51.53, 51.54, 51.55, 51.56, 51.58, 51.59, 51.60 and Subpart M.

* * * * *

3. In § 51.63 paragraph (a) the reference to "51.58(h)" is deleted from the first sentence.

Subparts E–L [Added and Reserved]

4. New subparts E to L are added and reserved.

5. A new Subpart M is added as follows:

Subpart M—Intergovernmental Consultation

Agency Certification

Sec.

51.240 General plan requirements.
51.241 Nonattainment areas for carbon monoxide and ozone.
51.242 (Reserved).

Continuing Consultation Process

51.243 Consultation process objectives.
51.244 Plan elements affected.
51.245 Organizations and officials to be consulted.
51.246 Timing.
51.247 Hearings on consultation process violations.

Relationship of Plan to Other Planning and Management Programs

51.248 Coordination with other programs.
Sec.
51.249 (Reserved).
51.250 Transmittal of information.
51.251 A–95 clearinghouse review.
51.252 Summary of plan development participation.

Authority: Secs. 110, 121, 174(a), 301(a) Clean Air Act as amended (42 U.S.C. 7410, 7421, 7504, and 7601(a)).

Agency Designation

§ 51.240 General plan requirements.

Each State implementation plan must identify organizations, by official title, that will participate in developing, implementing, and enforcing the plan and the responsibilities of such organizations. The plan shall include any related agreements or memoranda of understanding among the organizations.

§ 51.241 Nonattainment areas for carbon monoxide and ozone.

(a) For each AQCR or portion of an AQCR in which the national primary standard for carbon monoxide or ozone will not be attained by July 1, 1979, the Governor (or Governors for interstate areas) shall certify, after consultation with local officials, the organization responsible for developing the revised implementation plan or portions thereof for such AQCR. The procedures described in the "Section 174 Guidelines" issued jointly in December 1977 by EPA and the Department of Transportation should be consulted in this process. These guidelines are published as Appendix U to Part 51.

(b) The Governor shall certify an organization of elected officials of local governments designated by agreement of affected general purpose local governments unless no agreement was reached by affected local governments by February 7, 1978, or the locally designated organization does not meet the criteria for a lead planning organization contained in the "Section 174 Guidelines." In making the certification, the Governor shall take into consideration any ongoing process of local designation in existence on February 7, 1978. The certification shall be in accordance with the joint determination of responsibilities for plan development, implementation, and enforcement required by section 174(a) of the Clean Air Act, as amended.

(c) The Governor shall certify, where feasible, the metropolitan planning organization responsible for the continuing, cooperative, and comprehensive transportation planning process required under 23 USC 134 and the Urban Mass Transportation Act; the organization responsible for air quality maintenance planning; or the

organization responsible for both. In determining the feasibility of certifying such an organization, the Governor shall also consider whether the organization gives adequate representation to local elected officials of general purpose governments and has areawide planning responsibilities in other Federal environmental or planning programs which could contribute to integration and consolidation of planning functions. Where possible, preference should be given to organizations with several program responsibilities, such as comprehensive planning or water quality management. Attention is directed to Part IV of the Office of Management and Budget Circular A–95 (41 FR 2050) which encourages the designation of established, substate comprehensive planning agencies as the agencies to carry out Federally assisted or required areawide planning.

(d) The Governor shall submit the following information to the Administrator of the EPA through the appropriate EPA regional office. The information shall be made available for public review at the regional office.

(1) A list of all air quality planning organizations certified pursuant to section 174 within the State.

(2) A description of the geographic jurisdictions of these organizations by AQCR, or portion thereof.

(3) A general description of the responsibilities of the certified organizations.

(4) A brief discussion of the alternatives investigated for consolidation of environmental and other planning functions, and the basis for the selection of the certified organization.

(5) A brief description of the consultative process leading to the selection of a certified organization, including the disposition of significant concerns raised by participants.

(e) Within 60 days following a redesignation, pursuant to section 107(d) of the Clean Air Act, as amended, to nonattainment of any AQCR or portion of an AQCR designated as attainment or unclassifiable for the national primary standard for carbon monoxide or ozone the State and elected officials of affected general purpose local governments shall jointly determine their respective responsibilities in developing, implementing, or enforcing portions of a revised implementation plan. The Governor shall certify, within the 60-day period and after consultation with local officials, the organization responsible for developing the revised plan or portions thereof for such area. The procedures in the "Section 174 Guidelines" should be consulted in the joint determination of responsibilities and in the certification of the organization. The organization certified by the Governor shall be a locally designated organization unless agreement among local officials cannot be achieved in time to make the certification within the 60-day period. If no agreement is reached, the Governor may then, after consultation with local officials, certify an organization of local officials or a State agency. The implementation plan submitted within nine months after an area is designated nonattainment shall include the information listed in § 51.241(d)(1)–(5).

(f) An organization certified under the provisions of this section shall remain certified until the Governor, after consultation with elected officials of local government in a nonattainment area, certifies another organization. Elected officials of local government may make written request to the Governor to change the certified organization for an area. The request shall contain the reasons for the proposed change and the replacement organization proposed for certification. The Governor shall consider such requests and, if he or she finds that the reasons are compelling, shall send a notice of the proposed change to the Regional Administrator, the chief official of the organization to be replaced, and elected officials of major general purpose local governments in the nonattainment area. The notice of proposed change shall include the reasons for the change, the effective date of the change, the effects of the change on development of necessary implementation plan revisions, and a revision of the joint determination of responsibilities developed pursuant to section 174(a) of the Clean Air Act, as amended. The notice of proposed change shall be made available for public review in the affected area for at least 30 days before becoming effective.

§ 51.242 [Reserved]

Continuing Consultation Process

§ 51.243 Consultation process objectives.

Any governmental organization that has the lead responsibility for development of one of the State implementation plan elements listed in § 51.244 shall provide for a continuing intergovernmental consultation process in carrying out those responsibilities. All affected governmental organizations should, to the extent feasible, be involved in the development of the process. Already established consultation processes, such as those established under § 51.241, may be used, and supplemented if necessary, to meet the requirements of this subpart. A satisfactory consultation process must include provisions to meet the following objectives:

(a) Provide for information dissemination to and education of relevant organizations and individuals on, at least, all elements of the State implementation plan identified in § 51.244.

(b) Provide an opportunity for regular and frequent involvement of affected governmental organizations and elected officials in development of all elements of the revised State implementation plan which affect their area.

(c) Provide an opportunity for joint resolution by affected governmental organizations and individuals of key issues in the development of the revised implementation plan. Key issues include determination of the proportion of emission reductions to come from stationary and mobile sources; selection of mobile and stationary source control strategies; and determination of responsibilities among State and local governments for implementation and enforcement, particularly where commitment of local resources will be necessary.

§ 51.244 Plan elements affected.

The consultation process must ensure consultation during preparation of the following measures:

(a) Procedures for preconstruction review of major stationary sources of air pollution. Preparation of such procedures includes the development of allocation programs for allowable emission increments for attainment areas and growth increments or banked emission reductions for nonattainment areas.

(b) Transportation-related planning procedures and control measures.

(c) Procedures and control measures, other than those related to transportation, applicable to nonattainment areas.

(d) Measures for prevention of significant deterioration of air quality, and protection of visibility in Federal Class I areas.

(e) Air quality maintenance measures.

(f) Delayed compliance orders described in section 113(d) of the Clean Air Act, as amended, August 1977.

(g) Any other measures required under Part C or Part D of the Act.

§ 51.245 Organizations and officials to be consulted.

A continuing intergovernmental consultation process established in

accordance with § 51.243 shall ensure the involvement of the following organizations or individuals whenever the interests for which they are responsible are directly or indirectly affected:

(a) State, areawide, and local agencies responsible for air pollution control, health planning, transportation planning, energy planning, manpower planning, economic and community development, housing planning, coastal zone management, solid waste management, and water quality management.

(b) Elected officials of local government.

(c) Federal land managers having authority over lands affected by State implementation plans.

(d) Any other affected governmental organizations that may be responsible for implementing or enforcing the plan element being developed.

§ 51.246 Timing.

The continuing intergovernmental consultation process shall apply to any measure related to the plan elements in § 51.244 adopted after December 18, 1979. The State implementation plan shall be revised to provide an opportunity for Federal, State and local involvement in such a consultation process no later than December 18, 1979.

§ 51.247 Hearings on consultation process violations.

(a) Where a majority of elected officials of any local government affected by a plan element listed in § 51.244 contend that they have been improperly excluded from consultation on that element, they may petition the EPA Regional Administrator to hold a hearing on the matter. Upon receipt of the petition, the Regional Administrator shall request from the responsible State agency a formal response to that petition. After evaluation of the State's response to the petition, the Regional Administrator shall make a determination whether to hold a hearing. If a hearing is held, the transcript and the State's response shall be forwarded to the Administrator for consideration when approving or disapproving the plan elements. If no hearing is held, the Regional Administrator's determination, together with the State's response, shall similarly be forwarded to the Administrator.

(b) The other organizations or individuals involved in preparing the plan element or otherwise affected by it shall be given notice of the hearing and afforded an opportunity to participate in it.

Relationship of Plan to Other Planning and Management Programs

§ 51.248 Coordination with other programs.

(a) A governmental organization that has a major responsibility for developing any of the State implementation plan elements listed in § 51.244 shall coordinate with other planning and management programs substantially affecting or affected by such elements through the development of procedures, or the use of existing procedures, to ensure the following:

(1) Use of common data.

(2) Coordination, and where possible, integration of work programs.

(3) Use, where possible, of common public participation and information programs.

(5) Incorporation of appropriate air quality criteria as a factor in other planning and management programs.

(6) Consideration of other community objectives in development of air pollution control strategies.

(b) The coordination procedures shall include a process for determining conformity between the State implementation plan and other plans and programs, such as those pertaining to transportation, land use, solid waste, water quality, or community development, substantially affecting or affected by the implementation plan. Existing procedures should be used, where feasible. The State implementation plan shall include a list of any memoranda of understanding developed, as part of that process, among the agencies responsible for development, implementation, or enforcement of air quality plans. The provisions of items 3a through d, Part IV of the Office of Management and Budget Circular A–95 shall be considered in the preparation of memoranda of understanding.

§ 51.249 [Reserved]

§ 51.250 Transmittal of information.

Each plan shall provide assurances that the governmental organization having primary responsibility for implementing national ambient air quality standards in any AQCR, or portion thereof, will promptly transmit to other organizations having similar or related responsibility in the same or other States, information on factors (e.g., construction of new industrial plants) which may significantly affect air quality in any portion of such AQCR or in any adjoining AQCR.

§ 51.251 A–95 Clearinghouse review.

The organization responsible for developing the State implementation plan revision shall submit a draft of any major implementation plan revision including any of the six elements listed in § 51.244 to the cognizant State and areawide clearinghouses as established under the Office of Management and Budget Circular A–95, for review and comment for a period of 45 days. The draft plan, or portions thereof, shall be submitted to the A–95 clearinghouse either prior to or concurrent with announcement of public hearings on the plan. Comments received from the clearinghouse within that 45-day period shall be considered. The organization initiating the plan revision shall retain copies of these comments for inspection by the Administrator and the public.

§ 51.252 Summary of plan development participation.

An organization with responsibility for the development of all or a portion of the implementation plan elements listed in § 51.244 shall include in the plan:

(a) A summary of the procedures used to involve the general public, public and special interest groups having a major interest in the program, local and areawide governmental organizations, elected officials of local governments, State agencies and the State legislature, and Federal land managers in the development of the plan revision.

(b) A discussion of any significant comments raised during the consultation process, including those received in the A–95 clearinghouse or in any public hearing held on the plan. The discussion shall include a description of the final disposition of such points.

Clean Air Act Section 174 Guidelines

Guidance on Designation of Lead Planning Organizations for Nonattainment Areas and on Determination of Interagency Responsibilities, December 1977, Issued Jointly by The U.S. Environmental Protection Agency and The U.S. Department of Transportation Washington, D.C.

Appendix B. Section 174.

General questions on any of the material covered by this guideline should be sent to the Office of Transportation and Land Use Policy (AW-445), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, Attention: Ms. Martha Burke. Ms. Burke's telephone number is (202) 755-0570. Questions concerning specific state or local areas should be directed to the appropriate EPA regional office.

1. Introduction

1.1 Applicability.

These guidelines are applicable to all metropolitan area regions or portions of regions where the national ambient air quality standards for photochemical oxidants or carbon monoxide will not be attained by July 1, 1979.

1.2 Purposes.

The purposes of these guidelines include:

1. To recommend procedures and criteria for determining a lead agency to be responsible for coordinating the preparation of the implementation plan revisions called for by the 1977 amendments to the Clean Air Act (Pub. L. 95-95) in metropolitan area regions where carbon monoxide or photochemical oxidant standards will not be attained by July 1979.

2. To assist state and local governments in identifying the initial planning, implementation, and enforcement responsibilities for the plan revisions and in establishing a process for further definition of responsibilities as development of the revisions progresses.

3. To encourage further coordination and consolidation of federally sponsored planning programs. This includes the integration of the new transportation related air quality requirements under Pub. L. 95-95 into the transportation planning process required by federal transportation grant statutes.

1.3 Background.

On August 7, 1977, President Carter signed into law the first comprehensive amendments to the Clean Air Act since 1970. Among the more important changes in the Clean Air Act are provisions encouraging local governments and organizations of local elected officials to assume additional responsibilities in the development, implementation, and enforcement of plans to attain national ambient air quality standards. Such plans were first required under the 1970 amendments to the Clean Air Act. The 1977 amendments require plan revisions for areas where standards have not been attained.

The assumption of additional responsibilities by local governments and local officials is specifically encouraged in those areas where photochemical oxidant and carbon monoxide standards will not be attained by July 1, 1979 (section 174(a)). The first identification of nonattainment areas for these and other pollutants under the requirements of the 1977 amendments must have been made by states by December 5, 1977. The Administrator of the Environmental Protection Agency (EPA) must publish a list of these areas, with any modifications he deems necessary, by February 3, 1978.

For areas where standards for photochemical oxidants and carbon monoxide will not be attained by July 1, 1979, state and local elected officials must jointly determine by February 7, 1978, their respective responsibilities for the plan revisions necessary to attain standards by the new deadlines in the 1977 amendments. The plan elements for which responsibilities are to be jointly determined encompass control measures for all pollutants for which standards have not been attained, not just photochemical oxidants and carbon monoxide.

The amendments require that, where possible, the implementation plan revisions be prepared by an organization of local elected officials designated by agreement of local governments. The amendments strongly encourage preparation by the organization now responsible for transportation planning under section 134 of title 23, U.S.C., or for air quality maintenance planning (or for both). The designated organization and its responsibilities must be certified by the state (or states if an interstate area is involved). Where local governments have not reached agreement by February 7, 1978, the governor must, in consultation with the elected officials of local governments in the affected area, designate an organization of local elected officials or a state agency to prepare the plan revisions. The designation by the governor must be in accordance with the joint determination of responsibilites made by state and local elected officials.

The governor must, under regulations which the EPA will propose during December 1977, submit a notice to the EPA certifying the designated agency for each nonattainment area or identifying the organization that he or she has designated. The notice must include a brief summary of the process involved in selecting the designated agency. A more detailed documentation of the selection process shall be included as part of the plan revisions to be submitted to the EPA by January 1, 1979. Evidence of the involvement of state legislatures and local governments is required as part of the plan revision submittal (section 172(b)(9)).

Only organizations of local elected officials of general purpose governments certified by the governor will be eligible for the grants authorized under section 175 of the amendments. In each urban area which is wholly or partially classified as a nonattainment area, only one organization will be eligible to receive a grant. The organization receiving the grant may use the grant funds to support plan revision activities carried out by other governmental organizations, public interest groups, or private consultants.

In addition to further defining the process for implementation of the Clean Air Act amendments, the EPA and the Department of Transportation also encourage in these guidelines further coordination and consolidation of federally sponsored planning programs. Such encouragement is consistent with President Carter's Environmental Message of May 1977 and with subsequent actions taken by the President to eliminate, consolidate, or simplify federal planning requirements. The Environmental Message in part stressed the need for improved implementation of environmental laws through more efficient delivery of federally funded programs. The encouragement for coordination and consolidation does not imply the advocacy of any particular institutional mechanism. A wide variety of mechanisms ranging from concentration of authority or responsibility in a single organization to development of memoranda of understanding among several organizations are available to achieve the same objectives.

2. Selection of a Lead Planning Organization

2.1 Criteria for Selecting an Organization.

These guidelines are intended to assist state and local officials in reaching agreement on the lead planning organization to be responsible for plan revisions called for by the 1977 Clean Air Act amendments. The role of the lead planning organization may vary from developing almost all elements of the plan revision to acting as a forum for decisionmaking by elected officials on elements developed almost entirely by other organizations. In most instances the lead organization will probably develop some elements, coordinate the development of other elements, and serve as a forum for deciding the ultimate nature of the plan revisions.

The amendments require that, where feasible, the organization designated and certified to prepare the plan revisions shall be (1) the metropolitan planning organization (MPO) responsible for the continuing, cooperative, and comprehensive transportation planning process for the affected area; (2) the organization responsible for the air quality maintenance planning process; or (3) an organization responsible for both planning processes. Coordination of the development of a plan revision with the MPO transportation planning process is particularly important in those nonattainment areas where transportation control measures appear necessary to attain standards. Only through the MPO process can the federal funds available under Federal Highway Administration and Urban Mass Transportation Administration programs be used to implement necessary transportation management measures and capital projects.

The Administrator of the EPA also strongly encourages that, in addition to meeting the requirements described above, the designations made pursuant to section 174 contribute to a consolidation within a single organization of responsibilities for air quality planning and for other environmental planning carried out under federal laws administered by the EPA. These laws include the Federal Water Pollution Control Act, the Safe Drinking Water Act, and the Resource Conservation and Recovery Act. The EPA believes that, where properly applied, consolidation of environmental planning efforts is an essential step in the development of comprehensive environmental strategies that are able to take into account the interrelated nature of environmental

problems. Comprehensive strategies can also result in a more efficient and effective use of resources in achieving environmental benefits.

The following criteria should be considered by local elected officials and by the governor when determining the lead planning organization for urban nonattainment regions:

1. The organization should be the forum for cooperative decisionmaking by principal elected officials of general purpose local governments. The principal elected officials of general purpose local governments should have adequate (preferably majority or larger) representation in the organization but membership need not be limited to them or their designees. There should be participation by agencies that may be responsible for implementation of portions of the plan.

2. The organization should have a planning jurisdiction that includes the current urbanized area and the area likely to be urbanized at least over the period to be covered by the revised plan.

3. The organization should have the ability to produce the necessary plan revision for the planning jurisdiction described above by the January 1, 1979 submittal deadline. The organization should have the capability to perform the necessary analysis and planning tasks itself or be able to enter into binding agreements with other organizations to perform such tasks.

4. The organization should have the capability to coordinate the development of the plan revision with other relevant planning processes, if it does not have responsibility for those processes, and with agencies that may have responsibility for implementation or enforcement. Relevant planning processes include the continuing, cooperative, and comprehensive planning process; other environmental planning processes assisted through EPA-administered programs; and comprehensive planning processes established in accordance with Part IV of the Office of Management and Budget Circular A-95 (41 FR 2052).

2.2 The Selection Process.

Local governments within a nonattainment area for photochemical oxidants or carbon monoxide may, by agreement, designate an organization of elected officials of local government to prepare the plan revision for the pollutants for which standards in that area have not been attained. A resolution by the governing body of an organization meeting the criteria in section 2.1 of these guidelines is sufficient to demonstrate agreement of local governments. Such a designation must be submitted to the governor by February 7, 1978. Local governments intending to designate an organization should consult with the state during the designation process.

If local governments agree on an organization by February 7, 1978, the governor shall certify that organization by April 1, 1978, unless he or she finds that the designated organization does not meet the criteria in section 2.1. If local governments have initiated, but have not completed, designation of an organization by February 7, 1978, they should inform the governor that an on-going process exists.

If local governments are unable to agree by February 7 on a single lead organization of local elected officials to be responsible for the coordination of the plan revision, the governor shall, in consultation with local elected officials of general purpose local governments, designate an organization or a state agency by April 1, 1978. If more than one organization meeting the criteria in section 2.1 is self-designated in an area and proposed to the governor for certification, the governor shall certify the organization which, in his or her opinion, is most capable of completing the required plan revisions.

The governor may designate a state, local, or regional agency, but that designation shall be in accordance with the joint determination of responsibilities required by section 174 of the Clean Air Act amendments and discussed in the following section of these guidelines. In making a designation, the governor shall take into consideration any on-going process of local designation in existence on February 7, 1978, even though no formal agreement among local governments has been reached.

The governor shall submit to the Administrator of the EPA by April 1, 1978, through the appropriate EPA regional office, a list of all organizations or agencies certified or designated within the state, a description of the geographic jurisdictions of these organizations and agencies, and a general description of their responsibilities. Regardless of the agency finally designated or certified, the decisions should reflect an examination of all reasonable alternatives for consolidation of environmental and other planning functions. The submission should include a brief discussion of the alternatives investigated and the basis for the ultimate choice. If the organization designated or certified by the governor is not one of the organizations encouraged by the amendments and by the Administrator in these guidelines, the reasons that such an organization should not have the lead responsibility for planning should be specifically addressed. More detailed descriptions, including documentation of the consultation that occurred, shall be submitted by January 1, 1979 with the implementation plan revision.

3. Joint Determination of Responsibilities

3.1 Joint Determination Process.

The determination of responsibilities made jointly by state and local elected officials will necessarily have to be relatively general for many areas. The nature and extent of the air quality problem may not be adequately defined by the February 7, 1978 deadline specified in the amendments. In addition, the planning process guidelines for photochemical oxidant and carbon monoxide nonattainment areas, required to be prepared by the EPA also by February 7, will not be available for consideration in the joint determinations. The nature of the process recommended in the EPA guidelines should influence the ultimate determination of responsibilities.

Because agency responsibilities, especially for plan implementation and enforcement, will undoubtedly change or become more specific by the time a plan revision is actually submitted to the EPA for approval, the determination of responsibilities should be viewed as a process, the first phase of which is to be completed by February 7, 1978. The final product of the joint determination process should be included as part of the plan revision submitted by January 1, 1979. Possible steps in this phased process are set forth below. Because institutional arrangements differ from region to region and from state to state, specification of a generally applicable process for joint state-local determination of agency responsibilities is not possible.

Many state and local governments already have initiated such a process. As long as the approach taken provides for substantial involvement of all parties—local governments, regional agencies, and states—and results in the identification of agencies and responsibilities as described in these guidelines, such an existing process is sufficient to meet the requirements of section 174(a). The activities described in the following section should be completed by February 7, 1978 to comply with the requirements of section 174.

3.2 Notification of Affected Governmental Organizations.

The state should, by correspondence or other established notification procedures, ensure that all affected governmental organizations within the nonattainment region are informed of the purpose and schedule of the joint determination process. In many instances, an entire state may be designated as a nonattainment area for photochemical oxidants. However, many control strategies will still generally focus on urban regions. As a minimum, the following organizations should be notified in each region:

a. General purpose local governments.

b. Organizations of local elected officials (including all metropolitan planning organizations).

c. Air pollution control agencies (including the agency or agencies responsible for air quality maintenance planning).

d. Areawide A-95 clearinghouses.

e. Areawide and statewide water quality planning agencies designated under section 208 of the Federal Water Pollution Control Act.

f. Areawide solid waste management agencies.

g. Areawide comprehensive planning agencies.

h. Coastal management agencies.

i. Interested citizen groups.

3.3 Establishment of a Determination Process.

The state should ensure the establishment of a process for determination of agency responsibilities that will provide state and local elected officials of all major political subdivisions within a region with an opportunity for substantial involvement and that will enable the concerns of these officials to be adequately addressed. This may be done through a variety of mechanisms including the establishment of task forces with state and local government

representatives and the use of public meetings or hearings with elected officials of all major general purpose local governments within the affected regions invited. Where appropriate, existing forums such as meetings of organizations of local elected officials or meetings of air quality maintenance policy advisory groups should be used in the determination process.

All state and local officials participating in the determination of agency responsibilities should have the opportunity to propose agencies and their respective functions. All proposals should be made available to affected agencies and the general public for comment.

3.4 Formal Indentification of Responsibilities.

The initial joint determination of responsibilities shall at a minimum establish which level of government (although not necessarily the specific agency)—the state, local governments, regional agencies or any combination of these—shall be responsible for: (1) the development of an accurate, comprehensive, and current emission inventory; (2) the completion of an air quality analysis, using modeling techniques, to determine the level of control needed to attain standards; and (3) the evaluation and selection of control strategies for mobile sources, point sources, and area sources. An initial assignment of responsibilities for implementation and enforcement must be considered. However, it is expected that the final determination of such responsibilities will occur after the measures to be included in the plan revision have been relatively well defined.

When agreement is reached among the state and the participating local elected officials, memoranda of understanding or other comparable joint acknowledgements of responsibilities should be signed. Because duties and responsibilities for implementation and enforcement of plan revisions may change as development of the plan revisions proceeds, the determination of agency responsibilities need not be incorporated in the state implementation plan until the revisions are submitted for federal approval. The initial determination of responsibilities made by February 7, 1978, to meet the requirements of section 174, should be submitted by April 1, 1978, to the EPA with the certifications of lead planning organizations discussed in section 2 of these guidelines.

Appendix A—List of Key Dates

Date	Action
August 7, 1977	Clean Air Act amendments are signed into law.
December 5, 1977	States identify nonattainment areas.
February 3, 1978	EPA publishes list of nonattainment areas.
February 7, 1978	Local governments designate organizations of local officials.
	State and local elected officials complete joint determinations of responsibilities.
April 1, 1978	Governors transmit to EPA certification of lead planning organizations and joint determinations of responsibilities.
January 1, 1979	Governors transmit to EPA plan revision for nonattainment areas.

Appendix B—Section 174

Planning procedures

42 USC 7504

Consultation

"Sec. 174. (a) Within six months after the enactment of the Clean Air Act Amendments of 1977, for each region in which the national primary ambient air quality standard for carbon monoxide or photochemical oxidants will not be attained by July 1, 1979, the State and elected officials of affected local governments shall jointly determine which elements of a revised implementation plan will be planned for and implemented or enforced by the State and which such elements will be planned for and implemented or enforced by local governments or regional agencies, or any combination of local governments, regional agencies, or the State. Where possible within the time required under this subsection, the implementation plan required by this part shall be prepared by an organization of elected officials of local governments designated by agreement of the local governments in an affected area, and certified by the State for this purpose. Where such an organization has not been designated by agreement within six months after the enactment of the Clean Air Act Amendments of 1977, the Governor (or, in the case of an interstate area, Governors), after consultation with elected officials of local governments, and in accordance with the determination under the first sentence of this subparagraph, shall designate an organization of elected officials of local governments in the affected area or a State agency to prepare such plan. Where feasible, such organization shall be the metropolitan planning organization designated to conduct the continuing, cooperative and comprehensive transportation planning process for the area under section 134 of title 23, United States Code, or the organization responsible for the air quality maintenance planning process under regulations implementing this section, or the organization with both responsibilities.

"(b) The preparation of implementation plan provisions under this part shall be coordinated with the continuing, cooperative, and comprehensive transportation planning process required under section 134 of title 23, United States Code, and the air quality maintenance planning process required under section 110, and such planning processes shall take into account the requirements of this part.

Department of Health, Education, and Welfare

Office of Education

Arts Education Program; Proposed Rulemaking

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Parts 160g, 161c]

Arts Education Program

AGENCY: Office of Education, HEW.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commissioner of Education proposes to revise the regulations that govern the Arts Education Program as required by the Education Amendments of 1978.

The proposed regulations—

(a) Respond to the broadened eligibility provision in the legislation, which allows public and private agencies, organizations, and institutions, as well as State educational agencies (SEAs) and local educational agencies (LEAs), to compete for funds;

(b) Define new priorities and funding strategies; and

(c) Establish eligibility requirements and funding criteria for applications.

DATES: Comments must be received on or before August 17, 1979. A public meeting will be held on these proposed regulations in Washington, D.C. on May 30, 1979, from 3:00 to 4:30 p.m.

ADDRESSES: Comments should be addressed to Harold Arberg, Director, Arts and Humanities Staff, U.S. Office of Education, 400 Maryland Avenue, SW. (Room 3728, Donohoe Bldg.), Washington, D.C. 20202. The public meeting will be held in the auditorium, Room 1928, Regional Office Building 3, 7th and D Streets, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Lonna Jones, Arts Education Coordinator, Office of the Commissioner. (202) 472-5658.

SUPPLEMENTARY INFORMATION:

Background

The Arts Education Program provides the only Federal categorical support for arts education.

This support, at the elementary and secondary education levels, consists of:

(a) Competitive awards to SEAs, LEAs, and other public and private agencies, organizations, and institutions;

(b) Arrangements with the John F. Kennedy Center for the Performing Arts for model projects and programs in the performing arts for children and youth; and

(c) Arrangements with the National Committee/Arts for the Handicapped for model projects and programs for handicapped persons in all the arts.

These regulations address only the competitive grant awards under (a). Program arrangements with the Kennedy Center and the National Committee/Arts for the Handicapped, as well as technical assistance awards, will be funded by procurement contracts and are not part of these regulations.

Basis for Changes in the Regulations

Changes proposed in these regulations are based on the Commissioner's new priorities and funding strategies for the program, as well as the statutory changes.

The program focus, elementary and secondary arts education, is not altered by the amendments. However, the regulations establish new requirements that bring other levels of education, colleges, universities, and other community arts and educational resources, into partnerships with elementary and secondary schools.

Objectives

These regulations: (a) *Reaffirm the concept of the arts as an integral part of elementary and secondary curriculum.* The arts are often isolated from other areas of learning and from regular academic school programs. The law assumes that the arts should be essential and vital components of every student's education; that the arts provide students with useful insights into other areas of learning; and that a Federal program is appropriate to foster the interrelationship of the arts and education.

(b) *Clarify roles of the various applicants.* These proposed regulations establish requirements and criteria for a wide range of applicants.

The regulations establish minimum requirements ("elements") for cooperation to—

(1) Allow community resources, for example, museums, arts centers, artists, performers, parent groups, universities and colleges, to serve as arts resources for the schools;

(2) Strengthen SEA and LEA ties with State and community arts resources;

(3) Bring practicing professional artists into the retraining and development of teachers and administrators; and

(4) Encourage new approaches and initiatives from nonschool resources working cooperatively with SEAs and LEAs.

(c) *Set new funding strategies.* The approach until now has been to provide token or "seed" grants of $10,000 or less to as many States as possible. The new strategy concentrates funds on comparatively few projects, and these proposed regulations contemplate larger awards in fewer States. In order to encourage project commitment, the OE share of funding will be no more than 50 percent of project costs.

Funding priority will be given to those applicants who indicate capability to link together effectively existing school and community resources in support of school arts programs. This coordination will encourage increased interaction between schools and groups, cultural leaders, and others whose major focus is the arts.

(d) *Establish common criteria for all applicants.* The objective is to select projects with the greatest impact on elementary and secondary arts education, whether submitted by school or nonschool agencies.

(e) *Establish links with other Federal agencies.* The Commissioner chairs the Working Group on the Arts in Education, a subcommittee of the Federal Council on the Arts and the Humanities. Member agencies are: The National Endowments for the Arts and the Humanities, the National Institute of Education, the Institute of Museum Services, the John F. Kennedy Center for the Performing Arts, the National Gallery of Art, the Smithsonian Institution, and the Office of Education.

The eight agencies in the group share a central obligation to promote national goals, and a common interest in reaffirming the centrality of the arts in education and in working together to clarify agency relationships in the field.

As a basis for interagency cooperation, and as a commitment to strengthening combined Federal resources for the arts in education, the Commissioner may convene the Working Group or another committee consisting of Federal Council member agencies to review or comment on applications. Applications may be considered for joint support by the Office of Education and other Federal agencies that are members of the Council.

How the Regulations Are Intended to Work

An application may be submitted in one of three funding categories. However, an applicant may be funded for only one project—whether proposed singly by the applicant or jointly with other applicants.

The funding categories are: (1) State—for statewide projects; (2) urban or large community—for projects in standard metropolitan statistical areas with access to cultural resources; and (3)

rural or small community—for projects in areas isolated from metropolitan environments with limited or no cultural resources.

Each of the three categories has specific application requirements that are addressed in the regulations. All projects must be designed to—

(1) Provide opportunities for all students in the schools served by the project to acquire skills in and through several arts media, including at least dance, music, theater, and the visual arts; and

(2) Integrate these disciplines into the regular eductional program of the schools, rather than to include the peripherally or as extra-curricular activities.

Each applicant shall provide for a project advisory committee broadly representative of State and local arts and educational resources. A State project shall use its official State arts education advisory committee, if one exists. A local applicant shall submit an information copy of its application to the SEA for a 30-day comment period.

The proposed regulations give examples of types of project activities for which an applicant may request support. The Commissioner may approve projects for a maximum of three years; however, renewals are subject to availability of funds and review.

Applications are judged in the following categories; needs assessment; coordination; project administration; and results, end products, or outcome. The Commissioner may add 10 points to the total score of an application to achieve geographic distribution and project diversity.

Requirements in EDGAR

The proposed regulations do not cover certain application requirements and grantee responsibilities that are part of the Education Division's General Administrative Regulations (EDGAR). EDGAR replaces the General Provisions or Office of Education Program Regulations. The following are among the items applicable to this program that will be explained in EDGAR:

How to apply for a grant.

Certain conditions that must be met by a grantee.

The administrative responsibilities of a grantee. Where appropriate, proposed regulations reference other key provisions of EDGAR.

Public Participation

The Office of Education will hold a public meeting on these proposed regulations May 30, 1979, at the U.S. Office of Education, 400 Maryland Avenue, S.W., Washington, D.C. as part of the Commissioner's convocation on the Arts in Education, a one-day meeting of the three groups that comprise the Office of Education's Arts in Education Initiative. Participants in the Convocation will be:

(1) The Arts in Education Forum, a group of about 50 arts and educational association executives who serve national constituencies of arts administrators, teachers, principals, parents, community arts organizations, arts specialists, and artists;

(2) The Working Group for the Arts in Education of the Federal Council on the Arts and the Humanities, composed of eight Federal agencies with activities or programs in arts education;

(3) The Interbureau Task Force on the Arts in Education, Office of Education, composed of about 20 program officials from all OE bureaus.

A summary of the meeting transcript will be available after this meeting.

Invitation to Comment

Interested persons are invited to submit comments, suggestions, and recommendations to be considered prior to the issuance of final regulations.

Comments, suggestions, or recommendations may be sent to the address given at the beginning of this notice. All comments received on or before August 17, 1979, will be considered. They will be available for public inspection in Room 3728, Donohoe Building, 400 Sixth Street, SW., Washington, D.C. 20202, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday of each week except on Federal holidays.

Citation of Legal Authority

The reader will find a citation of statutory or other legal authority in parentheses on the line following each substantive provision.

PART 160g—[REDESIGNATED]

Part 160g, 45 CFR is redesignated as Part 161c and revised to read as follows:

PART 161c—ARTS EDUCATION PROGRAM

Subpart A—General

Sec.

161c.1 Arts Education Program.
161c.2 Eligible parties.
161c.3 Regulations that apply.
161c.4 Definitions.

Subpart B—What Kinds of Projects Does the Office of Education Assist Under This Program?

161c.9 Program elements.
161c.10 Elements of cooperation.
161c.11 Eligible activities.
161c.12 Project duration.

Subpart C—How is an Application Submitted?

161c.21 Limitation on number of applications.
161c.22 Joint application.
161c.23 Application requirements.
161c.24 State review of local applications.

Subpart D—How Is a Grant Made?

161c.31 How the Commissioner judges applications.
161c.32 Criteria for evaluation of applications.

Subpart E—What Conditions Must Be Met by a Grantee?

161c.41 Ongoing evaluation activities.
161c.42 Funding.
161c.43 Ineligible costs.

Authority: Title III, Part C, of the Elementary and Secondary Education Act, as amended by the Education Amendments of 1978, Pub. L. 95-561 (20 U.S.C. 2961).

Subpart A—General

§ 161c.1 Arts Education Program.

The Arts Education Program provides Federal financial assistance for the arts in elementary and secondary education.

(20 U.S.C. 2961)

§ 161c.2 Eligible parties.

(a) State educational agencies (SEAs), local educational agencies (LEAs), and nonprofit agencies, organizations, and institutions may apply for grants.

(b) Nonprofit agencies, organizations, and institutions may include, but are not limited to, libraries, museums, theaters, arts councils and centers, colleges and universities, performing arts groups, and parent, youth, and civic organizations.

(20 U.S.C. 2962)

§ 161c.3 Regulations that apply to the Arts Education Program.

(a) *Regulations for grants.* The following regulations apply to grants under the Arts Education Program:

(1) The Education Division General Administrative Regulations (EDGAR) in Part 100a (Direct Grant Programs) and Part 100c (Definitions).

(2) The regulations in this Part 161c.

(b) *Regulations for procurement contracts.* The Commissioner may award contracts to carry out the purposes of the Act. The regulations in this part, however, do not apply to procurement contracts under the Arts Education Program. These contracts are subject to:

(1) Federal and HEW procurement regulations in 41 CFR Chapters 1 and 3; and

(2) Requirements and criteria in particular requests for proposals (RFPs) published in the *Commerce Business Daily.*

(20 U.S.C. 1221e–3, 2982)

§ 161c.4 Definitions.

(a) The definitions in Part 100c of the Education Division General Administrative Regulations (EDGAR) apply to these regulations, including the following terms:

Commissioner
Equipment
Facilities
Local educational agency
Nonprofit
State
State educational agency

(b) In addition, the following definitions apply in these regulations:

"Act" means the Arts in Education Act of 1978, enacted by Pub. L. 95–561 as Part C of Title III of the Elementary and Secondary Education Act of 1965.

"Arts" includes, but is not limited to, music, dance, drama, folk art, creative writing, architecture and allied fields, painting, sculpture, photography, graphic and craft arts, industrial design, costume and fashion design, motion pictures, televison, radio, and tape and sound recording, the presentation, performance, execution, and exhibition of these art forms, and the study and application of the arts to the human environment. (20 U.S.C. 2961, 952(b), Pub. L. 89–209)

"Arts education program" means a program in which the arts are an integral part of elementary and secondary school education and that complies with § 161c.9 (Program elements).

"Urban or large community," for purposes of these regulations, means a standard metropolitan statistical area, as defined in section 617(9) of the Elementary and Secondary Education Act.

"Rural or small community," for purposes of this regulation, means a geographic area—other than a State—isolated from a metropolitan area. Cultural resources outside the schools are nonexistent or limited.

Subpart B—What Kinds of Projects Does the Office of Education Assist Under This Program?

§ 161c.9 Program elements.

The Commissioner awards grants to assist in establishing, conducting, or improving arts education programs. Each arts education program to be assisted under a project must be designed to—

(a) Provide opportunities for all students in the schools served by the project to acquire skills and understanding in and through several arts media, including, at least, dance, music, theater, and the visual arts; and

(b) Integrate these arts disciplines into the regular educational program of the schools served, rather than to include them on an extra-curricular or peripheral basis.

(20 U.S.C. 2961, 2962)

§ 161c.10 Elements of cooperation.

(a) An applicant shall develop—and describe in its application—a strategy to work collaboratively with State and/or local agencies, including SEAs and LEAs, schools, colleges and universities, arts organizations, and other community resource groups in the geographic area to be served by the proposed project.

(b) The applicant or grantee shall involve these groups in planning, conducting, and improving the assisted arts education program.

(c) To be considered for a grant, an arts education project must meet the following minimum elements of cooperation in the funding category under which the applicant applies:

(1) *All projects.* (i) The project must have a project advisory committee consisting of members broadly representative of education, the arts, business, the professions, and parent and youth groups in the project area. A State applicant shall use the State arts education advisory committee (such as the State Alliance for Arts Education Committee) if one exists and if it meets the requirements of a project advisory committee. A local applicant shall have on its project advisory committee some representation from the State arts education advisory committee, if one exists.

(ii) The advisory committee shall provide service to assist with the project, in areas such as—

(A) Planning the project proposal;

(B) Meeting with project staff to review and comment on the progress of the project;

(C) Acquainting the community with the project; and

(D) Disseminating information regarding the project.

(2) *State projects.* The proposed projects shall provide for interagency program planning and implementation with at least the SEA, the State arts education advisory committee, the State arts agency, a minimum of three LEAs in the State, and a variety of other State and local arts resource organizations, agencies, and institutions.

(3) *Urban or large community projects.* Projects cooperation shall include, but not be limited to—

(i) Serving the elementary and secondary students of a minimum of five cooperating schools located in one or more LEAs; and

(ii) Participation of a minimum of three arts and educational organizations, institutions, and agencies.

(4) *Rural or small community projects.* The projects shall utilize available arts and community resources within the project area and may also use resources from outside the area.

(20 U.S.C. 2962)

§ 161c.11 Eligible Activities.

Projects to make the arts an integral part of elementary and secondary curriculums may include, but need not be limited to—

(a) Activities related to program content, including—

(1) Leadership training and staff development;

(2) Community awareness programs;

(3) Technical assistance; and

(4) Material and curriculum development; and

(b) Activities related to program management, including—

(1) Planning and coordination;

(2) Evaluation; and

(3) Documentation and dissemination.

(20 U.S.C. 2962)

§ 161c.12 Project duration.

(a) The Commissioner may approve a project for a maximum of three years in accordance with EDGAR §§ 100a.250 and 100a.251.

(b) Any continuation awards for budget periods after the first budget period of an approved multi-year project are made for decreasing amounts of funds. See EDGAR §§ 100a.253–100a.254 for provisions on continuation awards and extension of a project.

(c) In deciding whether or not to make a continuation award, the Commissioner considers the factors in § 100a.253(a) of EDGAR and the degree to which a project shows school-community

cooperation and direct benefit to elementary and secondary arts education, as evidenced by site visits, reports, project evaluation, and documentation.

(20 U.S.C. 1221e–3, 2962)

Subpart C—How to Apply for a Grant

§ 161c.21 Limitation on number of applications.

The Commissioner approves no more than one project application from an applicant in a fiscal year, whether or not that application is filed jointly with other applicants.

(20 U.S.C. 1221e–3, 2962)

§ 161c.22 Joint application.

A single application may be submitted by a group of eligible parties. Joint applications are subject to §§ 100a.127 through 100a.129 of EDGAR.

(20 U.S.C. 1221e–3, 2962)

§ 161c.23 Application requirements.

(a) *Project requirements.* The Commissioner considers only applications that meet the requirements in the following sections of these regulations:

(1) Limitation on number of applications (§ 161c.21).

(2) Joint application (§ 161c.22).

(3) Program elements (§ 161c.9).

(4) Elements of cooperation (§ 161c.10).

(5) Cost-sharing requirements (§ 161c.42).

(b) *Criteria.* In preparing an application for a grant, an applicant should address each criterion in § 161c.32.

(20 U.S.C. 1221e–3, 2962)

(c) *Special requirements for SEA or LEA applicants.* (1) An application from an LEA shall comply with the requirements in §§ 100a.136 through 100a.141 of EDGAR concerning an open meeting on the application.

(2) A grant to an SEA or LEA is subject to EDGAR requirements in §§ 100a.680 and 100b.650 through 100b.663 concerning participation by private school children.

(20 U.S.C. 887e, 2942(b))

§ 161c.24 State review of local applications.

(a) The SEA, working with the State arts education advisory committee, may review and comment on local applications.

(b) If a State advisory committee does not exist, the SEA may assemble a committee for this purpose, using the elements for a project advisory committee in § 161c.10 as a guide.

(c) The local applicant shall send a copy of its application to the SEA, at the same time it sends the application to the Commissioner. The application must show that a copy was sent to the SEA.

(d) The SEA has 30 days after date of receipt of the application in which to review it.

(20 U.S.C. 1221e–3, 2962)

Subpart D—How is a Grant Made?

§ 161c.31 How the Commissioner judges applications.

(a) General selection procedures for applications are discussed in §§ 100a.216 through 100a.221 of EDGAR.

(b) In selecting new or continuing applications the Commissioner may use the Federal Council on the Arts and the Humanities to review or comment on applications.

(1) The Commissioner may, in conjunction with the Council, identify applications within the priorities of other funding agencies on the Council.

(2) The Commissioner may decline to fund applications within other agencies' priorities.

(3) Applications may be considered for joint support by the Office of Education and other Federal agencies which are members of the Council.

(c) The Commissioner may reserve funds for grants in each of the areas of State projects, urban or large community projects, and rural or small community projects.

(20 U.S.C. 2962)

§ 161c.32 Criteria for evaluation of applications.

The Commissioner evaluates applications within each of the funding areas on the basis of criteria in this section totaling 100 possible points.

(a) *Criteria related to program management.*—(1) *Needs assessment.* The extent to which the application—

(i) Identifies and analyzes, objectively and comprehensively, the elementary and secondary arts education needs in the area to be served. In judging this criterion, the Commissoner considers the application's description of the geographic location to be served by the proposed project, including school populations. (5 points)

(ii) Sets forth clear and measurable objectives that relate to the identified needs. (5 points)

(2) *Coordination.* (i) The quality of the applicant's plan to mobilize and coordinate activities of all agencies, organizations, and institutions involved. In judging this criterion, the Commissioner considers the application's description of how and why each entity is cooperating in the project. (10 points)

(ii) *Quality* of planning and its *consistency* with plans and/or activities previously carried out in the arts. In judging this criterion, the Commissioner considers how the project relates to the objectives of the State plan for the arts in education, if one exists. (5 points).

(iii) Extent of commitment and involvement of the SEA and LEAs in the proposed project. (10 points)

(iv) The extent to which the applicant makes effective use of the facilities and services of State and local agencies, institutions, and organizations, beyond the minimum requirements in § 161c.10. (5 points)

(3) *Project administration.* (i) The Commissioner uses EDGAR criteria worth a total of 30 points to evaluate applications. These criteria in §§ 100a.202 through 100a.205 concern the quality of the applicant's proposed plan of operation (10 points), key personnel (5 points), budget and cost-effectiveness (10 points), and evaluation plan (5 points).

(ii) The adequacy of provisions for disseminating information about the project. (10 points)

(b) *Criteria related to program content.* (1) The extent to which the proposed project is designed to serve the needs of all students in the project area, including the handicapped, gifted, and underprivileged. (5 points)

(2) *Results, end products, or outcome.* The extent to which the proposed project employs or will result in new and innovative approaches, methods, or materials of value in increasing the effectiveness of the arts in education. (15 points)

(c) *Distribution of projects.* (1) The Commissioner considers the extent to which approval of a project will contribute to—

(i) An equitable geographic distribution or arts education programs throughout the United States in both urban and rural areas; and

(ii) A variety in types of projects funded that collectively demonstrate diverse approaches to the arts in elementary and secondary education.

(2) The Commissioner may add up to 10 points to the score of an aplication to help achieve these aims.

(20 U.S.C. 2962)

Subpart E—What Conditions Must Be Met by a Grantee?

§ 161c.41 Ongoing evaluation activities.

(a) Throughout a project period, a grantee is responsible for evaluation activities that provide information for effective management of the project, including—

(1) Documentation of all activities for self-monitoring purposes; and

(2) Collection of statistics and data on students served, student and teacher achievements and attitudes, and relationships between other academic subjects and the arts.

(b) The Commissioner may require that some of the information in paragraph (a) of this section be included in project reports.

(c) Not more than 10 percent of total project costs may be used for outside evaluation of the project.

(20 U.S.C. 2962)

§ 161c.42 Funding.

(a) *OE share.* The Office of Education share is limited to a maximum of 50 percent of the costs of a project.

(b) *Project share.* The project share may include cash or in-kind contributions from the cooperating organizations, agencies, and institutions involved in the project. Salaries of regular full-time instructional personnel may not be included as in-kind contribution.

(20 U.S.C. 2962)

§ 161c.43 Ineligible costs.

Federal funds may not be used for—

(a) Equipment worth more than five percent of the total grant amount;

(b) Direct student financial aid; or

(c) Salaries for regular, full-time instructional personnel.

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Permanent Regulatory Program; Clearance of Recordkeeping Requirements by General Accounting Office

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

[30 CFR Ch. VII]

Surface Mining Reclamation and Enforcement Permanent Regulatory Program

AGENCY: Office of Surface Mining, Reclamation and Enforcement (OSM), U.S. Department of the Interior, Washington, D.C. 20240.

ACTION: Notice to confirm clearance of recordkeeping and reporting requirements.

SUMMARY: This notice confirms clearance by the General Accounting Office (GAO) of permanent regulatory program regulations requiring collection, submission or retention of information issued by the Office of Surface Mining Reclamation and Enforcement (OSM). Of the nearly 300 reporting and/or recordkeeping requirements submitted to GAO for clearance, 228 sections were approved and 65 sections were excluded from the clearance process either because they were exempted under 4 CFR 10.6(c) or were not subject to the Federal Reports Act. Three sections were not cleared due to the wording inconsistency and language of the regulations. These sections will be revised by way of an errata sheet to be published in the Federal Register at a later date.

EFFECTIVE DATE: May 7, 1979.

ADDRESSES:

Assistant Director, Management and Budget, Office of Surface Mining Reclamation and Enforcement, Department of the Interior, Washington, D.C. 20240, 202–343–4293.

Assistant Director, Regulatory Reports Review, U.S. General Accounting Office, Room 5106, 441 G Street NW., Washington, D.C. 20548.

FOR FURTHER INFORMATION CONTACT: Joan Shaw, 202–343–5447.

SUPPLEMENTAL INFORMATION: On March 13, 1979, the Secretary of Interior promulgated regulations at Title 30, Code of Federal Regulations, Chapter VII (44 FR 15312–15463), under the Surface Mining Control and Reclamation Act of 1977, Pub. L. 95–87, 30 U.S.C. 1201 *et seq.* Those regulations which required collection, submission or retention of information were promulgated subject only to review and clearance by the GAO pursuant to 44 U.S.C. 3512. The GAO solicited public comments on these regulations by public notice in the Federal Register on March 28, 1979 (44 FR 18467).

GAO clearance for each of the regulations listed at 44 FR 18532–18562 was given on May 7, 1979, except for sections 786.21, 805.14(b) and 807.11(a). Accordingly, all of these regulations, except for these three items, are effective as of May 7, 1979. However, once OSM forwards GAO a copy of the Federal Register notice revising these three items not cleared, clearance will be given.

GAO excluded from the clearance process the following:

Sections 741.11(a)(1); 743.11(b); 745.15(a); 745.16, 764.11, 764.15(a)(1), (2), (4), (5), and (6); 764.15(b)(1) and (2); 764.15(c); 764.17(a), (b), (c), and (e); 776.14; 786.12; 786.13; 786.14(a), 786.17(a) and (b); 788.15; 788.17; 805.14(a); 807.11(c); 807.11(f); 807.11(g); 808.12; 840.11(a); 840.11(b); 840.11(c); 842.12(a); 842.14; 842.15(a); 842.15(b); 843.11(a)(2); 843.11(b)(2), 843.11(c), 843.11(f); 843.12(a)(2); 843.12(b) and (e); 843.13(c), (d), and (e); 843.14(a), (b), and (d); 843.15(d) and (f); 845.17(a) and (b); 845.18(d); and 845.19(a).

Sections 745.15(a) and 745.16 were not subject to the Federal Reports Act because they were unlikely to apply to 10 or more respondents over the life of the regulations. Other sections listed above were either (1) not subject to the Federal Reports Act because they do not require reporting to the Federal Government or to a regulatory authority or do not impose recordkeeping requirements, or (2) they were exempt from clearance under 4 CFR 10.6(c)(5) or (c)(6) of GAO regulations.

The reporting requirements contained in 30 CFR 700.12(b) and 700.13 have been approved by the U.S. General Accounting Office under number B–190462 (RO589).

The recordkeeping requirements contained in 30 CFR 707.12 has been approved by the U.S. General Accounting Office under number B–190462 (RO590).

The reporting requirement contained in 30 CFR 730.12(b) has been approved by the U.S. General Accounting Office under number B–190462 (RO591).

The reporting requirements contained in 30 CFR 731.12(a), 731.13 and 731.14 have been approved by the U.S. General Accounting Office under number B–190462 (RO592).

The reporting requirements contained in 30 CFR 732.11(d), 732.13(f), 732.14, 732.16(a), 732.17(b), 732.17(f), 732.17(g), and recordkeeping requirement contained in 30 CFR 732.16(b) have been approved by the U.S. General Accounting Office under number B–190462 (RO593).

The reporting requirements contained in 30 CFR 733.12(a)(2) has been approved by the U.S. General Accounting Office under number B–190462 (RO594).

The reporting requirements contained in 30 CFR 741.11(c)(1), 741.12(c), 741.13(c), 741.15(a)(1), 741.15(b)(1), 741.21(b), 741.24(c), and 741.25(b) have been approved by the U.S. General Accounting Office under number B–190462 (RO595).

The reporting requirements contained in 30 CFR 742.11(a), 742.13(a), 742.18(c), and 742.18(d) have been approved by the U.S. General Accounting Office under number B–190462 (RO596).

The reporting requirements contained in 30 CFR 745.11 (a) and (b) have been approved by the U.S. General Accounting Office under number B–190462 (RO598).

The reporting requirements contained in 30 CFR 761.12(b)(2), 761.12(e), 761.12(f), and the recordkeeping requirement contained in 30 CFR 761.12(d) have been approved by the U.S. General Accounting Office under number B–190462 (RO599).

The reporting requirements contained in 30 CFR 764.13(b), 764.13(c), 764.19(b), and the recordkeeping requirements contained in 30 CFR 764.15(d), 764.21, and 764.25(b) have been approved by the U.S. General Accounting Office under number B–190462 (RO600).

The reporting requirements contained in 30 CFR 769.11 and 769.13 have been approved by the U.S. General Accounting Office under number B–190462 (RO601).

The reporting requirements contained in 30 CFR 771.15(c), 771.21(a)(1), 771.21(b)(2), 771.21(b)(3), and 771.23 have been approved by the U.S. General Accounting Office under number B–190462 (RO602).

The reporting requirements contained in 30 CFR 776.11 and 776.12 have been approved by the U.S. General Accounting Office under number B–190462 (RO603).

The reporting requirements contained in 30 CFR 778.13, 778.14, 778.15, 778.16, 778.17, 778.18, 778.19, 778.20, and 778.21 have been approved by the U.S. General Accounting Office under number B–190462 (RO604).

The reporting requirements contained in 30 CFR 779.11, 779.12, 779.13, 779.14, 779.15, 779.16, 779.17, 779.18, 779.19, 779.20, 779.24, 779.25, and 779.27 have been approved by the U.S. General Accounting Office under number B–190462 (RO605).

The reporting requirements contained in 30 CFR 780.11, 780.12, 780.13, 780.14, 780.15, 780.16, 780.18, 780.21, 780.23, 780.25, 780.27, 780.29, 780.31, 780.33, 780.35, and 780.37 have been approved by the U.S. General Accounting Office under number B–190462 (RO606).

The reporting requirements contained in 30 CFR 782.13, 782.14, 782.15, 782.16, 782.17, 782.18, 782.19, 782.20, and 782.21 have been approved by the U.S. General Accounting Office under number B–190462 (RO607).

The reporting requirements contained in 30 CFR 783.11, 783.12, 783.13, 783.14, 783.15, 783.16, 783.17, 783.18, 783.19, 783.20, 783.21, 783.22, 783.24, 783.25, and 783.27 have been approved by the U.S. General Accounting Office under number B–190462 (RO608).

The reporting requirements contained in 30 CFR 784.11, 784.12, 784.13, 784.14, 784.15, 784.16, 784.17, 784.18, 784.19, 784.20, 784.21, 780.22, 784.23, 784.24, and 784.25 have been approved by the U.S. General Accounting Office under number B–190462 (RO609).

The reporting and recordkeeping requirements contained in 30 CFR 785.13 (e), (f), (g), and (h); 785.14; 785.15; 785.16; 785.17(b) (1), (2), (4), (6), and (8); 785.18(c); 785.19; 785.20; 785.21; and 785.22 have been approved by the U.S. General Accounting Office under number B–190462 (RO610).

The reporting and recordkeeping requirements contained in 30 CFR 786.11 (a), (b), (c), and (d); 786.14(b); 786.15; 786.17(c); 786.19; and 786.23 (c) and (d) have been approved by the U.S. General Accounting Office under number B–190462 (RO611).

The reporting requirements contained in 30 CFR 788.12, 788.14, 788.18, and 788.19, and the recordkeeping requirements contained in 30 CFR 788.11 and 788.16 have been approved by the U.S. General Accounting Office under number B–190462 (RO612).

The reporting requirements contained in 30 CFR 800.11 and 800.12 have been approved by the U.S. General Accounting Office under number B–190462 (RO613).

The reporting requirement contained in 30 CFR 806.11(b) has been approved by the U.S. General Accounting Office under number B–190462 (RO615).

The reporting requirement contained in 30 CFR 807.11(e)(4) has been approved by the U.S. General Accounting Office under number B–190462 (RO616).

The reporting and recordkeeping requirements contained in 30 CFR Part 816, subsections 46(c)(4), 46(r), 46(t), 49(h), 52(a)(3), 52(b)(1)(iii), 53(a), 62, 64, 65(a)(2)(iii), 67, 68, 71(j), 82(a)(4), 82(b), 87, 91(b), 117(b)(4), 117(c) (1) and (3), 131(b), 133(c) (1) through (4), 133(c) (8) and (9), 150(d)(1), 152(d)(13), 160(d)(1), and 163(d) have been approved by the U.S. General Accounting Office under number B–190462 (RO618).

The reporting and recordkeeping requirements contained in 30 CFR Part 817, subsections 46(c)(4), 46(r), 46(t), 49(h), 52(a)(3), 52(b)(1)(iii), 53(a), 62, 65(b)(2)(iii), 67, 68, 71(j), 82(a)(4), 82(b), 87, 91(b), 117(b)(4), 117(c) (1) and (3), 131(b), 133(c) (1) through (4), 133(c) (8) and (9), 150(d)(1), 152(d)(13), 160(d)(1), and 163(d) have been approved by the U.S. General Accounting Office under number B–190462 (RO619).

The recordkeeping requirements contained in 30 CFR 822.14 (a) and (d) have been approved by the U.S. General Accounting Office under number B–190462 (RO620).

The reporting requirement contained in 30 CFR 826.12(b) has been approved by the U.S. General Accounting Office under number B–190462 (RO621).

The reporting requirements contained in 30 CFR 840.11(d)(3), 840.14(a), and 840.14(b) have been approved by the U.S. General Accounting Office under number B–190462 (RO622).

The reporting requirement contained in 30 CFR 843.16 has been approved by the U.S. General Accounting Office under number B–190462 (RO624).

The recordkeeping requirement contained in 30 CFR 845.18(c) has been approved by the U.S. General Accounting Office under number B–190462 (RO625).

Because OSM did not have the experience in fullfilling these recordkeeping and reporting requirements, estimating accurately the compliance burden estimates was very difficult. Therefore we are requesting that respondents inform OSM, no later than November 30, 1980, as to how long it took to comply with reporting requirements listed in this clearance notice. This will give OSM an opportunity to reevaluate its burden estimates and revise estimates where necessary.

The following sections may impose reporting requirements which duplicate information already submitted by respondents to other Federal or State agencies:

779.27, 780.14, 780.15, 780.25, 782, 783.25, 784.16, 784.23, 784.28, 816.46, 816.49, 816.81, 816.85, 816.86, 816.91–93, 817.46, 817.49, 817.81, 817.85, 817.91–93, 822.14(a), 822.14(d).

Where these sections, or any other sections, impose reporting requirements which duplicate any information that is required to be submitted to another Federal or a State agency, any person may comply with these regulations by submitting to the appropriate regulatory authority, in lieu of preparing new reports, one copy of such duplicate report. Information which is submitted as duplicative must be identical to the information required by these regulations in all substantive respects including, but not limited to, timeliness and detail of data, time span of data, geographic area, qualification of the preparer and other professional certification, specific maps, time tables, and plans, measurements or monitoring devices, design and construction specifications, required demonstrations and methods of notice.

During GAO's review, commenters and GAO staff identified, and OSM confirmed that the sections below require either reporting or recordkeeping but had not been previously submitted for GAO clearance:

30 CFR 776.13(b)
30 CFR 776.17(b)
30 CFR 779.21
30 CFR 779.22
30 CFR 784.26
30 CFR 785.17(b)(3)
30 CFR 785.17(b)(5)
30 CFR 785.17(b)(7)
30 CFR 786.15(a)(3)
30 CFR 786.25(b)(2)
30 CFR 786.25(b)(4)
30 CFR 807.11(d)
30 CFR 807.11(h)(ii)
30 CFR 816.49(i)
30 CFR 816.52(a)
30 CFR 816.52(b)(1)(ii)
30 CFR 816.95
30 CFR 816.116
30 CFR 817.49(i)
30 CFR 817.52(a)
30 CFR 817.52(b)(1)(ii)
30 CFR 817.95
30 CFR 817.116
30 CFR 843.14(c)

OSM will be submitting these sections to GAO during the week of June 4, 1979. These sections will not be effective until they have been cleared by GAO under the Federal Reports Act.

To determine what water quality and quantity information the Federal Government or organizations have collected and can make available to the public, you can contact:

National Water Data Exchange, Program Office (NAWDEX), U.S. Geological Survey, 421 National Center, Reston, Va. 22092, 703–860–6031.

Dated: June 8, 1979.

Walter N. Heine,

Director, Office of Surface Mining Reclamation and Enforcement.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
DOT/UMTA*	MSPB/OPM		DOT/UMTA*	MSPB/OPM
DOT/FRA*	LABOR		DOT/FRA*	LABOR
CSA	HEW/FDA		CSA	HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

*NOTE: As of June 14, 1979, the Urban Mass Transportation Administration and Federal Railroad Administration, Department of Transportation, will publish on the Monday/Thursday schedule.

REMINDERS

The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.

Rules Going Into Effect Today

FEDERAL COMMUNICATIONS COMMISSION

27994 5-14-79 / Private land mobile radio service; simplification of certain procedures for filing applications

List of Public Laws

Last Listing June 15, 1979

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (telephone 202-275-3030).

S. 7 / Pub. L. 96-22 "Veterans' Health Care Amendments of 1979". (June 13, 1979; 93 Stat. 47) Price $1.10.

S. 709 / Pub. L. 96-23 To authorize appropriations for the Coast Guard for fiscal years 1980 and 1981, and for other purposes. (June 13, 1979; 93 Stat. 68) Price $.60.

35195–35600

BOOK 2:
PAGES
35601–36000

Federal Register

Book 1 of 2 Books
Tuesday, June 19, 1979

Highlights

35280 **National School Lunch Program** USDA/FNS determines the value of donated agricultural commodities and other foods; effective 6–15–79

35980 **Energy Impacted Area Development Assistance** USDA/FmHA issues regulations concerning areas impacted by increased coal or uranium production, processing or transportation; effective 6–19–79 (Part VII of this issue)

35231 **Supplemental Food Program** USDA/FNS proposes funding formulas for women, infants and children; effective 6–19–79; comments by 8–3–79

35904 **Indian Reservations** USDA/FNS sets forth requirements for conducting the Food Stamp and Food Distribution Programs; effective 6–19–79 (Part III of this issue)

35282 **Hydrocarbon, Coal, and Coke Consumption** Commerce/Census provides information on consumption of fuels for nonenergy purposes

35217 **Certain Alcohol Fuels** Treasury/IRS provides temporary regulations concerning exemption from motor fuels excise taxes

35604 **Gun Control** Treasury/BATF publishes firearms laws of political subdivisions and states (Part II of this issue)

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Area Code 202–523–5240

Highlights

35297 **Alcohol, Drug Abuse, and Mental Health Administration** HEW/PHS establishes an Office of Extramural Project Review and Extramural Policy and Project Review

35946 **Advisory Councils and Boards** HEW/NIH requests nominations for members of councils and boards; nominations by 8–1–79 (Part IV of this issue)

35295 **Spironolactone** HEW/FDA announces efficacy review results and marketing conditions; comments by 8–20–79

35956 **Inmate Correspondence** Justice/Prisons Bureau provides rules concerning control, custody, care, treatment and instruction; effective 7–1–79; comments by 10–1–79 (Part VI of this issue)

35286 **Motor Vehicle Information and Cost Savings** EPA summarizes retrofit device evaluation of the "Malpassi Filter King"

35201 **Sugar Beet Crop Insurance** USDA/FCIC prescribes shorter, clearer, and more simplified procedures; effective 6–19–79

35195 **Barley Crop Insurance** USDA/FCIC prescribes shorter, clearer and more simplified procedures; effective 6–19–79

35208 **Food Additives** EPA includes paint-on application of chlorpyritos regulations in food-handling establishments; effective 6–19–79

35209 **Aluminium Phosphide** EPA removes restrictions prohibiting contact in manufacturing beer; effective 6–19–79

35230 **Cigar-Binder Tobacco** USDA/ASCS investigates operations of marketing quota; comments by 7–19–79

35256 **Seaway Regulations** DOT/SLS proposes amendments to safety procedures; comments by 8–3–79

35356 **Sunshine Act Meetings**

Separate Parts of This Issue

35604 **Part II, Treasury/BATF**
35904 **Part III, USDA/FNS**
35946 **Part IV, HEW/NIH**
35953 **Part V, EPA**
35956 **Part VI, Justice/Prisons Bureau**
35980 **Part VII, USDA/FmHA**

Rules and Regulations

Federal Register
Vol. 44, No. 118
Tuesday, June 19, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 295

Availability of Information and Records to the Public; Changes in Addresses; Correction

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule; correction.

SUMMARY: The purpose of this document is to correct errors in FR Doc. 79-13287 appearing at pgs. 25396-25397 in the Federal Register of May 1, 1979.

EFFECTIVE DATE: Upon publication in the Federal Register.

FOR FURTHER INFORMATION CONTACT: Joseph M. Scordato, Freedom of Information Officer, Administrative Services Division, Food and Nutrition Service, USDA, Washington, D.C. 20250 (202-447-8278).

SUPPLEMENTARY INFORMATION: It is impractical and unnecessary to follow the proposed rule making and public participation procedure of 5 U.S.C. and Executive Order 12044 since this is a technical amendment that is nonsubstantive in nature. The errors and corrections are as follows:

1. On Page 25396, the fifth amendment erroneously omitted a reference to paragraph (d), as well as omitting a reference to and the amendatory language of paragraphs (e) and (f). It should be corrected to read as follows:

"5. In § 295.7 the second sentence and paragraphs (a), (b), (c), (d), and (e) are revised and paragraph (f) is added to read as follows:

§ 295.7 Public inspection and copying.

* * * * *

(e) Supplemental Food Program materials—Room 4405, Auditors Building, 14th and Independence Ave. S.W., Washington, D.C.

(f) All other FNS materials—Inquire at Administrative Services, Division, Room 792, 500 12th Street S.W., Washington, D.C., for specific locations."

2. On page 25396, the sixth amendment erroneously used the term "subparagraphs" rather than "paragraphs" in referring to paragraphs (g) and (h).

3. On page 25397, the seventh amendment erroneously omitted a reference to paragraph (e). It should be corrected to read:

"7. In § 295.9 paragraphs (a), (b), (c) and (d) are revised and paragraph (e) is added to read as follows:" (5 U.S.C. 301, 552; 7 CFR 1.1-1.16).

Done this 12th day of June, 1979, at Washington, D.C.

Robert Greenstein,
Acting Administrator,
Food and Nutrition Service.

Federal Crop Insurance Corporation

7 CFR Parts 401 and 419

Barley Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation.

ACTION: Final rule.

SUMMARY: This rule prescribes procedures for insuring barley crops effective with the 1980 crop year. The rule combines provisions from previous regulations for insuring barley in a shorter, clearer, and more simplified document which will make the program more effective administratively. This rule is promulgated under the authority contained in the Federal Crop Insurance Act, as amended.

EFFECTIVE DATE: June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202-447-3325.

SUPPLEMENTARY INFORMATION: The Federal Crop Insurance Corporation (FCIC) published a notice of proposed rulemaking in the Federal Register (44 FR 23229, Thursday, April 19, 1979) outlining the prescribed procedures for insuring barley crops effective with the 1980 crop year. In the notice, FCIC, under the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), proposed that a new Part 419 of Chapter IV in Title 7 of the Code of Federal Regulations be established to prescribe procedures for insuring barley crops effective with the 1980 crop year to be known as 7 CFR Part 419 Barley Crop Insurance.

All previous regulations applicable to insuring barley crops as found in 7 CFR 401.101-401.111 and 401.125 are not applicable to 1980 and succeeding barley crops but remain in effect for FCIC barley insurance policies issued for the crop years prior to 1980.

It has been determined that combining all previous regulations for insuring barley crops into one shortened, simplified and clear regulation would be more effective administratively. In addition, Part 419 contains a premium adjustment table to provide maximum individual premium discounts for good insuring experience of up to 50 percent and premium increases for unfavorable insuring experience. The good experience discounts provided under the previous barley crop insurance policies have been discontinued; however, the premium adjustment table will result in more premium discounts for good experience than were formerly provided under the good experience discounts in the previous policy. Further, Part 419 (1) provides that any premium balance not paid by the termination date will be increased by a 9 percent service fee with a 9 percent simple interest charge applying to any unpaid premium balance at the end of each subsequent 12-month period, (2) extends the 15-day period for submitting a notice of damage or loss to 30 days and eliminates the 60-day period for filing a claim for loss, (3) establishes the production guarantee on a harvested basis with a reduction of the lesser of 4 bushels or 20 percent of the guarantee for any unharvested acreage, (4) provides 3 levels of insurance coverage on each barley crop in each county, (5) provides new termination dates for indebtedness and sales closing dates which more nearly reflect current farming practices, and (6) increases the limitation from $5,000 to $20,000 in cases involving good faith reliance on misrepresentation (as found in 7 CFR

Part 419.5 of the regulations) wherein the Manager of the Corporation is authorized to take action to grant relief. The Barley Crop Insurance Regulations provide a December 31 cancellation date for all counties in which only spring barley is insurable and a June 30 date for all other counties. These regulations and any amendments thereto, must be placed on file in the Corporation's office for each particular county in which the insurance is available by not later than 15 days prior to June 30 or December 31 (for spring barley) in order to be effective for the crop year.

Under the provisions of Executive Order No. 12044, and the Administrative Procedure Act (5 U.S.C. 553 (b) and (c)), the public was given an opportunity to submit written comments, data, and views on the proposed regulations, but none were received. Therefore, with the exception of minor and nonsubstantive corrections to language, the regulations, as contained in the proposed rule, are hereby issued as a final rule to be in effect starting with the 1980 crop year.

Final Rule

§ 401.125 [Reserved]

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby deletes and reserves 7 CFR 401.125 with such regulations as are contained therein remaining in effect for FCIC insurance policies issued for crop years prior to 1980, and issues a new Part 419 in Chapter IV of Title 7 of the Code of Federal Regulations (7 CFR Part 419) to be known as the Barley Crop Insurance Regulations, which shall remain in effect, until amended or superseded, for the 1980 and succeeding crop years, to read as follows:

PART 419—BARLEY CROP INSURANCE

Subpart—Regulations for the 1980 and Succeeding Crop Years

Sec.

419.1 Availability of barley insurance.
419.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.
419.3 Public notice of indemnities paid.
419.4 Creditors.
419.5 Good faith reliance on misrepresentation.
419.6 The contract.
419.7 The application and policy.

Authority: Secs. 506, 516, 52 Stat. 73, as amended 77, as amended (7 U.S.C. 1506, 1516).

Subpart—Regulations for the 1980 and Succeeding Crop Years

§ 419.1 Availability of Barley Insurance.

Insurance shall be offered under the provisions of this subpart on barley in counties within limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation. Before insurance is offered in any county, there shall be published by appendix to this chapter the names of the counties in which barley insurance will be offered.

§ 419.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.

(a) The Manager shall establish premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed for barley which shall be shown on the county actuarial table on file in the office for the county and may be changed from year to year.

(b) At the time the application for insurance is made, the applicant shall elect a coverage level and price at which indemnities shall be computed from among those levels and prices shown on the actuarial table for the crop year.

§ 419.3 Public notice of indemnities paid.

The Corporation shall provide for posting annually in each county at each county courthouse a listing of the indemnities paid in the county.

§ 419.4 Creditors.

An interest of a person in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, or an involuntary transfer shall not entitle the holder of the interest to any benefit under the contract except as provided in the policy.

§ 419.5 Good faith reliance on misrepresentation.

Notwithstanding any other provision of the barley insurance contract, whenever (a) an insured person under a contract of crop insurance entered into under these regulations, as a result of a misrepresentation or other erroneous action or advice by an agent or employee of the Corporation, (1) is indebted to the Corporation for additional premiums, or (2) has suffered a loss to a crop which is not insured, or for which the insured person is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured person believed to be insured, or believed the terms of the insurance contract to have been complied with or waived, and (b) the Board of Directors of the Corporation, or the Manager in cases involving not more than $20,000, finds (1) that an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (2) that said insured person relied thereon in good faith, and (3) that to require the payment of the additional premiums or to deny such insured's entitlement to the indemnity would not be fair and equitable, such insured person shall be granted relief the same as if otherwise entitled thereto.

§ 419.6 The contract.

(a) The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. Such acceptance shall be effective upon the date the notice of acceptance is mailed to the applicant. The contract shall cover the barley crop as provided in the policy. The contract shall consist of the application, the policy, the attached appendix, and the provisions of the county actuarial table. Any changes made in the contract shall not affect its continuity from year to year. Copies of forms referred to in the contract are available at the office for the county.

§ 419.7 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation may be made by any person to cover such person's insurable share in the barley crop as landlord, owner-operator, or tenant. The application shall be submitted to the Corporation at the office for the county on or before the applicable closing date on file in the office for the county.

(b) The Corporation reserves the right to discontinue the acceptance of applications in any county upon its determination that the insurance risk involved is excessive, and also, for the same reason, to reject any individual application. The Manager of the Corporation is authorized in any crop year to extend the closing date for submitting of applications or contract changes in any county, by placing the extended date on file in the office for the county and publishing a notice in the **Federal Register** upon the Manager's determination that no adverese selectivity will result during the period of such extension: *Provided, however,* That if adverse conditions should develop during such period, the

Corporation will immediately discontinue the acceptance of applications.

(c) In accordance with the provisions governing changes in the contract contained in policies issued under FCIC regulations for the 1980 and succeeding crop years, a contract, in the form provided for under this subpart, will come into effect as a continuation of a barley contract issued under such prior regulations, without the filing of a new application.

(d) The provisions of the application and Barley Insurance Policy for the 1980 and Succeeding Crop Years, and the Appendix to the Barley Insurance Policy are as follows:

United States Department of Agriculture

Federal Crop Insurance Corporation

Application for 19—— and Succeeding Crop Years

Barley Crop Insurance Contract

_____

(Contract number)

_____

(Identification number)

_____

(Name and address) (Zip Code)

_____

(County) (State)

Type of entity _____

Applicant is over 18 Yes—— No——

A. The applicant, subject to the provisions of the regulations of the Federal Crop Insurance Corporation (herein called "Corporation"), hereby applies to the Corporation for insurance on the applicant's share in the barley seeded on insurable acreage as shown on the county actuarial table for the above-stated county. The applicant elects from the actuarial table the coverage level and price at which indemnities shall be computed. THE PREMIUM RATES AND PRODUCTION GUARANTEES SHALL BE THOSE SHOWN ON THE APPLICABLE COUNTY ACTUARIAL TABLE FILED IN THE OFFICE FOR THE COUNTY FOR EACH CROP YEAR.

Level election _____

Price election _____

Example: For the 19— crop year only (100% share)

Location/ farm No.	Guarantee per acre[1]	Premium per acre	Practice

[1] Your guarantee will be on a unit basis (bushels X per acre guarantee X share).

B. WHEN NOTICE OF ACCEPTANCE OF THIS APPLICATION IS MAILED TO THE APPLICANT BY THE CORPORATION, the contract shall be in effect for the first crop year specified above, unless the time for submitting applications has passed at the time this application is filed, AND SHALL CONTINUE FOR EACH SUCCEEDING CROP YEAR UNTIL CANCELED OR TERMINATED as provided in the contract. This accepted application, the following barley insurance policy, the attached appendix, and the provisions of the county actuarial table showing the production guarantees, coverage levels, premium rates, prices for computing indemnities, insurable and uninsurable acreage, shall constitute the contract. Additional information regarding contract provisions can be found in the county regulations folder on file in the office for the county. No term or condition of the contract shall be waived or changed except in writing by the Corporation.

Barley Crop Insurance Policy

Terms and conditions

Subject to the provisions in the attached appendix:

1. *Causes of loss.* (a) Causes of loss insured against. The insurance provided is against unavoidable loss of production resulting from adverse weather conditions, insects, plant disease, wildlife, earthquake or fire occurring within the insurance period, subject to any exceptions, exclusions or limitations with respect to causes of loss shown on the actuarial table.

(b) Causes of loss not insured against. The contract shall not cover any loss of production, as determined by the Corporation, due to (1) the neglect or malfeasance of the insured, any member of the insured's household, the insured's tenants or employees, (2) failure to follow recognized good farming practices, (3) damage resulting from the backing up of water by any governmental or public utilities dam or reservoir project, or (4) any cause not specified as an insured cause in this policy as limited by the actuarial table.

2. *Crop and acreage insured.* (a) The crop insured shall be barley which is seeded for harvest as grain and which is grown on insured acreage for which the actuarial table shows a guarantee and premium rate per acre and, where so provided on the actuarial table, a mixture of barley with oats or wheat or both seeded for harvest as grain. The production from such mixture shall be counted as barley on a weight basis.

(b) The acreage insured for each crop year shall be that acreage seeded to barley on insurable acreage, as shown on the actuarial table and the insured's share therein as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect: *Provided,* That insurance shall not attach or be considered to have attached as determined by the Corporation to any acreage (1) where premium rates are established by farming practices on the actuarial table, and the farming practices carried out on any acreage are not among those for which a premium rate has been established, (2) not reported for insurance as provided in section 3 if such acreage is irrigated and an irrigated practice is not provided for such acreage on the actuarial table, (3) which is destroyed and after such destruction it was practical to reseed to barley and such acreage was not reseeded, (4) initially seeded after the date on file in the office for the county which has been established by the Corporation as being too late to initially seed and expect a normal crop to be produced, (5) of volunteer barley, (6) seeded to a type or variety of barley not established as adapted to the area or shown as noninsurable on the actuarial table, or (7) seeded with another crop, except as otherwise provided herein.

(c) Insurance may attach only by written agreement with the Corporation on acreage which is seeded for the development or production of hybrid seed or for experimental purposes.

3. *Responsibility of insured to report acreage and share.* The insured shall submit to the Corporation on a form prescribed by the Corporation, a report showing (a) all acreage of barley seeded in the county (including a designation of any acreage to which insurance does not attach) in which the insured has a share and (b) the insured's share therein at the time of seeding. Such report shall be submitted each year not later than the acreage reporting date on file in the office for the county.

4. *Production guarantees, coverage levels and prices for computing indemnities.* (a) For each crop year of the contract, the production guarantees, coverage levels, and prices at which indemnities shall be computed shall be those shown on the actuarial table.

(b) The production guarantee per acre shall be reduced by the lesser of 4 bushels or 20 percent for any unharvested acreage.

5. *Annual premium.* (a) The annual premium is earned and payable at the

time of seeding and the amount thereof shall be determined by multiplying the insured acreage times the applicable premium per acre, times the insured's share at the time of seeding, times the applicable premium adjustment percentage in subsection (c) of this section.

(b) For premium adjustment purposes, only the years during which premiums were earned shall be considered.

(c) The premium shall be adjusted as shown in the following table:

Percent Adjustments for Favorable Continuous Insurance Experience

Loss ratio[1] through previous crop year	Number of years continuous experience through previous year															
	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15 or more

[1] Loss Ratio means the ratio of indemnity(ies) paid to premium(s) earned.

[2] Only the most recent 15 crop years will be used to determine the number of "Loss Years" (A crop year is determined to be a "Loss Year" when the amount of indemnity for the year exceeds the premium for the year).

(d) Any amount of premium for an insured crop which is unpaid on the day following the termination date for indebtedness for such crop shall be increased by a 9 percent service fee, which increased amount shall be the premium balance, and thereafter, at the end of each 12-month period, 9 percent simple interest shall attach to any amount of the premium balance which is unpaid: *Provided,* When notice of loss has been timely filed by the insured as provided in section 7 of this policy, the service fee will not be charged and the contract will remain in force if the premium is paid in full within 30 days after the date of approval or denial of the claim for indemnity; *however,* if any premium remains unpaid after such date, the contract will terminate and the amount of premium outstanding shall be increased by a 9 percent service fee, which increased amount shall be the premium balance. If such premium balance is not paid within 12 months immediately following the termination date, 9 percent simple interest shall apply from the termination date and each year thereafter to any unpaid premium balance.

(e) Any unpaid amount due the Corporation may be deducted from any indemnity payable to the insured by the Corporation or from any loan or payment to the insured under any Act of Congress or program administered by the U.S. Department of Agriculture, when not prohibited by law.

6. *Insurance period.* Insurance on insured acreage shall attach at the time the barley is seeded and shall cease upon the earliest of (a) final adjustment of a loss, (b) combining, threshing, or removal of the barley from the field, (c) October 31 of the calendar year in which barley is normally harvested, or (d) total destruction of the insured barley crop.

7. *Notice of damage or loss.* (a) Any notice of damage or loss shall be given promptly in writing by the insured to the Corporation at the office for the county.

(b) Notice shall be given promptly if, during the period before harvest, the barley on any unit is damaged to the extent that the insured does not expect to further care for the crop or harvest any part of it, or if the insured wants the consent of the Corporation to put the acreage to another use. No insured acreage shall be put to another use until the Corporation has made an appraisal of the potential production of such acreage and consents in writing to such other use. Such consent shall not be given until it is too late or impractical to reseed to barley. Notice shall also be given when such acreage has been put to another use.

(c) In addition to the notices required in paragraph (b) of this section, if an indemnity is to be claimed on any unit, the insured shall give written notice thereof to the Corporation at the office for the county not later than *30 DAYS* after the earliest of (1) the date harvest is completed on the unit, (2) the calendar date for the end of the insurance period, or (3) the date the entire barley crop on the unit is destroyed, as determined by the Corporation. The Corporation

reserves the right to provide additional time if it determines there are extenuating circumstances.

(d) Any insured acreage which is not to be harvested and upon which an indemnity is to be claimed shall be left intact until inspected by the Corporation.

(e) The Corporation may reject any claim for indemnity if any of the requirements of this section are not met.

8. *Claim for indemnity.* (a) It shall be a condition precedent to the payment of any indemnity that the insured (1) establish the total production of barley on the unit and that any less of production was directly caused by one or more of the insured causes during the insurance period for the crop year for which the indemnity is claimed and (2) furnish any other information regarding the manner and extent of loss as may be required by the Corporation.

(b) Indemnities shall be determined separately for each unit. The amount of indemnity for any unit shall be determined by (1) multiplying the insured acreage of barley on the unit by the applicable production guarantee per acre, which product shall be the production guarantee for the unit, (2) subtracting therefrom the total production of barley to be counted for the unit, (3) multiplying the remainder by the applicable price for computing indemnities, and (4) multiplying the result obtained in step (3) by the insured share: *Provided,* That if the premium computed on the insured acreage and share is more than the premium computed on the reported acreage and share, the amount of indemnity shall be computed on the insured acreage and share and then reduced proportionately.

(c) The total production to be counted for a unit shall be determined by the Corporation and shall include all harvested and appraised production.

(1) Mature production which grades No. 4 or better shall be reduced .12 percent for each .1 percentage point of moisture in excess of 14.5 percent, and if, due to insurable causes, any barley does not grade No. 4 or better, or is graded smutty, garlicky, or ergoty, in accordance with the Official U.S. Grain Standards, the production shall be adjusted by (i) dividing the value per bushel of the damaged barley (as determined by the Corporation) by the price per bushel of U.S. No. 2 barley and (ii) multiplying the result by the number of bushels of such barley. The applicable price for No. 2 barley shall be the local market price on the earlier of: the day the loss is adjusted or the day the damaged barley was sold.

(2) Any harvested production from volunteer crops growing with the seeded barley crop or small grains seeded in the growing barley crop on acreage which the Corporation has not given consent to be put to another use shall be counted as barley on a weight basis.

(3) Appraised production to be counted for a unit shall include: (i) the greater of the appraised production or 50 percent of the applicable guarantee for any acreage which, with the consent of the Corporation, is seeded before barley harvest becomes general in the current crop year to any other crop insurable on such acreage (excluding any crop(s) maturing for harvest in the following calendar year), (ii) any appraisals by the Corporation for potential production on harvested acreage and for uninsured causes and poor farming practices, (iii) not less than the applicable guarantee for any acreage which is abandoned or put to another use without prior written consent of the Corporation or damaged solely by an uninsured cause, and (iv) only the appraisal in excess of the lesser of 4 bushels or 20 percent of the production guarantee for all other unharvested acreage.

(d) The appraised potential production for acreage for which consent has been given to be put to another use shall be counted as production in determining the amount of loss under the contract. *However,* if consent is given to put acreage to another use and the Corporation determines that any such acreage (1) is not put to another use before harvest of barley becomes general in the county, (2) is harvested, or (3) is further damaged by an insured cause before the acreage is put to another use, the indemnity for the unit shall be determined without regard to such appraisal and consent.

9. *Misrepresentation and fraud.* The Corporation may void the contract without affecting the insured's liability for premiums or waiving any right including the right to collect any unpaid premiums if, at any time, the insured has concealed or misrepresented any material fact or committed any fraud relating to the contract, and such voidance shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

10. *Transfer of insured share.* If the insured transfers any part of the insured share during the crop year, protection will continue to be provided according to the provisions of the contract to the transferee for such crop year on the transferred share, and the transferee shall have the same rights and responsibilities under the contract as the original insured for the current crop year. Any transfer shall be made on an approved form.

11. *Records and access to farm.* The insured shall keep or cause to be kept for two years after the time of loss, records of the harvesting, storage, shipments, sale or other disposition of all barley produced on each unit including separate records showing the same information for production from any uninsured acreage. Any persons designated by the Corporation shall have access to such records and the farm for purposes related to the contract.

12. *Life of contract: Cancellation and termination.* (a) The contract shall be in effect for the crop year specified on the application and may not be canceled for such crop year. Thereafter, either party may cancel the insurance for any crop year by giving a signed notice to the other on or before the cancellation date preceding such crop year.

(b) Except as provided in section 5(d) of this policy, the contract will terminate as to any crop year if any amount due the Corporation under this contract is not paid on or before the termination date for indebtedness preceding such crop year: *Provided,* That the date of payment for premium (1) if deducted from an indemnity claim shall be the date the insured signs such claim or (2) if deducted from payment under another program administered by the U.S. Department of Agriculture, shall be the date such payment was approved.

(c) Following are the cancellation and termination dates:

State/county	Cancellation date	Termination date for indebtedness
Arizona, Delaware, Maryland, North Carolina, and Pennsylvania	June 30	October 10.
California:		
Modoc and Siskiyou Counties	December 31	March 31.
All other California counties	June 30	October 10.
Idaho:		
Idaho County and all counties lying north thereof	June 30	November 30.
All other Idaho counties	December 31	March 15.
Oregon:		
Klamath and Malheur Counties	December 31	March 31.
All other Oregon counties	June 30	November 30.
Washington	June 30	November 30.
All other states	December 31	March 31.

(d) In the absence of a notice from the insured to cancel, and subject to the provisions of subsections (a), (b), and (c) of this section and section 7 of the Appendix, the contract shall continue in force for each succeeding crop year.

Appendix

(Additional Terms & Conditions)

1. *Meaning of Terms*

For the purposes of barley crop insurance: (a) "Actuarial table" means the forms and related material for the crop year approved by the Corporation which are on file for public inspection in the office for the county, and which show the production guarantees, coverage levels, premium rates, prices for computing indemnities, insurable and uninsurable acreage, and related information regarding barley insurance in the county.

(b) "County" means the county shown on the application and any additional land located in a local producing area bordering on the county, as shown on the actuarial table.

(c) "Crop year" means the period within which the barley crop is normally grown and shall be designated by the calendar year in which the barley crop is normally harvested.

(d) "Harvest" means the severance of mature barley from the land for combining or threshing.

(e) "Insurable acreage" means the land classified as insurable by the Corporation and shown as such on the county actuarial table.

(f) "Insured" means the person who submitted the application accepted by the Corporation.

(g) "Office for the county" means the Corporation's office serving the county shown on the application for insurance or such office as may be designated by the Corporation.

(h) "Person" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

(i) "Share" means the interest of the insured as landlord, owner-operator, or tenant in the insured barley crop at the time of seeding as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect, and no other share shall be deemed to be insured: *Provided,* That for the purpose of determining the amount of indemnity, the insured share shall not exceed the insured's share at the earliest of (1) the date of beginning of harvest on the unit, (2) the calendar date for the end of the insurance period, or (3) the date the entire crop on the unit is destroyed, as determined by the Corporation.

(j) "Tenant" means a person who rents land from another person for a share of the barley crop or proceeds therefrom.

(k) "Unit" means all insurable acreage of barley in the county on the date of seeding for the crop year (1) in which the insured has a 100 percent share, or (2) which is owned by one entity and operated by another entity on a share basis. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the barley crop on such land shall be considered as owned by the lessee. Land which would otherwise be one unit may be divided according to applicable guidelines on file in the office for the county, or by written agreement between the Corporation and the insured. The Corporation shall determine units as herein defined when adjusting a loss, notwithstanding what is shown on the acreage report, and has the right to consider any acreage and share reported by or for the insured's spouse or child or any member of the insured's household to be the bona fide share of the insured or any other person having the bona fide share.

2. *Acreage Insured*

(a) The Corporation reserves the right to limit the insured acreage of barley to any acreage limitations established under any Act of Congress, provided the insured is so notified in writing prior to the seeding of barley.

(b) If the insured does not submit an acreage report on or before the acreage reporting date on file in the office for the county, the Corporation may elect to determine by units the insured acreage and share or declare the insured acreage on any unit(s) to be "zero". If the insured does not have a share in any insured acreage in the county for any year, the insured shall submit a report so indicating. Any acreage report submitted by the insured may be revised only upon approval of the Corporation.

3. *Irrigated Acreage*

(a) Where the actuarial table provides for insurance on an irrigated practice, the insured shall report as irrigated only the acreage for which the insured has adequate facilities and water to carry out a good irrigation practice at the time of seeding.

(b) Where irrigated acreage is insurable, any loss of production caused by failure to carry out a good irrigation practice, except failure of the water supply from an unavoidable cause, occurring after the beginning of seeding, as determined by the Corporation, shall be considered as due to an uninsured cause. The failure or breakdown of irrigation equipment or facilities shall not be considered as a failure of the water supply from an unavoidable cause.

4. *Annual Premium*

(a) If there is no break in the continuity of participation, any premium adjustment applicable under section 5 of the policy shall be transferred to (1) the contract of the insured's estate or surviving spouse in case of death of the insured, (2) the contract of the person who succeeds the insured if such person had previously participated in the farming operation, or (3) the contract of the same insured who stops farming in one county and starts farming in another county.

(b) If there is a break in the continuity of participation, any reduction in premium earned under section 5 of the policy shall not thereafter apply; *however,* any previous unfavorable insurance experience shall be considered in premium computation following a break in continuity.

5. *Claim for and Payment of Indemnity*

(a) Any claim for indemnity on a unit shall be submitted to the Corporation on a form prescribed by the Corporation.

(b) In determining the total production to be counted for each unit, production from units on which the production has been commingled will be allocated to such units in proportion to the liability on each unit.

(c) There shall be no abandonment to the Corporation of any insured barley acreage.

(d) In the event that any claim for indemnity under the provisions of the contract is denied by the Corporation, an action on such claim may be brought against the Corporation under the provisions of 7 U.S.C. 1508(c): *Provided,* That the same is brought within one year after the date notice of denial of the claim is mailed to and received by the insured.

(e) Any indemnity will be payable within 30 days after a claim for indemnity is approved by the Corporation. However, in no event shall the Corporation be liable for interest or damages in connection with any claim for indemnity whether such claim be approved or disapproved by the Corporation.

(f) If the insured is an individual who dies, disappears, or is judicially declared incompetent, or the insured is an entity other than an individual and such entity is dissolved after the barley is seeded for any crop year, any indemnity will be paid to the person(s) the Corporation determines to be beneficially entitled thereto.

(g) The Corporation reserves the right to reject any claim for indemnity if any of the requirements of this section or section 8 of the policy are not met and the Corporation determines that the amount of loss cannot be satisfactorily determined.

6. *Subrogation*

The insured (including any assignee or transferee) assigns to the Corporation all rights of recovery against any person for loss or damage to the extent that payment hereunder is made by the Corporation. The Corporation thereafter shall execute all papers required and take appropriate action as may be necessary to secure such rights.

7. *Termination of the Contract*

(a) The contract shall terminate if no premium is earned for five consecutive years.

(b) If the insured is an individual who dies, or is judicially declared incompetent, or the insured entity is other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution; *however,* if such event occurs after insurance attaches for any crop year, the contract shall continue in force through such crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity.

8. *Coverage Level and Price Election*

(a) If the insured has not elected on the application a coverage level and price at which indemnities shall be computed from among those shown on the actuarial table, the coverage level and price election which shall be applicable under the contract, and which the insured shall be deemed to have elected, shall be as provided on the actuarial table for such purposes.

(b) The insured may, with the consent of the Corporation, change the coverage level and/or price election for any crop year on or before the closing date for submitting applications for that crop year.

9. *Assignment of Indemnity*

Upon approval of a form prescribed by the Corporation, the insured may assign to another party the right to an indemnity for the crop year and such assignee shall have the right to submit the loss notices and forms as required by the contract.

10. *Contract Changes*

The Corporation reserves the right to change any terms and provisions of the contract from year to year. Any changes shall be mailed to the insured or placed on file and made available for public inspection in the office for the county at least 15 days prior to the cancellation date preceding the crop year for which the changes are to become effective, and such mailing or filing shall constitute notice to the insured. Acceptance of any changes will be conclusively presumed in the absence of any notice from the insured to cancel the contract as provided in section 12 of the policy.

Note.—The reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942, and OMB Circular No. A–40.

These regulations have been determined not significant under the USDA criteria implementing Executive Order No. 12044. A draft impact analysis is available from Peter F. Cole, Secretary, Federal Crop Insurance Corporation, Room 4096, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

Approved by the Board of Directors on June 8, 1979.

Dated: June 8, 1979.

Peter F. Cole,

Secretary, Federal Crop Insurance Corporation.

Approved by: W. Otto Johnson, *Acting Manager, Federal Crop Insurance Corporation.*

Dated: June 13, 1979.

7 CFR Parts 401 and 430

Sugar Beet Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation.

ACTION: Final rule.

SUMMARY: This rule prescribes procedures for insuring sugar beet crops effective with the 1980 crop year. The rule combines provisions from previous regulations for insuring sugar beets in a shorter, clearer, and more simplified document which will make the program more effective administratively. This is promulgated under the authority contained in the Federal Crop Insurance Act, as amended.

EFFECTIVE DATE: June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202–447–3325.

SUPPLEMENTARY INFORMATION: The Federal Crop Insurance Corporation (FCIC) published a notice of proposed rulemaking in the Federal Register [44 FR 27119, Wednesday, May 9, 1979] outlining the prescribed procedures for insuring sugar beet crops effective with the 1980 crop year. In the notice, FCIC, under the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), proposed that a new Part 430 of Chapter IV in Title 7 of the Code of Federal Regulations be established to prescribe procedures for insuring sugar beet crops effective with the 1980 crop year to be known as 7 CFR Part 430 Sugar Beet Crop Insurance.

All previous regulations applicable to insuring sugar beet crops as found in 7 CFR 401.101–401.111, 401.140, and 401.149 will not be applicable to 1980 and succeeding sugar beet crops but will remain in effect for FCIC sugar beet insurance policies issued for the crop years prior to 1980.

It has been determined that combining all previous regulations for insuring sugar beet crops into one shortened, simplified, and clearer regulation would be more effective administratively. In addition, Part 430 contains a premium adjustment table to provide maximum individual premium discounts for good insuring experience of up to 50 percent and premium increases for unfavorable insuring experience. The good experience discounts provided under the previous sugar beet crop insurance policies have been discontinued; however, the premium adjustment table will result in more premium discounts for good experience than were formerly provided under the good experience discounts in the previous policy. Further, Part 430 (1) provides that any premium balance not paid by the termination date will be increased by a 9 percent service fee with a 9 percent per annum simple interest charge applying to any unpaid premium balance at the end of each subsequent 12-month period, (2) extends the 15-day period for submitting a notice of damage or loss to 30 days and eliminates the 60-day period for filing a claim for loss, (3) provides 3 levels of insurance coverage on each sugar beet crop in each county, and (4) increases the limitation from $5,000 to $20,000 in

those cases involving good faith reliance on misrepresentation (as found in 7 CFR Part 430.5 of the regualtions) wherein the Manager of the Corporation is authorized to take action to grant relief.

The Sugar Beet Crop Insurance Regulations provide a July 15 cancellation date for Arizona and California, and December 31 for all other States. These regulations and any amendments there to, must be placed on file in the Corporation's office for each particular county in which the insurance is available not later than 15 days prior to the applicable cancellation date.

Under the provisions of Executive Order No. 12044, and the Administrative Procedure Act (5 U.S.C. 553 (b) and (c)). the public was given an opportunity to submit written comments, data, and views on the proposed regulations, but none were received. Therefore, with the exception of minor and nonsubstantive corrections to language, the regulations as contained in the proposed rule are hereby issued as a final rule to be in effect starting with the 1980 crop year.

Final Rule

§§ 401.140 and 401.149 [Reserved]

Accordingly, under the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby deletes and reserves 7 CFR 401.140 and 401.149, with such regulations as are contained therein remaining in effect for FCIC policies issued for crop years prior to 1980, and issues a new Part 430 in Chapter IV of Title 7 of the Code of Federal Regulations (7 CFR Part 430) to be known as the Sugar Beet Crop Insurance Regulations, which shall remain in effect, until amended or superseded, for the 1980 and succeeding crop years, to read as follows:

PART 430—SUGAR BEET CROP INSURANCE

Subpart—Regulations for the 1980 and Succeeding Crop Years

Sec.

430.1 Availability of sugar beet insurance.
430.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.
430.3 Public notice of indemnities paid.
430.4 Creditors.
430.5 Good faith reliance on misrepresentation.
430.6 The contract.
430.7 The application and policy.

Authority: Secs. 506, 516, 52 Stat. 73, 77, as amended (7 U.S.C. 1506, 1516).

Subpart—Regulations for the 1980 and Succeeding Crop Years

§ 430.1 Availability of sugar beet insurance.

Insurance shall be offered under the provisions of this subpart on sugar beets in counties within limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation. Before insurance is offered in any county, there shall be published by appendix to this chapter the names of the counties in which sugar beet insurance will be offered.

§ 430.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.

(a) The Manager shall establish premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed for sugar beets which shall be shown on the county actuarial table on file in the office for the county and may be changed from year to year.

(b) At the time the application for insurance is made, the applicant shall elect a coverage level and price at which indemnities shall be computed from among those levels and prices shown on the actuarial table for the crop year.

§ 430.3 Public notice of indemnities paid.

The Corporation shall provide for posting annually in each county at each county courthouse a listing of the indemnities paid in the county.

§ 430.4 Creditors.

An interest of a person in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, or an involuntary transfer shall not entitle the holder of the interest to any benefit under the contract except as provided in the policy.

§ 430.5 Good faith reliance on misrepresentation.

Notwithstanding any other provision of the sugar beet insurance contract, whenever (a) an insured person under a contract of crop insurance entered into under these regulations, as a result of a misrepresentation or other erroneous action or advice by an agent or employee of the Corporation, (1) is indebted to the Corporation for additional premiums, or (2) has suffered a loss to a crop which is not insured or for which the insured person is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured person believed to be insured, or believed the terms of the insurance contract to have been complied with or waived, and (b) the Board of Directors of the Corporation, or the Manager in cases involving not more than $20,000, finds (1) that an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (2) that said insured person relied thereon in good faith, and (3) that to require the payment of the additional premiums or to deny such insured's entitlement to the indemnity would not be fair and equitable, such insured person shall be granted relief the same as if otherwise entitled thereto.

§ 430.6 The contract.

(a) The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. Such acceptance shall be effective upon the date the notice of acceptance is mailed to the applicant. The contract shall cover the sugar beet crop as provided in the policy. The contract shall consist of the application, the policy, the attached appendix, and the provisions of the county actuarial table. Any changes made in the contract shall not affect its continuity from year to year. Copies of forms referred to in the contract are available at the office for the county.

§ 430.7 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation may be made by any person to cover such person's insurable share in the sugar beet crop as landlord, owner-operator, or tenant. The application shall be submitted to the Corporation at the office for the county and, where applicable, on or before the closing date on file in the office for the county.

(b) The Corporation reserves the right to discontinue the acceptance of applications in any county upon its determination that the insurance risk involved is excessive, and also, for the same reason, to reject any individual application. The Manager of the Corporation is authorized in any crop year to extend the closing date for submitting of applications or contract changes in any county, by placing the extended date on file in the office for the county and publishing a notice in the Federal Register upon the Manager's determination that no adverse selectivity will result during the period of such extension: *Provided, however,* That if adverse conditions should

develop during such period, the Corporation will immediately discontinue the acceptance of applications.

(c) In accordance with the provisions governing changes in the contract contained in policies issued under FCIC regulations for the 1980 and succeeding crop years, a contract in the form provided for under this subpart will come into effect as a continuation of a sugar beet contract issued under such prior regulations, without the filing of a new application.

(d) The provisions of the application and Sugar Beet Insurance Policy for the 1980 and Succeeding Crop years, and the Appendix to the Sugar Beet Insurance Policy are as follows:

United States Department of Agriculture

Federal Crop Insurance Corporation

Application for 19—— and Succeeding Crop Years

Sugar Beet Crop Insurance Contract

Contract No. _____
Identification No. _____
Name and address _____
Zip Code _____
County _____
State _____
Type of entity _____
Applicant is over 18—Yes ☐ No ☐

A. The applicant, subject to the provisions of the regulations of the Federal Crop Insurance Corporation (herein called "Corporation"), hereby applies to the Corporation for insurance on the applicant's share in the sugar beets planted on insurable acreage as shown on the county actuarial table for the above-stated county. The applicant elects from the actuarial table the coverage level and price at which indemnities shall be computed. THE PREMIUM RATES AND PRODUCTION GUARANTEES SHALL BE THOSE SHOWN ON THE APPLICABLE COUNTY ACTUARIAL TABLE FILED IN THE OFFICE FOR THE COUNTY FOR EACH CROP YEAR.

Level election _____
Price election _____
Example: For the 19—— crop year only (100% share) _____
Location/farm No. _____
Guarantee per acre * _____
Premium per acre _____
Practice _____

Your guarantee will be on a unit basis (acres X per acre guarantee X share).

B. WHEN NOTICE OF ACCEPTANCE OF THIS APPLICATION IS MAILED TO THE APPLICANT BY THE CORPORATION, the contract shall be in effect for the crop year specified above, unless the time for submitting applications has passed at the time this application if filed, AND SHALL CONTINUE FOR EACH SUCCEEDING CROP YEAR UNTIL CANCELED OR TERMINATED as provided in the contract. This accepted application, the following sugar beet insurance policy, the attached appendix, and the provisions of the county actuarial table showing the production guarantees, coverage levels, premium rates, prices for computing indemnities and insurable and uninsurable acreage shall constitute the contract. Additional information regarding contract provisions can be found in the county regulations folder on file in the office for the county. No term or condition of the contract shall be waived or changed except in writing by the Corporation.

Code No./witness to signature _____
Signature of applicant _____
Date _____
Address of office for county: _____

_____
Phone _____
Location of farm headquarters: _____

_____

Sugar Beet Crop Insurance Policy

Terms and conditions

Subject to the provisions in the attached appendix:

1. *Causes of loss.* (a) Causes of loss insured against. The insurance provided is against unavoidable loss of production resulting from adverse weather conditions, insects, plant disease, wildlife, earthquake or fire occurring within the insurance period subject to any exceptions, exclusions or limitations with respect to causes of loss shown on the actuarial table.

(b) Causes of loss not insured against. The contract shall not cover any loss of production, as determined by the Corporation, due to (1) the neglect or malfeasance of the insured, any member of the insured's household, the insured's tenants or employees, (2) failure to follow recognized good farming practices, (3) damage resulting from the backing up of water by any governmental or public utilities dam or reservoir project, or (4) any cause not specified as an insured cause in this policy as limited by the actuarial table.

2. *Crop and acreage insured.* (a) The crop insured shall be sugar beets grown under a contract with a processor for processing as sugar, for which the actuarial table shows a guarantee and premium rate per acre, and which are grown on insured acreage.

(b) The acreage insured for each crop year shall be that acreage planted to sugar beets on insurable acreage as shown on the actuarial table and the insured's share therein as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect. *Provided*, That insurance shall not attach or be considered to have attached as determined by the Corporation to any acreage (1) where premium rates are established by farming practices on the actuarial table, and the farming practices carried out on any acreage are not among those for which a premium rate has been established, (2) excluded from the processor contract for, or during, the crop year, (3) which is destroyed and after such destruction it was practical to replant to sugar beets and such acreage was not replanted, (4) initially planted after the date where applicable on file in the office for the county which has been established by the Corporation as being too late to initially plant and expect a normal crop to be produced, (5) planted to sugar beets the preceding crop year in Michigan, Minnesota, North Dakota and Ohio or the two preceding crop years in all other States unless otherwise provided on the county actuarial table, (6) planted to a type or variety of sugar beets not established as adapted to the area or shown as non-insurable on the actuarial table, or (7) in California other than Imperial County, planted before the filing of the application or reinstatement request if such acreage is not inspected for the crop year and approved in writing by the Corporation after a normal stand is obtained.

(c) Insurance may attach only by written agreement with Corporation on acreage which is planted for the development or production of hybrid seed or for experimental purposes.

3. *Responsibility of insured to report acreage and share.* The insured shall submit to the Corporation on a form prescribed by the Corporation, a report showing (a) all acreage of sugar beets planted in the county (including a designation of any acreage to which insurance does not attach) in which the insured has a share and (b) the insured's share therein at the time of planting. Such report shall be submitted promptly after completion of planting each year not later than the acreage reporting date on file in the office for the county.

4. *Production guarantees, coverage levels and prices for computing indemnities.* (a) For each crop year of the contract, the production guarantees, coverage levels and prices at which indemnities shall be computed shall be those shown on the actuarial table.

(b) The production guarantee per acre shall be progressive as follows:

(1) *First Stage*—from planting until July 1 (except in California and Arizona) it shall be until the earlier of thinning or 90 days after planting; and to any acreage that the Corporation determines was damaged in this stage to the extent that growers in the area usually would not further care for the crop.

(2) *Second Stage*—from the end of the first stage until at least 15 percent of the production guarantee per acre for the third stage has been harvested.

(3) *Third Stage*—after harvest of at least 15 percent of the production guarantee per acre for any acreage.

The production guarantee applicable to any acreage within a unit shall be that established for the stage reached by the crop on such acreage, as determined by the Corporation.

(5) *Annual premium.* (a) The annual premium is earned and payable at the time of planting and the amount thereof shall be determined by multipling the insured acreage times the applicable premium per acre, times the insured's share at the time of planting, times the applicable premium adjustment percentage in subsection (c) of this section.

(b) For premium adjustment purposes, only the years during which premiums were earned shall be considered.

(c) The premium shall be adjusted as shown in the following table:

Percent Adjustments for Favorable Continuous Insurance Experience

Loss ratio [1] through previous crop year	Number of years continuous experience through previous year															
	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15 or more

[1] Loss Ratio means the ratio of indemnity(ies) paid to premium(s) earned.

[2] Only the most recent 15 crop years will be used to determine the number of "Loss Years" (A crop year is determined to be a "Loss Year" when the amount of indemnity for the year exceeds the premium for the year).

(d) Any amount of premium for an insured crop which is unpaid on the day following the termination date for indebtedness for such crop shall be increased by a 9 percent service fee, which increased amount shall be the premium balance, and thereafter, at the end of each 12 month period, 9 percent simple interest shall attach to any amount of the premium balance which is unpaid: *Provided,* When notice of loss has been timely filed by the insured as provided in section 7 of this policy, the service fee will not be charged and the contract will remain in force if the premium is paid in full within 30 days after the date of approval or denial of the claim for indemnity; however, if any premium remains unpaid after such date, the contract will terminate and the amount of premium outstanding shall be increased by a 9 percent service fee, which increased amount shall be the premium balance, if such premium balance is not paid within 12 months immediately following the termination date, 9 percent simple interest shall apply from the termination date and each year thereafter to any unpaid premium balance.

(e) Any unpaid amount due the Corporation may be deducted from any indemnity payable to the insured by the Corporation or from any loan or payment to the insured under any Act of Congress or program administered by the U.S. Department of Agriculture, when not prohibited by law.

6. *Insurance period.* Insurance on insured acreage shall attach at the time the sugar beets are planted and shall cease upon the earliest of (a) final adjustment of a loss, (b) harvesting, (c) total destruction of the insured sugar beet crop, and (d) the applicable date of the calendar year in which the sugar beets are normally harvested as follows: (1) July 15 for Arizona and Imperial County, California, (2) the last day of the 12th calendar month after planting of the acreage for all other California counties, unless a written request from the insured for an extension of the insurance period is received prior to such date and is approved by the Corporation, (3) November 25 in Ohio, or (4) November 15 in all other States.

7. *Notice of damage or loss.* (a) Any notice of damage or loss shall be given promptly in writing by the insured to the Corporation at the office for the county.

(b) Notice shall be given promptly if, during the period before harvest, the sugar beets on any unit are damaged to the extent that the insured does not expect to further care for the crop or harvest any part of it, or if the insured wants the consent of the Corporation to put the acreage to another use. No insured acreage shall be put to another use until the Corporation has made an appraisal of the potential production of such acreage and consents in writing to such other use. Such consent shall not be given until it is too late or impractical to replant to sugar beets. Notice shall also be given when such acreage has been put to another use.

(c) In addition to the notices required in subsection (b) of this section, if an indemnity is to be claimed on any unit, the insured shall give written notice thereof to the Corporation at the office for the country not later than *30 DAYS* after the earliest of (1) the date harvest is completed on the unit, (2) the calendar date for the end of the insurance period, or (3) the date the entire sugar beet crop on the unit is destroyed, as determined by the Corporation. The Corporation reserves the right to provide additional time if it determines there are extentuating circumstances.

(d) Any insured acreage which is not to be harvested and upon which an indemnity is to be claimed shall be left intact until inspected by the Corporation.

(e) The Corporation may reject any claim for indemnity if any of the requirements of this section are not met.

8. *Claim for indemnity.* (a) It shall be a condition precedent to the payment of any indemnity that the insured (1) establish the total production of sugar beets on the unit and that any loss of production was directly caused by one or more of the insured causes during the insurance period for the crop year for which the indemnity is claimed and (2) furnish any other information regarding the manner and extent of loss as may be required by the Corporation.

(b) Indemnities shall be determined separately for each unit. The amount of indemnity for any unit shall be determined by (1) multiplying the insured acreage of sugar beets on the unit by the applicable production guarantee per acre, which product

shall be the production guarantee for the unit, (2) subtracting therefrom the total production of sugar beets to be counted for the unit, (3) multiplying the remainder by the applicable price for computing indemnities, and (4) multiplying the result obtained in step (3) by the insured share: *Provided*, That if the premium computed on the insured acreage and share is more than the premium computed on the reported acreage and share, the amount of indemnity shall be computed on the insured acreage and share and then reduced proportionately.

(c) The total production to be counted for a unit shall be determined by the Corporation and shall include all harvested and appraised production: *Provided*, That for acreage not qualifying for the third stage production guarantee, only the appraised and harvested production in excess of the difference between the third stage production guarantee and the production guarantee applicable to such acreage shall be counted. For acreage abandoned, put to another use without prior written consent of the Corporation, or damage solely by an uninsured cause, not less than the applicable production guarantee shall be counted.

(1) Any harvested production of sugar beets shall be adjusted by the factor (rounded to three decimal places) obtained by dividing the average percentage of sugar in sugar beets, as determined from individual tests made at the time of delivery to the processor, by the percentage of sugar shown on the actuarial table: *Provided, however*, That if individual tests of sugar content are not made by the processor at the time of delivery of the sugar beets, the factor to be used shall be 1.000: *Provided, further*, That for harvested sugar beets which are not acceptable under the contract with a processor due to an insurable cause of loss occurring within the insurance period, the Corporation will determine the production to be counted by (i) dividing the value of the beets, as determined by the Corporation by the value of undamaged beets containing the percentage of sugar shown on the actuarial table and (ii) multiplying the result obtained by the tons of beets harvested: *Provided, further*, That any Corporation appraisals shall be the tons appraised with no adjustment for quality.

(2) Appraised production to be counted shall include: (i) Any appraisals by the Corporation for potential production on harvested acreage and for uninsured causes and poor farming practices, and (ii) not less than the applicable guarantee for any acreage which is abaondoned or put to another use without prior written consent of the Corporation or damaged solely by an uninsured cause.

(d) The appraised potential production for acreage for which consent has been given to be put to another use shall be counted as production in determining the amount of loss under the contract. *However*, if consent is given to put acreage to another use and the Corporation determines that any such acreage (1) is not put to another use before harvest of sugar beets becomes general in the county, (2) is harvested, or (3) is further damaged by an insured cause before the acreage is put to another use, the indemnity for the unit shall be determined without regard to such appraisal and consent.

9. *Misrepresentation and fraud.* The Corporation may void the contract without affecting the insured's liability for premiums or waiving any right, including the right to collect any unpaid premiums if, at any time the insured has concealed or misrepresented any material fact or committed any fraud relating to the contract, and such voidance shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

10. *Transfer of insured share.* If the insured transfers any part of the insured share during the crop year, protection will continue to be provided according to the provisions of the contract to the transferee for such crop year on the transferred share, and the transferee shall have the same rights and responsibilities under the contract as the original insured for the current crop year. Any transfer shall be made on an approved form.

11. *Records and access to farm.* The insured shall keep or cause to be kept for two years after the time of loss, records of the harvesting, storage, shipments, sale or other disposition of all sugar beets produced on each unit including separate records showing the same information for production from any uninsured acreage. Any persons designated by the Corporation shall have access to such records and the farm for purposes related to the contract.

12. *Life of contract: Cancellation and termination.* (a) The contract shall be in effect for the crop year specified on the application and may not be canceled for such crop year. Thereafter, either party may cancel insurance for any crop year by giving a signed notice to the other on or before the cancellation date preceding such crop year.

(b) Except as provided in section 5(d) of this policy, the contract will terminate as to any crop year if any amount due the Corporation under this contract is not paid on or before the termination date for indebtedness preceding such crop year. *Provided*, That the date of payment for premium (1) if deducted from an indemnity claim, shall be the date the insured signs such claim, or (2) if deducted from payment under another program administered by the U.S. Department of Agriculture shall be the date such payment was approved.

(c) Following are the cancellation and termination dates:

State and county	Cancellation date	Termination date for indebtedness
Arizona and Imperial County, Calif.	July 15	August 31.
All other California counties.	July 15	(1)
All other States	December 31	March 31.

[1] The termination date for indebtedness for all California counties other than Imperial County shall be the date the insured begins planting for the next crop year unless prior to such date the insured has made arrangements satisfactory to the Corporation for payment of the premium owed the Corporation.

(d) In the absence of a notice from the insured to cancel, and subject to the provisions of subsections (a), (b), and (c) of this section and section 7 of the Appendix, the contract shall continue in force for each succeeding crop year.

Appendix

(Additional Terms and Conditions)

1. *Meaning of Terms*

For the purposes of sugar beet crop insurance:

(a) "Actuarial table" means the forms and related material for the crop year approved by the Corporation which are on file for public inspection in the office for the county, and which show the production guarantees, coverage levels, premium rates, prices for computing indemnities, insurable and uninsurable acreage, and related information regarding sugar beet insurance in the county.

(b) "County" means the county shown on the application and any additional land located in a local producing area bordering on the county, as shown on the actuarial table.

(c) "Crop year" means the period within which the sugar beet crop is normally grown and shall be designated by the calendar year in which the sugar beet crop is normally harvested: *however*, in California and Arizona it shall be the period from planting until the applicable date for the end of the insurance period and shall be designated by (1) the calendar year in which planted if planted on or before July 15, or (2) the next calendar year if planted after July 15.

(d) "Harvest" means the lifting and topping of the sugar beets for the purpose of delivery to a processor.

(e) "Insurable acreage" means the land classified as insurable by the Corporation and shown as such on the county actuarial table.

(f) "Insured" means the person who submitted the application accepted by the Corporation.

(g) "Office for the county" means the Corporation's office serving the county shown on the application for insurance or such office as may be designated by the Corporation.

(h) "Person" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

(i) "Share" means the interest of the insured as landlord, owner-operator, or tenant in the insured sugar beet crop at the time of planting as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect, and no other share shall be deemed to be insured: *Provided*, That for the purpose of determining the amount of indemnity, the insured share shall not exceed the insured's share at the earliest of (1) the date of beginning of harvest on the unit, (2) the calendar date for the end of the insurance period, or (3) the date the entire crop on the unit is destroyed, as determined by the Corporation.

(j) "Tenant" means a person who rents land from another person for a share of the sugar beet crop or proceeds therefrom.

(k) "Unit" means all insurable acreage of sugar beets in the county on the date of

planting for the crop year (1) in which the insured has a 100 percent share, or (2) which is owned by one entity and operated by another entity on a share basis. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the sugar beet crop on such land shall be considered as owned by the lessee. Land which would otherwise be one unit may be divided according to applicable guidelines on file in the office for the county or by written agreement between the Corporation and the insured. The Corporation shall determine units as herein defined when adjusting a loss, notwithstanding what is shown on the acreage report, and has the right to consider any acreage and share reported by or for the insured's spouse or child or any member of the insured's household to be the bona fide share of the insured or any other person having the bona fide share.

2. *Acreage Insured*

(a) The Corporation reserves the right to limit the insured acreage of sugar beets to any acreage limitations established under any Act of Congress, provided the insured is so notified in writing prior to the planting of sugar beets.

(b) If the insured does not submit an acreage report on or before the acreage reporting date on file in the office for the county, the Corporation may elect to determine by units the insured acreage and share or declare the insured acreage on any unit(s) to be "zero". If the insured does not have a share in any insured acreage in the county for any year, the insured shall submit a report so indicating. Any acreage report submitted by the insured may be revised only upon approval of the Corporation.

3. *Irrigated Acreage*

(a) Where the actuarial table provides for insurance on an irrigated practice, the insured shall report as irrigated only the acreage for which the insured has adequate facilities and water to carry out a good irrigation practice at the time of planting.

(b) Where irrigated acreage is insurable, any loss of production caused by failure to carry out a good irrigation practice, except failure of the water supply from an unavoidable cause occurring after the beginning of planting as determined by the Corporation shall be considered as due to an uninsured cause. The failure or breakdown of irrigation equipment or facilities shall not be considered as a failure of the water supply from an unavoidable cause.

4. *Annual Premium*

(a) If there is no break in the continuity of participation, any premium adjustment applicable under section 5 of the policy shall be transferred to (1) the contract of the insured's estate or surviving spouse in case of death of the insured, (2) the contract of the person who succeeds the insured if such person had previously participated in the farming operation, or (3) the contract of the same insured who stops farming in one county and starts farming in another county.

(b) If there is a break in the continuity of participation, any reduction in premium earned under section 5 of the policy shall not thereafter apply; *however*, any previous unfavorable insurance experience shall be considered in premium computation following a break in continuity.

5. *Claim for and Payment of Indemnity*

(a) Any claim for indemnity on a unit shall be submitted to the Corporation on a form prescribed by the Corporation.

(b) In determining the total production to be counted for each unit, production from units on which the production has been commingled will be allocated to such units in proportion to the liability on each unit.

(c) There shall be no abandonment to the Corporation of any insured sugar beet acreage.

(d) In the event that any claim for indemnity under the provisions of the contract is denied by the Corporation, an action on such claim may be brought against the Corporation under the provisions of 7 U.S.C. 1506(c): *Provided,* That the same is brought within one year after the date notice of denial of the claim is mailed to and received by the insured.

(e) Any indemnity will be payable within 30 days after a claim for indemnity is approved by the Corporation. *However,* in no event shall the Corporation be liable for interest or damages in connection with any claim for indemnity whether such claim be approved or disapproved by the Corporation.

(f) If the insured is an individual who dies, disappears, or is judicially declared incompetent, or the insured is an entity other than an individual and such entity is dissolved after the sugar beets are planted for any crop year, any indemnity will be paid to the person(s) the Corporation determines to be beneficially entitled thereto.

(g) The Corporation reserves the right to reject any claim for indemnity if any of the requirements of this section or section 8 of the policy are not met and the Corporation determines that the amount of loss cannot be satisfactorily determined.

6. *Subrogation*

The insured (including any assignee or transferee) assigns to the Corporation all rights of recovery against any person for loss or damage to the extent that payment hereunder is made by the Corporation. The Corporation thereafter shall execute all papers required and take appropriate action as may be necessary to secure such rights.

7. *Termination of the Contract*

(a) The contract shall terminate if no premium is earned for five consecutive years.

(b) If the insured is an individual who dies or is judicially declared incompetent, or the insured entity is other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution; *however,* if such event occurs after insurance attaches for any crop year, the contract shall continue in force through such crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity.

8. *Coverage Level and Price Election*

(a) If the insured has not elected on the application a coverage level and price election at which indemnities shall be computed from among those shown on the actuarial table, the coverage level and price election which shall be applicable under the contract, and which the insured shall be deemed to have elected, shall be as provided on the actuarial table for such purposes.

(b) The insured may, with the consent of the Corporation, change the coverage level and/or price election for any crop year on or before the closing date for submitting applications for that crop year.

9. *Assignment of Indemnity*

Upon approval of a form prescribed by the Corporation, the insured may assign to another party the right to an indemnity for the crop year and such assignee shall have the right to submit the loss notices and forms as required by the contract.

10. *Contract Changes*

The Corporation reserves the right to change any terms and provisions of the contract from year to year. Any changes shall be mailed to the insured or placed on file and made available for public inspection in the office for the county at least 15 days prior to the cancellation date preceding the crop year for which the changes are to become effective, and such mailing or filing shall constitute notice to the insured. Acceptance of any changes will be conclusively presumed in the absence of any notice from the insured to cancel the contract as provided in section 12 of the policy.

Note.—The reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942, and OMB Circular No. A–40.

Note.—These regulations have been determined non significant under the USDA criteria implementing Executive Order No. 12044. A draft impact analysis is available from Peter F. Cole, Secretary, Federal Crop Insurance Corporation, Room 4096, U.S. Department of Agriculture, Washington, D.C. 20250.

Approved by the Board of Directors on June 8, 1979.

Dated: June 8, 1979.

Federal Crop Insurance Corporation.

BILLING CODE 3410-08-M

Agricultural Marketing Service

7 CFR Part 929

Findings and Determinations with Respect To Continuation of the Amended Marketing Agreement and Order Regulating Cranberries Grown in Specified States

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This document contains the determination with respect to continuation of the amended marketing agreement and order regulating cranberries grown in specified States. A referendum was conducted among cranberry growers May 14 through May 23, 1979, to ascertain if they favor termination of this regulatory program. The vote in that referendum shows that the required majority of such growers do not favor termination.

EFFECTIVE DATE: June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Malvin E. McGaha, Fruit Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250, Phone: (202) 447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* A notice was published in the **Federal Register** on May 3, 1979 (44 FR 25846), directing that a referendum be conducted among cranberry growers to ascertain if such growers favor continuance of the marketing agreement, as amended, and Order No. 929, as amended (7 CFR Part 929). This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). Consistent with such notice, the referendum was conducted among growers who were engaged in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York, in the production of cranberries during the representative period determined to be September 1, 1978, through April 30, 1979. The referendum period was May 14 through May 23, 1979.

Upon the basis of the results of the referendum, it is hereby found and determined that the termination of the marketing agreement and order is not favored by a majority of producers who produced more than 50 percent of the cranberries produced for market during the representative period. This action has not been determined significant under the USDA criteria for implementing Executive Order 12044.

Dated: June 13, 1979.

Jerry C. Hill,

Deputy Assistant Secretary.

CIVIL AERONAUTICS BOARD

14 CFR Part 375

[Regulation SPR-161; Amendment No. 12]

Navigation of Foreign Civil Aircraft Within the United States, Approval by the General Accounting Office

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. June 14, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule gives notice that the General Accounting Office has approved the recordkeeping and reporting requirements contained in the subject regulation. This approval is required under the Federal Reports Act, and was transmitted to the Civil Aeronautics Board by letter dated June 6, 1979.

DATES: Adopted: June 14, 1979; Effective: June 14, 1979.

FOR FURTHER INFORMATION CONTACT: Clifford M. Rand, Chief, Data Requirements Division, Office of Economic Analysis, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, 202–673–6044.

PART 375—NAVIGATION OF FOREIGN CIVIL AIRCRAFT WITHIN THE UNITED STATES

Accordingly, the Civil Aeronautics Board amends Part 375 of its Special Regulations (14 CFR 375) by adding the following note at the end of Part 375:

Note.—The recordkeeping requirements contained in §§ 375.43(b) and 375.43(c) and the reporting requirements contained in §§ 375.44(b), 375.45 and 375.70 have been approved by the U.S. General Accounting Office under B–180226 (R0642).

This amendment is issued by the undersigned pursuant to the delegation of authority from the Board to the Secretary in 14 CFR 385.24(b). (Sec. 204 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324).

By the Civil Aeronautics Board:

Phyllis T. Kaylor,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 201 and 202

[Release Nos. 33-6077; 34-15911; 35-21095; 39-528; IC-10726; IA-679]

Consideration of Written Comments Received After the Closing Date in Informal Commission Proceedings

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is amending its regulations to provide notice of a current practice of the Commission to accept, and include in the public record, in its discretion, written comments received by the Commission after the closing date in rulemaking proceedings and adjudications not required to be determined on the record. The Commission is also making certain editorial amendments to its regulations concerning these informal Commission proceedings.

EFFECTIVE DATE: June 12, 1979.

FOR FURTHER INFORMATION CONTACT: Howard A. Bartnick, Office of the General Counsel, Securities and Exchange Commission, Room 735, 500 North Capitol Street, Washington, D.C. 20549, (202) 376–8003.

SUPPLEMENTARY INFORMATION: The Commission finds, in accordance with the Administrative Procedure Act ("APA"), 5 U.S.C. § 553(b)(A) and 5 U.S.C. § 553(d), that these amendments relate solely to agency organization, procedure or practice and do not relate to a substantive rule. Accordingly, notice and opportunity for public comment pursuant to the APA is not necessary and the foregoing action becomes effective immediately.

Accordingly, Chapter II of Title 17 of the Code of Federal Regulations is amended as follows:

PART 201—RULES OF PRACTICE

1. By amending the heading of § 201.27 to read as follows:

§ 201.27 Adjudications under the Securities Exchange Act of 1934 not required to be determined on the record after notice and opportunity for hearing.

2. By adding § 201.28 to read as follows:

§ 201.28 Adjudications not required to be determined on the record after notice and opportunity for hearing.

(a) This section applies to every case of adjudication (as defined in section 551 of title 5, United States Code)

pursuant to any statute which the Commission administers, which adjudication is not required to be determined on the record after notice and opportunity for hearing and which the Commission has not chosen to determine on the record after notice and opportunity for hearing.

(b) In any case of adjudication described in paragraph (a) above, if the Commission provides notice and opportunity for the submission of written comments by parties to the adjudication or, as the case may be, by other interested persons, written comments received on or before the closing date for comments, unless accorded confidential treatment pursuant to statute or rule of the Commission, become a part of the public record of the adjudication. The Commission, in its discretion, may accept and include in the public record written comments filed with the Commission after the closing date.

PART 202—INFORMAL AND OTHER PROCEDURES

3. By amending § 202.6 by revising paragraph (b) and adding paragraph (c) to read as follows:

§ 202.6 Adoption, revision, and rescission of rules and regulations of general application.

* * * * *

(b) After preliminary consideration by the Commission a draft of the proposed rule is published in the Federal Register and mailed to interested persons (e.g., other interested regulatory bodies, principal registrants or persons to be affected, stock exchanges, professional societies and leading authorities on the subject concerned and other persons requesting such draft) for comments. Unless accorded confidential treatment pursuant to statute or rule of the Commission, written comments filed with the Commission on or before the closing date for comments become a part of the public record upon the proposed rule. The Commission, in its discretion, may accept and include in the public record written comments received by the Commission after the closing date.

(c) Following analysis of comments received, the rule may be adopted in the form published or in a revised form in the light of such comments. In some cases, a revised draft is prepared and published and, where appropriate, an oral hearing may be held before final action upon the proposal. Any interested person may appear at the hearing and/or may submit written comment for consideration in accordance with the Commission's notice of the rulemaking procedure to be followed. The rule in the form in which it is adopted by the Commission is publicly released and is published in the Federal Register.

(Sec. 19(a), 48 Stat. 906; Sec. 23(a), 48 Stat. 901; Sec. 20(a), 49 Stat. 833; Sec. 319(a), 53 Stat. 1173; Sec. 38(a), 54 Stat. 841; Sec. 211(a), 54 Stat. 855; (15 U.S.C. 77s(a), 78w(a), 78t(a), 77sss(a), 80a–37(a), 80b–11(a)))

By the Commission.

George A. Fitzsimmons,
Secretary.

Shirley E. Hollis,
Assistant Secretary.

June 12, 1979.

21 CFR Part 193

[FRL 1250–3; FAP 7H5172/R48]

Paint-on Application of Chlorpyrifos in Food-Handling Establishments

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule amends 21 CFR 193.85 by establishing a food additive regulation to include paint-on application of chlorpyrifos in food-handling establishments. The regulation was requested by Positive Formulators, Inc. This rule provides for another method of applying chlorpyrifos in food-handling establishments at 2 percent of the active ingredient by weight.

EFFECTIVE DATE: Effective on June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Frank Sanders, Product Manager (PM) 12, Registration Division (TS–767), Office of Pesticide Programs, EPA, 401 M Street, SW, Washington, DC 20460 (202/426–9425).

SUPPLEMENTARY INFORMATION: On October 27, 1977, notice was given (42 FR 56643) that Positive Formulators, Inc., 1044 N. Jerrie Ave., Tucson, AZ 85711, had filed a petition (FAP 7H5172) with the EPA. This petition proposed that 21 CFR 193.85 be expanded to include the use of the insecticide chlorpyrifos (*O,O-*

diethyl *O*-(3,5,6-trichloro 2-pyridyl)phosphorothioate) in the slow-release paint-on formulation for insect control in food handling establishments (places other than private residences including, but not limited to, restaurants, grocery stores, bakeries, bottling plants, and canneries) where food and food products are held, processed, prepared or served. The slow-release product shall be limited to a maximum of 2 percent by weight of the active ingredient. No comments were received by the Agency in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance included a two-year rat feeding/oncogenic study and a dog feeding study with no-observed-effect levels (NOEL) of 0.1 milligram (mg)/kilogram, (kg) of body weight (bw)/day, a three-generation rat reproduction study with no effects up to 1 mg/kg bw/day, and an acute delayed neurotoxicity study on hens (negative at up to 100 mg/kg bw).

Based on the two-year rat feeding/oncogenicity study with a 0.1 mg/kg bw/day NOEL and using a safety factor of 10, the acceptable daily intake (ADI) for man is 0.01 mg/kg bw/day. The theoretical maximum residue contribution (TMRC) in the human diet from the proposed use does not exceed the ADI.

Desirable data that are lacking from the petition are a lifetime oncogenicity study and a teratology study. The lifetime oncogenicity study is expected to be completed in November 1979 and the teratology study is expected to be completed in late 1979. The petitioner also agreed to voluntarily delete the use of chlorpyrifos in food areas of food-handling establishments from the label should the teratology and life-time oncogenic study exceed the risk criteria for chronic toxicity as delineated in 40 CFR 162.11. Although the oncogenicity evaluation of chlorpyrifos is not complete, it is concluded that based on the available data, the risks are acceptable since the absence of an oncogenic potential is adequately shown in the two-year rat feeding/oncogenicity study.

The metabolism of chlorpyrifos is adequately understood, and an adequate analytical method (gas chromatography with a flame photometric detector) is available for enforcement purposes. Tolerances have previously been established (40 CFR 180.342) on a variety of raw agricultural commodities at levels ranging from 1 ppm to 0.01 ppm. Food additive regulations have also been established permitting the use of chlorpyrifos at a maximum concentration of 0.5 percent for spot and/or crevice treatment and in a controlled-release insect tape as a general treatment in food areas of food-handling establishments. No actions are currently pending against continued registration of chlorpyrifos, nor are any other relevant considerations involved in establishing the proposed regulation.

The pesticide is considered useful for the purpose for which the regulation is sought, and it is concluded that the pesticide may be safely used in the prescribed manner when such use is in accordance with the label and labeling registered pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136). Therefore the regulation amending 21 CFR 193.85 is being promulgated as proposed. Accordingly, a food additive regulation is established as set forth below.

Any person adversely affected by this regulation may, on or before July 19, 1979, file written objections with the Hearing Clerk, Environmental Protection Agency, Rm. M-3708 (A-110), 401 M St., SW., Washington, DC 20460. Such objections should be submitted in triplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized". This regulation has been reviewed, and it has been determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Effective on June 18, 1979, 21 CFR 193.85 is amended as set forth below.

Dated: June 12, 1979.

(Sec. 409(c)(1), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(c)(1)))

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

Part 193, Subpart A, § 193.85, is amended by revising paragraph (a) to read as follows:

§ 193.85 Chlorpyrifos.

* * * * *

(a) Application shall be limited solely to spot and/or crack and crevice treatment in food handling establishments where food and food products are held, processed, prepared or served. Contamination of food or food contact surfaces shall be avoided. Food must be removed or covered during treatment.

(1) Spray concentration for spot treatment shall be limited to a maximum of 0.5 percent of the active ingredient by weight. A coarse, low-pressure spray shall be used to avoid atomization or splashing of the spray.

(2) Paint-on application for spot treatment shall be limited to a maximum of 2 percent of the active ingredient by weight.

(3) Crack and crevice treatment shall be limited to a maximum of 2 percent of the active ingredient by weight. Equipment capable of delivering a pin-stream of insecticide shall be used.

21 CFR Part 193

[FAP 8H5184/R47; FRL 1251-6]

Tolerances for Pesticides in Food Administered by the Environmental Protection Agency; Aluminum Phosphide

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule amends 21 CFR 193.20 by establishing a food additive regulation permitting aluminum phosphide residues to come in contact with processed brewer's rice, malt, and corn grits in the manufacture of beer. The amendment to the regulations was requested by Phostoxin Sales, Inc. This rule removes the restriction prohibiting the direct contact of aluminum phosphide with processed brewer's rice, malt, and corn grits.

EFFECTIVE DATE: Effective on June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. William Miller, Product Manager (PM) 16, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, SW, Washington, DC 20460 (202/755-9315).

SUPPLEMENTARY INFORMATION: On May 10, 1978, notice was given (43 FR 20051) that Phostoxin Sales, Inc., P.O. Box 469, Alhambra, CA 96102, had filed a petition

(FAP 8H5184) with the EPA. This petition proposed that 21 CFR 193.20 be amended by establishing a regulation permitting the direct contact by fumigation of the formulation containing aluminum phosphide in or on processed rice and malt stored in breweries for the manufacture of beer with a tolerance limitation of 0.01 part per million (ppm).

Subsequently, the petitioner amended the petition by adding corn grits to the proposed regulation with a tolerance limitation of 0.01 ppm (43 FR 35385, August 9, 1978). Three comments were received objecting to the proposal on the grounds that: (a) the proposed use is illegal since it violates label directions, (b) alternative low cost methods of fumigation are available, and (c) residues from the proposed use are undesirable toxic contaminants. The Agency having considered the comments and having evaluated the available data concludes that the proposed regulation should be established because (a) it will permit the label to be amended so that the proposed use is in compliance with the label, (b) establishment of the regulation does not preclude an applicator from using any of the other low-cost alternative methods of fumigation in accordance with label directions, and (c) the proposed use is a no-residue situation so that the beer when consumed will not contain any toxicologically significant residues, such as phosphine gas or aluminum phosphide.

The data submitted in the petition and other relevant material have been evaluated, and it is concluded that the pesticide may be safely used in the prescribed manner when such use is in accordance with the label and labeling registered pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

The toxicological data considered in support of the proposed tolerances included acute and subacute inhalation studies of phosphine on various animal species. No chronic toxicity data for phosphine residues have been reviewed because such studies are deemed unnecessary for the following reasons:

(1) An acceptable daily intake (ADI) cannot be determined for phosphine since a chronic-feeding study for a gas is difficult if not impossible to achieve.

(2) Only extremely small quantities of residues remain on treated food after aeration.

(3) The small quantities of residues that remain would be further reduced through follow-up procedures, such as processing.

No data have been reported in previous petitions, nor in this one, regarding the transfer of residues resulting from the proposed use to meat, milk, poultry, and eggs. Because phosphine is a highly reactive and fugitive gas, residues of phosphine are not expected in meat, milk, poultry, and eggs as delineated in 40 CFR 180.6(a)(3). An adequate analytical method (colorimetry) is available for enforcement purposes, and the nature of aluminum phosphide is adequately understood.

Tolerances have previously been established for residues of phosphine resulting from application of aluminum phosphide (40 CFR 180.225) on a variety of raw agricultural commodities at levels ranging from 0.1 ppm to 0.01 ppm. A food additive tolerance (21 CFR 193.20) has previously been established for residues of phosphine resulting from application of aluminum phosphide to processed foods at 0.01 ppm. Also a feed additive tolerance (21 CFR 561.40) has previously been established for residues of phosphine resulting from application of aluminum phosphide to processed feeds at 0.1 ppm. No other considerations are involved in establishing the proposed regulation.

The pesticide is considered useful for the purpose for which a regulation is sought. Therefore the regulation permitting residues of aluminum phosphide to come in contact with processed brewer's rice, malt, and corn grits by amending 21 CFR 193.20 is being promulgated as proposed. Accordingly a food additive regulation is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication in the Federal Register, file written objections with the Hearing Clerk, Environmental Protection Agency, Rm. M–3706 (A–110), 401 M St., SW, Washington, DC 20460. Such objections should be submitted in triplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized". This regulation has been reviewed, and it has been determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Effective on the date of publication in the Federal Register, 21 CFR 193.20 is amended as set forth below.

Dated: June 12, 1979.

Statutory Authority: Section 409(c)(1) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 348(c)(1)].

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

Part 193, Subpart A, section 193.20 is amended by revising paragraph (b) to read as follows:

§ 193.20 Aluminum phosphide.

* * * * *

(b) To assure safe use of the additive, it is used in compliance with label and labeling conforming to that registered with the U.S. Environmental Protection Agency. Labeling shall bear a warning to aerate the finished food for 48 hours before it is offered to the consumer. A further warning shall state that under no condition should the formulation containing aluminum phosphide be used so that it or its unreacted residues will come in contact with any processed food, except processed brewer's rice, malt, and corn grits stored in breweries for use in the manufacture of beer.

BILLING CODE 4110-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

21 CFR Part 520

Oxfendazole Powder and Pellets

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends regulations to reflect approval of two new animal drug applications (NADAs) filed by Syntex Agribusiness, Inc., providing for the safe and effective use of the powder and pellet forms of an anthelmintic for horses.

EFFECTIVE DATE: June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Henry C. Hewitt, Bureau of Veterinary Medicine (HFV–114), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

SUPPLEMENTARY INFORMATION: Syntex Agribusiness, Inc., 3401 Hillview Ave., Palo Alto, CA 94304, filed NADA's 110–776 and 110–777 providing for use of oxfendazole powder and pellets, respectively, in horses for removal of certain large roundworms, pinworms,

large strongyles, and small strongyles. The powder is reconstituted to form a suspension and then administered by either stomach tube or dose syringe. The pellets are sprinkled on the grain portion of the ration.

In accordance with the freedom of information regulations and § 514.11(e)(2)(ii) of the animal drug regulations (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFA–305), Rm. 4–65, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.83), Part 520 is amended by adding new § 520.1628 to read as follows:

§ 520.1628 Oxfendazole powder and pellets.

(a) *Specifications.* (1) As powder for suspension: Each 30-gram packet contains 2.27 grams oxfendazole. (2) As pellets: each 35-gram packet contains 2.27 grams oxfendazole.

(b) *Sponsor.* See No. 017180 in § 510.600(c) of this chapter.

(c) *Conditions of use*—(1) *Amount.* 10 milligrams per kilogram of body weight. One packet treats a 500 pound (227 kilogram) horse and two packets treat the average mature horse (1000 pounds).

(2) *Indications for use.* The drug is used in horses for removal of the following gastrointestinal worms: Large roundworms (*Parascaris equorum*), mature and immature pinworms (*Oxyuris equi*), large strongyles (*Strongylus edentatus* and *Strongylus vulgaris*), and small strongyles.

(3) *Limitations*—(i) *Powder for suspension.* For gravity administration via stomach tube: Add ½ to 1 pint warm water per packet. For positive administration via stomach tube and dose syringe: Add enough water to bring volume to 5 ounces per packet; administer at rate of 1 fluid ounce per 100 pounds of body weight. Discard unused portions of suspension after 24 hours. Administer drug with caution to sick or debilitated horses. Not for use in horses intended for food. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

(ii) *Pellets. The drug is given by sprinkling on the grain portion of the ration. Withholding feed or water prior to administration is not necessary. Administer drug with caution to sick or debilitated horses. Not for use in horses intended for food. Consult your veterinarian for assistance in the diagnosis, treatment, and control of parasitism.*

Effective date. This regulation is effective June 19, 1979.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: June 12, 1979.

Lester M. Crawford,

Director, Bureau of Veterinary Medicine.

[FR Doc. 79-18699 Filed 6-18-79; 8:45 am]

BILLING CODE 4110-03-M

ENVIRONMENTAL PROTECTION AGENCY

21 CFR Part 561

[FAP 9H5203/R49; FRL 1251-8]

Tolerances for Pesticides in Animal Feeds Administered by the Environmental Protection Agency; Chlorpyrifos

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final Rule.

SUMMARY: This rule amends 21 CFR 561.98 by establishing a feed additive tolerance for residues of the insecticide chlorpyrifos in or on sorghum grain milling fractions for animal feed at 1.5 parts per million (ppm). The regulation was requested by Dow Chemical Co. This rule establishes a maximum permissible level for residues of chlorpyrifos in or on sorghum grain million fractions.

EFFECTIVE DATE: Effective June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Frank Sanders, Product Manager (PM) 12, Registration Division (TS–767), Office of Pesticide Programs, EPA, 401 M Stret, SW, Washington, DC 20460 (202/426–9425).

SUPPLEMENTARY INFORMATION: On January 18, 1979, notice was given (44 FR 3771) that Dow Chemical U.S.A., Midland, MI 48640, had filed a petition (FAP 9H5203) with the EPA. This petition proposed that 21 CFR 561.98 be amended by establishing a regulation permitting combined residues of the insecticide chlorpyrifos (*O,O*-diethyl *O*-(3,5,6,-trichloro-2-pyridyl) phosphorothioate) and its metabolite 3,5,6,-trichloro-2-pyridinol in or on sorghum grain milling fractions (bran, germ, screenings) intended for animal feed resulting from application of the subject insecticide to growing sorghum with a tolerance limitation of 1.5 ppm. No comments were received by the Agency in response to this notice of filing. (A related document establishing tolerances for residues of chlorpyrifos on sorghum grain, fodder, and forage appears elsewhere in today's Federal Register.)

The data submitted in the petition and other relevant material have been evaluated, and it is concluded that the pesticide may be safely used in the prescribed manner when such use is in accordance with the label and labeling registered pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

The toxicological data considered in support of the proposed tolerance included a two-year rat feeding/oncogenicity study and a dog feeding study with a no-observed-effect level (NOEL) of 0.1 milligram (mg)/kilogram (kg) of body weight (bw). Studies on delayed neurotoxicity and reproduction showed negative potentials. Based on the two-year chronic rat feeding study with the 0.1 mg/kg bw NOEL on cholinesterase activity and using a safety factor of 10, the acceptable daily intake (ADI) for man is 0.01 mg/kg bw/day. The theoretical maximum residue contribution (TMRC) in the human diet from the proposed tolerances and tolerances which have previously been established for residues of chlorpyrifos on a variety of raw agricultural commodities at levels ranging from 0.01 ppm to 1.50 ppm does not exceed the ADI. A food additive regulation (21 CFR 193.85) has previously been established for chlorpyrifos in food-handling establishments. Feed additive tolerances have also been established (21 CFR 561.98) for residues of chlorpyrifos in dried sugar beet pulp at 1 ppm and sugar beet molasses at 3 ppm.

Desirable data that are lacking from the petition are a lifetime oncogenicity study and a teratology study. In a letter of February 17, 1978, and January 31, 1979, the petitioner indicated that the lifetime oncogenicity study is expected to be completed in May, 1979 and the teratology study is expected to be completed in late 1979. The petitioner also agreed to voluntarily delete the use of chlorpyrifos on sorghum from the label should the lifetime oncogenicity and teratology studies be found to exceed the risk criteria for chronic toxicity in 40 CFR 162.11. Although the oncogenicity evaluation of chlorpyrifos is not complete, it is concluded that

based on the available data, the risks are acceptable since the absence of an oncogenic potential is shown in the two-year rat feeding/oncogenicity study.

The metabolism of chlorpyrifos is adequately understood, and an adequate analytical method (gas chromatography) is available for enforcement purposes. No actions are currently pending against continued registration of chlorpyrifos nor are there any other relevant considerations involved in establishing the proposed tolerance. The established tolerances for residues of chlorpyrifos in milk, meat, poultry, and eggs are adequate to cover the proposed use.

The pesticide is considered useful for the purpose for which a tolerance is sought. Therefore, the regulation establishing a tolerance of 1.5 ppm in or on sorghum fractions (bran, germ, screenings) by amending 21 CFR 561.98 is being promulgated as proposed. Accordingly, a feed additive regulation is established as set forth below.

Any person adversely affected by this regulation may, on or before July 19, 1979, file written objections with the Hearing Clerk, Environmental Protection Agency, Rm. M-3708 (A-110), 401 M St., SW, Washington, DC 20460. Such objections should be submitted in triplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized". This regulation has been reviewed, and it has been determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Effective June 19, 1979. 21 CFR 561.98 is amended as set forth below.

Dated: June 12, 1979.

(Section 409(c)(1) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(c)(1))

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

Part 561 is amended by revising section 561.98 to read as follows:

§ 561.98 Chlorpyrifos.

Tolerances are established for combined residues of the insecticide chlorpyrifos (*O, O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothioate) and its metabolite 3,5,6-trichloro-2-pyridinol in the following processed feeds when present therein as a result of application of this insecticide to growing crops:

	Parts per million
Feed:	
Sorghum milling fractions	1.5
Sugar beet pulp, dried	1
Sugar beet molasses	3

BILLING CODE 6560-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

24 CFR Part 1914

[Docket No. FI 5564]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, Federal Emergency Management Agency.[1]

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fourth column of the table.

[1] The functions of the Federal Insurance Administration, U.S. Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638-8620.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Federal Insurance Administrator has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

Section 1914.6 is amended by adding in alphabetical sequence new entries to the table.

§ 1914.6 List of eligible communities.

State	County	Location	Community No.	Effective dates of authorization/ cancellation of sale of flood insurance in community	Special flood hazard area identified
Oklahoma	Johnston	Wapanucka, town of	400337	June 7, 1979, emergency.	May 28, 1976.
Pennsylvania	Mercer	Mill Creek, township of	421871-B	do	Dec. 20, 1974 and June 18, 1976.
Pa	Lackawanna	Vandling, borough of	421748	do	Feb. 14, 1975.
Wyoming	Platte	Wheatland, town of	560043-B	July 2, 1975, emergency, Apr. 16, 1979, regular, Apr. 18, 1979, suspended, June 6, 1979, reinstated.	Apr. 12, 1974 and May 7, 1976.
Pennsylvania	Huntingdon	Barree, township of	421863	June 11, 1979, emergency.	Dec. 6, 1974.
Florida	Gadsden	Havana, town of	120411	June 12, 1979, emergency.	July 23, 1976.
Idaho	Bonneville	Swan Valley, city of	160154-A	June 11, 1979, emergency.	Aug. 29, 1975 and June 14, 1977.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968); effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963.)

Issued: June 12, 1979.

Gloria M. Jimenez,

Federal Insurance Administrator.

BILLING CODE 4210-23-M

24 CFR Part 1915

[Docket No. FI 5565]

List of Communities With Special Hazard Areas Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule identifies communities with areas of special flood, mudslide, or erosion hazards as authorized by the National Flood Insurance Program. The identification of such areas is to provide guidance to communities on the reduction of property losses by the adoption of appropriate flood plain management or other measures to minimize damage. It will enable communities to guide future construction, where practicable, away from locations which are threatened by flood or other hazards.

EFFECTIVE DATES: The date listed in the eighth column of the table or July 19, 1979, whichever is later.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93–234) requires the purchase of flood insurance on and after March 2, 1974, as a condition of receiving any form of Federal or federally related financial assistance for acquisition or construction purposes in a identified flood plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program. The prohibition, however, does not apply to loans by federally regulated, insured, supervised, or approved lending institutions (1) to finance the acquisition of a residential dwelling occupied as a residence prior to March 1, 1976, or one year following identification of the area within which such dwelling is located as an area containing special flood hazards, whichever is later, or made to extend, renew, or increase the financing or refinancing in connection with such a dwelling, (2) to finance the acquisition of a building or structure completed and occupied by a small business concern, as defined by the Secretary, prior to January 1, 1976, (3) any loan or loans, which in the aggregate do not exceed $5,000, to finance improvements to or rehabilitation of a building or structure occupied as a residence prior to January 1, 1976, or (4) any loan or loans, which in the aggregate do not exceed an amount prescribed by the Secretary, to finance nonresidential additions or improvements to be used solely for agricultural purposes on a farm.

This 30 day period does not supersede the statutory requirement that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. The six months period shall be considered to begin 30 days after the date of publication in the Federal Register or the effective date of the Flood Hazard Boundary Map, whichever is later. Similarly, the one year period a community has to enter the program under section 201(d) of the Flood Disaster Protection Act of 1973 shall be considered to begin 30 days after publication in the Federal Register or the effective date of the Flood Hazard Boundary Map, whichever is later.

This identification is made in accordance with Part 1915 or Title 24 of the Code of Federal Regulations as authorized by the National Flood Insurance Program (42 U.S.C. 4001–4128).

Section 1915.3 is amended by adding in alphabetical sequence a new entry to the table:

§ 1915.3 List of communities with special hazard areas (FHBM's in effect).

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 138

[T.D. 7629]

Exemption From Motor Fuels Excise Taxes for Certain Alcohol Fuels

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary regulations relating to exemption from motor fuels excise taxes for certain alcohol fuels. Changes in the applicable tax law were made by the Energy Tax Act of 1978. These regulations affect producers and sellers of motor fuels and provide them with the guidance needed to comply with the law.

DATE: These regulations apply generally to sales after December 31, 1978, and prior to October 1, 1984.

FOR FURTHER INFORMATION CONTACT: Robert H. Waltuch of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 Attention: CC:LR:T 202-566-3328, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

This document contains temporary regulations relating to the exemption from motor fuels excise taxes for certain alcohol fuels (gasohol) under section 221 of the Energy Tax Act of 1978 (Pub. L. 95-618, 92 Stat. 3185) ("Act"). The temporary regulations provided by this document will remain in effect until superseded by final regulations on this subject. A notice of proposed rulemaking with respect to final regulations appears elsewhere in this issue of the Federal Register.

Section 221 of the Act amended section 4061 and 4041 of the Internal Revenue Code of 1954 (Code) relating to excise taxes on motor fuels. Under section 4061 a 4 cent a gallon tax is imposed upon gasoline sold by a producer or importer. Under section 4041 a 4 cent a gallon tax is imposed on the retail sale or use of diesel and special motor fuels. Noncommercial aviation fuel is taxed at the rate of 7 cents a gallon on any liquid other than gasoline and 3 cents a gallon on gasoline (in addition to the 4 cents imposed under section 4061).

Section 221 of the Act added a new subsection (c) to section 4061 and a new subsection (k) to section 4041 of the Code. Under these amendments the excise taxes on motor fuels do not apply generally to certain sales of qualifying mixtures of motor fuels and alcohol (gasohol) or to the sale of motor fuels for the purpose of producing gasohol.

On February 22, 1979, the Internal Revenue Service issued IR-2099 which provided interim guidance to those wishing to take advantage of the exemption. Producers of qualifying mixtures of gasoline and alcohol, as defined in the Act, may register to purchase gasoline free of the federal excise tax. Producers were directed to register by filing Form 637, *Registration for Tax-Free Transactions Under Chapter 32 of the Internal Revenue Code*, with their Internal Revenue Service District Director. Any person who in the ordinary course of a trade or business regularly purchases gasoline and alcohol in bulk quantities for mixing could be considered a producer for this purpose.

These regulations supersede the interim guidance given in IR-2099 and provide additional rules to clarify the

scope and application of the exemption relating to gasohol.

Refunds or Credits

There is no provision in the Code that provides for a refund or credit with respect to tax-paid gasoline used in producing gasohol. Congress is presently considering amending the Code to allow such a refund in section 108(c)(2) of the Technical Corrections Bill of 1979 (H.R. 2797). For refund or credit provisions relating to diesel, special motor and noncommercial aviation fuels, see § 138.4081(c)–1 (f).

Waiver of Procedural Requirements of Treasury Directive

There is need for expeditious adoption of the provisions contained in this document because of the need for immediate guidance to persons wishing to produce or sell gasohol. For this reason, Jerome Kurtz, Commissioner of Internal Revenue, has determined that the provisions of paragraphs 8 through 14 of the Treasury Department directive implementing Executive Order 12044 must be waived.

Drafting Information

The principal author of this regulation is Robert H. Waltuch of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Adoption of Amendments to the Regulations

Title 26 of the Code of Federal Regulations, Part 138 is amended by inserting in the appropriate place the following new sections 138.4041(k)–1 and 138.4081(c)–1:

§ 138.4041(k)–1 Fuels containing alcohol.

Under section 4041(k) the tax imposed under section 4041 does not apply to the sale or use of any liquid fuel at least 10 percent of which consists of alcohol. Except where a different rule has been expressly provided, purchasers and sellers of liquids under section 4041(k) are subject to the same requirements and limitations as are imposed on purchasers and sellers of gasoline under section 4081(c). See, § 138.4081(c)–1.

§ 138.4081(c)–1 Gasoline mixed with alcohol.

(a) *In general.* Under section 4081(c) the tax imposed by section 4081 on the sale of gasoline does not apply to the sale of qualifying gasohol or to the sale of gasoline for the purpose of producing qualifying gasohol if the requirements of this section are met. Qualifying gasohol is referred to in this section as gasohol. Gasohol is a blend of gasoline and alcohol (whether domestic or imported alcohol) in a mixture at least 10 percent of which contains alcohol made from any product other than petroleum, natural gas, or coal. In determining whether the 10 percent alcohol requirement has been met, alcohol that is 95 or more percent pure (190 degrees or more of proof) will be considered pure if no part of the impurity is gasoline. To the extent that the alcohol is less than 95 percent pure or to the extent that any part of the impurity is gasoline, a corresponding increase in the amount of alcohol is required to meet the 10 percent requirement. For certain requirements imposed on producers of alcohol (ethanol) under chapter 51 of the Code relating to distilled spirits, see 27 CFR Part 201. For certain requirements imposed on purchasers of specially denatured alcohol (ethanol), see 27 CFR Part 211.

(b) *Sale of gasoline to produce gasohol.* Under section 4081(c) the sale of gasoline for the purpose of producing gasohol is not exempt unless the sale is in bulk quantities for delivery into a bulk storage tank of a producer who meets the requirements of this section. For purposes of section 4081(c), the term "producer" means any person who in the ordinary course of its trade or business regularly buys gasoline and alcohol in bulk quantities for blending for use in its trade or business or for resale. Thus, the mere purchase of gasoline for blending into gasohol does not qualify a person as a producer. A person is not a producer for purposes of section 4082 merely because such a person is a producer of gasohol as defined in this section. Thus, the provisions of section 4083 (relating to certain exempt sales to producers) do not necessarily apply.

(c) *Requirement for gasohol producers purchasing tax free—(1) Certificate of Registry.* A person qualifying as a producer who wishes to purchase gasoline tax free for the purpose of producing gasohol must be registered with the district director for the district in which its principal place of business is located, unless exempt from registration requirements under section 4222(b). A person registers, if not previously registered, by completing and filing Form 637, *Registration for Tax-Free Transactions Under Chapter 32 of the Internal Revenue Code*, in duplicate, in accordance with its instructions. Copies of Form 637 may be obtained from any district director. Upon approval a registry number is assigned and a Certificate of Registry is issued. At the time of purchase, a registered producer must furnish to the seller in writing its registry number together with its signed statement of the exempt purpose of the purchase. Persons not required to be registered under section 4222(b) may purchase tax free by following the procedure that applies to them in the case of other tax-free sales. See § 48.4222(b)–1.

(2) *Revocation or suspension of registration.* The district director is authorized to revoke or temporarily suspend, upon written notice, the registration of any person and the right of such a person to purchase gasoline tax free under section 4081(c) in any case in which the district director finds that—

(i) The registrant is not a bona fide producer of gasohol;

(ii) The registrant failed to comply with the requirements of paragraph (c)(1) of this section, relating to the evidence required to support a tax-free sale;

(iii) The registrant has used its registration to avoid the payment of any tax imposed by chapter 31 or 32 of the Code, or to postpone or interfere in any manner with the collection of such a tax;

(iv) The revocation or suspension is necessary to protect the revenue; or

(v) The registrant is for some other reason not eligible under this section to retain a Certificate of Registry.

The revocation or suspension of registration is in addition to any other penalty that may apply under the law for any act or failure to act.

(d) *Seller not relieved of liability in certain cases.* The seller of the gasoline remains liable for the tax imposed under section 4081 if at the time of the sale the seller of the gasoline has reason to believe that all the gasoline sold by it to the purchaser is not intended for blending into gasohol or that the purchaser has failed to register or that its registration has been revoked or suspended.

(e) *Special rules—(1) Limitation on tax-free sales.* The exemption from the excise tax under section 4081(c) applies to the sale of gasoline only for use in producing gasohol. Therefore, unless the sale is exempt under another provision of the Code, the seller of the gasoline may sell tax free only that portion of the gaoline that is intended for use in producing gasohol.

(2) *Credit sales to exempt users.* Under section 6416 of the Code, the producer of gasoline is entitled to a refund or credit if tax-paid gasoline is

ultimately sold to tax-exempt users in a case to which section 6416 (b) (2) (A), (B), (C), (D), or (H) applies. To determine the amount of overpayment, the producer of gasoline, among other things, must be able to establish the amount of tax-paid gasoline that was sold by the ultimate vendor to tax-exempt users. Therefore, if the ultimate vendor sells both tax-paid gasoline and gasohol on credit and the sales of the two kinds of fuels are not clearly distinguished, the producer of the gasoline will not be entitled to a credit or refund with respect to the tax-paid gasoline if it can not establish the amount of the tax-paid gasoline sold by the ultimate vendor to tax-exempt users.

(f) *Refunds and credits*—(1) *Gasoline.* Except as provided in paragraph (f)(2) of this section, there is no provision in the Code that allows a refund or credit with respect to tax-paid gasoline used in producing gasohol.

(2) *Mixture of gasoline and alcohol containing more than 40 percent alcohol.* If a purchaser buys gasoline tax paid for blending a mixture of gasoline and alcohol containing more than 40 percent alcohol, that mixture will be treated as a special fuel under section 4041 and the refund provisions in section 6416 and the regulations under that section apply.

(3) *Diesel, special motor, and noncommercial aviation fuels.* If a producer (as defined in paragraph (b) of this section) buys diesel, special motor, or noncommercial aviation fuels tax paid and uses the fuel in producing exempt gasohol, then the refund provisions in section 6427 of the Code and the regulations under that section apply.

(g) *Later separation and failure to blend*—(1) *Gasoline.* If any person fails to blend gasoline purchased tax free under section 4081(c) with alcohol to make gasohol, or later separates the tax-free gasoline from the alcohol, that person is treated as a producer of gasoline as defined in section 4082 and the provisions of section 4061 relating to the sale of gasoline by a producer apply. If gasoline has been purchased tax free for the purpose of producing gasohol in excess of the amount of gasoline that the purchaser is able to establish has actually been used to produce gasohol by the records required under paragraph (h)(3) of this section, the purchaser is treated as having failed to blend the excess gasoline, and the provisions of this paragraph apply. In such a case, any of the excess gasoline that is not in the purchaser's possession is treated as having been disposed of by sale or by a use that is treated as a sale under section 4082(c). See section 7201 for criminal penalties relating to a willful attempt to evade or defeat tax, and sections 6651 and 6653 for additions to tax for failure to file a return or pay tax and for negligence and fraud.

(2) *Diesel, special, and noncommercial aviation fuels.* If any person separates the diesel, special, or noncommercial aviation fuel purchased tax free under section 4041(k) from the alcohol, the separation is treated as a sale of the fuel for purposes of section 4041.

(h) *Information; records*—(1) *Information to be furnished to purchaser.* A producer of gasoline who sells gasoline tax free under section 4081(c) shall indicate to the purchaser that the purchaser is obtaining gasoline tax free for making gasohol. The producer may transmit this information by any convenient means, such as coding of sales invoices, provided that the information is presented with sufficient particularity so that the purchaser is informed that he has obtained the gasoline tax free and the purchaser can compute and remit the tax due if the gasoline is diverted to a taxable use.

(2) *Records of seller.* Every person who, but for this section would be liable for the excise tax on the sale of the gasoline, shall maintain in its records—

(i) The identity of the purchaser,

(ii) The written statement required to be given to the seller under paragraph (c) of this section, and

(iii) The quantity of gasoline sold tax free to each purchaser.

(3) *Records of producer of gasohol.* Any person purchasing gasoline tax free for the purpose of producing gasohol must maintain sufficient records to establish that the gasoline purchased tax free for the purpose of producing gasohol has actually been used for that purpose. Such a person must maintain records sufficient to establish to the satisfaction of the district director that alcohol, of the requisite kind, has actually been obtained by it in a quantity sufficient to have enabled it to have produced the full amount of gasohol that could have been produced from the quantity of gasoline it has acquired tax free for the purpose of producing gasohol.

(i) *Effective dates.* Section 4061(c) (relating to gasoline mixed with alcohol) applies to sales after December 31, 1978, and before October 1, 1984. Gasoline sold prior to January 1, 1979, and which is blended into gasohol after that date is not exempt from the tax under section 4081(c) of the Code. Section 4041(k) (relating to fuels other than gasoline) applies to sales or use after December 31, 1978, and before October 1, 1984. Where the special fuels have been blended into gasohol and have been put into the tank of a vehicle prior to January 1, 1979, the fuels are considered used prior to that date. The record-keeping requirements under this section apply to sales or uses that occur after July 19, 1979.

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

(Sec. 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805); secs. 4041(k), 4081(c) of the Code)

Jerome Kurtz,
Commissioner of Internal Revenue.

Approved: June 7, 1979.

Donald C. Lubick,
Assistant Secretary of the Treasury.

Real Estate Handbook; Relocation Assistance Program; Correction

AGENCY: U.S. Army Corps of Engineers, DOD

ACTION: Final rule.

SUMMARY: On January 15, 1979 (44 FR 3168) the U.S. Army Corps of Engineers published certain portions of the Real Estate Handbook describing existing procedures pertinent to the real estate activities of the Corps. The section number 644.121 assigned therein to Subpart D—Relocation Assistance Program is hereby redesignated as § 644.175, Cross Reference, to allow additional expansion for Subpart C.

EFFECTIVE DATE: January 2, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Leslie L. Pitchford, Jr., Chief, Programs Division, Real Estate Directorate, Office of the Chief of Engineers, Washington, D.C. 20314 (202-693-6285).

Dated: June 12, 1979.

BILLING CODE 3710-92-M

Department of the Air Force

32 CFR Part 842

Administrative Claims; Miscellaneous Amendments

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Final rule.

SUMMARY: The following amendments to the administrative claims regulations reflect recent statutory changes, and promulgates changes in policy. The amendments will also simplify the settlement and disposition of administrative claims.

EFFECTIVE DATE: April 11, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Francis B. Van Nuys, Deputy Chief, Claims and Tort Litigation Staff, Office of the Judge Advocate General, Washington, DC 20324 (202-693-0350).

SUPPLEMENTARY INFORMATION. The provisions of Part 842 are issued under authority of Sec. 8012, 70A Stat. 488; 10 U.S.C. 8012, except as otherwise noted.

The amendments will read as follows:

1. Section 842.8 is amended by revising the caption for paragraph (a)(1) to read as follows:

§ 842.8 Action on disapproving claims.

(a) * * *

(1) *Claims under Subpart C and M.*

* * *

* * * * *

§ 842.12 [Amended]

2. Section 842.12 is amended as follows:

A. Paragraph (a) is amended by deleting the word "and" at the end of the last sentence, and by substituting a "period" in place of the "comma", after the word "implied".

B. Paragraph (c) is revised to read as follows:

* * * * *

(c) Claims for damage to or loss or destruction of property that result from an act or omission that occurred outside the scope of a member's employment which are cognizable under other claims statutes may be processed under this regulation, in whole or in part, if specific authority has been obtained from HQ USAF/JACC (Subparts C, E, G, or M of this part).

3. Section 842.24 is amended to revise Rule 7, Column (B) Remarks, to read as follows:

§ 842.24 Cognizable claims not payable.

* * * * *

Except if loss was not recovered and is no longer recoverable and the reason it is not recoverable is not the knowing or intentional act or omission of the claimant, his agent, or his employee. Claim should then be processed in same manner as if claimant did not have insurance.

4. Section 842.31 is amended to revise paragraph (c) to read as follows:

§ 842.31 Property recovered by claimant.

* * * * *

(c) Disclaim any interest in the property and request that it be turned over to the Defense Property Disposal Office. (10 U.S.C. 2575(a)).

5. Section 842.32 is amended to revise paragraph (a)(1) and to add paragraphs (b), (b)(1), (b)(2), (b)(3), and (c) to read as follows:

§ 842.32 Items turned in for salvage.

* * * * *

(a) * * *

(1) Notifies the claimant in writing that the item must be delivered to the Defense Property Disposal Office as a condition to payment awaiting turn-in. EXCEPTION: If claims officer had determined that the cost to turn the property in to Government salvage would exceed its monetary value, he may ask the claimant to discard it.

(2) * * *

(b) The claims officer, upon receipt of approving authority's notice.

(1) Completes DD Form 1345-1 or other form as prescribed by the local property disposal office and makes sure that copies accompany the property to the local property disposal office.

(2) Determines whether Government transportation is necessary to carry the item(s) to the local Defense Property Disposal Office activity; if so, DD Form 1348-1 is authority for transportation.

(3) Determines necessary action if the description of property on DD Form 1845 does not agree with the item to be turned in.

(c) The Defense Property Disposal Office uses DD Form 1348-1 to receipt for property turned in for salvage, returns two copies to the delivering agent, and turns one copy over to the claims office for inclusion in the claim file.

6. Section 842.43 is amended to add Rule 8 to read as follows:

§ 842.43 Proper claimants.

Rule	Proper claimant (A)	Scope of limitations (B)
.	.	.
8	Air Force military or civilian health care providers.	For judgment or settlement resulting from litigation concerning acts committed within the scope of their employment as authorized by 10 U.S.C. 1089(f) and DOD Directive 6000.6. After investigation, forward all such claims to HQ USAF/JACC for settlement. (See Para. 7-6d)

7. Section 842.46 is amended to add paragraph (d) to read as follows:

§ 842.46 Claims payable under this subpart.

* * * * *

(d) Claims by Air Force military or civilian health care providers (see § 842.43, Rule 8). Payable costs resulting from claims or suits against individuals by 10 U.S.C. 1089(f) shall include any costs of judgment which are taxed by a court, costs of a settlement or compromise approved by the Attorney General, normal litigation expenses and such interest as any medical personnel may be obligated to pay by any court order or by statute. Costs for attorney's fees shall not be payable unless the retention of the attorney was approved by the Attorney General.

8. Section 842.49 is amended to revise paragraph (e) to read as follows:

§ 842.49 Settlement authority.

* * * * *

(e) *Claims recommended for payment in excess of $25,000.*

(1) The Secretary of the Air Force may disapprove a claim or, if he considers it meritorious and otherwise covered under this subpart make an award in an amount greater than $25,000.

(2) Upon receipt of a settlement agreement in full satisfaction of the claim, he may authorize a partial payment of $25,000 (including any emergency payment under § 842.4). Generally emergency payments are made only for personal, not corporate, claims (§ 842.4). The Secretary will return the claim to the Judge Advocate General for payment action. The claim will be forwarded to the General

Accounting Office for certification to the Treasury of the balance due claimant.

9. Section 842.54 is amended to revise paragraphs (c)(4) to read as follows:

§ 842.54 Settlement authority.

* * * * *

(4) When the Secretary approves a claim in excess of $25,000, the Judge Advocate General will prepare a letter of transmittal with appropriate documentation to the Claims Division, General Accounting Office, Washington, D.C. 20548, for GAO certification and payment by the Department of the Treasury.

10. Section 842.141 is amended to revise paragraph (a) to read as follows:

§ 842.141 Assertable claims.

A claim is assertable if:

(a) It is based on injury or disease that occurred after January 1, 1963 either under circumstances creating tort liability for the payment of damage upon a third person, or under circumstances wherein the United States is an eligible third-party beneficiary of a medical payment, uninsured motorist, no-fault, or workmen's compensation insurance policy.

11. Section 842.143 is amended to revise paragraph (b) to read as follows:

§ 842.143 Notification of injured party.

* * * * *

(b) The injured party, when desiring to do so, may seek the advice of legal counsel concerning any possible claim for personal injury or disease and furnish the base staff judge advocate the name and address of any civilian attorney retained.

12. Section 842.145 is amended to revise paragraph (a) to read as follows:

§ 842.145 Compromise settlements.

(a) Compromise of the Government's claim is authorized if the injured party or his or her attorney requests, in writing, that the United States accept less than the full amount of its claim. Normally such a request is based upon the proposed acceptance by the injured party of less than the total assets available due to either questionable liability or litigation risks. The Government's claim should ordinarily be compromised for an amount which bears the same percentage relationship to the amount claimed as the settlement does to the jury verdict expectancy. For example, if the Government's claim is $3,000 and the jury verdict expectancy is $15,000 but the injured party elects to settle for a total of $10,000, the United States should compromise for ⅔ of its claim, or $2,000.

13. Section 842.147 is amended to revise paragraph (a) to read as follows:

§ 842.147 Settlement authority.

(a) The Secretary of the Air Force may accept the full amount of any hospital recovery claim, or he may compromise or waive any such claim not in excess of $40,000. The Secretary has delegated and limited this authority as shown in 842.148.

14. Section 842.148 is amended to revise Rule 2, Column A, as amended § 842.148 reads as follows:

§ 842.148 Settlement authorities for hospital recovery claims.

RULE	A If a claim is for	B then payment may be accepted in full and a release signed by	C it may be compromised, settled, or waived by
1	any amount	The Judge Advocate General. The Asst Judge Advocate General. Director of Civil Law, Chief, Deputy Chiefs, and Branch Chiefs, Claims and Tort Litigation Staff SJAs and their designees of PACAF, and USAFE, and GCMs with PACAF and USAFE. SJAs and their designees of bases, stations, and fixed installations	
2	$40,000 or less		The Judge Advocate General. The Asst Judge Advocate General. Director of Civil Law, OTJAG. Chief, Deputy Chief, and Branch Chiefs Claims and Tort Litigation Staff. See note 2.
3	$15,000 or less		SJAs and their designees of PACAF and USAFE
4	$7,500 or less		SJAs and their designees of one-base GCMs and GCMs of PACAF and USAFE
5	$5,000 or less		SJAs and their designees of each base, station, or fixed installation.

Note.—Claims over $40,000 that cannot be collected in full may be acted on only with the approval of the Department of Justice.

Carol M. Rose,

Air Force Federal Register Liaison Officer.

[FR Doc. 79-19041 Filed 6-18-79; 8:45 am]

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 7

Yellowstone National Park, Wyoming, Montana, Idaho; Fishing Regulations

AGENCY: National Park Service, Interior.

ACTION: Final Rule.

SUMMARY: The proposed regulations set forth below are a partial revision of existing regulations promulgated to control sport fishing within Yellowstone National Park. Controls are necessary to protect native fish species and to provide for sport fishing with adequate replenishment of fish populations through natural reproduction. Research findings and field experience indicate the need for further protection of native species, for correction of difficult law enforcement situations and for relaxed limits on certain exotic species.

EFFECTIVE DATE: June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Superintendent, Yellowstone National Park, P.O. Box 168, Yellowstone National Park, Wyoming 82190.

SUPPLEMENTARY INFORMATION:

Previous Publications

A Notice of Proposed Rulemaking was published in the Federal Register of March 30, 1979 (44 FR 18995), proposing a regulation substantially the same as the regulations set forth below.

The purpose of this amendment is to:

1. Protect spawning fish in the Gardner River and in Trout Lake from illegal fishing methods.

2. Protect delicate thermal features along portions of the Firehole River and to avoid accidental burns to fishermen.

3. Protect an ecologically unique fish population in Three Ponds north of Snake River Hot Springs.

4. Provide for catch-and-release fishing only on Beula and Hering Lakes and adjacent streams, on Sportsman Lake, on upper Cougar Creek, on the Cascade Creek drainage near Canyon, on the Sylvan Lake drainage, on Sedge Creek above Turbid Lake, on those portions of the Bechler River containing genetically pure cutthroat trout and for cutthroat trout in Blacktail Deer Creek and Blacktail Ponds.

5. Correct Paragraph (2) Open Fishing Season, to properly indicate the daily period in which fishing is permitted.

6. Correct the catch-and-release regulation on Pelican Creek drainage to include only that portion of the drainage above the lower two miles, the latter which is closed to fishing.

7. Extend the additional catch limit on brook trout to the Gallatin River and Grayling Creek drainages and to include brown trout in the added limit on these drainages only.

8. Provide for the ecologically correct disposal of fish entrails in the backcountry.

Season changes on Trout Lake and on a portion of the Gardner River will protect spawning trout from illegal fishing methods such as snagging and clubbing. Closing a portion of the Firehole River will help to prevent damage to thermal features on the river bank and will lessen the possibility of fishermen accidentally stepping into hot pools. The small ponds north of Snake River Hot Springs are the only known waters containing all the fish species native to the upper Snake River and in an unaltered condition. Closure to fishing will preserve this unique ecosystem for research purposes.

Catch-and-release fishing on several waters in the park will preserve native strains of cutthroat trout. Paragraph (2) Open Fishing Season incorrectly indicates the daily fishing period. The catch-and-release regulation on Pelican Creek was written incorrectly and is confusing. The additional limits of brook and brown trout in the Gallatin River and Grayling Creek drainages will help to shift fishing pressure from the rarer native species to the more competitive non-native fish.

General park regulations prohibit disposing of fish entrails in any fresh water. A special regulation permitting this will provide a more ecologically correct method of disposal in a natural area and will avoid creating an attraction to bears that results from burying the entrails or from the often ineffective attempts at burning them in a campfire.

Comments

No specific objections to the proposed rule changes were received during the 30-day comment period which was provided. Three letters were received which were in favor and encouraged the adoption of the proposed changes. One letter and five phone calls were received requesting copies of the proposed regulations However, no comments were subsequently received from these inquiries. One letter was received disagreeing with our overall fisheries program, but did not make specific comments on the proposed regulations.

In view of the fact that the summer fishing season has already begun, the National Park Service has determined that immediate implementation of these regulations is necessary to adequately provide for resource protection. Therefore, it is deemed neither necessary nor constructive to delay the effective date for 30 days after this publication.

Authority

(Sec. 3, Act of August 25, 1916 (39 Stat. 535, as amended, 16 U.S.C. 3), and the Act of May 7, 1894 (28 Stat. 73, as amended; 16 U.S.C. 26), 245 DM 1 (42 FR 12931), as amended)

Drafting Information

The primary author of this regulation is Jerry R. Phillips, Assistant Chief Ranger, Yellowstone National Park.

Impact Analysis

The National Park Service has determined that this document is not a significant rule requiring preparation of a regulatory analysis under Executive Order 12044 and Part 14 of Title 43 of the Code of Federal Regulations; nor is it a major Federal action significantly affecting the quality of the human environment which would require preparation of an Environmental Impact Statement. An Environmental Statement for the Master Plan for Yellowstone National Park which discusses, among other things, the impacts of controlling fishing within the park, has been prepared by the National Park Service. This statement is available for review at the address given above, or interested

parties may request copies of it from the Superintendent.

Boyd Evison,

Acting Associate Director, Management and Operations.

In consideration of the foregoing, paragraphs (e)(2), (3)(ix), (xi), (xii); (5)(vii) through (xvi), (6)(v) and (10)(i) of § 7.13 of Title 36, Code of Federal Regulations, are revised as follows:

§ 7.13 Yellowstone National Park.

* * * * *

(e) *Fishing.* * * *

(2) *Open Fishing Season.* * * *

(i) All rivers and creeks in the Yellowstone River drainage above the Upper Falls at Canyon except as otherwise provided in paragraph (e)(3) of this section, are open to fishing between the hours of 5 a.m. and 10 p.m., local time, from July 15 through October 31. Rivers and creeks include those portions of Yellowstone Lake marked by buoys within 100 yards of the river or creek inlet.

(ii) All lakes in the Yellowstone River drainage above the Upper Falls at Canyon, except as otherwise provided in paragraph (e)(3) of this section, are open to fishing between the hours of 5 a.m. and 10 p.m., local time, from June 15 through October 31. The marking buoys in the vicinity of the outlet of Yellowstone Lake shall define the northern limit of Yellowstone Lake.

(iii) The Trout Lake drainage above Soda Butte Creek, including Trout, Buck and Shrimp Lakes, shall be open between the hours of 5 a.m. and 10 p.m., local time, from June 15 through October 31.

(iv) All other waters, except as provided in paragraph (e)(3) of this section, are open to fishing between the hours of 5 a.m. and 10 p.m., local time, from May 28 through October 31.

* * * * *

(3) *Class Waters.* * * *

(ix) The Firehole River, from the road bridge one-half mile east of Old Faithful downstream to the road bridge at Biscuit Basin, including any other portions of the Firehole River, identified by the posting of appropriate signs, which lie in the immediate vicinity of hazardous or fragile thermal features.

* * * * * *

(xi) The Gardner River between Mammoth Hot Springs and the North Boundary, where and when posted, on or after September 1 until the end of the park fishing season.

(xii) The three ponds one-half mile north of Snake Hot Springs.

* * * * *

(5) *Catch-and-Release Waters.* * * *

(vii) Pelican Creek and all its tributaries from two miles above the mouth to the headwaters.

* * * * *

(ix) Sylvan Lake, including its inlets, and the outlet downstream to Clear Creek.

(x) The Cascade Creek drainage near Canyon Village, including Cascade Lake.

(xi) The Falls River drainage above the falls at the 7200 foot contour, as posted, including Beula and Hering Lakes.

(xii) Sportsman Lake, including the inlets and the outlet downstream to Mol Heron Creek.

(xiii) Cougar Creek above the Gneiss Creek trail crossing.

(xiv) The Bechler River and its tributaries above Colonnade Falls.

(xv) Sedge Creek and its tributaries above Turbid Lake.

(xvi) Blacktail Deer Creek drainage, including Blacktail Ponds, for cutthroat trout only.

* * * * *

(6) *Daily Limits by Waters.* * * *

(v) The Gallatin River and Grayling Creek and their tributaries, and Cougar Creek below the Gneiss Creek trail crossing: Five fish, any size, of which at least three must be brook or brown trout.

* * * * *

(10) *Disposal of Fish Entrails.* * * *

(i) In those backcountry waters, designated by the Superintendent, fish entrails may be disposed of by puncturing the air bladder and depositing the entrails in deep water in the lake or stream from which the fish was taken.

* * * * *

BILLING CODE 4310-70-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL 1245-7]

Texas, Approval and Promulgation of Implementation Plan: Deletion of Reporting Requirement

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: EPA is amending § 52.2297—Employer Mass Transit and Carpool Incentive Program to delete the annual reporting requirements. The content and format of the reports as presently specified do not provide information which is sufficiently useful to justify the time and expense of their preparation. This action eliminated the requirement for annual reports but retains the requirement for initial reports.

EFFECTIVE DATE: June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Joan Brown, Air Compliance Branch, Region 6, Environmental Protection Agency, 1201 Elm Street, Dallas, Texas 75270, (214) 767-2755.

SUPPLEMENTARY INFORMATION: On July 21, 1977 (42 FR 37376), the Administrator promulgated regulations under the Clean Air Act as an addition to the state implementation plan for Texas. The regulations required reductions in emission of hydrocarbons as an aid in attaining the health-related ambient air quality standard for photochemical oxidants (ozone). One of the regulations, 40 CFR 52.2297, was called the Employer Mass Transit and Carpool Incentive Program. This regulation required certain employers and educational institutions in 23 Texas counties to establish programs to encourage and increase the use of mass transit and carpools by employees and students. The employers and educational institutions were required to submit an initial report, followed by annual reports each June 30, describing the program and its effectiveness.

It has now been determined that the annual reports place a burden on employers and educational institutions which outweighs the value of the information presently required in the annual reports. The requirement for annual reports is now being removed, although the requirement for initial reports is retained. The agency is studying alternative formats which would provide more meaningful and consistent data. The annual reports which would be due on June 30, 1979, need not be submitted.

For good cause, the Administrator finds that notice of proposed rulemaking and public comment are unnecessary before this amendment is made effective. It removes a requirement presently existing. Because of the limited value of the reports as presently required, no useful data will be lost by not obtaining such reports.

For good cause, the Administrator finds that this amendment should be made effective immediately. Because of the nearness of this publication to the date for submission of the annual reports, any delay could result in the failure to remove the legal requirement before the date on which the reports must be submitted.

This action is taken under the authority of the Clean Air Act, sections 110 and 301, 42 U.S.C. 7410 and 7601.

Dated: June 12, 1979.

Douglas M. Costle,

Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart SS—Texas

§ 52.2297 [Amended]

1. In § 52.2297, paragraph (e) is revoked and reserved.

40 CFR Part 52

[FRL 1243-4]

Air Programs; Louisiana Variance; Kaiser Aluminum & Chemical Corp. (Norco)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This action approves a variance to Louisiana Regulation 19.5 for Kaiser Aluminum & Chemical Corporation in Norco, Louisiana. Compliance under the variance is scheduled for December 31, 1980. The variance will allow Kaiser to complete emission controls for its petroleum coke calcining facilities. The continuation of particulate matter emissions at current rates are not expected to cause or contribute to a violation of ambient air quality standards.

DATES: This rulemaking is effective on July 19, 1979.

FOR FURTHER INFORMATION CONTACT: Jerry Stubberfield, Environmental Protection Agency, Region 6, Air Program Branch, Dallas, Texas 75270, (214) 767-2742.

SUPPLEMENTARY INFORMATION: A proposed variance to Louisiana Regulation 19.5 for Kaiser Aluminum & Chemical Corp. (Norco) was submitted to EPA by the Governor of Louisiana on August 31, 1978. Under the variance, Kaiser is required to achieve compliance by December 31, 1980. A schedule of compliance, which includes increments of progress, is contained in the Commission Order of the Louisiana Air Control Commission.

EPA review of the proposed variance indicated that a continuation of particulate emissions at current rates would not cause or contribute to a violation of air quality standards. As a result EPA proposed approval of the variance on march 12, 1979 (44 FR 13545), and invited public comment on the proposed action. No comments were received.

Current Action

The variance to Louisiana Regulation 19.5 for Kaiser Aluminum & Chemical Corp. (Norco) is being approved as proposed.

This notice of final rulemaking is issued under the authority of Section 110(a) of the Clean Air Act, as amended, 42 U.S.C. 7410-(a).

Dated: June 12, 1979

Douglas M. Costle,

Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart T—Louisiana

1. In § 52.970, paragraph (c) is amended by adding a new paragraph (13) as follows:

§ 52.970 Identification of plan.

* * * * *

(c)* * *

(13) A variance to Regulation 19.5 for Kaiser Aluminum & Chemical Corporation at Norco, Louisiana was submitted by the Governor on August 31, 1978.

2. In Subpart T, § 52.980 is amended by adding a new paragraph (b) as follows:

§ 52.980 Compliances schedules.

* * * * *

(b) The compliance schedule below for Kaiser Aluminum & Chemical Corporation is approved as a revision to the plan pursuant to §§ 51.6 and 51.15 of this chapter. The regulation cited is an approved regulation of the State.

Source	Location	Regulation involved	Final compliance date
Kaiser Aluminum & Chemical Corp. (coke calciner)	Norco	19.5	Dec. 31, 1980.

[FR Doc. 79-18077 Filed 6-18-79; 8:45 am]
BILLING CODE 6560-01-M

40 CFR Part 65

[FRL 1241-1]

Delayed Compliance Order for Collins & Aikman Corp., Located in Albemarle, N.C.

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Administrator of EPA hereby issues a Delayed Compliance Order to Collins and Aikman Corporation. This innovative technology order issued pursuant to Section 113(d)(4) of the Clean Air Act requires the company to bring air emissions from its two coal fired boilers at Albemarle, North Carolina, into compliance with North Carolina air pollution control regulations contained in the federally approved North Carolina State Implementation Plan (SIP). Collins and Aikman Corporation's compliance with the Order will preclude suits under the federal enforcement and citizen suit provisions of the Clean Air Act for violation(s) of the SIP regulations covered by the Order during the period the Order is in effect.

DATES: This rule takes effect on June 18, 1979.

FOR FURTHER INFORMATION CONTACT: Floyd Ledbetter, Air Enforcement Branch, U.S. Environmental Protection Agency, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30308, Telephone Number: (404) 881-4298.

ADDRESSES: The Federal Delayed Compliance Order, supporting material, and any comments received in response to a prior Federal Register notice proposing issuance of the Order are available for public inspection and copying during normal business hours at: U.S. Environmental Protection Agency, Region IV, Air Enforcement Branch, 345 Courtland Street, NE., Atlanta, Georgia 30308.

SUPPLEMENTARY INFORMATION: On February 8, 1979, the Regional Administrator of EPA's Region IV Office published in the Federal Register, Vol. 44, No. 29, p. 8315, a notice setting out the provisions of a proposed "innovative technology" federal delayed compliance order for Collins and Aikman Corporation. The notice asked for public comments and offered the opportunity to request a public hearing on the proposed Order. No public comments or requests

for a public hearing were received in response to the proposal notice.

Therefore, a federal delayed compliance order effective this date is issued to the Collins and Aikman Corporation by the Administrator of EPA pursuant to the authority of Section 113 (d)(1) and (d)(4) of the Clean Air Act, 42 U.S.C. 7413(d) (1) and (4). The Order places Collins and Aikman Corporation on a schedule to bring its two coal fired boilers in Albemarle, North Carolina, into compliance as expeditiously as practicable with the North Carolina Administrative Code Title 15, Chapter 2D, a part of the federally approved North Carolina State Implementation Plan. The Order also imposes interim requirements which meets Sections 113(d)(1)(C) and 113(d)(7) of the Act, and emission monitoring and reporting requirements. If the conditions of the Order are met, it will permit the Collins and Aikman Corporation to delay compliance with the SIP regulations covered by the Order until June 1, 1980. A source receiving an innovative technology delayed compliance order pursuant to Section 113(d)(4) of the Act has five years from the state implementation plan deadline to comply with the regulation in question. The Collins and Aikman Corporation is unable to comply immediately with these regulations.

EPA has determined that the Order shall be effective upon publication of this notice because of the immediate need to place Collins and Aikman Corporation on a schedule for compliance with the applicable requirement(s) in the North Carolina State Implementation Plan.

(42 U.S.C. 7413(d), 7601)

Dated: June 12, 1979.

Douglas M. Costle,

Administrator.

In consideration of the foregoing, Chapter I of Title 40 of the Code of Federal Regulations is amended as follows:

PART 65—DELAYED COMPLIANCE ORDERS

§ 65.380 [Amended]

1. By adding the following entry to the table in § 65.380 Federal delayed compliance orders issued under Section 113(D) (1), (3), and (4) of the Act.

* * * * *

BILLING CODE 6560-01-M

40 CFR Part 65

[FRL 1247-4]

Delayed Compliance Order for General Housewares Corp., Wagner Manufacturing Division

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: By this rule, the Administrator of U.S. EPA approves a Delayed Compliance Order to General Housewares Corp., Wagner Manufacturing Division (Wagner). The Order requires the Company to bring air emissions from its grey iron at Sidney, Ohio into compliance with certain regulations contained in the federally approved State Implication Plan (SIP). Wagner's compliance with the Order will preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act (Act) for violations of the SIP regulations covered in the Order.

DATES: This rule takes effect June 18, 1979.

FOR FURTHER INFORMATION CONTACT: Cynthia Colantoni, United States Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, Telephone (312) 353-2082.

SUPPLEMENTARY INFORMATION: On May 1, 1979 the Regional Administrator of U.S. EPA's Region V Office published in the **Federal Register** (44 FR 25473) a notice setting out the provisions of a proposed State Delayed Compliance Order for Wagner. The notice asked for public comments and offered the opportunity to request a public hearing on the proposed Order.

No public comments and no request for a public hearing were received in response to the notice.

Therefore, a Delayed Compliance Order effective this date is approved to Wagner by the Administrator of U.S. EPA pursuant to the authority of Section 113(d)(2) of the Act, 42 U.S.C. 7413(d)(2). The Order places Wagner on a schedule to bring its grey iron cupolas at Sidney, Ohio into compliance as expeditiously as practicable with Regulations OAC 3745-17-07 and OAC 3745-17-11, a part of the federally approved Ohio State Implementation Plan. Wagner is unable to immediately comply with these regulations. The Order also imposes interim requirements which meet Sections 113(d)(1)(C) and 113(d)(7) of the Act, and emission monitoring and reporting requirements. If the conditions of the Order are met, it will permit Wagner to delay compliance with the SIP regulations covered by the Order until July 1, 1979.

Compliance with the Order by Wagner will preclude Federal enforcement action under Section 113 of the Act for violations of the SIP regulations covered by the Order. Citizen suits under Section 304 of the Act to enforce against the source are similarly precluded. Enforcement may be initiated, however, for violations of the terms of the Order, and for violations of the regulations covered by the Order which occurred before the Order was issued by U.S. EPA or after the Order is terminated. If the Administrator determines that Wagner is in violation of a requirement contained in the Order, one or more of the actions required by Section 113(d)(9) of the Act will be initiated. Publication of this notice of final rulemaking constitutes final Agency action for the purposes of judicial review under Section 307(b) of the Act.

U.S. EPA has determined that the Order shall be effective June 18, 1979 because of the need to immediately place Wagner on a schedule for compliance with the Ohio State Implementation Plan.

42 U.S.C. 7413(d), 7601)

Dated: June 13, 1979.

Douglas M. Costle,

Administrator.

In consideration of the foregoing, Chapter I of Title 40 of the Code of Federal Regulations is amended as follows:

PART 65—DELAYED COMPLIANCE ORDERS

By adding the following entry to the table in § 65.401:

§ 65.401 U.S. EPA approval of State delayed compliance orders issued to major stationary sources.

Source	Location	Order No.	Date of FR Proposal	SIP regulation involved	Final compliance date
•	•	•	•	•	•

BILLING CODE 6560-01-M

40 CFR Part 180

[PP 6F1830/R207; FRL 1252-1]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Chlorpyrifos

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final Rule.

SUMMARY: This rule establishes tolerances for residues of the insecticide chlorpyrifos on sorghum grain at 0.75 part per million (ppm) sorghum fodder at 6 ppm, and sorghum forage at 1.5 ppm. The regulation was requested by Dow Chemical Co. This rule establishes maximum permissible levels for residues of chlorpyrifos on sorghum grain, fodder, and forage.

EFFECTIVE DATE: Effective June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Frank Sanders, Product Manager (PM) 12, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, SW, Washington, DC 20460 (202/426-9425).

SUPPLEMENTARY INFORMATION: On September 1, 1976, notice was given (41 FR 36834) that Dow Chemical Co., PO Box 1706, Midland, MI 48640, had filed a pesticide petition (PP 6F1830) with the EPA. This petition proposed that 40 CFR 180.342 be amended to establish tolerances for combined residues of the insecticide chlorpyrifos (*O,O-diethyl O-*(3,5,6-trichloro-2-pyridyl) phosphorothioate) and its metabolite 3,5,6,-trichloro-2-pyridinol in or on the raw agricultural commodities sorghum grain at 0.75 ppm, and sorghum fodder and forage at 1.5 ppm.

The State Order identified below has been approved by the Administrator in accordance with Section 113(d)(2) of the Act and with this Part. With regard to this Order, the Administrator has made all the determinations and findings which are necessary for approval of the Order under Section 113(d) of the Act.

Subsequently, the petitioner amended the petition by increasing the proposed tolerance on sorghum fodder from 1.5 ppm to 6 ppm. Since sorghum fodder is not a human food item, the higher tolerance will not result in a potential increase in exposure of humans to chlorpyrifos residues. Thus, the tolerances are not being proposed at this time to provide an opportunity for public comment. No comments were received in response to this notice of filing. (A related document concerning the establishment of a feed additive tolerance for residues of chlorpyrifos on sorghum grain milling fractions appears elsewhere in today's **Federal Register**).

The data submitted in the petition and other relevant material have been evaluated. The toxicology data considered in support of the proposed tolerances included a two-year rat feeding/oncogenicity study and a dog feeding study with a no-observed-effect level (NOEL) of 0.1 milligram (mg)/kilogram (kg) of body weight. Studies on delayed neurotoxicity and reproduction showed negative potentials. Based on the two-year chronic rat feeding study with the 0.1 mg/kg bw NOEL on cholinesterase activity and using a safety factor of 10, the acceptable daily intake (ADI) for man is 0.01 mg/kg bw/day. The theoretical maximum residue contribution (TMRC) in the human diet from the proposed tolerances and tolerances which have previously been established for residues of chlorpyrifos on a variety of raw agricultural commodities at levels ranging from 0.01 ppm to 1.5 ppm does not exceed the ADI. A food additive regulation (21 CFR 193.85) has previously been established for chlorpyrifos in food-handling establishments. Feed additive tolerances have also been established (21 CFR 561.98) for residues of chlorpyrifos in dried sugar beet pulp at 1 ppm and sugar beet molasses at 3 ppm.

Desirable data that are lacking from the petition are a lifetime oncogenicity study and a teratology study. In a letter of February 17, 1978, and January 31, 1979, the petitioner indicated that the lifetime oncogenicity study is expected to be completed in May, 1979 and the teratology study is expected to be completed in late 1979. The petitioner also agreed to voluntarily delete the use of chlorpyrifos on sorghum from the label should the lifetime oncogenicity and teratology studies be found to exceed the risk criteria for chronic toxicity in 40 CFR 162.11. Although the oncogenicity evaluation of chlorpyrifos is not complete, it is concluded that based on the available data, the risks are acceptable since the absence of an oncogenic potential is shown in the two-year rat feeding/oncogenicity study.

The metabolism of chlorpyrifos is adequately understood, and an adequate analytical method (gas chromatography) is available for enforcement purposes. No actions are currently pending against continued registration of chlorpyrifos nor are there any other relevant considerations involved in establishing the proposed tolerances. The established tolerances for residues of chlorpyrifos in milk, meat, poultry, and eggs are adequate to cover the proposed uses.

The pesticide is considered useful for the purpose for which tolerances are sought, and it is concluded that the tolerances of 0.75 ppm on sorghum grain, 6 ppm on sorghum fodder, and 1.5 ppm on sorghum forage established by amending 40 CFR 180.342 will protect the public health. It is concluded, therefore, that the tolerances be established as set forth below.

Any person adversely affected by this regulation may, on or before July 19, 1979, file written objections with the Hearing Clerk, Environmental Protection Agency, Rm. M-3708 (A-110), 401 M St., SW, Washington, DC 20460. Such objections should be submitted in triplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Under Executive Order 12044, EPA is required to judge whether a regulation is

"significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized". This regulation has been reviewed, and it has been determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Effective June 18, 1979, Part 180 is amended as set forth below.

Dated: June 12, 1979.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

(Section 408(d)(2) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)(2))

Part 180, Subpart C, section 180.342, is amended by alphabetically inserting sorghum grain at 0.75 ppm, sorghum fodder at 6 ppm, and sorghum forage at 1.5 ppm in the table to read as follows:

§ 180.342 Chlorpyrifos; tolerances for residues.

* * * * *

Commodity:	Parts per million
* * * * *	
Sorghum, fodder	6
Sorghum, forage	1.5
Sorghum, grain	0.75
* * * * *

BILLING CODE 6560-01-M

40 CFR Part 600

[FRL 1076-6]

Fuel Economy of Motor Vehicles; Technical Amendment

AGENCY: Environmental Protection Agency.

ACTION: Final Rule.

SUMMARY: This amendment provides EPA additional latitude in judging the levels of correlation between fuel economy data generated at the EPA laboratory in Ann Arbor, Michigan, and at industry laboratories. Currently this judgment must be based on data developed under a specific section of Part 600. The regulations have been amended to allow for use of data from Part 86, Part 600, or from correlation testing.

DATES: These amendments are effective June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Gregory J. Dana, Regulatory Management Staff (ANR-455), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, phone: 202-755-0596.

SUPPLEMENTARY INFORMATION: Under the present regulations, only data from Part 600 is allowed to be used to determine the level of offset between manufacturers' and the EPA laboratory. If insufficient data are available under Part 600, additional testing must be performed, even though applicable data exist from testing done under Part 86 or correlation programs. This action places no additional burden on the industry as it simply allows the use of all existing data to determine the level of offset. Therefore, issuance of a proposal and opportunity for public comment is unnecessary. For these reasons, EPA finds good cause to publish this technical amendment as final and to have it take effect immediately in accordance with 5 U.S.C. 553(b).

Note.—The Environmental Protection Agency has determined that this document is not a "significant" regulation and does not require preparation of a regulatory analysis under Executive Order 12044.

Dated: June 12, 1979.

Douglas M. Costle,

Administrator.

Part 600 of Chapter I, Title 40 of the Code of Federal Regulations is hereby amended as follows:

1. By amending paragraph (g) of § 600.006 to read as follows:

§ 600.006 [Amended]

* * * * *

(g) If, based on a review of the fuel economy data generated under Part 86, Part 600, or by correlation testing, the Administrator determines that an unacceptable level of offset exists between fuel economy data generated by a manufacturer and fuel economy data generated by the Administrator, he may reject all fuel economy data submitted by the manufacturer until the cause of the discrepancy is determined and validity of the data is established by the manufacturer.

* * * * *

(Secs. 501, 503, 505, 506, Motor Vehicle Information and Cost Savings Act as amended by Title III of the Energy Policy and Conservation Act (15 U.S.C. 2001, 2003, 2005, and 2006))

[FR Doc. 79-18018 Filed 6-18-79; 8:45 am]

BILLING CODE 6560-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1033

[Service Order No. 1381]

Indiana Interstate Railway Co., Inc. Authorized to Operate Over Tracks Leased From the Penn Central Corp.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Service Order No. 1381.

SUMMARY: Indiana Interstate Railway Company, Inc., is authorized to operate over former tracks of Penn Central between Goshen, Indiana, and Shipshewana, Indiana.

DATES: Effective 11:59 p.m., June 15, 1979, until further order of this Commission. Expires when modified or vacated by order of this Commission.

FOR FURTHER INFORMATION CONTACT: J. Kenneth Carter (202) 275-7840.

Decided: June 12, 1979.

Railroad service on the former Shipshewana Branch of the former Penn Central Transportation Company, identified in the Final System Plan of the Reorganization of the Northeastern Railroads as USRA Line No. 399, between Goshen, Indiana, and Shipshewana, Indiana, has been discontined for several years. The State of Indiana has leased this line from The Penn Central Corporation and has designated Indiana Interstate Railway Company, Inc. (II) to operate this line.

An application seeking authority to operate as the designated operator of this line will be filed by II. There is an interchange connection between this line and Consolidated Rail Corporation at Goshen, Indiana. If service over this line is not restored, numerous shippers on this line will not have needed rail service.

It is the opinion of the Commission that an emergency exists requiring the immediate resumption of operations over this line in the interest of the public; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, § 1033.1381 *Indiana Interstate Railway Company, Inc. authorized to operate over tracks leased from the Penn Central Corporation.*

(a) The Indiana Interstate Railway Company, Inc. (II) is authorized to operate over tracks of USRA Line No. 399, formerly known as the Shipshewana Branch of the Penn

Central Transportation Company (PC) between former PC milepost 0.7 at Goshen, Indiana, and former PC milepost 16.7 at Shipshewana, Indiana, a distance of approximately 16.0 miles.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign traffic.

(c) Nothing herein shall be considered as a prejudgement of the application of the Indiana Interstate Railway Company, Inc. seeking authority to operate over these tracks.

(d) *Effective date.* This order shall become effective at 11:59 p.m., June 15, 1979.

(e) *Expiration.* The provisions of this order shall remain in effect until modified or vacated by order of this Commission.

(49 U.S.C. (10304–10305 and 11121–11126).)

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. Homme, Jr.,

Secretary.

49 CFR Part 1125

(Ex Parte No. 293, Sub. No. 2)

Standards for Determining Rail Services Continuation Subsidies; Decision

AGENCY: Rail Services Planning Office, Interstate Commerce Commission.

ACTION: Amendments to the Standards.

SUMMARY: On March 16, 1979, the Rail Services Planning Office (RSPO) published proposed amendments regarding calculation of the off-branch costs for Class II railroads under section 1125.7(n)(4). The method proposed in that notice will be adopted and the necessary amendments made to the regulations to effect the revisions. It is RSPO's position that the method adopted will develop costs that more accurately reflect those incurred by Class II and III railroads handling traffic to and from branch lines that are operated under a subsidy agreement. A further benefit of the procedure adopted is that it is applicable for Class III railroads as well as Class II railroads. In the March 16 notice, there was a companion issue related to the effect of inflation on costs, which will be handled in a separate notice.

EFFECTIVE DATE: January 1, 1979.

FOR FURTHER INFORMATION CONTACT: James Wells, Chief, Cost and Subsidies Branch, Section of Rail Services Planning, 202–275–7283.

SUPPLEMENTARY INFORMATION: On March 16, 1979 the RSPO published a notice of proposed rulemaking that covered the issues of (1) revised off-branch costs for Class II railroads and (2) the effects of inflation on costs between the conclusion of the calendar and subsidy year. The second issue requires further comment on the proposed method and, therefore, will be handled in a separate notice.

No comments of substance were received on the method proposed for calculating the off-branch costs of Class II railroads. As a result, RSPO is adopting the procedure in the March 16 notice and is amending the regulations to implement this change. As RSPO stated in the supplementary information of the March 16 notice, the new procedure recognizes the operational elements of terminal handlings, line-haul service, and the interchange function. This is a great improvement over the single-element basis of the prior procedure. A further benefit is that the adopted procedure can be applied to the newly-designated Class III category of railroads in addition to those designated Class II.

Part 1125, Subchapter B of Chapter X of Title 49 of the Code of Federal Regulations is amended by making the change set forth below to the regulations issued on January 11, 1978. The amendments are retroactive to January 1, 1979.

This decision does not significantly affect the quality of the human environment.

Issued June 20, 1979 by Alexander L. Morton, Director, Rail Services Planning Office,

By the Commission.

H. G. Homme, Jr.,

Secretary.

1. Section 1125.7(n)(4) is revised to read as follows:

§ 1125.7 Calculation of avoidable costs and management fee.

* * * * * *

(n) * * *

(4) Class II and Class III line-haul railroads shall calculate off-branch costs as follows (based on: the carrier's latest Form R–2 or R–3 filed with the ICC; the ICC's latest *Rail Carload Cost Scales;* and the carrier's own records):

(i) A carrier that has only freight operations shall calculate the estimated system variable expenses by multiplying the total operating expenses by .78, the three-year composite variability ratio for all Class I railroads. If a carrier has passenger and freight service, the freight portion of the total estimated system variable expenses shall be calculated by multiplying the total estimated system variable expenses, calculated as above, by the ratio of freight related operating expenses to total railway operating expenses [freight related operating expenses divided by total railway operating expenses].

(ii) The total number of revenue carload terminal handlings shall be determined from company records [originating and terminating (local) revenue carloads multiplied by 2, plus originating or terminating and interchange (interline) revenue carloads].

(iii) The total number of revenue carload interchange handlings shall be determined from company records [bridge (interchange to interchange) revenue carloads multiplied by 2, plus revenue carloads that are originated or terminated and interchanged (interline)].

(iv) The average load per car shall be determined from company records [ton-miles-revenue freight, divided by loaded freight car-miles].

(v) The ratios employed to separate the estimated system variable expenses between interchange, terminal and line-haul operations are calculated as follows:

(A) Theoretical interchange expenses are calculated by multiplying the number of revenue carload interchange handlings, paragraph (n)(4)(iii) of this section, by the interchange variable cost per carload for other than box, unequipped, refrigerator, tank and TOFC cars (ICC *Rail Carload Cost Scales,* Table 12, Line 6 or 14, appropriate region, multiplied by 100).

(B) Theoretical terminal carload expenses are calculated by multiplying the number of revenue carload terminal handlings, paragraph (n)(4)(ii) of this section, by the average train variable terminal cost per carload for box-general service, equipped (one half of the terminal cost per carload ICC *Rail Carload Scales,* Table 3, appropriate region, line 2, col. (6)).

(C) Theoretical terminal lading expenses are calculated by multiplying the total terminal tons [terminal carload handlings, paragraph (n)(4)(ii) of this section, multiplied by average load per car, paragraph (n)(4)(iv) of this section] by the average train variable terminal cost per ton for box-general service, equipped [one half of the terminal cwt. cost, ICC *Rail Carload Cost Scales*, Table 3, appropriate region, line 2 col. (7), multiplied by 20].

(D) Theoretical line-haul car expenses are calculated by multiplying the carrier's loaded car-miles by the average train variable cost per car-mile excluding interchange, for box-general service, equipped [ICC *Rail Carload Cost Scales*, Table 3, appropriate region, Line 2, col. (4) minus Appendix B, appropriate region, Line 2, col. (4)].

(E) Theoretical line-haul lading expenses are calculated by multiplying the carrier's total ton-miles of revenue freight by the average train variable ton-mile cost for a box-general service, equipped [wt-mile cost ICC *Rail Carload Cost Scales*, Table 3, appropriate region, Line 2, col. (5), multiplied by 20].

(F) Theoretical station clerical expenses are calculated by multiplying total revenue carload terminal handlings, paragraph (n)(4)(ii) of this section, by the variable station clerical cost per carload [one half of the station clerical cost per carload, ICC *Rail Carload Cost Scales*, Table 10, appropriate region, Line (2) multiplied by 100].

(G) Total theoretical system variable expenses are calculated by adding paragraph (n)(4)(v)(A) plus (n)(4)(v)(B) plus (n)(4)(v)(C) plus (n)(4)(v)(D) plus (n)(4)(v)(E) of this section.

(H) The ratio for interchange variable expenses is calculated by dividing total theoretical interchange variable expenses, paragraph (n)(4)(v)(A) of this section, by the total theoretical system variable expenses, paragraph (n)(4)(v)(G) of this section.

(I) The ratio for terminal variable expenses is calculated by dividing the total theoretical terminal variable expenses, paragraph (n)(4)(v)(B) plus (n)(4)(v)(C) of this section, by the total theoretical system variable expenses, paragraph (n)(4)(v)(G) of this section.

(J) The ratio for line-haul variable expenses is calculated by dividing total theoretical line-haul variable expenses, paragraph (n)(4)(v)(D) plus (n)(4)(v)(E) of this section, divided by the total theoretical system variable expenses, paragraph (n)(4)(v)(G) of this section.

(K) The ratio for station clerical variable expenses is calculated by dividing total theoretical station clerical variable expenses, paragraph (n)(4)(v)(F) above, by the total theoretical system variable expenses, paragraph (n)(4)(v)(G) above.

(vi) The carrier's total system variable expenses are separated as follows:

(A) Total interchange variable expenses are calculated by multiplying the total system variable expenses, paragraph (n)(4)(i) of this section, by the interchange variable expense ratio, paragraph (n)(4)(v)(H) of this section.

(B) Total terminal variable expenses are calculated by multiplying the total system variable expenses, paragraph (n)(4)(i) of this section, by the terminal variable expense ratio, paragraph (n)(4)(v)(I) of this section.

(C) Total line-haul variable expenses are calculated by multiplying the total system variable expenses, paragraph (n)(4)(i) of this section, by the line-haul variable expense ratio, paragraph (n)(4)(v)(J) of this section.

(d) Total station clerical variable expenses are calculated by multiplying the total system variable expenses, paragraph (n)(4)(i) of this section by the station clerical expense ratio, paragraph (n)(4)(v)(K) of this section.

(vii) The carrier's unit costs shall be determined as follows:

(A) The interchange cost per carload shall be calculated by dividing the total interchange variable expense, paragraph (n)(4)(vi)(A) above by the total number of interchange handlings, paragraph (n)(4)(iii) of this section.

(B) The terminal cost per carload shall be calculated the total terminal variable expenses, paragraph (n)(4)(vi)(B) above, by the total number of terminal handlings, paragraph (n)(4)(ii) of this section.

(C) The line-haul cost per car-mile shall be calculated by dividing the total line-haul variable expenses, paragraph (n)(4)(vi)(C) of this section, by the total number of loaded car-miles.

(D) The modified terminal cost per carload shall be calculated by adding the interchange cost per carload, paragraph (n)(4)(vii)(A) of this section, to the station clerical cost per carload total station clerical variable expense, paragraph (n)(4)(vi)(D) of this section, divided by the total number of terminal handlings, paragraph (n)(4)(ii) of this section].

(viii) The interchange costs shall be calculated by multiplying the interchange cost per carload, paragraph (n)(4)(vii)(A) above, by the number of carloads of traffic interchanged with other railroads.

(ix) The terminal costs shall be calculated by multiplying the modified terminal cost per carload, paragraph (n)(4)(vii)(D) of this section, times the number of carloads which originated or terminated on the branch during the subsidy year. To this amount add the normal terminal cost per carload, paragraph (n)(4)(vii)(B) of this section, times the number of carloads which originated or terminated on the branch that are local to the railroad serving the branch.

(x) The line-haul costs shall be calculated by mulitplying the line-haul cost per car-mile, paragraph (n)(4)(vii)(C) of this section, by the loaded car-miles generated off the branch by cars originated or terminated on the branch during the subsidy year.

Proposed Rules

Federal Register
Vol. 44, No. 119
Tuesday, June 19, 1979

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

[5 CFR Part 353]

Restoration To Duty

AGENCY: Office of Personnel Management.

ACTION: Proposed rulemaking.

SUMMARY: OPM proposes to amend § 353.306 of its regulations governing the restoration to duty of compensably injured employees who have partially recovered, to delete the 1-year limitation during which agencies are required to make every effort to restore these individuals. This will mean that agencies will be required to consider partially recovered employees or former employees without time limit, just as they are now required to similarly consider those who fully recover from a job related injury. This proposal is in furtherance of the President's budget message to Congress on the restoration to duty of injured employees and the intent of Congress in its enactment of the Rehabilitation Act of 1973, and the Injury Compensation Amendments of 1974.

DATES: Written comments are invited and will be considered if received no later than August 20, 1979.

ADDRESS: Send written comments to Raleigh M. Neville, Office of Staffing Policies, Staffing Services, Rm 6526, Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. 20415.

FOR FURTHER INFORMATION CONTACT: Raleigh M. Neville (202) 632–6817

Accordingly, § 353.306 of Part 353, title 5, Code of Federal Regulations, is amended to read as follows:

§ 353.306 Partially recovered injured employees.

Agencies must make every effort to restore according to the circumstances in each case, an employee or former employee who has partially recovered from a compensable injury and who is able to return to limited duty.

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

[7 CFR Part 724]

Termination of Marketing Quotas on Cigar-Binder (Types 51 and 52) Tobacco for the 1979–80 Marketing Year

AGENCY: Agricultural Stabilization and Conservation Service.

ACTION: Proposed rule.

SUMMARY: The Secretary of Agriculture is investigating whether the operation of marketing quotas for cigar-binder tobacco will cause this kind of tobacco to be in short supply for the 1979–80 marketing year. Interested persons are invited to submit written comments, views and recommendations concerning the possible suspension of marketing quotas for cigar-binder (types 51 & 52) tobacco for the 1979–80 marketing year. Also, requests for a hearing will be granted if timely submitted.

DATES: Written comments and requests for a hearing must be received by July 19, 1979 in order to be sure of consideration.

ADDRESSES: Send comments and hearing requests to the Acting Director, Price Support and Loan Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Robert L. Tarczy, (202) 447–7601.

SUPPLEMENTARY INFORMATION: Pursuant to and in accordance with the Agricultural Adjustment Act of 1938, as amended, (referred to hereinafter as the "Act"), a national marketing quota of 8.1 million pounds was announced for the 1979–80 marketing year for cigar-binder (types 51 & 52) tobacco (44 FR 7108). However, as noted in the quota determination, production of only 2.1 million pounds during the 1979–80 marketing year is needed to make the supply of this kind of tobacco equal to its reserve supply level. Because only 31 percent of the announced marketing quota over the past four years has been produced, a national marketing quota of 6.75 million pounds is needed to make available production of 2.1 million pounds and such quota was announced. This quota was later increased by 20 percent to 8.1 million pounds by the Secretary's authority under Section 312(b) of the Act.

Because quotas were terminated during recent years, a portion of this tobacco was produced by people who did not have a cigar binder tobacco allotment (the poundage quota is converted to an acreage allotment) and by producers who have allotments but produced in excess of their allotment. Consequently, desired levels of production may not be attainable with marketing quotas in force.

Accordingly, pursuant to and in accordance with section 371(a) of the Act, as amended, an investigation is being made to determine whether the operation of farm marketing quotas in effect on cigar-binder (types 51 & 52) tobacco for the 1979–80 marketing year will cause the amount of such kind of tobacco which will be free of marketing restrictions to be less than the normal supply for such kind of tobacco for such marketing year.

If upon the basis of such investigation the Secretary finds the existance of such fact, he will proclaim the same and specify such increase in, or termination of, existing quotas as he finds, on the basis of such investigation, is necessary to make the amount of such kind of tobacco which will be free of marketing restrictions for the 1979–80 marketing year equal to the normal supply.

Marketing quotas were proclaimed for cigar-binder (types 51 & 52) tobacco for the 1978–79, 1979–80 and 1980–81 marketing years (43 FR 4966). Farmers approved marketing quotas for such 3 marketing years (43 FR 16310).

Under present legislation the termination of maketing quotas for any marketing year would be limited in application and effect to that year only.

Under Sections 101 and 106 of the Agricultural Act of 1949, as amended, price support will be made available on the 1979 crop of cigar-binder (types 51 & 52) tobacco even if marketing quotas are terminated because producers did not

disapprove marketing quotas for such tobacco.

Data shows that total disappearance (domestic use plus exports) of cigar-binder (types 51 & 52) tobacco has decreased from 26 million pounds during the 1955–56 marketing year, prior to the advent of reconstituted binder sheet, to 1.9 million pounds during the 1977–78 marketing year. Disappearance is expected to increase to 2.4 million pounds during the 1978–79 marketing year. This has necessitated drastic adjustments in production. Producers used the Soil Bank and the Cropland Adjustment Programs extensively in making these adjustments. In addition, the allotted acreage has been reduced from 16,643 acres in the 1955–56 marketing year to about 4,824 acres in 1979.

Total disappearance (domestic use plus exports) has exceeded production in 18 of the 23 years from 1955 to 1977. This has caused stocks of this kind of tobacco to decline from 62.2 million pounds on October 1, 1955, to 4.9 million pounds at the beginning of the current marketing year (October 1, 1978).

With production during the 1978–79 year estimated at 2.6 million pounds, the total supply of cigar-binder tobacco is 7.5 million pounds. Subtracting estimated disappearance during the 1978–79 year of 2.4 million pounds, carryover for the beginning of 1979–80 marketing year could equal 5.1 million pounds, 1.7 million below the normal supply determined and announced February 1, 1979.

Quotas for cigar-binder tobacco have been annually terminated since the 1970 marketing year began.

Section 371(a) of the Act provides that in the course of the investigation conducted by the Secretary, due notice and opportunity for hearing shall be given to interested persons.

Proposed Rule

It is proposed that an investigation be conducted to determine whether the operation of marketing quotas for cigar-binder tobacco will cause this kind of tobacco to be in short supply for the 1979–80 marketing year. It is proposed further that interested persons be invited to submit written comments, views and recommendations or request a hearing concerning the possible suspension of marketing quotas for cigar-binder (types 51 & 52) tobacco for the 1979–80 marketing year.

Prior to making any determination, the Department will consider comments, views and recommendations submitted in writing to the Acting Director, Price Support and Loan Division.

Executive Order 12044 (43 FR 12661, Mar. 24, 1978) requires at least a 60 day public comment period on any proposed significant regulations except where the Agency determines this is not possible. Because cigar binder producers need to know as soon as possible the status of quotas for the 1979–80 marketing year, it is hereby found and determined that compliance with the 60-day comment period required by Executive Order 12044 is impossible. Accordingly, comments must be received by July 19, 1979 in order to be assured of consideration.

Note.—A draft impact analysis is available from Jerome F. Sitter, Director, Price Support and Loan Division, Room 3741-South Building, P.O. Box 2415, Washington, D.C. 20013.

Note.—This regulation has been determined not significant under the USDA criteria implementing Executive Order 12044.

Signed at Washington, D.C. on June 12, 1979.

Ray Fitzgerald,

Administrator, Agricultural Stabilization and Conservation Service.

BILLING CODE 3410-05-M

Food and Nutrition Service

[7 CFR Part 246]

Special Supplemental Food Program for Women, Infants, and Children (WIC)

AGENCY: Food and Nutrition Service.

ACTION: Proposed Program (Food) Funding Formula for the Special Supplemental Food Program for Women, Infants and Children (7 CFR 246).

SUMMARY: The Food and Nutrition Service is reissuing for public comment the formula for distribution program (food) funds to State agencies participating in the Special Supplemental Food Program for Women, Infants and Children.

DATE: June 19, 1979; comments by August 3, 1979.

ADDRESS: Supplemental Food Programs Division, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Jennifer R. Nelson, Director, (202) 447–8206.

SUPPLEMENTARY INFORMATION: The Secretary of Agriculture issued notices in proposed (October 11, 1978) and final (January 2, 1979) form which described the components and the operation of the formula used to allocate program (food) funds to participating State agencies. Subsequent to issuance of the final notice, it was brought to the Department's attention that the description of the mathematical process used to run the formula was not totally accurate. The Department then issued a clarification notice at 44 FR 18253 (March 27, 1979) which more clearly explained the process followed in the allocation of funds.

As the Department received only 24 comments on the October 11 proposed notice, a number of questions were not addressed in these comments which significantly impact on participating agencies. For this reason, and to assure that all interested persons understand and have an additional opportunity to comment on the complete formula process, the Department is reissuing the formula description with a full discussion of all the components and of the operation of the formula. Although the Department wishes to receive comments on all aspects of the formula, comments are specifically requested on the method used to determine the number of children under five below 200 percent of poverty, the 50 percent cap component, and the alternative formula procedures.

I. Description of the Funding Formula Components

In choosing components for the formula which were need indicators, the Department had to find data elements which were readily available or could be determined for all State agencies and which, when compared to each other, would indicate the need for the Program in each State agency. A survey of available and determinable data was made prior to the September 6–8, 1978, Funding Panel meeting (additional information about the Funding Panel is available in the October 11, 1978 Federal Register notice) to determine which data met the criteria of need indicator and availability. These data were then made available to the Panel for discussion.

Based on review of the data available and the Panel's recommendations, the Department chose to use the number of children under five below 200 percent poverty in each State and the infant mortality rate in each State. The figure for the number of children under five below 200 percent poverty in each State serves as a poverty and population factor and is compared among State agencies to indicate the relationships among States based on the number of potential participants. Since this data element is based on population, using it alone would result in a distribution of funds based on the size of the State

agency. It was necessary to introduce another data element to indicate the respective nutritional need of potential participants among State agencies. Infant mortality rate was chosen to fulfill this requirement. Infant mortality rate is based on the number of infant deaths per 1,000 live births and it has no inherent population bias. As a result, it is a good indicator of the severity of nutritional need among the target population of a State agency.

A (1) *Children Under Five Below 200 Percent Poverty*—The U.S. Bureau of Census Survey of Income Education (SIE), 1975, was used as the source for determining the number of children under five below 200 percent of poverty in the 50 States. Since similar data was not available for Puerto Rico, the Virgin Island and the Indian State agencies, alternative methods, described below, were used to determine the figures for these State agencies.

The SIE data is separated into several categories. For each specified poverty level of below 75 percent, below 125 percent, below 150 percent, below 175 percent and below 200 percent, data is provided on the number of children in each of the following categories: under 18, 5 to 17 years, less than 3 years, 3 to 5 years, 6 to 13 years, 14 and 15 years, and 16 and 17 years. In order to determine the number of children 0 through 4, the Department decreased the 3 to 5 years figure by one-third (multiply by .66667) to delete the 5 year olds and added the resulting figure to the less than 3 years number. For example, the number for Connecticut is figured as follows:

Less than 3 years = 39,930

3 to 5 years = 44,960

44,960 × .66667 = 29,973.46

39,930 + 29,973 = [1]69,903

[1]Children 0 through 4

This method may tend to slightly overstate the total number of children nationwide in the 0–4 category, since it assumes that the birth rate remained the same over the five year period considered. The results of this procedure are shown in column 1 below.

An alternate method for determining the number of children 0–4 in each State is possible. The number of children 5 to 17 years can be subtracted from the number of children under 18. If this method is used, the number for Connecticut would be obtained as follows:

Under 18	270,050
5 to 17 years	−200,490
Children 0 through 4	69,560

For Connecticut, the alternate method arrives at a lower number of children under five below 200 percent of poverty than the procedure used by the Department. The comparison chart below shows that the results of the two methods vary among States; some States are considered to have less children according to the Department's method while others have more children. There is, however, very little difference in the total number nationwide.

Children Under 5 Below 200 Percent Poverty

	USDA procedure No. 1	Alternate procedure No. 2
New England:		
Connecticut	69,903	69,560

Washington	108,237	106,170
National total	7,048,816	6,928,414

Data for Indian agencies, Puerto Rico and the Virgin Islands were not as easily determined. A variety of sources was used for the Indian State agencies including the Indian Health Service, the Bureau of Indian Affairs, Tribal statistics and the 1970 census. Two basic assumptions had to be made by the Department before the 1970 census data could be used. First, the 1970 census data include five year olds; the Department used the total number, with the five year olds included, because it assumed that the Indian population might have increased from 1970 to 1975.

This assumption was based on a review of birth and mortality data from the National Center for Health Statistics. These data for the years 1970 through 1975 showed that the number of national births (births minus infant deaths) decreased over this period while births for Indians increased. The 1970 census data represents the only published report of American Indian statistics. The data reflect the number of persons within the reservation boundaries and do not include those residing in adjacent areas. Therefore, including the five year olds will help compensate for the persons in adjacent areas not counted in the census. Second, since data for Indians were not distinguished by poverty level, the Department assumed that all Indian children are below 200 percent poverty. These two assumptions may result in inflated numbers of children for the State agencies, but the Department feels that these assumptions are basically correct and that any overstatement would have minor effects.

The above described data were used for all Indian agencies in the first quarter of FY '79. Despite the Department's assumptions that all Indian children are below 200 percent poverty and that 5 year olds could be included, some of these agencies were still found to be above their maximum grant level. The FNS Regional Offices were asked to determine if more current data were available from reliable governmental sources at the regional or tribal level. New data were found which more accurately reflect the number of children in these State agencies' service areas. The presence of new data resulted in some changes in allocation levels for some Indian State agencies for the second quarter. The Department is reviewing all sources to determine the best data available for use in FY '80.

The U.S. Bureau of Census Survey of Income and Education, 1975, was used to obtain a total number of children under five in Puerto Rico. In order to determine the number of these children which fell below 200 percent of poverty, the Department applied the procentage of children in Puerto Rico eligible to receive free and reduced price lunches, which represents those children under 200 percent of poverty. Data on the total number of children under five were not available from the Bureau of Census for the Virgin Islands. Therefore, the Department contacted the National

Center for Health Statistics to obtain the number of live births and infant deaths in the Virgin Islands for the years 1971 through 1976 (no data were available for 1972). The deaths were subtracted from the births and the numbers for these years were summed to arrive at the total number of children under five. The percentage of children eligible to receive free and reduced price lunches in the Virgin Islands was then applied to this number to obtain the number of these children under 200 percent of poverty.

For States with participating Indian State agencies within their boundaries, the numbers used for the Indian agencies were subtracted from the State total to prevent double counting. (This subtraction is not reflected in the above charts, but is reflected in subsequent charts).

The Department specifically requests comments on the procedures used to determine the number of children under five below 200 percent of poverty and recommendations on which of these procedures should be used for the funding formula.

(2) *Infant Mortality Rate*—Infant mortality data used in the formula were obtained from the Monthly Vital Statistics Report for 1976 for most State agencies including Puerto Rico. (Data for the Virgin Islands represents 1975 figures.) This is a National Center for health Statistics publication which reflects the final infant mortality data for 1976. The infant mortality rate is the number of deaths of infants under one year of age per 1,000 live births. The National Center for Health Statistics' final data for 1977 will be available soon and will be used in the formula for the allocation of FY '80 funds.

Infant mortality rates for the Indian State agencies were generated by the Department based on infant deaths and live births data obtained from the Indian Health Service. The equation used to generate these numbers for each Indian State agency is as follows:

$$\frac{\text{Infant Deaths}}{\text{Infant Births}} \times 1{,}000 = \text{Infant Mortality Rate}$$

The national infant mortality rate for 1976 used for the comparison was 15.2. The individual State agency rates used in the formula are listed below.

	Infant Mortality Rate

The comparison of the two need indicators (components), children under five below 200 percent poverty and infant mortality rate, form the basis of the funding formula. The formula is as follows:

$$\frac{\text{(State Children Under 5 Below 200\% Poverty)}}{\text{(Total Children Under 5 Below 200\% Poverty}} \times \frac{\text{(State Infant Mortality Rate)}}{\text{(National Infant Mortality Rate)}}$$

The "Total Children Under 5 Below 200% Poverty" is the sum of all the State numbers of children under 5 below 200% poverty.

Additional provisions of the formula are the hold harmless level, maximum grant level and 50 percent cap.

B(1.) *Hold Harmless*—The "hold harmless" level for each State agency is determined by first totaling all the program (food) funds available to the State agency in the fourth quarter of the previous fiscal year. An additional 10 percent is added to this level to provide for inflation and some growth. The final figure (previous fourth quarter food funds plus 10 percent) is the hold harmless level.

The hold harmless provision of the formula was included to assure that all State agencies receive sufficient funds to maintain their fourth quarter operational level, in turn assuring that no participants would be removed from the Program. Failure to include this provision would in effect destroy the efforts of the State agencies to expand their operation over the past years. The fiscal year 1978 fourth quarter level and that level with a 10 percent increase are shown in the chart below. The fiscal year 1978 fourth quarter level was computed by adding the fiscal year 1978 fourth quarter total grant (less any overexpenditures from previous months), earned unused administrative funds and for those State agencies participating in the Migrant Demonstration Project, one-third of the funds provided to those agencies for the Project. This figure reflects the funds available to be spent in the fourth quarter. The overexpenditures were subtracted from the funding level, since this amount of money was needed to fund expenditures in an earlier quarter and, therefore, was not available to be

spent in the fourth quarter. The earned unused administrative funds equal the difference between 25 percent of food expenditures (earned administrative funds as determined by the fiscal year 1978 funding procedure) and the State agency's administrative expenditures. These unused funds were available to be spent by the State agency in the fourth quarter. Only one-third of the migrant funding was considered, because the migrant grant was designed to cover three quarters of operation so that only one-third of this funding would apply to the fourth quarter. This total was multiplied by 80 percent to determine the amount which could be used for food.

	4th quarter fiscal year 1978 level	4th quarter fiscal year 1979 level plus 10 percent

(2.) *Maximum Grant*—Maximum grant levels were determined to assure that no State agency received more money than its potential need would indicate. Potential need is determined by adding the number of children under five below 200 percent of poverty and the number of live births for one year (to indicate pregnant women) and multiplying the total by a monthly food package cost level and then by three. This results in a food funding level sufficient to serve all of a State agency's potentially eligible participants for one quarter.

The live birth data used included all births and are not adjusted to reflect those births in families below 200 percent of poverty. This results in overstated figures. An alternate procedure has been suggested which would use one-fifth of the number of children under five below 200 percent of poverty rather than live births.

Live birth data were obtained from the National Center for Health Statistics; Vital Statistics Report, 1975, and from Indian Health Service, Bureau of Indian Affairs and Tribal Statistics. The food package cost used for Indian State agencies was the higher of either the Indian State agency's actual average food cost or the average food cost for all Indian State agencies. The cost used for other State agencies was the average cost for all those agencies. The data elements used in determining the maximum grant level are shown in the chart below. Only the food costs for Indian State agencies are listed; all other State agencies were figured with an average food cost of $22.26. This cost is the average for the first ten months of FY '78. Applicable State figures for the children under five below 200 percent poverty have been adjusted to subtract out Indian data.

(3) *50 Percent Cap*—During the development of the program (food) formula, the Department completed one run of the formula with the hold harmless and maximum grant provisions of the formula in place. The results of this run were reviewed, and it was determined that some State agencies were receiving quite substantial increases in their funding level as compared with their previous fourth quarter level. The Department felt that such increases would result in too rapid expansion which could have detrimental effects on the efficient operation of the Program and could result in a greater amount of unspent funds at the end of the year. Since the amount of funds involved was especially large for agencies which received $5 million in food monies in the previous fiscal year, the Department decided to limit these agencies to a 50 percent increase over their fourth quarter level. To date, Puerto Rico and Florida are the only State agencies experiencing this limitation.

In addition to these agencies, there are four State agencies (Indiana, New Mexico, Nebraska, and Virgin Islands) which receive more than a 50 percent increase over their fourth quarter level. There is a total of 15 State agencies that either receive more than their hold harmless level or receive the 50 percent cap. This means that these agencies receive more than a 10 percent increase over their fourth quarter level. These increases range from 11.8 percent to 178.3 percent.

The Department is concerned that all available funds be spent as expeditiously as possible. In regard to the 50 percent cap issue, there are several questions: (1) Is 50 percent the proper percentage level for the cap, or should a different percentage limitation be established? and (2) Should the cap continue to apply only to States which received at least $5 million in the prior fiscal year, or should it apply to more States? If it should apply to more States, should there be a lower threshhold than $5 million and, if so, what should the threshhlold be, or should there be no threshhold at all? The Department is very interested in the public's comments on these specific questions.

II. Application of the Formula

The first step of the formula process is to enter all data elements into the computer. Data for each State agency are entered along with applicable totals used in comparisons. As stated above, the total number of children under five below 200 percent poverty is the sum of all State agency numbers entered.

Second, the mathematical equation is carried out. For each State agency, the number of children under five below 200 percent poverty is divided by the national total of children under five below 200 percent poverty. The result is multiplied by each State agency's infant mortality rate divided by the national average infant mortality rate. This equation results in a multidigit decimaled number called the index number.

Third, the index numbers are summed and then each State agency's index number is divided by the total to arrive at a percent which indicates the State agencies' relationships to each other and to the total. The percentages are applied to the funds available to determine each State agency's funding level.

Fourth, State agencies are run through the formula initially. If according to the formula any State agency would receive less funds than it received for the immediately preceding fiscal year's fourth quarter plus 10 percent, it is "held harmless" and given the fourth quarter level plus 10 percent. Additionally, if according to the formula any State agency would receive an amount greater than its maximum grant level it is funded at the maximum grant level. Those State agencies with a fourth quarter annualized level of $5 million or more that have been previously identified by a preliminary run of the formula as receiving more than a 50 percent increase by the formula are limited to a 50 percent increase. The amount of funds needed to provide allocations for the three categories listed above, namely, hold harmless, maximum grant and 50 percent cap State agencies, is totaled and subtracted from the total funds available.

The formula is then run on the remaining funds for the State agencies which did not fall into one of the three categories listed above. Any State agency receiving less than its fourth quarter level plus 10 percent in this second run is held harmless. The funds needed for allocations to hold harmless State agencies are subtracted from total funds for this second run, and the formula is run again with the remaining funds and State agencies. This procedure is repeated until no State agencies are held harmless.

Each time a subsequent run of the formula is made, the index numbers of the State agencies remaining in consideration are summed and the new total is used to derive new percentage relationships (new indexes are not computed as this would not change the percentages). The percentages are then applied to the remaining funds to determine funding levels. The resultant levels are compared to the hold harmless levels to determine if any State agency is receiving less than their hold harmless level. Any such agencies are given their hold harmless level, and they and the funds provided for them are removed from consideration. The purpose of the subsequent runs is to continue the comparison until no more State agencies are held harmless.

III. Alternative Formula Procedures

Some alternate procedures for applying the formula have been suggested and are discussed below.

A. *Alternative I*

One procedure would implement the first run of the formula as described above except that there would be no 50 percent cap State agencies. All State agencies that were identified as hold harmless or maximum grant would be given those funds and dropped out of consideration. Next, rather than completing the subsequent runs described above, the State agencies remaining in consideration after the first run would be given their fourth quarter plus 10 percent level. The funds necessary to accomplish this would be subtracted. Then the formula would be run for those State agencies against the small amount of remaining funds. The result of this application of the formula would be added to each State agency's fourth quarter plus 10 percent level to arrive at each State agency's total funding level for the quarter.

The effect of this procedure would be that State agencies with a greater degree of need as demonstrated by the formula receive less funds than they receive if the formula is applied according to the Department's method. Conversely, those State agencies with a lesser need receive more funds. As a result, the purpose of the Department's formula to allocate the greatest funds to the neediest agencies is thwarted.

The chart below indicates the percentage of need that was being met in each State agency in the fourth quarter of FY 1978. The chart represents a comparison of the average fourth quarter FY 1978 participation of infants and children to the State agency's number of children under 5 below 200 percent poverty. This comparison results in a figure which indicates the percentage of potential participants being served by the State agency.

State	Percent of need being met 4th quarter fiscal year 1978

*State agencies not held harmless by the current USDA formula and which would be affected by the alternative formula.

USDA's formula application provides funds based on the number of potential eligibles in conjunction with infant mortality rates so that those State agencies meeting the lowest percentage of their need receive the highest percentage of increase in their funding level. In so doing, the Department is funding those most in need. Conversely, Alternative I would not give the highest relative increase to those State agencies with the greatest need. In fact, this alternative would substantially reduce the funding level of these State agencies. The end result of this alternative is that previous funding levels are perpetuated, since through this procedure everyone receives around a 10 percent increase. The current USDA formula is designed to help correct the past funding inequities which are reflected in the percentage of need being met shown in the chart above.

B. Alternative II

Another alternative would be to apply the formula as applied by the Department without the hold harmless provision. This would give State agencies funding according to their releative need with no relationship to previous operations. The most overwhelming effect of using this procedure would be the drastic cut backs in operation which some State agencies would have to initiate. The end result of such action is the removal of at least some participants from the Program.

C. Alternative III

Another alternative would be to provide all State agencies with a straight percentage increae over their fourth quarter level. This would perpetuate the current inequality of the funding relationships among State agencies. That is, those State agencies that were more successful in expanding their operation at the beginning of the Program would receive a larger portion of the funds. Therefore, they would be able to meet a larger percentage of their need. The use of this procedure would continue this funding inequity.

D. Alternative IV

A procedure which would more quickly correct the funding inequity among the States would be to hold all State agencies which are meeting a larger proportion of their need to their current operational level and give those State agencies which are meeting less of their need sufficient funds and time to expand their operation and catch up. One major problem with this procedure is that there is no provision for inflation. As costs rise the State agencies being held at status-quo would either reduce benefits or remove participants from the Program. Alternatives IV and V do not meet the strict definition of a formula and thus might not be in full compliance with the law.

These are only a few alternative suggestions. The Department is interested in receiving comments on these alternatives as well as suggestions of any other viable options.

As stated above, the Department is issuing this document for public comment. In order to allow sufficient time to analyze all comments received and then to issue in final a description of the formula used to allocate program (food) funds prior to fiscal year 1980, it is necessary to limit the comment period to 45 days. The Department believes the public interest is served in this instance in that a longer comment period would result in the allocation of funds prior to the formal publication of the Department's final decision on this issue. To be assured of consideration, comments should be received by August 3, 1979. All comments received by that date will be carefully considered before a final decision is made.

Comments may be sent to: Jennifer R. Nelson, Director, Supplemental Food Programs Division, Food and Nutrition Service, USDA, Washington, D.C. 20250.

Copies of all written submissions received will be made available for public inspection in Room 4405, 201 14th Street, S.W., Washington, D.C., during regular business hours (8:30 a.m. to 5 p.m.)

Signed in Washington, D.C., on June 13, 1979.

Carol Tucker Foreman,

Assistant Secretary for Food and Consumer Services.

BILLING CODE 3410-30-M

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 121]

Small Business Size Standards; Establishing a New Size Standard for Retail Heating Oil Dealers for Purposes of SBA Loan Programs

AGENCY: Small Business Administration.

ACTION: Proposed Rulemaking.

SUMMARY: This rule proposes to raise the size standard for retail heating oil dealers from $2 million to $6 million in average annual sales. It is necessary because the structure of the industry has shifted due to changes in the

accessibility and prices of raw materials and because of legislative costs imposed on the industry.

EFFECTIVE DATE: Written comments must be submitted by July 19, 1979.

ADDRESS ALL COMMENTS TO: Kaleel C. Skerik, Chief, Size Standards Division, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Robert N. Ray, Jr., (202) 653-6373.

SUPPLEMENTARY INFORMATION: The loan size standard of $2 million for SIC 5983, *Fuel Oil Dealers*, was set in 1975 and was based on the industrial structure of firms within that industry during the 1973–1974 period. The 1973–1974 years, however, marked the beginning of fuel shortages as a result of cutbacks among the oil exporting nations. Thus, the fuel oil industry did not have sufficient time to adjust to the changing supply situation when the size standard of $2 million was initially set in 1975.

Cost increases due to foreign imposed supply limitations since 1973 have had a greater impact than any other factor in changing the industrial structure of the fuel oil industry. It is estimated, for example, that the magnitude of wholesale price rises from mid-1973 to mid-1979 in the fuel oil industry will be in the 150–200 percent range. This is similar to price increases announced by the Organization of Petroleum Exporting Countries, which suggests that changes in the price of imported crude have been the primary cause of price rises in the oil industry.

While foreign imposed price increases have affected the structure of the entire fuel oil industry, other factors have tended to impact most heavily on the small business sector of that industry. For examples, the seasonal tendency in the industry to accumulate large amounts of customers' accounts receivable tends to work a hardship on small firms which typically do not have the same availability to financial capital as do large firms. Reporting and recordkeeping requirements initiated by the Department of Energy have also contributed more heavily to the costs of operating a small fuel oil marketing business than costs for large firms in the industry. Thus, other factors in conjuction with foreign imposed price increase have adversely affected the small business sector of the industry.

A rise in the size standard to $5.0 million from the present $2.0 million would account for an estimated 80 percent of dealers in the fuel oil industry.

It would bring the proportion of firms considered small by the Small Business Administration in this industry into closer comparability with other industries, and also help to alleviate those problems present in the industry which disproportionately impact on small firms.

Accordingly, pursuant to authority contained in Section 5(b)(6) of the Small Business Act, as amended, 15 U.S.C. 634, et seq, section 121.3, Schedule D of Part 121, Chapter I of Title 13, Code of Federal Regulations is proposed to be amended by changing Major Group 59 to read as follows:

Schedule D

* * * * *

Major Group 59—Miscellaneous Retail

5961	Mail order houses	7.5
5983	Fuel oil dealers	6.0

Dated: June 8, 1979.

William H. Mack, Jr.,

Acting Administrator.

[FR Doc. 79-19077 Filed 6-19-79; 8:45 am]

BILLING CODE 8025-01-M

FEDERAL TRADE COMMISSION

[16 CFR Ch. I]

Opportunity to Submit Comments on Petition to Issue Rule Declaring Oil Company Ownership of Petroleum Pipelines To Be an Unfair Method of Competition

[File No. 7910065]

AGENCY: Federal Trade Commission.

ACTION: Request for Comment.

SUMMARY: The Federal Trade Commission has been petitioned by Senator Edward M. Kennedy of Massachusetts to issue a rule declaring oil company ownership of petroleum pipelines to be an unfair method of competition. The Commission has unanimously decided that the petition should be neither granted nor denied until interested persons are afforded an opportunity to make their views known to the Commission staff who will recommend to the Commission appropriate action with respect to the competitive problems alledged by the petition. Accordingly, the Commission is soliciting written views on the Petition and the specific questions set forth below in this Notice. The Commission believes that public comment on the petition could greatly enhance development of the issues which should be considered by the Commission.

DATES: Comments should be received on or before October 18, 1979.

ADDRESS: Send comments to Ronald B. Rowe, Assistant Director, Bureau of Competition, Federal Trade Commission, 6th & Pennsylvania Avenue, NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: Ronald B. Rowe, Assistant Director, or Rhett R. Krulla, Attorney, Bureau of Competition, Federal Trade Commission, Washington, D.C. 20580 (telephone (202) 724-1441 and (202) 724-1428, respectively).

SUPPLEMENTARY INFORMATION: Comments should be submitted in triplicate to the above address. All comments so received will be placed in a public file, except for information that discloses the identity of a confidential source or contains confidential commercial or financial information. If you believe your comment contains such information or fits this category, please specify the reasons for your belief. Such information will be retained in the Bureau staff's nonpublic, investigative file.

Interested persons are invited to address any issues of fact, law, policy or procedure which they feel are relevant to the petition and should be considered by the Commission. Further, the Commission particularly desires comment upon the questions listed below. These questions are provided in order to facilitate public comment and should not be construed to limit the nature and scope of comments prepared in response to this Notice. Following these questions, Senator Kennedy's petition is reprinted in full below.

1. What is the competitive structure of petroleum transportation?

(a) To what extent do petroleum pipelines compete among themselves in the transportation of petroleum?

(b) To what extent do petroleum pipelines compete with other modes of petroleum transportation?

(c) What barriers, if any, exist with respect to entry into large diameter petroleum pipeline transportation?

(d) What effects do pipeline economies of scale have on competition in petroleum transportation?

2. What are the economic effects of oil company ownership of petroleum pipelines?

(a) To what extent may transactional and project risks, ability to attract capital, operating efficiencies, or other economic factors support oil company ownership of petroleum pipelines?

(b) What information is required, and how might such information be used, to confirm or deny the petitioner's allegation that integrated oil companies are able to extract monopoly profits

through restriction of pipeline throughput or capacity?

(c) To what extent have individual oil company owned pipelines operated at or near full capacity or under prorationing during the past ten years?

(d) What has been the expansion history of individual pipelines? What has been the relationship between such expansions and increases in demand?

3. What are the competitive effects of oil company ownership of petroleum pipelines

(a) Are oil companies able to secure any competitive advantages through ownership of petroleum pipelines?

(b) Are there any significant competitive differences among the various oil company owned pipelines? What market indicia should be used to measure these differences?

(c) What degree of competitive harm should be shown before Commission action is warranted?

(d) What obstacles, practical difficulties, or disadvantanges may non-owners face in securing the desired level of use of oil company owned pipelines?

(e) What is the effectiveness of common carrier regulation of petroleum pipelines? To what extent are the following aspects of petroleum pipeline transportation unregulated: pipeline routing, pipeline connections, provision of terminal and storage facilities, pipeline financing, pipeline capacity and expansion, pipeline ownership, and tariff and prorationing policies?

(f) How do the services generally provided by existing independent petroleum pipelines differ from those ordinarily provided by oil company owned pipelines?

(g) To what extent have non-owners and non-major oil companies used individual oil company owned pipelines during the past ten years? What share of the total throughput of such pipelines has been accounted for by non-owners and by non-major oil companies?

(h) To what extent do potential pipeline shippers enter into exchange agreements as an alternative to using oil company owned pipelines as common carriers? What are the advantages or disadvantages of such arrangements?

(i) How are decisions made during the planning stage of a petroleum pipeline project regarding: Ownership, routing, capacity, expansion, connections policy, provision of terminal and storage facilities, prorationing policy, financing, tariff policy, and share readjustment? How are such decisions made once the pipeline becomes operational?

4. Would prohibition of oil company ownership of petroleum pipelines serve the public interest?

(a) Would the Commission's issuance of a rule prohibiting oil company ownership of petroleum pipeline serve the public interest?

(b) Should divestiture by the Commission be limited to pipelines possessing substantial market power?

(c) What limitations or exceptions, if any, should there be to the scope or application of the proposed rule?

(d) What alternative rules or remedies to the proposed rule should the Commission consider? How could the Commission best implement such rules or remedy?

(e) What are the public benefits or costs of oil company ownership of petroleum pipelines?

(f) What would be the public benefits or costs of prohibiting oil company ownership of petroleum pipelines and requiring divestiture of existing oil company owned pipelines?

(g) How could pipeline divestiture best be implemented?

5. What would be the financial effects of prohibiting oil company ownership of petroleum pipelines?

(a) What effect would diverstiture have upon existing financial arrangements of oil company owned pipelines including throughput commitments and debt obligations?

(b) What effect would diverstiture have upon the ability of divested pipelines to expand or to attract capital? What capital requirements would such existing pipelines have?

(c) How would new pipelines not owned by oil companies be financed?

(d) What, if any, guarantees or throughput commitments would be necessary for financing of independent pipelines? Under what circumstances would oil companies provide such guarantees or commitments? What compensation should oil companies expect in return?

* * * * *

Petition for the Initiation of a Rulemaking Proceeding Prohibiting Ownership of Petroleum Pipelines by Petroleum Companies

The purpose of this petition is to request the Federal Trade Commission ("Commission") pursuant to 5 U.S.C. 553 and 16 CFR 1.25 to initiate a rulemaking proceeding to proscribe as unfair methods of competition certain forms of petroleum pipeline ownership. Specifically, I request the Commission issue a trade regulation rule declaring it to be an unfair trade practice for an oil company to have any ownership interest in petroleum pipelines of certain classes.

Jurisdiction

The Commission has authority under Section 5 of the Federal Trade Commission Act, 15 U.S.C. 45, to prohibit "unfair methods of competition in or affecting commerce." While pipelines themselves are exempted from the Commission's jurisdiction to the extent they are common carriers as defined in Section 5(a)(6) of the FTC Act, parent companies of such carriers are not exempt. The Commission may proceed against parents and affiliates of, or parties acting in concert with, persons exempted from the Commission's jurisdiction.[1]

The Commission has authority under Section 6(g) of the FTC Act to proceed by way of rulemaking in lieu of case-by-case adjudication. That section empowers the Commission to issue rules defining unfair methods of competition, violations of which would constitute violations of Section 5 of the FTC Act.[2] This method is especially appropriate where an elaborate factual record need not be developed. Because the debate over the competitive consequences of petroleum pipeline ownership by integrated oil companies will involve predominantly issues of competitive theory, with disputes of fact playing a less significant role, rulemaking rather than adjudication is the most efficient way to address this question.

The question whether divestiture for competitive purposes can be ordered in an administrative rulemaking proceeding was dealt with by the Supreme court this year in *FCC v. National Citizens Committee for Broadcasting et al.*, U.S.——, 50 L.Ed. 2d 697, 98 S. Ct.—— (June 12, 1978). In that case, the Court upheld an FCC rule dealing with the "cross ownership" of television and radio stations by newspapers; the FCC rule required divestiture in sixteen cases. The court upheld the divestiture requirements, thus establishing a clear precedent for dealing with industry-wide structural problems through rulemaking.

The Commission has long held that divestiture is within its power when this

Rep., 21,371 (December 6, 1977) (appeal pending). *Exxon Corp. et al.*, Docket No. 8934, Order Denying Respondents' Motion to Strike Allegations Re Pipelines or to Stay this Proceeding Re Pipelines, July 3, 1978; Order Denying Respondents' Motions to Strike Pipeline Allegations Etc., October 16, 1974; Order Denying Respondents' Motions Regarding Governmental Action and Primary Jurisdiction, December 3, 1974.

[2] *National Petroleum Refiners' Ass'n et al. v. FTC et al.*, 482 F. 2d 672 (D.C. Cir. 1973), *cert denied*, 415 U.S. 951 (1974).

remedy would advance the public interest.[3]

Harm to the Public Interest

The specific unfairness on which this petition is grounded involves the relationship between pipelines and their oil company owners, and the inherent competitive advantages that accrue to the oil companies as a result of such ownership. As will be discussed below, the public interest is injured in two ways. First, consumers must pay higher prices for petroleum products because integrated oil companies are able to exploit the monopoly power inherent in their pipeline ownership. Second, competition between oil companies is injured because the system of integrated oil company ownership virtually by definition places disadvantages on the non-owner shipper in terms of both costs and access to the lines. This unfairness does not depend upon a specific pattern of behavior; it is the inevitable result of shipper ownership of common carrier pipelines.

Factual Background

Vertically integrated oil companies are owners of the vast majority of petroleum pipelines. This control extends to all three types of pipeline: Gathering lines carrying crude oil from wells to intermediate storage tanks; crude oil pipelines carrying crude from producing areas to refineries; and product pipelines carrying refined products from refineries or terminals to markets. A study prepared by the ICC staff showed that in 1975, the top 20 vertically integrated oil companies controlled 74.2 percent of total pipeline operating revenue. That same study found that the top twenty integrated oil firms accounted for 94.5 percent of all crude barrel-mile movements and 78.1 percent of product barrel-mile traffic.[4]

Of the 90 petroleum pipeline companies which reported $500,000 or more annual revenues in 1975, a full 81 were owned either by vertically integrated oil companies (50.8 percent) or by joint stock companies affiliated with one or more vertically integrated oil companies (30.2 percent).

Petroleum pipelines are natural monopolies. The economies of scale are usually such that maximum efficiency may be realized when only one pipeline serves a particular geographic market. Competition between pipelines would, therefore, result in waste and inefficiency. The natural monopoly inherent in pipeline transportation has been recognized by the law since the passage of the Hepburn Act in 1906. That Act brought petroleum pipelines under the regulation of the Interstate Commerce Commission. It required them to provide transportation upon reasonable request and to establish just and reasonable rates.

Historically, however, pipeline regulation has been a failure. ICC regulation has ensured neither equitable rates nor nondiscriminatory access. Over the seventy-two years that it had jurisdiction over pipelines, the ICC dealt with the access problem only twice, each time to require a reduction of minimum tender offers. While the ICC has regularly explained its inactivity in this area by asserting that there have been no complaints from the industry, there is considerable evidence that access to pipelines has been a chronic competitive problem. In 1967, the Attorney General's Report on the Interstate Oil Compact found that the nonowner shippers confronted serious obstacles in gaining access to common carrier crude pipelines:

> * * * outsiders simply are unable to use these lines as they could other types of common carriers. This is probably due less to direct refusal to accept outside shipment as to the multiple inconvenience which an outsider would encounter in attempting shipment over a line designated and geared almost entirely to handle the refiner-owner's own shipments.

The report went on to describe the consequences of this control:

> * * * virtually all crude oil passing through a pipeline carrier system is oil owned by the carrier's refining affiliate. Some exception is made where the "outsider" is also an integrated company whose lines elsewhere the carrier's refining affiliate may wish to use. Even in this situation, however, the appearance of discrimination is avoided by the exchange and reexchange of the oil involved, or its "sale and repurchase."

More recently, the Department of Justice report on Deepwater Ports cited an economic analysis performed by a large oil company which noted the numerous ways nonowners can be denied access:

> * * * there are many subtle ways that nonowners can, in effect, be locked out limiting grade, tankage use, batch size, scheduling, etc. "Colonial" and "Explorer," for example, clearly inhibit nonowners. And, at present, the terminal to St. James pipeline is planned as an undivided interest line. While in theory the undivided share is common carrier transportation, in practice it is not * * *

("Explorer" and "Colonial" are two of the largest and most important petroleum product pipelines in the country.)

As for rate regulation, the record of the ICC is no better. In a recent case, *Farmers Union Central Exchange et al v. FERC*, No. 76-2138 (D.C. Cir. June 27, 1978) the United States Court of Appeals for the district of Columbia Circuit reviewed the whole history of rate regulation by the ICC. In the years since the passage of the Hepburn Act, the Court could find no "viable precedents" and no "semblance of established ratemaking theory" that would enable it to make sense of the record before it.

The Case for Prohibiting Shipper Ownership

The central proposition on which this petition is grounded is that the failure of regulation to guarantee nondiscrimination in access, adequate capacity for nonowners, and equitable rates is a direct consequence of the struture of pipeline ownership. This theory was developed by the Department of Justice and presented to the Subcommittee by Assistant Attorney General Shenefield. It holds that under the present statutory scheme, effective regulation is logically impossible. Rate regulation can be evaded by restricting the capacity of the line and forcing some part of the downstream demand to be met by less efficient and more costly means, thus raising the price of all product shipped into that market.

In testimony prepared for the Antitrust Subcommittee, the commission's Director of the Bureau of Competition illustrated the theory with a simplified example:

> * * * assume that boston is served by one pipeline, that it is the least-cost method of transportation into Boston, and that it is owned by one firm. How large will the owner make the pipe? If the owner is a firm that depends upon the profit derived solely from pipeline transportation fees, it will size the line to maximize its transportation profits. On the other hand, if the line is owned by a firm that owns both the pipeline and sells gasoline in the Boston market, that firm will size the line so that the combined profits from the operation of the line and the gasoline sales in the Boston area are maximized. Under federal regulation, the profit rate permitted on pipeline operations is fixed. However, the owner-shipper can size his line so that the volume of gasoline that flows into the market is restricted, thereby ensuring that profits from its gasoline marketing operations are maximized.

In short, because pipeline capacity is not regulated, owners can evade rate regulation. The effect of such evasion is to raise prices to consumers and to

---

[3] *In The Matter of Ekco Products Co.*, 65 FTC 1163, 1213 (1964), aff'd 347 F.2d 745 (7th Cir. 1965).

[4] These data, as well as other relevant factual material, are set out in the *Staff Report of the Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary, 85th Cong., 2nd Sess., Report on Oil Company Ownership of Pipelines*, 56 (Comm. Print 1978), which is attached to and made a part of this petition.

discriminate against nonowner shippers by depriving them of adequate capacity and equitable rates.

It is important to recognie that capacity is singularly difficult to regulate. Such regulation places the government into the business of second-guessing investment decisions. It would involve a drastically expanded scheme for pipeline regulation. The Department of Justice proposed such a regulatory scheme for deepwater ports, regulated by the Department of Transportation, but argued that the scheme would be inappropriate for dealing with competitive problems in the pipeline industry as a whole.[5]

As Assistant Attorney General Shenefield said concerning the rules for deepwater ports in testimony prepared for the Antitrust Subcommittee:

> On the balance, I believe the basic flaw in the Competitive Rules, even in the (deepwater port) context, may be characterized as their tendency to treat the symptoms rather than the disease. The treatment goes on forever, at considerable expense to all, and only the approximation of a cure is effected.

> The other possible solution is divestiture—the separation of pipeline ownership from the other oil industry operations. Again, as Mr. Shenefield observed:

> Divestiture * * * attacks the problem directly because the problem is clearly rooted in the structure. What might appear to be a drastic approach, therefore, is in reality a clean and decisive break with the burdensome requirement of continuous, pervasive regulatory scrutiny.

> The argument may be summed up as follows. Petroleum pipelines are natural monopolies. The only way nonowner shippers, and ultimately the public, can be protected from the abuse of the monopoly power invested in their owners is through effective regulation. Effective regulation, however, is impossible given both the present statutory scheme and the industry structure. The choices, therefore, are between a massive expansion of regulation, and in particular regulation of capacity and other investment decision, on the one hand, and divestiture, on the other.

Appropriateness of FTC Action

The Commission has both the necessary jurisdiction and the flexibility in its rulemaking procedures to deal effectively with the problem of pipeline ownership. Not only can the Commission deal with competitive problems through its broad rulemaking powers, it has the ability to tailor its procedures to fit the precise nature of the particular problem before it. To a large extent, the issues raised by this petition do not require an evidentiary hearing. They involve the "fairness" of shipper-ownership within the meaning of Section 5 of the FTC Act. They are more matters of law and public policy than questions of fact. Therefore, a formal adjudicative proceeding would be both inappropriate and unnecessary. Although some evidentiary hearings may be called for, fairness and equity will not require rigid adherence to trial-type procedures, nor the compilation of a voluminous factual record.

As is clear from the attached statement of Assistant Attorney General Shenefield, the Department of Justice has developed considerable expertise in the pipeline area. It would be extremely valuable to the Commission, as well as an effective and efficient use of governmental resources, if the FTC were to undertake this proceeding with the active participation of the Department. This can be achieved by a simple request from the Commission that the Department participate in the proceedings.

Conclusion

Since 1906 there have been numerous studies, investigations, and reports on the question of pipeline ownership.[6] Virtually all have found a massive inconsistency between shipper-ownership on one hand, and common carrier status on the other. Virtually all have called for divorcing ownership of pipelines from the shipper function. Reinforcing this mass of accumulated expertise is the overwhelmingly persuasive analysis done by the Department of Justice.

It is clear that the failure of traditional common carrier regulation has not been solely the result of indifference or ineptitude. In the context of the present system of shipper-ownership, traditional regulation is logically impossible. Such ownership, with its potential for harm both to outside shippers and to consumers, is unfair and violates Section 5 of the FTC Act. The Commission has the jurisdiction and the authority to promulgate an effective remedy—the divestiture of petroleum pipelines from integrated oil companies.

Respectfully submitted,

Edward M. Kennedy.

BILLING CODE 6750-01-M

---

[5] The proposal for regulating deepwater ports involved four "Competitive Rules:"

1. Deepwater ports must provide open and nondiscriminatory access to all shippers, owner and nonowner alike.

2. Any deepwater port owner or shipper providing adequate throughput guarantees at the standard tariff can unilaterally request and obtain expansion of capacity.

3. Deepwater ports must provide open ownership to all shippers at a price equivalent to replacement cost less economic depreciation.

4. The ownership shares of the deepwater ports' owners must be revised frequently (annually) so that each owner's share quals his share of average throughput.

It is relevant to note there that application of these four Rules to pipelines on the Outer Continental Shelf was considered and rejected by the Senate during the debate on the OCS Lands act Amendments. The objection was to the complexity and the burden of the regulation.

[6] This material is discussed at some length in the attached Subcommittee Staff Report on Oil Company Ownership of Pipelines [not attached].

[16 CFR Part 457]

Standards and Certification; Proposed Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Amendment to Notice of Proposed Rulemaking.

SUMMARY: This amendment to the notice of proposed rulemaking clarifies the authority of the Presiding Officer to issue compulsory process in connection with the Commission's rulemaking proceeding concerning standards and certification. Although the Commission gave the Presiding Officer the power to issue compulsory process in its notice of proposed rulemaking, it inadvertently omitted the standards by which that power should be exercised. This notice adds those standards.

EFFECTIVE DATE: June 19, 1979.

FOR FURTHER INFORMATION CONTACT: Barry R. Rubin, Attorney, Office of the General Counsel, Federal Trade Commission, Washington, D.C. 20580 (202) 523-3520.

SUPPLEMENTARY INFORMATION: On December 7, 1978, the Commission published a Notice of Proposed Rulemaking concerning this proceeding. [43 FR 57289 December 7, 1978.] Pursuant to Rule 1.20 of the Commission's Rules of Practice, 16 CFR 1.20, that notice prescribed the procedures to be followed in this proceeding. As announced in the notice, the powers of the Presiding Officer in this proceeding, in which no issues were designated, are those of Rule 1.13(c) of the Commission's Rules of Practice, 16 CFR 1.13(c), which include the power to "compel the attendance of persons or the production of documents or to obtain

responses to written questions," 16 CFR 1.13(c)(1)(vi). In the original notice, the Commission inadvertently omitted the standards that should govern the Presiding Officer's discretion to exercise compulsory process in this proceeding. Cf. 16 CFR 1.13(d)(6) (standards for the Presiding Officer's exercise of his compulsory process power in proceedings in which issues are designated). Accordingly, this amendment prescribes the standards that govern the Presiding Officer's discretion to issue compulsory process in the Standards and Certificate Rulemaking. The Notice of Proposed Rulemaking [43 FR 57269] is amended as follows:

By revising Section G to read as follows:

Section G. Notification of Interest

Interested persons who wish to avail themselves of the opportunity to question witnesses must, by March 2, 1979, notiy the Presiding Officer of their position with respect to the proposed rule and each individual provision thereof. This notification must be in sufficient detail to enable the Presiding Officer to identify groups with the same or similar interests respecting the proposed rule. The Presiding Officer may require the submission of additional information from any applicant whose notification is inadequate. Failure to file an adequate notification in sufficient detail may result in the applicant not being considered for purposes of questioning.

Before the hearings commence, the Presiding Officer will identify groups with the same or similar interests in the proceeding. Such groups will be required to select a single representative for the purpose of conducting questioning and, if unable to make this selection, the Presiding Officer may select a representative of each such group. The Presiding Officer will notify all interested persons of the identity of the group representatives at the earliest practicable time.

Group representatives will be given an opportunity to question each witness on any issue relevant to the proceeding and within the scope of the testimony. The Presiding Officer may disallow any questioning which is not appropriate for full and true disclosure as to relevant issues. The Presiding Officer may impose fair and reasonable time limitations on the questioning. Given that questioning by group representatives and the staff will satisfy the statutory requirements with respect to disputed issues, no such issues will be designated by the Presiding Officer.

The Presiding Officer may grant requests to compel the production of documents or the attendance of persons or to obtain responses to written questions, only to the extent necessary to provide a participant in the rulemaking proceeding with an opportunity to obtain information necessary for a full and true disclosure as to relevant issues. Such requests should contain a statement showing the general relevancy of the material, information or presentation, and the reasonableness of the scope of the request, together with a showing that such material, information or presentation is not available by voluntary methods and cannot be obtained through examination, including cross-examination of oral presentations or the presentation of rebuttal submissions.

Any motion to limit or quash a ruling to compel the attendance of persons or the production of documents or to obtain responses to written questions shall be filed with the Presiding Officer within ten (10) days after service thereof, or within such other time as the Presiding Officer may allow. Such motion shall set forth all assertions of privilege or other factual and legal objection to the ruling, including all appropriate argument, affidavits and other supporting documentation. The Presiding Officer may, in his sole discretion, certify a ruling on such motion to quash to the Commission.

The Commission may, on its own motion, review a determination of the Presiding Officer which requires the production of confidential Commission records or the appearance of an offical or employee of the Commission or another government agency.

By direction of the Commission.

Carol M. Thomas,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social Security Administration

[20 CFR Parts 404 and 416]

Old-Age, Survivors, and Disability Insurance Program and Supplemental Security Income for the Aged, Blind, and Disabled; Decision To Develop Regulations

AGENCY: Social Security Administration, HEW.

ACTION: Notice of Decision to Develop Regulations.

SUMMARY: HEW plans to rewrite and reorganize several subparts of the regulations under titles II and XVI of the Social Security Act. The objectives are: (1) to comply with Executive Order 12044 and to meet the Department's "Operation Common Sense" standards by makihg the regulations clearer and easier to understand; (2) to remove obsolete and rarely used provisions; and (3) as appropriate, to examine the policies and consider additions, revisions, and clarifications. The revised subparts will be published with Notice of Proposed Rulemaking.

FOR FURTHER INFORMATION CONTACT: Charles Rollins, Room 4334, West High Rise Building, 6401 Security Boulevard, Baltimore, Maryland 21235, (301) 594-6666.

SUPPLEMENTARY INFORMATION: The regulations presently being rewritten are:

(1) *20 CFR Part 404, Subpart Q.* This subpart contains the rules for representative payees under the Old-Age, Survivors, and Disability Insurance program. These rules explain when a person needs a representative payee, how a payee is selected and how we assure that the payee uses payments in the best interest of the beneficiary.

(2) *20 CFR Part 416, Subpart F.* This subpart contains the rules for representative payees under the Supplementary Security Income Program. These rules explain when a person needs a representative payee, how a payee is selected and how we assure that the payee uses payments in the best interest of the beneficiary.

(3) *20 CFR Part 416, Subpart M.* This subpart contains the rules for suspension or termination of supplementary security income (SSI) benefits. The rules explain when suspension or termination of SSI is required and the due process requirements for effecting suspension or termination.

(4) *20 CFR Part 416, Subpart Q.* This subpart contains the rules that require people who receive SSI benefits based on disability or blindness to accept training and other services to enable them to work. It also contains the rules that require drug addicts and alcoholics to accept treatment in order to receive supplemental security income benefits based on disability.

(5) *20 CFR Part 416, Subpart U.* This subpart contains the rules under which the Department of Health, Education, and Welfare (HEW) can make arrangements with States for HEW to decide whether people who receive SSI benefits are eligible for Medicaid.

HEW has classified the recodification of these regulations as policy significant in nature.

Dated: June 12, 1979.

Stanford G. Ross,

Commissioner of Social Security.

Current Good Manufacturing Practice in Manufacturing, Processing, Packing, or Holding Human Food

Correction

In FR Doc. 17432 appearing at page 33237 in the issue for Friday, June 8, 1979, make the following corrections:

(1) On page 33238, in the first column, under the heading, "SUMMARY", in the 16th line, "CGTMP" should be corrected to read "CGMP".

(2) On page 33238, in the first column, under the heading, "SUMMARY", in the 21st line, "save" should be corrected to read, "safe".

(3) On page 33238, in the first column, under the heading, "DATES", in the 4th line, delete the phrase, "on or before December 5, 1979" and substitute the following words in lieu thereof: "180 days after the date of its publication in the Federal Register".

BILLING CODE 1505-01-M

[21 CFR Parts 20 and 110]

[Docket No. 78P-0296]

Current Good Manufacturing Practices in Manufacturing, Processing, Packing, or Holding Human Food; Hearings

AGENCY: Food and Drug Administration.

ACTION: Notice of public hearings.

SUMMARY: The Food and Drug Administration (FDA) annouces that public hearings will be held in Chicago, Illinois on September 11, 1979, in San Francisco, California on October 3, 1979, and in Atlanta, Georgia on October 24, 1979, to receive information and views interested from persons on the proposed revision of the regulation concerning current good manufacturing practice (CGMP) for human food published in the Federal Register of June 8, 1979.

DATES: A written notice of participation should be filed by August 15, 1979 for the Chicago hearing, by September 7, 1979 for the San Francisco hearing, and by September 28, 1979 for the Atlanta hearing.

ADDRESS: Written notices of participation should be sent to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: F. Leo Kauffman, Bureau of Foods (HFF-414), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street, SW., Washington, DC 20204, 202-245-1164.

SUPPLEMENTARY INFORMATION: FDA will hold informal public hearings on the proposed revised current good manufacturing practice in manufacturing, processing, packing, or holding human food ("Umbrella CGMP") regulation, published in the Federal Register of June 8, 1979 (44 FR 33238). The hearings will be limited to the issues raised by that proposal. These hearings are essential in order to gather sufficient information and opinions on the impact of the proposed revision of the regulations. In particular, FDA is especially interested in the impact that these revised regulations will have on small businesses. The agency solicits comments from small business persons or trade associations representing small businesses on this issue.

These informal hearings are open to the public and will be held in accordance with Part 15 of the FDA procedural regulations (21 CFR Part 15).

The hearing scheduled for September 11, 1979 will start at 9:30 a.m. in the Radisson Hotel, 505 N. Michigan Avenue, Chicago, IL 60611. Those persons desiring to make a presentation at this hearing should file a written notice of participation by August 15, 1979.

The hearing scheduled for October 3, 1979 will start at 9:30 a.m. in the Ramada Inn, 590 Bay Street (Fisherman's Wharf), San Francisco, CA 94133. Those persons desiring to make a presentation at this hearing should file a written notice of participation by September 7, 1979.

The hearing scheduled for October 24, 1979 will start at 9:30 a.m. in the Atlanta Hilton, 255 Courtland Street, Atlanta, GA 30303. Those persons desiring to make a presentation at this hearing should file a written notice of participation by September 28, 1979.

Individuals or organizations will be allotted time for a presentation at only one hearing.

A written notice of participation should be filed with the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, by the appropriate date indicated above. The envelope containing the notice of participation should be prominently marked "FOOD CGMP HEARING."

The notice of participation itself should be identified with Docket Number 78P-0296 and contain the following information:

1. Name, address, and telephone number of person desiring to make a presentation.
2. Business affiliation, if any.
3. Topic(s) of presentation.
4. Number of minutes for oral presentation (maximum of 15 minutes, unless more time can be justified).

A schedule of presentations for a hearing will be mailed to each person who files a notice of participation for that hearing and will also be available from the Hearing Clerk. If the number of persons formally requesting time for presentation exceeds the number that can be accomodated during the day session, the hearing will be carried over to the evening and, if necessary, to the following day. Participants will be notified in advance if an additional session(s) is required. Time permitting, persons not formally scheduled to make a presentation may be permitted to make a presentation at the discretion of the presiding officer. Individuals and organizations with common interests are urged to consolidate their presentations. Formal written statements or extensions of remarks (preferably four copies) may be presented to the presiding officer on the day of the hearing for inclusion in the hearing record of this proceeding.

Dated: June 14, 1979.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-19099 Filed 6-18-79; 8:45 am]

BILLING CODE 4110-03-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[24 CFR Part 1917]

[Docket No. FI-5557]

Proposed Flood Elevation Determinations for the Town of St. Marks, Wakulla County, Fla., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of St. Marks, Wakulla County, Florida.

These base (100-year) flood elevations are the basis for the flood plain

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Town Hall, Port Leon Drive, St. Marks, Florida. Send comments to: Mayor Luther Franklin, P.O. Box 296, St. Marks, Florida 32355.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or toll free line (800) 424–8872, Room 5270, 451 Seventh Street, SW, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of St. Marks, Wakulla County, Florida, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in the flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance of existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Hurricane Tidal Surge from Gulf of Mexico.	Intersection of West Pine Street and Seventh Street.	12
	Intersection of Tallahassee Avenue and Riverside Drive.	12

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963)

Issued: June 1, 1979.

Gloria M. Jimenez,

Federal Insurance Administrator.

Proposed Flood Elevation Determinations for the City of West Melbourne, Brevard County, Fla.; Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of West Melbourne, Brevard County, Florida.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 90 East Court, Melbourne, Florida.

Send comments to: Mayor Larry Archibald, City Hall, P.O. Drawer 338, Melbourne, Florida 32901.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or toll-free line (800) 424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of West Melbourne, Brevard County, Florida, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Crane Creek	Shannon Avenue extended	28
	Just downstream of Wickham Road.	23

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963.)

Issued: June 1, 1979.

Gloria M. Jimenez,

Federal Insurance Administrator.

Proposed Flood Elevation Determinations for the City of Martinsville, Morgan County, Ind., Under the National Flood Insurance Program; Correction

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Correction of proposed rule.

SUMMARY: This document corrects a proposed rule on base (100-year) flood elevations that appeared on page 44 FR 1136 of the **Federal Register** of January 4, 1979.

EFFECTIVE DATE: January 4, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program (202) 755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

The following:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
White River	Approximately 3.7 miles downstream of Conrail Railroad Bridge.	590
	Approximately 2.69 miles upstream of State Route 39 at northern extraterritorial limits.	604
Indian Creek	At mouth of White River 2.8 miles upstream of 500 West Road.	590 606

Should be corrected to read:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
White River	Approximately 1.7 miles downstream of Conrail Railroad Bridge.	592
	Approximately 2.69 miles upstream of State Route 39.	604
Indian Creek	Approximately 1,850 feet downstream of State Route 37.	591
	Approximately 2.8 miles upstream of 500 West Road.	605

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963).

Issued: June 1, 1979.

Proposed Flood Elevation Determinations for the Borough of Jefferson, Allegheny County, Pa., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Borough of Jefferson, Allegheny County, Pennsylvania.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Borough Building, 3006 Old Clairton Road, Clairton, Pennsylvania.

Send comments to: Mr. Anthony Capane, Council President of Jefferson, R.D. 4, 27 Marion, Finleyville, Pennsylvania 15332.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Borough of Jefferson, Allegheny County, Pennsylvania in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet, National geodetic vertical datum
Monongahela River	Downstream Corporate Limits.	748
	Lock and Dam 3 (Upstream)	750
	Upstream Corporate Limits	751
Lobbs Run	Confluence with Monongahela River.	751
	3rd crossing of Walton Road (Upstream).	784
	Upstream Limit of Detailed Study.	812
Peters Creek	Downstream Corporate Limits.	760
	Private Drive 5,000 feet upstream of S.R. 51 (Upstream).	783
	Upstream Corporate Limits	822
Lewis Run	Confluence with Peters Creek.	773
	3rd crossing of State Route 57 (Upstream).	842
	Upstream Corporate Limits	918
Lick Run	Confluence with Peters Creek.	820
	Snowden Road (Upstream)	862
	McElhaney Road (Upstream).	925
	Upstream Limit of Detailed Study.	962

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963).

Proposed Flood Elevation Determinations for the Borough of Pitcairn, Allegheny County, Pa., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Borough of Pitcairn, Allegheny County, Pennsylvania.

These base (10-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Borough Office, Pitcairn, Pennsylvania.

Send comments to: Mr. Joseph L. Rizzo, Council President of Pitcairn, 320 Center Avenue, Pitcairn, Pennsylvania 15140.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755-5581 or Toll Free Line (800) 424-8872, Room 5270, 451 Seventh Street, SW, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Borough of Pitcairn, Allegheny County, Pennsylvania in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. Proposed Flood Elevation Determinations for the Town of Pine Ridge, Lexington County, S.C.; Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Pine Ridge, Lexington County, South Carolina.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Town Hall, 1015 Fish Hatchery Road, West Columbia, South Carolina 29169.

Send comments to: Mayor W.F. Turner or Mr. Doug Caley, Town Councilman, Town Hall, 1015 Fish Hatchery Road, West Columbia, South Carolina 29169.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755-5581 or Toll Free Line (800) 424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of Pine Ridge, Lexington County, South Carolina, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Congress Creek	Northeastern Corporate Limits.	146
	Northwestern Corporate Limits (Approximately 2500 feet downstream of Southern Railway).	150
Big Branch	Just upstream of Fish Hatchery Road.	183
First Creek	Dogwood Road	174

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963).

Proposed Flood Elevation Determinations for Kitsap County, Wash., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in Kitsap County, Washington.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at County Courthouse, 614 Division Street, Port Orchard, Washington.

Send comments to: Mr. Gene Lobe, Chairman, Board of County Commissioners, Kitsap County, County Courthouse, 614 Division Street, Port Orchard, Washington 98366.

FOR FUTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for Kitsap County, Washington, in accordance with section 110 of the Flood Distaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)], 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

[Docket No. FI-5563]

Proposed Flood Elevation Determinations for the City of Middleton, Dane County, Wis., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Middleton, Dane County, Wisconsin. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 7426 Hubbard Avenue, Middleton, Wisconsin. Send comments to: Honorable Dan Ramsey, Mayor, City of Middleton, City Hall, 7426 Hubbard Avenue, Middleton, Wisconsin 53562.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Middleton, Wisconsin, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Pheasant Branch	County Truck Highway M (25 feet)*	856
	Century Avenue (County Truck Highway M) (25 feet)*	876
	Park Street (80 feet)**	892
	Park Street (180 feet)*	900
	U.S. Highway 12 (105 feet)*	916

*Upstream from centerline.
**Downstream from centerline.

Source of flooding	Location	Depth in feet above ground
Pheasant Branch	1600 feet northwest of intersection of Airport Road and Atom Road.	2

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963).

[26 CFR Part 48]

[LR-120-79]

Exemption from Motor Fuels Excise Taxes for certain Alcohol Fuels

AGENCY: Internal Revenue Service, Treasury.

ACTION: Proposed rulemaking cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this Federal Register, the Internal Revenue Service is issuing a temporary regulation regarding the exemption from motor fuels excise taxes for certain alcohol fuels. The temporary regulation also serves as a notice of proposed rulemaking for final excise tax regulations.

DATES: The temporary regulation applies generally to sales after December 31, 1978, and prior to October 1, 1984. The proposed regulations are to be effective for the same period. Written comments and requests for public hearing must be delivered or mailed by August 20, 1979.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T LR–120–79, Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Robert H. Waltuch of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, Attention: CC:LR:T, 202–566–3328 not a toll-free call.

SUPPLEMENTARY INFORMATION: The temporary regulation in the Rules and Regulations portion of this issue of the Federal Register amends 26 CFR Part 138. The final regulations which are proposed to be based on the temporary regulation would amend 26 CFR Part 48. For the text of the temporary regulation, See FR Doc. 79–19025 (T.D. 7629) published in the Rules and Regulations portion of this issue of the Federal Register.

Jerome Kurtz,

Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

[32 CFR Part 41]

[DoD Directive 1332.14]

Enlisted Administrative Separations

AGENCY: Office of the Secretary of Defense.

ACTION: Proposed rule.

SUMMARY: The Department of Defense proposes to revise its directive governing enlisted administrative separations. This proposal delegates authority to the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics). It provides for the discharge of individuals who are not determined to be mobilization assets. It adds a new category that provides for uncharacterized service when a member's term of service has been of insufficient length to warrant characterization or in unusual circumstances, on a casy-by-case basis, as determined by the Secretary of a Military Department. It requires qualified military counsel, when reasonably available, in all instances where counsel is to be consulted or provided, and it adds other administrative due process entitlements. The revision provides for the honorable characterization of service for those discharged or released from active duty for expiration of service, convenience of the Government and unsuitability reasons.

DATES: Written comments must be received by July 19, 1979.

ADDRESS: Office of the Deputy Assistant Secretary of Defense (Military Personnel Policy), the Pentagon, Room 3C980, Washington, D.C. 20301.

FOR FURTHER INFORMATION CONTACT: LTC Gary A. Johnson, USAF, telephone 202-697-9525.

SUPPLEMENTARY INFORMATION: In FR Doc. 76-6104 appearing in the Federal Register on March 3, 1976 (41 FR 9088), the Office of the Secretary of Defense published a revision to this part (DoD Directive 1332.14). The directive was again revised effective December 29, 1976. This proposed rule further modifies Part 41. Although this part pertains solely to agency management and personnel, thus obviating the requirement under 32 CFR Part 296 (1978) for notice and public comment, the proposed rule nontheless is set forth herein to obtain the views of the public.

Specific Modifications

Certain modifications have been made to the marginal performer program. Discharge processing is required for cases involving homosexuality and other aberrant sexual acts when probable cause exists for determining the allegations to be valid. The proposal permits only a General discharge or a Discharge Under Other than Honorable Conditions when there is a discharge by reason of misconduct or discharge in lieu of court-martial. If the appropriate authority determines that the overall record of the member clearly warrants an honorable separation, the member may be separated for unsuitability in mitigated or extenuated cases of misconduct.

New Notification Procedures

New notification procedures are prescribed for those individuals who are unable or unwilling to meet an administrative discharge board proceeding. This proposal was drafted following receipt of comments from the Military Departments, the U.S. Coast Guard, and the Veterans Administration. Nothing in this proposal has express retroactive application to individuals previously separated or discharged from military service.

Accordingly, it is proposed to revise 32 CFR Part 41 reading as follows:

PART 41—ENLISTED ADMINISTRATIVE SEPARATIONS

Sec.

41.1 Reissuance and purpose.
41.2 Applicability and scope.
41.3 Definitions.
41.4 Policy.
41.5 Responsibilities.
41.6 Characterization of service.
41.7 Reasons for and characterization of service.
41.8 Authority and procedures for separation.
41.9 Suspension of Executive of approved separation.
41.10 Effective date and implementation.

Authority: Title 10, U.S.C. 1162, 1163, 1169, 1170, 1172, and 1173.

§ 41.1 Reissuance and purpose.

This part updates the policies, standards, and procedures which govern the administrative separation of enlisted persons from the Military Services; and implements various provisions of Title 10, U.S.C.

§ 41.2 Applicability and scope.

The provisions of this part apply to the Regular and Reserve components of the Army, Navy, Air Force, Marine Corps, and, by agreement with the Secretary of Transportation, to the Coast Guard. When the terms "military Services or Military Departments" are used in this part, the Coast Guard is included.

§ 41.3 Definitions.

(a) *Member.* An enlisted man or woman of the Military Services.

(b) *Discharge.* Complete severance from all military status.

(c) *Release from Active Duty.* Termination of active duty status and transfer or reversion to a Reserve Component not on active duty, including transfer to the Individual Ready Reserve (IRR).

(d) *Separation.* A general term which includes discharge or release from active duty.

(e) *Administrative Separation.* Discharge or release from active duty upon expiration of enlistment or required period of service or in any other lawful manner, but specifically excluding separation by sentence of court-martial.

(f) *Military Record.* An individual's behavior while a member of a Military Service, including general comportment and performance of duty.

(g) *Administrative Discharge Board.* A board appointed to render findings on a case and to recommend retention in the Service or separation with or without probation, specifying the reason for separation and character of service to be assigned (see § 41.8, paragraph (f) and § 41.9).

(h) *Separation Authority.* An official authorized by a Military Service to take final action with respect to specified types of separation.

(i) *Respondent.* A member of a Military Service who has been notified that action has been initiated to separate the member under a specified Service regulation.

(j) *Counsel.* A lawyer, within the meaning of the Uniform Code of Military Justice (UCMJ), 10 U.S.C. Section 827(b), Article 27(b) (1976) or a civilian attorney employed at the member's expense.

(k) *Minority Group.* A segment of the population that possesses common traits, which are transmissible by descent or common characteristics and a cultural heritage signicantly different from that of the general population. Such groups include, but are not limited to, blacks, American Indians, Asian or Pacific Islanders, Alaskan Natives, and Hispanic Americans.

§ 41.4 Policy.

(a) Military Departments have the authority to separate from the Service enlisted members with an appropriate characterization of service. Such

members will be separated in accordance with the procedures set forth in this part.

(b) In determining whether a member should retain current military status or be administratively separated, the member's military record should be evaluated, including records of nonjudicial punishment imposed during a prior period of service, all records of conviction by court-martial, and any other factors which are material and relevant (refer to § 41.6).

(c) The Military Services may establish additional reasons for separation to meet their specific needs, subject to approval by the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics) (ASD (MRA&L)).

(d) Standards and procedures for separation and retention are prescribed in §§ 41.6 through 41.9.

(e) Except for those members whose quality of service has been determined to warrant that they be discharged under other than honorable conditions, personnel released from active duty under the provisions of this part and determined to be mobilization assets may be retained in the Ready Reserve of their respective Military Service to fulfill their total military obligation. Such action is in accordance with Title 10, United States Code, Section 651, and may be accomplished under standards and conditions established by the respective Military Service.

§ 41.5 Responsibilities.

(a) Each of the Military Services shall:

(1) Prescribe appropriate internal procedures for periodic explanation to enlisted members of the types of discharges, the basis for their issuance, and the possible effects of various discharges upon reenlistment, civilian employment, veterans' benefits, and related matters. As a minimum, such explanation shall take place each time the Articles of the Uniform Code of Military Justice (UCMJ) are explained, pursuant to 10 United States Code, Section 937. The requirement that the effects of the various types of discharges be explained to military personnel does not create a procedural right, but establishes a command responsibility to publicize the effects. Failure on the part of the member to receive or to understand such explanation shall not create a defense to effecting a discharge nor a legal basis for review of the effectiveness of the discharge.

(2) Ensure that information concerning the purpose and scope of the Discharge Review Board and the Board for Correction of Military/Naval Records, established pursuant to Title 10, United States Code, Sections 1552 and 1553, and DoD Directive 1332.28, "Discharge Review Board (DRB) Procedures and Standards," March 28, 1978, is explained during the separation processing of all members. Specific counseling is required concerning Pub. L. 95–126 which states that a discharge under other than honorable conditions, resulting from a period of continuous, unauthorized absence of 180 days or more, is a conditional bar to benefits of the Veterans Administration. Such counseling may be given orally, but a written fact sheet or similar document is preferred.

(b) The ASD (MRA&L) is delegated the authority to modify or supplement this part in a manner consistent with the general policies set forth herein.

§ 41.6 Characterization of Service.

(a) *Guidelines.* Standards of acceptable personnel conduct and peformance of duty for military personnel are found in the UCMJ and the Service regulations, and embody time-honored customs and traditions of the Military Services. Due consideration must be given to the member's age, length of service, grade, and general aptitude when determining the reason for separation and the characterization of service, consistent with the following:

(1) *Honorable.* Honorable service is the standard against which a servicemember's performance is compared. It encompasses a wide and variable range of related attributes, such as courage, fidelity, honesty, trustworthiness, and effectiveness as measured while a member of the Military Service. These attributes are reflected in the member's military record, including the reason for separation. A member will not necessarily be denied an honorable characterization solely by reason of a specific number of convictions by courts-martial or actions involving nonjudicial punishment under Article 15 of the UCMJ during the member's current enlistment period of obligated services.

(2) *General (Under Honorable Conditions).* Such a characterization is appropriate when a member's military record, including the reason for separation, is not sufficiently meritorious to warrant an honorable characterization, but not so unsatisfactory as to warrant an other than honorable characterization of service.

(3) *Under Other Than Honorable Conditions.* Such a characterization is appropriate when a member's military record, including the reason for separation, indicates the person has performed or conducted himself or herself in an unsatisfactory manner, and a higher characterization of service is not warranted. Such a member will be discharged for: Misconduct or security reasons, when based on the approval of a recommendation of an administrative discharge board or waiver of the right to board action; or resignation or request for discharge for the good of the Service in lieu of court-martial.

(i) No member shall be discharged under other than honorable conditions if the grounds for such action are based wholly or in part upon acts or omissions for which the member has been previously tried by court-martial resulting in acquittal or action having the effect thereof, except when such acquittal or equivalent disposition is based on a ruling not going to the merits of the case.

(ii) No member shall be discharged under other than honorable conditions unless the member is afforded the right to present his or her case before an administrative discharge board, with the advice and assistance of counsel, and unless such discharge is supported by approved board findings and an approved board recommendation for such a discharge. As exceptions, a discharge under other than honorable conditions may be issued without board action if the member (A) is beyond military control by reason of unauthorized absence for a period of one year or more, subject to the limitations of Title 10, United States Code, Section 1163 (1976) (members of a Reserve Component) (See § 41.8); (B) resigns or requests discharge for the good of the Service and in lieu of court-martial; or (C) waives his or her right to board action.

(b) *Special Consideration.* (1) Uncharacterized service is appropriate when a member's term of military service has been of insufficient length to warrant characterization. Notwithstanding any other provision within this part, an administrative separation of any member, who is separated during initial entry training (e.g.; recruit, basic, one-station unit) and has less than 180 days of continuous active service in the current enlistment, will be uncharacterized unless the member is separated by reason of misconduct or disability. Such a determination may also be directed, on a case-by-case basis, by the Secretary concerned, when unusual circumstances indicate an inconsistency with the concept of characterization.

(2) Except as indicated below, the characterization of service of the current enlistment or period of service will be determined solely by the member's military record and reason for separation during that enlistment or period of service, plus any extensions thereof prescribed by law or by the Military Service concerned, or effected with the consent of the member. The following shall not be considered:

(i) Prior service activities, including but not limited to records of conviction by courts-martial, records of non-judicial punishments, records of absence without leave, or commission of other offenses for which punishment was not imposed.

(ii) Preservice activities, except that in cases involving separations for fraudulent or erroneous enlistments, consideration may be given to omission of facts which, if known, would have precluded, postponed, or otherwise affected the member's eligibility for enlistment or induction from active duty under the provisions of this part, a member shall be provided a separation document reflecting the period of service concerned, in accordance with DoD Instruction 1336.1, "Certificate of Release or Discharge from Active Duty (DD Form 214/5 Series)," December 14, 1978. Upon request, the member will also be provided written evidence of the characterization of service, if applicable. In the case of an honorable discharge, an Honorable Discharge Certificate (DD Form 256) will be awarded. Characterization of service upon completion of total military obligation will normally be the same as the characterization assigned upon release from active duty, unless other circumstances justify a different characterization. The General Discharge Certificate (DD Form 257) and the Under Other Than Honorable Conditions Discharge Certificate (DD Form 794) will only be issued in cases involving members discharged from a Reserve Component.

§ 41.7 Reasons for and characterization of separations.

(a) *Expiration of enlistment or fulfillment of service obligation.* A member separated by reason of expiration of the term of obligated service will be assigned an Honorable characterization. For purposes of this paragraph, when individuals serving outside the continental United States (CONUS) or non-CONUS residents serving outside their state/territory, and the separation takes place not more than 30 days before the end of a given enlistment, expiration of enlistment will be considered to have occurred. Where the reason for separation is other than for expiration of enlistment, this provision does not apply.

(b) *Convenience of the Government.* A member separated by reason of the convenience of the Government will be assigned an Honorable characterization. Separation by reason of the convenience of the Government may be effected for such reason as may be prescribed by the Secretary of the Military Department concerned and will include the following:

(1) General demobilization, reduction in authorized strength, or an order applicable to all members of a class of personnel specified in the order.

(2) Acceptance of a commission, appointment or acceptance into a program leading to a commission, or appointment in any branch of the Military Services for active duty only.

(3) Immediate enlistment or reenlistment.

(4) Erroneous induction, enlistment, extension of enlistment, these reasons include enlistments that would not have occurred had the truth been known to the Government or had appropriate directives been followed.

(5) Early separation of personnel under various, authorized programs or circumstances as established by the Military Departments and approved by the ASD(MRA&L) (see § 41.4, paragraph (c)).

(6) Pregnancy or childbirth involving women members, upon the request of the member, unless the Secretary of the Military Department determines that retention is in the best interest of the Service.

(7) Inability to perform prescribed duties, repetitive absenteeism or nonavailability for worldwide assignment resulting from parenthood.

(8) Conscientious objection in accordance with DoD Directive 1300.6, "Conscientious Objectors," August 20, 1971.

(9) Sole surviving son/daughter and certain family members in accordance with DoD Directive 1315.14, "Special Assignment and Discharge Policies for Family Members," July 5, 1974.

(10) Physical or mental condition, not a disability, which interferes with assignment to and/or performance of duty, including but not limited to chronic seasickness, airsickness, enuresis, and sexual change.

(11)Marginal performance program.

(i) Application of this provision is limited to members meeting the following criteria:

(A) Members separated under this program must be assigned to: (1) Basic, recruit or one-station unit training and have less than 180 days of continuous active service in the current enlistment; (2) initial skill training immediately following basic/recruit training; or (3) an organizational unit for an appropriate period of evaluation, as determined by the Secretary of the Military department concerned, but for not less than 60 days.

(B) The members considered must be in their initial enlistment in that particular Military Service; serving in pay grade E–3 or below; and have less than two years of active service in their current enlistment.

(C) The member must be medically qualified for separation.

(D) The member must have completed any unsuspended disciplinary punishment and not have received more than a combination of three Article 15, UCMJ, punishments or convictions by courts-martial following completion of basic, recruit, or one-station unit training.

(E) The member must not be awaiting disciplinary action under the USMJ or have pending an unexecuted or a suspended discharge.

(ii) A marginal performer is identified by reason of the member's:

(A) Failure to attain or maintain required job skill proficiency, either by associated inaptitude or lack of reasonable effort; or

(B) Presence creating an administration burden to the command due to repeated minor military or disciplinary infractions; or

(C) Performance which has not contributed to unit readiness and mission accomplishment as evidenced by below average ratings or demonstrated incapacity to meet performance standards.

(iii) As a minimum, the Military Services will establish procedures requiring formal counseling and documentation concerning deficiencies, and affording an individual a reasonable opportunity to overcome them prior to initiating separation action. In addition, a member separated under this provision will be given an opportunity to consult with counsel, if reasonably available.

(c) *Dependency or Hardship.* A member separated by reason of dependency or hardship will be assigned an Honorable characterization.

(1) Separation may be directed when genuine dependency or undue hardship exists, and

(i) The hardship or dependency is not of a temporary nature;

(ii) Conditions have arisen or have been aggravated to an excessive degree since entry into the Service and the

member has made every reasonable effort to remedy the situation;

(iii) The separation will eliminate or materially alleviate the condition; and

(iv) There are no means of alleviation readily available other than the separation.

(2) Undue hardship does not necessarily exist solely because of altered present or expected income or because of separation from the member's family that causes the inconveniences incident to Military Service.

(d) *Minority.* A member who is under age 17 at the time the member's minority is discovered shall be processed in accordance with paragraph (e) of this section. Where the member has attained age 17 prior to the discovery of this defect, the member shall be discharged with an Honorable characterization upon application by the member's parent or guardian made to the separation authority within 90 days after the member's enlistment where:

(1) There is evidence satisfactory to the separation authority that the member is under 18 years of age; and

(2) The member enlisted without the written consent of the member's parent or guardian, if the member was not emancipated and is under the control of his or her parent or guardian.

(e) *Void/Voidable Enlistments.* (1) In those cases in which an enlistment is administratively determined to be void, the individual will be released from military control. Such individuals will be issued a DD Form 214, Certificate of Release or Discharge from Active Duty, to allow them to account for periods under military control, but that document will not constitute a discharge and will not contain a characterization of service. If otherwise eligible, an individual so released may be permitted to enter a new enlistment.

(2) In those cases in which the enlistment is voidable only at the option of the Military Service, the individual may be:

(i) Retained, with or without the individual's consent.

(ii) Released from military control, as provided in paragraph (e)(1) of this section or

(iii) Discharged in accordance with erroneous or fradulent enlistment provisions specified elsewhere herein.

(3) In those cases in which the enlistment is voidable at the option of either the individual or the Military Service, the individual may be released from Military control or discharged as provided above, regardless of which party elects to terminate the enlistment. In addition, under such regulations as the Military Service may prescribe, the individual may be retained if the disqualification is no longer present and both the individual and Military Service consent in writing.

(f) *Disability.* A member separated by reason of disability will be discharged with an Honorable characterization. Disability exists when it has been determined that a member is physically unfit to perform the duties of the member's office, rank, grade, or rating, and is not entitled to retirement under the provisions of Title 10, United States Code, chapter 61.

(g) *Personal Abuse of Drugs Other than Alcoholic Beverages.* (1) A member separated for this reason will be discharged with an Honorable discharge, when based on evidence developed as a direct or indirect result of a test administered for identification of drug abusers, or by a member's volunteering for treatment for a drug problem under the Drug Identification and Treatment Program administered by his or her particular Armed Force.

(2) A member may not be separated under this provision unless:

(i) The member's military record indicates a lack of potential for continued military service; or

(ii) Long-term rehabilitation is determined necessary and the member is transferred to a Veterans' Administration or civilian medical facility for rehabilitation; or(iii) The member has failed, through inability or refusal, to participate in, cooperate in, or complete a drug abuse treatment and rehabilitation program.

(3) A member separated under this provision will be given an opportunity to consult with counsel, if reasonably available.

Note.—It is essential to assure compliance with both the letter and spirit of the decision of the Court of Military Appeals in *United States* v. *Ruiz*, 23 C.M.A. 181, 48 C.M.R. 797 (1974). Care should be exercised to assure that a member identified for separation under this provision is not discharged with less than an Honorable discharge, based on some separate and distinct reason for discharge, unless it can be demonstrated that evidence of drug use obtained through the identification process described herein was not directly or indirectly utilized in establishing such separate and distinct reason.

(h) *Unsuitability.* A member separated from active duty or from Reserve status by reason of unsuitability will be assigned an Honorable characterization when it has been determined that the individual is not currently suitable for further Military Service. Factors considered under this category are normally of a nonvoluntary nature, apparently beyond the control of the member, which make retention incompatible with the best interest of the Military Services. Where military/disciplinary infractions are involved, the member should be considered for processing for misconduct.

Administrative separation action under paragraphs(h)(2), (5), (6), and (7), of this section, will not normally be initiated until a member has been formally counseled concerning deficiencies and afforded a reasonable opportunity to overcome them as reflected in appropriate counseling records. Unsuitability is evidenced by one or more of the following:

(1) Personality Disorder: As determined by a medical officer or contract physician (preferably a psychiatrist) or clinical psychologist and described in the *diagnostic and Statistical Manual (DSM–11) of mental Disorders*, American Psychiatric Association [1] which interferes with the member's ability to perform adequately. Combat exhaustion and other acute situational maladjustments are exceptions.

(2) Alcohol Abuse. A member who has been involved in alcohol-related incidents and who is offered but fails through inability or refusal to participate or cooperate in or complete an alcohol abuse treatment and rehabilitation program.

(3) Homosexual act (s) not falling within the purview of paragraph (j)(6) (including act(s) prior to the current period of service) and homosexual tendencies. Because anyform of homosexuality is incompatible with military service, discharge processing will be initiated when competent authority believes there is probable cause for determining that a valid basis exists for the allegations.

(4) Other aberrant sexual acts including, but not limited to, marriage between personnel of the same sex, voyeurism, and transvestism. Because aberrant sexual tendencies such as these are incompatible with Military Service, discharge processing will be initiated when competent authority believes there is probable cause for determining that valid basis exists for the allegations.

(5) Apathy, defective attitude, and inability to expend effort constructively that is a significant observable defect.

---

[1] Section on mental disorders, International Classification of Diseases and Injuries—8, *Diagnostic and Statistical Manual (DSM–11) of Mental Disorders*, 2nd Edition, Committee on Nomenclature and Statistics, American Psychiatric Association, Washington, D.C., 1968

(6) Inaptitude, which is a lack of general adaptability, want of readiness of skill, unhandiness, or inability to learn.

(7) Financial irresponsibility, which involves a failure to resolve satisfactorily indebtedness matters in a proper and timely manner.

(8) Mitigated or extenuated cases of misconduct. If in a separation proceeding for misconduct (paragraph (j) of this section), an Administrative Discharge Board or Separation Authority determines the overall record clearly warrants an Honorable or General Characterization, the servicemember may be processed on a case-by-case basis under this paragraph for unsuitability, subject to approval of the general court-martial authority concerned, or of such other authority designated Military Department concerned.

(i) *Security.* Members separated by reason of security will be discharged with an appropriate characterization and under conditions and procedures established by the Secretary of Defense, as set forth in DoD Directive 5210.9, "Military Personnel Security Program," June 19, 1956, and similar Directives applicable to the Coast Guard, when retention is clearly inconsistent with the interest of national security.

(j) *Misconduct.* Members discharged by reason of misconduct, except as provided in paragraph (j) (11) of this section will be given a General discharge or a discharge under other than honorable conditions as the particular circumstances in a given case warrant. Administrative discharge action under paragraphs (j)(1) through (5) and (11) of this section will not normally be initiated until a member has been formally counseled concerning deficiencies and afforded a reasonable opportunity to overcome them. Such counseling will be recorded and included in the record of the discharge action. Discharge for misconduct is appropriate when it has been determined that an individual is unqualified for further military service because the member's military record in the current enlistment or period of obligated service evidences one or more of the following patterns of conduct, acts, conditions:

(1) Serious or frequent involvement of a discreditable nature with civil or military authorities. Serious involvement is participation in an offense which, under the UCMJ, is punishable by a punitive discharge.

(2) An established pattern of shirking, which is the deliberate evasion of duty.

(3) An established pattern showing dishonorable failure to pay just debts.

(4) An established pattern showing dishonorable failure to contribute adequate support to dependents or failure to comply with orders, decrees, or judgements of a civil court concerning support of dependents.

(5) Drug abuse, which is the illegal or wrongful introduction into a military reservation, or the improper, illegal, or wrongful use, possession, sale, transfer, of any narcotic substance, intoxicating inhaled substance, marijuana, or controlled substance, as established by Title 21, United States Code, Section 812, "Schedule of Controlled Substances Establishment," when supported by evidence not attributed to a urinalysis test administered for identification of drug abusers or to a member's volunteering for treatment under the drug identification and treatment program administered by his/her particular Military Service, or where otherwise exempted in paragraph (g) of this section.

(6) Sexual deviation, including but not limited to:

(i) Sodomy

(ii) Lewd and lascivious act(s).

(iii) Indecent exposure.

(iv) Indecent act(s) with or assault upon a child under the age of 16 years.

(v) Aggravated in-service homosexual act(s), to include:

(A) The attempt, solicitation, or accomplishment of a homosexual act with a child under the age of 16 years, regardless of the cooperation of the child.

(B) The attempt, solicitation, or accomplishment of a homosexual act accompanied by assault or coercion so that one party involved did not willingly cooperate or consent, or where the consent or cooperation was obtained through force, fraud, or intimidation. Because such acts are incompatible with military service, discharge processing will be initiated when competent authority believes there is probable cause for determining that a valid basis exists for the allegations.

(7) Prostitution, which is the act of a male or female engaging in sexual activity for which payment is received.

(8) Conviction by civil authorities (foreign or domestic), or action taken which is tantamount to a finding of guilty of an offense for which the maximum penalty under the UCMJ (Title 10, United States Code) is death or confinement for one year or more; or which involves moral turpitude; or where the offender is adjudged a juvenile delinquent, wayward minor, or youthful offender, or is placed on probation, or punished in any way, as the result of an offense involving moral turpitude. If the offense is not listed in the *Manual for Courts-Martial,* 1969 (Rev.), Table of Maximum Punishments, or is not closely related to an offense listed therein, the maximum punishment authorized by the United States Codes, whichever is lesser, applies. A member is subject to discharge although he or she has filed an appeal or stated his or her intention to do so. However, it will be the general policy to withhold the execution of the approved discharge pending outcome of the appeal. If the execution of the discharge is considered appropriate without waiting for final action on the appeal, the member may be discharged upon the direction of the Secretary concerned or if the member requests such discharge.

(9) Procurement of a fraudulent enlistment, induction, or period or active service through any deliberate material misrepresentation, omission, or concealment which, if known at the time, might have resulted in rejection. The enlistment of a minor with false representation as to age without proper consent will not, in itself, be considered as fradulent enlistment (see paragraph (d) of this section). Where there is no court-martial jurisdiction over the member because of the manner in which the individual's enlistment was effected, the individual may be processed for separation in accordance with paragraph (e) of this section.

(10) Prolonged, unauthorized absence, continuous for one year or more.

(11) Unsatisfactory participation in a unit of the Ready Reserve as defined in DoD Directive 1215.13, "Unsatisfactory Performance of Ready Reserve Obligation," May ——1979, (see § 41.8, (d)(2)(iii)).

(k) *Resignation or Request for Discharge for the Good of the Service and in Lieu of Court-Martial.* Discharge under other than honorable conditions or a General discharge is authorized subject to procedures and safeguards specified in § 41.8, paragraph (g), upon resignation or request for discharge, where conduct has rendered a member triable by court-martial for an offense punishable by a punitive discharge. (The provisions of the Table of Maximum Punishments, Section B, paragraph 127c, *Manual for Courts-Martial,* 1969 (Rev.), are not applicable to requests for discharge pursuant to this paragraph.)

(l) *Secretarial Plenary Authority.* Notwithstanding the specific provisions of this or any other Directive, the Secretary concerned may direct the separation of any member with an Honorable or General characterization

or with no characterization prior to the expiration of term of service, after determining it to be in the best interests of that Department

§ 41.8 Authority and procedures for separation.

(a) *Convenience of the Government.* A separation with an Honorable characterization may be approved by the member's commanding officer or higher authority when it has been determined that the member merits separation. A member recommended for separation under § 41.7, paragraph (11) shall be afforded the opportunity to consult with counsel if reasonably available and to make a statement in the member's own behalf or to decline the opportunity in writing. If such a statement is made by the member, a staff judge advocate or legal assistant must review it prior to submitting the case to the separation authority.

(b) *Unsuitability.* A separation with an Honorable characterization may be approved by the commander with special court-martial jurisdiction or higher authority. A determination to approve the separation of an individual for unsuitability must be supported by a preponderance of the evidence, meaning that the evidence is of greater weight or more convincing than that which is offered in opposition to it.

(1) A member in pay grade E–3 or below with less than five years of total active and/or Reserve military service shall be notified in writing of the proposed action and shall be afforded an opportunity to consult with counsel, if reasonably available, and to make a statement in the member's own behalf or to decline the opportunity in writing. If such a statement is made by the member, a staff judge advocate or legal assistant must review it prior to submitting the case to the separation authority.

(2) A member in pay grade E–4 or higher or a member with five or more years of total active and Reserve military service shall be separated by reason of unsuitability only in accordance with the safeguards and procedures specified in paragraph (d)(2)(i) through (iii) of this section.

(c) *Other Reasons for Honorable Separations.* A separation with an Honorable characterization may be approved by the member's commanding officer or higher authority when it has been determined that the member merits separation because of expiration of enlistment or fulfillment of service obligation, dependency or hardship, minority, disability, void and voidable enlistment, and personal abuse of drugs other than alcoholic beverages. A member recommended for separation under § 41.7, paragraph (g) shall be afforded the opportunity to consult with counsel if reasonably available and to make a statement in the member's own behalf or to decline the opportunity in writing. If such a statement is made by the member, a staff judge advocate or legal assistant must review it prior to submitting the case to the separation authority.

(d) *Misconduct.* A General discharge or a discharge under other than honorable conditions is authorized. A determination of processing for misconduct must be supported by a preponderance of the evidence.

(1) Separation Authority.

(i) A General discharge may be approved by a commander with special court-martial jurisdiction or higher authority, only after consultation with the staff judge advocate or legal assistant with respect to the legal sufficiency of the proceedings.

(ii) A discharge under other than honorable conditions may be approved by a commander with general court-martial jurisdiction or higher authority, only after consultation with the staff judge advocate or legal assistant with respect to the legal sufficiency of the procedures. This authority may be delegated to a general or flag officer in command who has a judge advocate or law specialist on his or her staff for cases arising in that command. Every action taken pursuant to such delegation shall state the specific authority therefor.

(2) Safeguards and Procedures.

(i) A member who is under military control shall be notified in writing of the basis for the proposed discharge action, the provision mentioned in paragraph (e) of this section, and advised that the member has the right to:

(A) Present his or her case before an administrative discharge board.

(B) Be represented by counsel, as described in paragraph (f)(3)(i) of this section.

(C) Submit statements in the member's own behalf.

(D) Waive the above rights in writing. The member shall be given an opportunity to consult with counsel, prior to waiving such rights.

(ii) A member unable to appear in person before an administrative discharge board by reason of confinement by civil authorities will be so advised by certified mail (return receipt requested) and a receipt for certified mail (PS Form 3800) obtained. Such notification will include notice of the proposed discharge action, the most unfavorable type of characterization of service that may be assigned, and the fact that action has been suspended to give the member the opportunity to exercise the rights specified in paragraph (d)(2)(i)(A) through (D) of this section.

(iii) Any member of a Reserve Component not on active duty shall be entitled to basically the same rights as an active duty member.

(A) The notification letter to the individual will contain the following information:

( ) The proposed discharge action;
( ) The type of characterization of service that may be assigned or intent to transfer to the IRR, as appropriate;
( ) The probable characterization of service if certain conditions are not fulfilled following transfer to the IRR;
( ) The suspension of administrative discharge proceedings to give him or her the opportunity to exercise the rights specified in paragraph (d)(2)(i) of this section, and the opportunity to request appointment of a military counsel to represent the member or, in the member's absence, present the member's case before an administrative separation board; and
( ) The possible finalization of the proposed discharge action, if the member fails to respond within 45 days.

(B) When members of the Selected Reserve are notified of probable discharge action as a result of their unsatisfactory participation, reasonable effort should be made to furnish copies of such notification to the individual through personal contact by a member of the command and a written acknowledgement of receipt obtained. Where such efforts are unsuccessful, the notification will be mailed to the individual.

( ) In addition to the notification procedures specified in paragraph (d)(2)(iii)(A) of this section, the individual who mailed the notification will prepare a Sworn Affidavit of Service by Mail (see DoD Directive 1215.13, "Unsatisfactory Performance of Ready Reserve Obligation," ——— 1979), which will be inserted immediately, together with PS Form 3800, in the member's personnel file.
( ) Such notification shall be fully and sufficiently accomplished through the mailing of said notification to the member at the mailing address considered to be the most recent one furnished by the member as an address at or from which official mail will be received by or forwarded to the member.
( ) Provided the notification was properly and correctly mailed to the most recent address furnished by the member, absence of proof of delivery does not change the fact that the member was properly notified.

(iv) If a member waives his or her rights in any of the situations covered in paragraphs (d)(2)(i), (A) through (D), of

this section the separation authority may disapprove the waiver and refer the case to an administrative discharge board, or direct retention on active duty, or direct discharge. If discharge is directed, the character of service will be specified except as provided in § 41.6.

(v) A member beyond military control by reason of unauthorized absence:

(A) May be discharged under other than honorable conditions *in absentia* under any of the following circumstances (see DoD Directive 1325.2, "Desertion and Unauthorized Absenteeism," February 10, 1977).

( ) When the prosecution of the member is apparently barred by statute of limitations, Title 10, United States Code, Section 843(1976). In those cases, a discharge under other than honorable conditions may be directed at any time it is determined that prosecution is so barred: *Provided*, That upon consideration of available extenuating, mitigating, and aggravating factors in each case, the separation authority determines that the best interests of the Military Services will be served by issuance of such discharge.

( ) When the member who is an alien has gone to a foreign country where the United States has no authority to apprehend such a member under a treaty or agreement.

( ) When the member has been absent for a period of 18 months or more (absent any other aggravated circumstances, such as commission of a serious crime), on a case-by-case basis, as determined by the Secretary concerned. *This provision will only be implemented upon further authorization by the Secretary or Deputy Secretary of Defense.*

(B) Shall be notified of the imminent discharge action and advised of his or her rights in accordance with paragraph (d)(2)(i) of this section. Such notification will be forwarded to the last known record address of the member, or next of kin, as appropriate.

(C) Shall be subject to the separation limitations of Title 10, United States Code, Section 1163, if a member of a Reserve component.

(e) *Unauthorized Absence When Involuntary Discharge is Pending.* Members who absent themselves without authority while being processed for involuntary discharge need not be returned to military control solely for execution of the discharge. Notwithstanding the provisions of paragraph (d)(2)(v) of this section, an approved administrative discharge may be executed if:

(1) Processing, at least insofar as the member's presence is required, was complete at the time the unauthorized absence began; and

(2) A commander with special court-martial jurisdiction determines that the member's return to military control for disposition of the unauthorized absence is not required.

(f) *Administrative Discharge Board.*—(1) *Composition.* Except as provided in paragraph (f)(1) (i) through (v) of this section, an administrative discharge board shall be comprised of at least 3 experienced commissioned officers, at least one of whom shall be serving in the grade of major/lieutenant commander or higher. The board may include a nonvoting recorder. A nonvoting legal advisor may be appointed to assist the board if authorized by the Secretary concerned. The following additional requirements apply:

(i) If the respondent is a member of a Regular Component, the respondent may request in writing that an enlisted member be appointed to sit as a member of the board. All enlisted personnel appointed as members shall be serving in pay grade E–7 or above and shall be senior to the respondent. This provision does not apply to reservists. See Title 10, United States Code, Section 1163 (1976).

(ii) If the respondent is an enlisted member of a Reserve Component or holds an appointment as a Reserve commissioned or warrant officer, the membership shall include a majority of Reserve officers, if reasonably available. Where a Reserve majority is not available, the board shall include at least one Reserve component officer. Voting members shall be senior to the respondent's Reserve grade.

(iii) The board shall include at least one voting member, of the same sex as the respondent, if requested in writing by the respondent and reasonably available.

(iv) If the respondent is a member of a minority group, the board shall, upon the written request of the respondent, include as a voting member a minority group member, if such person is available. When requested, the appointed board member should normally be of the same minority as the respondent; however, nonavailability of a member of the same minority group shall not preclude convening the board. In the event of nonavailability, the reason shall be stated in the record of proceedings.

(v) A respondent who asks for special representation on the board in accordance with paragraphs (g)(1)(iii) and (iv), of this section shall not as a matter of right be entitled to a representative from each such category. The respondent shall elect, in writing, the category from which the special representative is preferred. In all cases, the majority of the board must be comprised of commissioned or warrant officers.

(2) *Procedures.* The board functions as an administrative rather than a judicial body. Strict rules of evidence need not be observed. However, reasonable restrictions as to relevancy and competency of matters considered may be imposed. When the board meets in closed session, only voting members shall be present. The proceedings of the board shall be kept as prescribed by the Secretary of the Military Department concerned but, as a minimum shall contain a verbatim record of the findings and recommendations. The findings of the board must be supported by a preponderance of the evidence. Based upon the findings, the board shall recommend one of the following:

(i) Retention.

(ii) Discharge for a specified reason with the appropriate characterization of service, according to the applicable Service regulations implementing this part.

(iii) Discharge in accordance with the above paragraph, but with the discharge suspended and the member placed on probation for a period of not less than six months or more than one year, except that the expiration of the respondent's enlistment or any extension thereto shall automatically terminate any probationary period.

(3) *Rights of the Respondent.* A respondent has the following rights:

(i) Counsel.

(A) As defined in § 41.3, counsel shall be appointed to represent the respondent during the course of the proceedings.

(B) The respondent may be represented by military counsel of the member's own choice provided that the requested counsel is available as determined under regulations of the Military Service concerned. If requested counsel is made available to represent the respondent, detailed military counsel shall be relieved.

(C) The respondent may employ a civilian attorney at the member's own expense. A respondent who retains a civilian attorney is not entitled to request military counsel of the member's own choice. However, appointed military counsel will be made available to assist the civilian attorney.

(ii) The respondent may request the appearance before the board of any witness on active duty or civilian employee of the Department of Defense whose testimony is believed to be material to the respondent's case. Other civilians who agree to appear may be issued invitational travel orders in appropriate cases (see paragraph

C6000.11, Joint Travel Regulations). Members of the Reserve Components may testify, either in an active duty or drill status. The respondent or his or her counsel will address the request in writing to the recorder or legal advisor where applicable, or in the absence of a recorder or legal advisor to the convening authority. Such request will state the reason for the personal appearance. If the recorder or legal advisor where applicable, denies the request, the matter will be forwarded to the convening authority. The convening authority, in his or her sole discretion, will determine whether the witness' testimony is material and whether the personal appearance is necessary. If the convening authority determines that the personal testimony of the witness is necessary and material, the hearing will be postponed or continued to permit attendance of the witness. If the separation authority determines that the personal testimony of the witness is not necessary or if the witness commanding officer determines that military necessity precludes the witness attendance at the hearing, the hearing shall be continued or postponed to provide the respondent with the opportunity to obtain a written statement from the requested witness within a reasonable time period determined by the convening authority. The respondent and the respondent's counsel may question any witness who appears before the board. Nothing in this paragraph is intended to preclude the respondent from arranging for the attendance of nonactive duty witnesses at the member's own expense.

(iii) The respondent may, at any time before the board convenes or during the proceedings, submit any answer, deposition, sworn or unsworn statement, affidavit, certificate, or stipulation. This includes, but is not limited to, depositions of witnesses not deemed to be reasonably available or witnesses unwilling to appear voluntarily.

(iv) The respondent may or may not submit to examination by the board. The provisions of Title 10, United States Code, Section 831, Article 31 apply.

(v) The respondent may challenge any voting member of the board for cause only.

(vi) Failure of the respondent to assert any of these rights after being apprised of them, cannot be considered as a bar to the board proceedings, findings, and recommendations.

(4) *Actions by Separation Authority.* Upon receipt of the record of board proceedings and a review of his or her staff judge advocate's or legal assistant's opinion regarding legal sufficiency:

(i) The separation authority may:

(A) Approve the board's recommendations and direct their execution.

(B) Approve the board's recommendations with the following modifications including any combination thereof:

( ) Suspended execution for a specified period of probation.

( ) Change the characterization of service to a more favorable one.

( ) Change the basis for discharge when the record indicates such action would be appropriate.

(C) Disapprove the findings or the recommendation for discharge and retain the member in the service.

(D) Disapprove the findings and recommendation and refer the case to a new board if the separation authority (*1*) finds legal prejudice to the substantial rights of the respondent or (*2*) if the findings of the previous board are determined to have been obtained by fraud or collusion. No member of the new board shall have served on a prior board which considered the same matter. The record of the proceedings of the earlier board, minus the findings, recommendations, and prejudicial matter, may be furnished the successor board. The separation authority shall not approve findings and recommendations less favorable to the respondent than those rendered by the previous board unless fraud or collusion can be attributed to the respondent or individuals acting on his or her behalf.

(E) Recommend separation to the Secretary concerned, pursuant to § 41.6(b), in the event of a board recommendation for retention if he or she believes that separation is warranted by the circumstances of the particular case.

(ii) The separation authority may not:

(A) Downgrade the characterization of service.

(B) Designate misconduct as the basis when the board has recommended separation for unsuitability.

(C) Suspend execution in cases of fraudulent enlistment.

(D) Approve discharge without probation when the board recommends discharge with probation. In this case, only the general court-martial or higher authority may approve the discharge without probation.

(g) *Resignation or Request for Discharge for the Good of the Service and in Lieu of Court-Martial.* A member may be issued a discharge under other than honorable conditions without board action, provided he or she has been afforded the opportunity to consult with counsel and certifies in writing that he or she (1) understands the elements of the offense for which being charged; (2) acknowledges guilt of the offense or any lesser offense, for which a punitive discharge is authorized; (3) understands that he or she will receive a discharge under other than honorable conditions unless the discharge authority finds mitigating circumstances warranting the issuance of a discharge under honorable conditions; and (4) understands the adverse nature of such a characterization and possible consequences thereof. Such a discharge will be approved by a commander exercising general court-martial jurisdiction or higher authority.

(h) *Conditional Waiver.* Use of a conditional waiver, as described below, is authorized at the discretion of the Military Departments. A conditional waiver is a statement initiated by a member waiving those rights associated with administrative separation board proceedings contingent upon receiving a characterization of military service higher than the least characterization authorized for issuance for the specific reason of separation in the member's situation. If such a statement of waiver is accepted, the particular circumstances of the member's military service warranting the higher characterization will be specifically identified by the member's commanding officer, or higher authority, in the separation correspondence to be filed in the member's military personnel record. A member may not waive rights contingent on receiving a separation with service uncharacterized.

§ 41.9 Suspension of execution of approved separation.

Except in the case of fraudulent enlistment, the separation or higher authority may, prior to the expiration of the member's enlistment or period of obligated service, suspend execution of an approved separation for a specified period not to exceed 12 months, if the circumstances of the case indicate a reasonable prospect of rehabilitation. During the period of suspension, the member shall be afforded an opportunity to demonstrate that he or she is capable of behaving properly for an extended period under varying conditions and that the member can perform assigned duties efficiently.

(a) Upon satisfactory completion of the probationary period, execution of the approved separation will be canceled automatically.

(b) Additional misconduct on the part of the member during the probationary

period or actions which constitute substandard performance of duty or demonstrate characteristics of unsuitability may establish the basis for one of the following actions:

(1) Punitive or new administrative action may be initiated, notwithstanding the suspension of execution of the approved separation.

(2) Vacation of the suspension and execution of the discharge. Prior to such action, the member will be afforded the opportunity to make a written statement in rebuttal or explanation of the conduct which forms the basis to vacate the suspension. Where the member has absented himself or herself and is beyond military control for 15 or more days, the suspension may be vacated and the discharge executed without affording the member the opportunity to make a statement. However, the member will be advised of this provision in the document suspending the discharge, a copy of which will be provided to the member.

June 14, 1979.

H. E. Lofdahl,

Director, Correspondence and Directives.

[FR Doc. 79-19074 Filed 6-18-79; 8:45 am]

BILLING CODE 3810-70-M

DEPARTMENT OF TRANSPORTATION

Saint Lawrence Seaway Development Corporation

[33 CFR Part 401]

Seaway Regulations; Miscellaneous Amendments

AGENCY: Saint Lawrence Seaway Development Corporation.

ACTION: PROPOSED RULE.

SUMMARY: The Saint Lawrence Seaway Development Corporation and its counterpart agency, the St. Lawrence Seaway Authority of Canada, have completed their annual review of joint Seaway Regulations and have agreed that several sections are in need of revision. The Seaway Corporation therefore proposes to amend 33 CFR Part 401–Sub part A in order 1) to require certain new safety features and procedures, 2) to revise provisions concerning the transportation of hazardous cargo in accordance with the International Maritime Dangerous Goods Code as promulgated by the Intergovernmental Maritime Consultative Organization (IMCO), 3) to insure its consistency with actual operating procedures, and 4) to clarify several existing regulations.

DATES: Comments received by August 3, 1979 will be considered.

ADDRESSES: Interested parties may submit written comments to the Saint Lawrence Seaway Development Corporation, P. O. Box 520, Massena, New York 13662 (Attn: General Counsel). Persons who want the receipt of their comments acknowledged in writing may submit a stamped, self-addressed postcard for this purpose.

FOR FURTHER INFORMATION CONTACT: Frederick A. Bush, General Counsel, (315) 764–0271, Ext. 245.

SUPPLEMENTARY INFORMATION: As indicated above, the Seaway Corporation and its counterpart agency, the Seaway Authority of Canada, have completed their annual review of the joint Seaway Regulations and propose to amend same for the reasons set forth in the summary. A slight reorganization of several sections is also being effected for clarity. Following is a summary and explanation of the changes proposed.

The Table of Contents will be amended to reflect changes in several section headings.

In § 401.2, a definition for "tanker" will be added. This is necessary as several of the sections included under the heading "Dangerous Cargo" are applicable to these vessels.

In § 401.3, paragraphs (b) and (d) will be amended to restrict vessel dimensions so as to protect bascule bridges which are located at several of the Seaway locks. These bridges, when fully raised, overhang the lock wall at a given point thereby limiting the height of the vessel above the water line measured at the vessel's side as well as the height of other structures which are located near the sides of the vessel, such as derricks, crosstrees, antennas, etc. A new Appendix I to the Seaway Regulations will illustrate the acceptable dimensions with respect to bascule bridges.

The present § 401.3(d) will be reworded to prohibit the discharge of any substance onto lock or tie-up walls and further will be redesignated as § 401.19(c).

The main text of § 401.5(b) will be relocated in substantially the same form to § 401.21 while its subparagraphs will be set forth in Schedule I. This change is designed to clearly indicate that the requirements contained therein apply only to the U.S. waters of the Seaway.

The heading to § 401.6 will be changed from "Draft markings" to "Markings" and a new paragraph (c) will be added to this section which requires that vessels with bulbous bows so indicate by placing special markings above their draft markings. This has appeared as a strong recommendation in the general Seaway Notice published by both Seaway entities for a number of years and is necessary so that the vessel may be safely spotted in the lock. Because the regulation will not be effective until the beginning of the 1981 navigation period, vessels will have an adequate time in which to comply with a relatively simple requirement.

In § 401.16, a reference to the vessel's weight is being substituted for a reference to the vessel's length. This will make the equipment required by the section dependent on the gross tonnage of the vessel rather than on its length and will keep the Seaway Regulations consistent in their requirements for equipment. Subsection 401.16(b) will be reworded for clarity with no change in substance.

As indicated above, § 401.19 will have added to it a new paragraph (c) which prohibits the discharge of any substance onto lock or tie-up walls. In addition, the section's heading will be changed to read "Disposal and discharge systems."

As further stated above, § 401.21 will be modified to indicate that in addition to the requirements contained elsewhere in the Seaway Regulations, certain requirements as set forth in Schedule I are applicable only to the U.S. waters of the Seaway. The present § 401.21 provision that vessels be equipped with rudder angle indicators will be included in Schedule I.

Section 401.26 along with § 401.29(c), § 401.31(c)(4), § 401.35, § 401.43, § 401.62 and § 401.63 will be amended so as to delete any reference to the Canadian Sault Ste. Marie Lock. This is necessary to reflect that the Canadian Seaway Authority no longer has any responsibility for the area.

New security required of vessels as a result of the recently revised Tolls Schedule (43 FR 11872) will be set forth in § 401.26.

Subsection 401.31(c)(2) will be amended to prohibit smaller plasure craft from overtaking and passing commercial vessels near lock entrances, the practice of which endangers both vessels.

As indicated previously, bascule bridges overhang several lock walls within the Seaway system. Section 401.3 is being amended to provided for this. Section 401.33 will also be amended to require that vessels whose dimensions exceed the maximum allowable under § 401.3(d) must apply for special transit instructions from either the Seaway Corporation or the Seaway Authority.

Subsection 401.40(a) will be revised to indicate that stop symbols rather than "Stop" signs are now in use at the locks.

Section 401.51 will be amended to require that a vessel master signal the vessel's presence to a bridgemaster by VHF radio rather than by using the vessel's whistle. This will make the regulation consistent with the usual practice.

Subsection 401.59(b) will be revoked and a new provision substituted therefor which requires that vessels only discharge substances in accordance with the applicable U.S. and Canadian Federal Regulations. Additionally, in the Welland Canal, two zones have been designated as prohibited discharge areas due to their proximity to municipal intake areas.

Sections 401.66 through 401.73 have been revised in accordance with IMCO standards and applicable U.S. and Canadian statutes concerning the transportation of dangerous cargo.

Section 401.77 will be amended to reflect the actual charge for pleasure craft tickets as revised by the recently adopted Tolls Schedule.

Section 401.80 will be amended to require a hazardous cargo vessel to report certain particulars of its cargo to the nearest Seaway station prior to entering or getting underway in the Seaway.

Sections 401.84 and 401.85 will be substantially revised so as to group in one place applicable reporting requirements.

A new Schedule I which indicates additional maneuvering data and equipment required to be on board vessels transiting the U.S. waters of the Seaway will be added. This will include the requirements previously set forth in § 401.5(b). The remaining Schedules will be renumbered accordingly. In addition, several minor changes will be made to the redesignated Schedules II and III in order to make them consistent with operating procedures now in effect.

The Seaway Corporation has determined that the expected impact of this regulation is so minimal that it does not warrant either a Regulatory Analysis or a formal Evaluation as required by the Secretary of Transportation's Order concerning Regulatory Policies and Procedures (44 FR 11034). It is expected to result in negligible costs to a few vessel owners. There should be no added cost to or impact on consumers and/or Federal, state and local governments.

For the stated reasons, it is proposed to amend the Seaway Regulations as follows.

1. The Table of Contents to the Seaway Regulations is amended as follows:

PART 401—SEAWAY REGULATIONS AND RULES

Subpart A—Regulations

Sec.

* * * * *

401.6 Markings.

* * * * *

401.19 Disposal and discharge systems.

* * * * *

401.21 Requirements for U.S. waters of the Seaway.

* * * * *

401.84 Reporting of impairment or other hazard by vessels transiting within the Seaway.

401.85 Reporting of impairment or other hazard by vessels intending to transit the Seaway.

* * * * *

Schedule I Requirements for U.S. waters of the Seaway.

* * * * *

Appendix I Vessel dimensions.

2. Section 401.2 is amended by adding a new paragraph (k) and redesignating the present paragraphs (k) through (n) as (l) through (o), respectively. Section 401.2(k) will read as follows:

§ 401.2 Interpretation.

* * * * *

(k) "Tanker" means any vessel specifically constructed for carrying bulk cargoes of liquid petroleum products, liquid chemicals, liquid edible oils and liquefied gases in tanks which form both an integral part and the total cargo carrying portion of that vessel.

* * * * *

3. Section 401.3 is amended as follows:

§ 401.3 Maximum vessel dimensions.

* * * * *

(b) No vessel shall transit if any part of the vessel or anything on the vessel extends more than 35.5 metres (116.5 feet) above water level.

* * * * *

(d) No vessel's hull or superstructure when alongside a lock wall shall extend beyond a limit over which an open bascule bridge could be hit. (See illustration in Appendix I).

4. Section 401.5 is revised to read as follows:

§ 401.5 Required equipment.

No vessel shall transit unless it is

(a) Propelled by motor power that is adequate in the opinion of an officer; and

(b) Marked and equipped in accordance with the requirements of sections 401.6 to 401.21.

5. The heading to § 401.6 is changed and a new paragraph (c) is added as follows:

§ 401.6 Markings.

* * * * *

(c) Effective April 1, 1981, where a vessel's bulbous bow extends forward beyond her stem head, a symbol of a bulbous bow shall be marked above the 79.25 decimetres (26 feet) mark in addition to a "+" symbol followed by a number indicating the total length in metres by which the bulbous bow projects beyond the stem.

6. Section 401.16 is amended as follows:

§ 401.16 Propeller direction alarms.

Every vessel of 1600 gross registered tons or more shall be equipped with—

* * * * *

(b) Visible and audible wrong-way propeller direction alarms located in the wheelhouse and engine rooms, unless the vessel is fitted with a device which renders it impossible to operate engines against orders from the bridge telegraph.

7. The heading to § 401.19 will be changed and a new paragraph (c) added as follows:

§ 401.19 Disposal and discharge systems.

* * * * *

(c) No substance shall be discharged or disposed onto a lock wall or tie-up wall by any means, including overboard discharge pipes.

8. Section 401.21 is revoked and the following substituted therefor:

§ 401.21 Requirements for U.S. waters of the Seaway.

In addition to the requirements set forth herein, vessels transiting the U.S. waters of the Seaway are subject to the requirements set forth in Schedule I.

9. Section 401.26 is amended to read as follows:

§ 401.26 Security for tolls.

(a) Before transit by a vessel to which the requirement of preclearance applies, security for the payment of tolls and other charges in accordance with the St. Lawrence Seaway Tariff of Tolls, shall be provided by the representative by means of—

* * * * *

(b) The security for the tolls and other charges of a vessel shall be sufficient to

cover the gross registered tonnage of the vessel—

(1) On the Seaway between Montreal and Lake Ontario, at $1.50 per ton for transit each way or at $3.00 per ton for a round trip;

(2) On the Welland Canal, at $1.25 per ton for transit each way or at $2.00 per ton for a round trip; and shall be maintained in an amount sufficient to cover each transit for which tolls and other charges have been incurred and are unpaid.

(c) Where a number of vessels—

(1) Are owned or controlled by the same individual or company, and

(2) Have the same representative, the security for the tolls and other charges may be provided in an amount estimated by the representative to be equal to $2.20 per ton for the aggregate maximum tonnage of the vessels within the Seaway at any one time and shall be maintained in an amount sufficient to cover each transit for which tolls and other charges have been incurred and are unpaid.

* * * * *

§ 401.29 [Amended].

10. Paragraph (c) of § 401.29 is revoked.

11. Subparagraph (c)(4) of § 401.31 is revoked. Subparagraph (c)(2) of § 401.31 is amended as follows:

§ 401.31 Meeting and passing.

* * * * *

(c) * * *

(2) Within 609.60 metres (2000 feet) of a canal or lock entrance.

* * * * *

12. Section 401.33 is revised to read as follows:

§ 401.33 Special instructions.

Special instructions shall be applied for from the Corporation or the Authority in connection with the intended transit of vessels of unusual design, hulks, sections of vessels, large dredges, all vessels in tow and vessels whose limits extend the requirements of § 401.3(d), and such vessels shall not transit except in compliance with such instructions.

13. Section 401.35 is revised to read as follows:

§ 401.35 Employment of tugs.

No tug shall be fastened alongside a vessel in a canal so that the aggregate of the beams exceeds 23 metres (75 feet 6 inches).

14. In § 401.40, paragraph (a) is amended as follows:

§ 401.40 Entering a lock.

(a) No vessel shall proceed into a lock in such a manner that the stem passes the stop symbol on the lock wall nearest the closed gates.

* * * * *

§ 401.43 [Amended].

15. Section 401.43 is amended by inserting the word "and" after "Iroquois" and deleting the phrase "and Sault Ste. Marie (Canada)".

The table to § 401.43 is also amended by deleting therefrom the portion entitled "Canadian Sault Ste. Marie".

§ 401.51 [Amended].

16. Section 401.51 is amended by deleting the phrase "three distinct blasts shall be sounded on the vessel's whistle" and substituting therefor "the Master shall signal the vessel's presence to the bridgemaster by VHF radio".

17. Paragraph (b) of § 401.59 is amended to read as follows:

§ 401.59 Pollution.

* * * * *

(b) No vessel shall discharge into Seaway waters any substance not in conformity with applicable U.S. Federal Regulations and Canadian Federal Government Regulations with the exception of the waters of the Welland Canal where two specific no-discharge zones are established as follows:

(1) From Lock 7 (Thorold) to Mile 17 (Welland); and

(2) From Lock 8 (Port Colborne) to the outer Port Colborne piers (Lake Erie).

* * * * *

§ 401.62 [Amended]

18. § 401.62 is amended by deleting therefrom the following Seaway Station:

VDX23 (Seaway Sault)—Sault Ste. Marie, Ontario—Traffic Control Sector No. 8.

§ 401.63 [Amended]

19. The Table to § 401.63 is amended by deleting therefrom the following:

9 Seaway Sault C.I.P. No. 17 to C.I.P. No. 18 Channel 14, Channel 14, Channel 14.

20. Sections 401.66 through 401.73 under the heading of "DANGEROUS CARGO" are revised as follows:

Dangerous Cargo

§ 401.66 Applicable laws.

Vessels carrying a cargo or part cargo of fuel oil, gasoline, crude oil or other inflammable goods in bulk, including empty tankers which are not gas free, and vessels carrying dangerous substances whether break-bulk or containerized, to which regulations made under the Canada Shipping Act, the Transportation of Dangerous Goods Act (Canada) or the Dangerous Cargo Act of the United States of America, or regulations issued pursuant thereto apply, shall be deemed to carry dangerous substances, and shall not transit unless all requirements of the said statutes and regulations and of these Regulations have been fulfilled.

§ 401.67 Explosive vessels.

A vessel carrying explosives, either Government or commercial, as defined by the Canada Shipping Act, the Transportation of Dangerous Goods Act (Canada), the Dangerous Cargo Act of the United States of America and the International Maritime Dangerous Goods Code Class 1, Divisions 1.1 to 1.5 inclusive shall be deemed for the purpose of these regulations to be an explosive vessel.

§ 401.68 Explosives permit.

(a) An explosives permit is required for an explosive vessel in the following cases:

(1) For all vessels carrying any quantity of explosives with a mass explosive risk, up to a maximum of two (2) metric tons (2.2 short tons; IMCO Class 1, Division 1.1);

(2) For all vessels carrying more than ten (10) metric tons (11.02 short tons) and up to a maximum of fifty (50) metric tons (55.12 short tons) of explosives that do not explode en masse (IMCO Class 1, Division 1.2);

(3) For all vessels carrying more then one hundred (100) metric tons (110.23 short tons) and up to a maximum of five hundred (500) metric tons (551.16 short tons) of explosives having a fire hazard without explosive effect (IMCO Class 1, Division 1.3);

(4) For all vessels carrying more than one hundred (100) metric tons (110.23 short tons) and up to a maximum of five hundred (500) metric tons (551.16) short tons) of safety explosives and shop goods (IMCO Class 1, Divisions 1.4 and 1.5).

(b) When an explosive vessel is carrying quantities of explosives above the maximum mentioned in paragraph (a) of this section, no explosives permit shall be granted.

(c) Written application for a Seaway Explosives Permit may be made to the Chief, Office of Lock Operations, Saint Lawrence Seaway Development Corporation, P.O. Box 520, Massena, New York 13662, or to the Manager of Operational Services, the St. Lawrence Seaway Authority, 202 Pitt Street, Cornwall, Ontario K6J 3P7. The application shall show that the cargo is packed, marked, labelled, described,

certified, stowed and otherwise conforms with all relevant regulations of the country in which it was loaded and of Canada and the United States.

(d) A signed copy of a Seaway Explosives Permit and a true copy of any certificate as to the loading of dangerous cargo shall be kept on board every explosive vessel in transit and shall be made available to any officer requiring production of such copies.

§ 401.69 Hazardous cargo vessels.

For the purpose of these Regulations, a vessel shall be deemed to be a hazardous cargo vessel in the following cases:

(a) A tanker carrying fuel oil, gasoline, crude oil or other flammable liquids in bulk, having a flashpoint below 61°C, including a tanker that is not gas free where its previous cargo had a flashpoint below 61°C.

(b) A tanker carrying compressed liquefied gases, bulk acids or liquefied chemicals.

(c) A dry cargo vessel carrying other dangerous substances whether in bulk, break-bulk or containerized that is in excess of:

(1) 50 metric tons (55.12 short tons) of gases, compressed, liquefied or dissolved under pressure (IMCO Class 2);

(2) 50 metric tons (55.12 short tons) of inflammable liquids having a flashpoint below 61°C (IMCO Class 3);

(3) 50 metric tons (55.12 short tons) of inflammable solids, spontaneously combustible material or substances emitting combustible gases when wet (IMCO Class 4);

(4) 50 metric tons (55.12 short tons) of oxidizing substances or organic peroxides (IMCO Class 5);

(5) Any quantity of poisonous (toxic) substances and infectious substances (IMCO Class 6);

(6) Any quantity of radioactive substances (IMCO Class 7);

(7) 50 metric tons (55.12 short tons) of corrosive substances (IMCO Class 8);

(8) Any quantity of metal turnings, borings, cuttings, or shavings in bulk having a temperature on loading or in transit in excess of 65.5°C; or

(9) Any quantity of grain which is under fumigation, where the chemical being used is hazardous to human life.

§ 401.70 Fendering—Explosive and hazardous cargo vessels.

All explosive vessels requiring a permit in accordance with § 401.68 of this title and all tankers carrying cargo with a flashpoint of up to 61°C, except those carrying such cargo in center tanks with gas free wing tanks, shall be equipped with a sufficient number of non-metallic fenders on each side to prevent any metallic part of the vessel from touching the side of a dock or lock wall.

§ 401.71 Signals—Explosive and hazardous cargo vessels.

(a) An explosive vessel shall display at the masthead or at an equivalent conspicuous position a "B" flag.

(b) A hazardous cargo vessel shall display at the masthead or at an equivalent conspicuous position a "B" flag superior to numeral pennant number 1.

§ 401.72 Reporting—Explosive and hazardous cargo vessels.

(a) Every explosive vessel or hazardous cargo vessel shall, when reporting in information related to cargo as required by § 401.84(a) of this title, report the nature and tonnage of its explosive or hazardous cargo, and the flashpoint of that cargo where applicable. Every vessel carrying grain which is under fumigation shall declare the nature of the fumigant and its properties.

(b) Every explosive vessel requiring a Seaway Explosives Permit shall, when reporting in, give the number of its Seaway Explosives Permit.

(c) Every hazardous cargo vessel carrying metal turnings, shavings, cuttings or borings in bulk shall, when reporting in information related to cargo as required by § 401.84(a) of this title, give the high temperature reading of each compartment at that time, together with the high temperature reading in each compartment taken on completion of loading.

(d) Every vessel carrying radioactive substances shall, when reporting in, give the number and date of issue of any required certificate issued by the Atomic Energy Control Board authorizing such shipment.

§ 401.73 Cleaning tanks—Hazardous cargo vessels.

Gas freeing and cleaning of cargo tanks shall not take place.

(a) In a canal or a lock;

(b) In an area that is not clear of other vessels or structures;

(c) Before gas freeing and tank cleaning has been reported to the nearest Seaway station.

§ 401.77 [Amended]

22. Section 401.77 is amended by deleting the comma after "Seaway lock" and by deleting the phrase "other than the lock on the Sault Ste. Marie (Canada) Canal,". The section is further amended by deleting the phrase "$2 or $3" and substituting therefor "$4".

23. § 401.80 is revised to read as follows:

§ 401.80 Reporting hazardous cargo.

(a) The master of any explosive vessel or hazardous cargo vessel shall report or shall cause to be reported to the nearest Seaway station, at least three hours prior to expected entry into the Seaway system, the nature and quantity of the dangerous cargo and where it is stowed on the vessel.

(b) The master of any vessel which takes on explosive or hazardous cargo while in the Seaway system shall report to the nearest Seaway station, at least three hours prior to commencing transit, the nature and quantity of the dangerous cargo and where it is stowed on the vessel.

24. Section 401.84 is revised to read as follows:

§ 401.84 Reporting of impairment or other hazard by vessels transiting within the Seaway.

While transiting the Seaway, the master of a vessel shall report to the nearest Seaway station as soon as possible—

(a) Any condition of the vessel that might impair its ability to transit safely and expeditiously;

(b) Any hazardous condition on the vessel;

(c) Any malfunction on the vessel of equipment required by § 401.5 to § 401.21 of the Seaway Regulations;

(d) Any difficulty on the part of the vessel in controlling its tow or tows;

(e) Any hazard, dangerous situation or malfunctioning aid to navigation which has not been published in a Notice to Mariners;

(f) Any loss of anchor with particulars of the precise location of the loss (immediate reporting required in this situation); and

(g) Any location where the visibility is less than one nautical mile (1.15 statute miles).

25. Section 401.85 is revised to read as follows:

§ 401.85 Reporting of impairment or other hazard by vessels intending to transit the Seaway.

The master of any vessel which intends to transit the Seaway shall report to the nearest Seaway station, prior to entering the Seaway, any of the conditions set forth in paragraphs (a) to (d) of § 401.84.

26. Schedule I, "Table of Speeds," and Schedule II, "Calling-in Table", are renumbered as Schedules II and III.

respectively. A new Schedule I is added as follows:

Schedule I.—Requirements for U.S. Waters of the Seaway.

No vessel of 1600 gross tons or more shall transit the U.S. waters of the Seaway unless it is equipped with the following maneuvering data and equipment:

(a) Charts of the Seaway which are currently corrected and of large enough scale and sufficient detail to enable safe navigation. These may be published by a foreign government if the charts contain similar information to those published by the U.S. Government.

(b) U.S. Coast Guard Light List, currently corrected.

(c) Current Seaway Notices Affecting Navigation.

(d) The following maneuvering data prominently displayed on a fact sheet in the wheelhouse:

(1) For full and half speed, a turning circle diagram to port and starboard that shows the time and distance of advance and transfer required to alter the course 90 degrees with maximum rudder angle and constant power settings;

(2) The time and distance to stop the vessel from full and half speed while maintaining approximately the initial heading with minimum application of rudder;

(3) For each vessel with a fixed propeller, a table of shaft revolutions per minute, for a representative range of speeds;

(4) For each vessel that is fitted with an auxiliary propeller, a table of control settings for a representative range of speeds;

(5) For each vessel that is fitted with an auxiliary device to assist in maneuvering, such as a bow thruster, a table of vessel speeds at which the auxiliary device is effective in maneuvering the vessel;

(6) The maneuvering information for the normal load and normal ballast condition for:

(i) Calm weather—wind 10 knots or less, calm sea;

(ii) No current;

(iii) Deep water conditions—water depth twice the vessel's draft or greater; and

(iv) Clean hull;

(7) At the bottom of the fact sheet, the following statement:

Warning

The response of the (name of the vessel) may be different from that above if any of the following conditions, upon which the maneuvering is based, are varied:

(a) Calm weather—wind 10 knots or less, calm sea;

(b) No current;

(c) Deep water conditions—water depth twice the vessel's draft or greater;

(d) Clean hull;

(e) Intermediate drafts or unusual trim.

(e) Illuminated magnetic compass at main steering station with compass deviation table, graph or record.

(f) Gyro-compass with illuminated gyro—repeater at main steering station.

(g) Marine radar system for surface navigation.

(h) Efficient echo sounding device.

(i) Illuminated rudder angle indicators or repeaters that are:

(1) Located in the wheelhouse;

(2) Arranged so that they can easily be read from any position on the bridge.

(j) Illuminated indicator showing the operating mode of that device when vessel is equipped with auxiliary maneuvering devices.

Schedule II [Amended]

27. Schedule II, "Table of Speeds", is amended by substituting "Buoy 162" for "Light 162" both in Column II of Item 9 and in Column I of Item 10, Schedule II is further amended by deleting Item 14 and renumbering Items 15 and 16 as Items 14 and 15, respectively.

Schedule III [Amended]

28. Schedule III, "Calling-in Table", is amended by deleting Items 25, 26, 27, 28, and 52 and by renumbering the remaining Items accordingly. In addition, the new Item 49 will be amended under the column entitled "Message content" to read as follows:

C.I.P. and checkpoint	Station to call	Message content
	DOWNBOUND VESSELS	
49. St. Lambert Lock to C.I.P. 2—leaving Sector 1.	Seaway Beauharnois Ch.14	1. Name of vessel. 2. Location. 3. Confirm harbor or river pilot requirement—St. Lambert. 4. Montreal Harbor berth number (if applicable)

29. A new Appendix I will be added as follows:

Appendix I.—Vessel Dimensions

Bascule bridges are located at a number of Seaway locks. These bridges, when fully raised, overhang the lock wall at a given point, thereby limiting:

(a) the height of a vessel above the water line measured at the vessel's side; and

(b) the height of other structures which are located near the sides of the vessel, such as derricks, crosstrees, antennas, etc.

The following block diagram shows the limits beyond which a vessel's hull or superstructure cannot extend *when the vessel is alongside the lock wall.* The limits in the block diagram are based on vessels with a maximum allowable beam of 23.16m (76 feet). For vessels with a beam width less than this, and whose dimensions exceed the limits of the block diagram (measured with the vessel alongside the lock wall), a special permission to transit must be obtained. (Accurate measurements may be required before such permission is granted).

Caution: Masters must take into account the ballast draft of the vessel when verifying the maximum permissible dimensions.

(68 Stat. 92–97, 33 U.S.C. § 981–990, as amended, and sections 4, 5, 6 and 7 of SEC. 2 of Pub. L. 95–474, 92 Stat. 1471.)

Issued at Massena, New York on June 11, 1979.

Saint Lawrence Seaway Development Corporation.

William H. Kennedy,

Acting Administrator.

[FRL 1252-6]

Motor Vehicle Pollution Control; Waiver of Carbon Monoxide Emission Standards, Public Hearing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public hearing to consider application for waiver of 1981 and 1982 model year light-duty vehicle emission standard for carbon monoxide (CO).

SUMMARY: General Motors Corporation (GM) has announced its intention to submit on June 22, 1979, an application requesting the Administrator to waive the effective date of the 1981 and 1982 CO standard under section 202(b)(5) of the Clean Air Act, as amended.

DATES: This notice announces that EPA will hold a public hearing in Washington, D.C. beginning on July 9, 1979, and continuing through July 13, 1979, if necessary, to consider GM's waiver application and any other manufacturers' applications received by June 29, 1979. Interested parties also may submit written comments to the public docket on the waiver applications until July 23, 1979.

ADDRESS: All public portions of CO waiver applications and other relevant information are available for public inspection between 8 a.m. and 4 p.m., Monday through Friday, at: U.S. Environmental Protection Agency, Central Docket Section (A–130), Room 2903 B Waterside Mall, 401 M Street, S.W., Washington, D.C. 20460 (Docket Number EN–79–4).

FOR FURTHER INFORMATION CONTACT: Ms. Carolyn Blackstone, Mobile Source Enforcement Division (EN–340), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 755–0944.

SUPPLEMENTARY INFORMATION: Under section 202(b)(5)(A) of the Clean Air Act, as amended, 42 U.S.C. 7521(b)(5)(A) (1977) ("Act"), at any time after August 31, 1978, any manufacturer may file with the Administrator an application requesting the waiver of the effective date of the carbon monoxide (CO) emission standard applicable to any model of light-duty motor vehicles and engines manufactured by the applicant during model years 1981 and 1982. Section 202(b)(5)(C) requires the Administrator to issue a decision granting or denying such waiver within 60 days after receipt of the application and after public hearing. Guidelines for the submission of such waiver requests have been previously published in the Federal Register, 43 FR 47272, October 13, 1978.

Section 202(b)(1)(A) requires that emissions of CO from 1981 and later model year light-duty motor vehicles be reduced by 90% from 1970 CO emission standards. A CO emission standard of 3.4 grams per vehicle mile, determined to achieve such reduction and made applicable by regulation to 1981 and later model year light-duty vehicles, has been published in the Federal Register, 43 FR 37972, August 24, 1978. If the Administrator determines that a waiver from the CO standard of 3.4 grams per vehicle mile (gpm) should be granted, he must simultaneously with such determination prescribe by regulation CO emission standards to apply to those model vehicles or engines to which the waiver applies. Under section 202(b)(5)(B), the maximum CO level for which a waiver may be granted is 7.0 gpm.

Under section 202(b)(5)(C), the Administrator may grant such a waiver only if he finds that protection of the public health does not require attainment of the statutory CO standard of 3.4 gpm for those model years and vehicles for which the waiver is sought. In addition, a waiver may be ganted only if the Administrator determines that (1) such waiver is essential to the public interest or the public health and welfare of the United States, (2) all good faith efforts have been made to meet the established standards, (3) the applicant has established that effective control technology, processes, operating methods, or other alternatives are not available or have not been available with respect to the model in question for a sufficient period of time to achieve compliance prior to the effective date of such standards, taking into consideration costs, driveability, and fuel economy, and (4) studies and investigations of the National Academy of Sciences and other information available to him have not indicated that technology, processes, or other alternatives are available to meet such standards.

In order for a waiver to be granted, the Administrator must detemine that the applicant has provided information sufficient to satisfy each of the waiver criteria set out above. However, the Administrator is not required to make his determination solely on the record of the hearing, and may consider any additional information as well. All information considered by the Administrator will be included in the public docket.

GM has announced its intention to submit a CO waiver application on June 22, 1979. A decision on GM's application then would have to be made on or before August 21, 1979. A public hearing on this application and on applications received from any other motor vehicle manufacturers on or before June 29, 1979, will be held in the General Services Administration Auditorium, 7th and D Streets, S.W., Washington, D.C., commencing at 9 a.m. on July 9, 1979. EPA encourages all manufactures planning to request a CO waiver to file their applications by the June 29 deadline so that all of the applications can be reviewed in one consolidated proceeding. *Procedures.* The public hearing is intended to provide an opportunity for interested persons to state their views or arguments, or to provide pertinent information concerning the action requested of the Administrator by the applicant. Any person desiring to make an oral statement at the hearing should file a notice of such intention and 10 copies of the proposed testimony and other relevant material in the Central Docket Section at the address listed above, not later than July 5, 1979. If feasible, at least 75 copies of such statement or material for the hearing record and for general circulation should be submitted to the Presiding Officer at the time of the hearing. In addition, any person may submit written questions at any time during the hearing to be propounded to the witnesses by the hearing panel to the extent practicable. Written statements and information may be filed in the public docket until July 23, 1979.

Under the subpoena authority of section 307(a)(1), appropriate representatives of the applicants will be required to attend the hearings and respond to questions propounded by the hearing panel. Moreover, representatives from other groups, in particular other automobile manufacturers, may also be subpoenaed to produce relevant information and provide testimony before the hearing panel. Section 307(a)(1) also authorizes the administration of oaths to testifying parties.

The Presiding Officer will have the responsibility for maintaining order, excluding irrelevant or repetitious material, scheduling presentations, directing that corroborative material be submitted in writing and, to the extent possible, notifying participants of the time at which they may appear.

Presentations by the participants should be addressed exclusively to the following considerations:

1. Whether protection of the public health requires attainment of the established CO standard of 3.4 gpm for the model years to which the waiver would apply.

2. Whether the requested waiver is essential to the public interest or public health and welfare of the United States.

3. Whether the applicants have made all good faith efforts to meet the CO standard for those model years and vehicles for which the waiver is sought.

4. Whether effective control technology, processes, operating methods, or other alternatives are not available or have not been available with respect to the model in question for a sufficient period of time to achieve compliance prior to the effective date of such standards, taking into consideration costs, driveability, and fuel economy.

5. Whether studies and investigations of the National Academy of Sciences and other information indicate that technology, processes or other alternatives are available to meet such standards.

6. The level of CO emissions, not to exceed 7.0 gpm, which could be met in each of the model years for which a waiver is requested and which would reflect the greatest degree of emission control achievable by use of available technology, giving appropriate consideration to the cost of applying such technology within the available time period.

A verbatim record of the proceedings will be made and will be available for public inspection. A copy of the transcript may be requested from the reporter during the hearing and will be made at the expense of the person so requesting. Copies of other documents in the public record also may be obtained as provided in 40 C.F.R. Part 2.

Dated: June 14, 1979.

B. R. Jackson,

Acting Assistant Administrator for Enforcement.

[FRL 1252-2]

State and Federal Administrative Orders Revising the Michigan State Implementation Plan

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed Rule; Proposed Disapproval of Revision.

SUMMARY: Proposed revisions to the Michigan State Implementation plan (SIP) were submitted by the Michigan Department of Natural Resources (MDNR), pursuant to section 110 of the Clean Air Act. These revisions pertain to emission limitations for sulfur dioxide and particulate matter for the chemical producing complex of the Dow Chemical Company in Midland, Michigan. These revisions seek approval of the continued use by Dow of a Supplementary Control System (SCS) for control of emissions from the complex in order to maintain satisfactory air quality. The U.S. Environmental Protection Agency is proposing to disapprove these revisions.

DATE: Comments must be received on or before July 19, 1979.

ADDRESS COMMENTS TO: John McGuire, Regional Administrator, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, Attention: Air Programs Branch.

Copies of the proposal are available for public inspection during normal business hours at the above address and at: Michigan Air Pollution Control Commission, General Office Building-State Secondary Complex, 7150 Harris Drive, 3rd Floor, Lansing, Michigan.

FOR FURTHER INFORMATION CONTACT: Mr. Joel Morbito, Michigan State Specialist, Air Programs Branch, United States Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604 (312) 353-2205.

SUPPLEMENTARY INFORMATION: Dow Chemical, U.S.A.—Michigan Division, operates a large chemical manufacturing plant located in Midland, Michigan. The Company burns coal, oil and gas in its power plants at these facilities, with a huge potential for exceeding air quality standards in the Midland area. Currently, the Michigan Implementation Plan provides that Dow-Michigan Division achieve compliance with sulfur dioxide emission standards by July 1, 1975. See 40 CFR Part 52.1175(d). This plan provides that Dow-Michigan Division achieve compliance with particulate emission standards by April 1, 1975. See 40 CFR Part 52.1175(e). As a means of complying with Michigan's emission regulations which are designed to meet the national ambient air quality standards (NAAQS), Dow entered into a Consent Order with the Michigan Air Pollution Control Commission (MAPCC) on May 17, 1974. The 1974 Consent Order provided that Dow could temporarily operate a Supplementary Control System (SCS) in order to meet NAAQS for sulfur dioxide. SCS are systems which limit the rate of pollutant emissions during periods when meteorological conditions are conducive to ground level concentrations in excess of the NAAQS. SCS differ from the traditional technique for pollution control, namely constant control devices. Constant control devices eliminate the amount of pollutant emitted into the atmosphere. The 1974 Consent Order further provided that so long as NAAQS for sulfur dioxide were met, Dow was granted a variance until July 1, 1980 from the emission regulations for air pollutants. This Order was never approved by USEPA as a revision to the Michigan Implementation Plan. The 1974 Consent Order contemplated retirement of Dow's fuel burning power plants July 1, 1980. When it became clear that a nuclear power plant would not be completed in time to supply Dow by July 1, 1980, Dow and the MAPCC devised a new plan designed to meet emission regulations by the time of the expiration of the variance on July 1, 1980.

On July 21, 1977, a new Consent Order between Dow and the MAPCC became effective. U.S. EPA never approved this Order as a revision to the Michigan Implementation Plan. This Consent Order provided that Dow would continue to operate an SCS until July 1, 1980, after which time coal would be eliminated as a fuel in the Dow power plants. It was determined that fuel conversion from coal to low-sulfur oil was a feasible means of reducing emissions at the complex to the required levels.

On August 7, 1977, shortly after the July, 1977 Consent Order between Dow and MAPCC, the Clean Air Act was amended. Section 123 of the Act now provides:

(a) The degree of emission limitation required for control of any air pollutant under an applicable implementation plan under this title shall not be affected in any manner by—

(1) so much of the stack height of any source as exceeds good engineering practice (as determined under regulations promulgated by the Administrator), or

(2) any other dispersion technique. . . .

(b) For the purpose of this section, the term "dispersion technique" includes any intermittent or supplemental control of air pollutants varying with atmospheric conditions. 42 U.S.C. § 7423.

In its request to revise its State Implementation Plan, Michigan permits Dow to continue to burn mostly coal and operate the SCS until December 31, 1982.

The information submitted and all other relevant material have been

evaluated. Operation of the Supplementary Control System by Dow violates the Clean Air Act prohibition of dispersion techniques. It is proposed, therefore, that the request of the Michigan Department of Natural Resources to extend the use of SCS at Dow Chemical, U.S.A., Midland, Michigan, and thereby revise the Michigan Implementation Plan, be disapproved.

Interested persons are invited to submit written comments on this proposed action. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them.

Dated: June 6, 1979.

John McGuire,

Regional Administrator.

[FRL 1251-3]

Mississippi: Proposed 1979 Implementation Plan Revisions

AGENCY: U.S. Environmental Protection Agency, Region IV.

ACTION: Proposed rule.

SUMMARY: EPA today proposes approval action on the State Implementation Plan (SIP) revision which the Mississippi Air and Water Pollution Control Commission submitted pursuant to requirements of Part D of the Clean Air Act Amendments (CAAA) of 1977 with regard to nonattainment areas. EPA has found all portions of the revisions to be approvable. Mississippi has one designated nonattainment area for total suspended particulate (TSP), in Jones County, (Laurel) Mississippi. On March 7, 1979, Mississippi formally submitted a SIP revision for the nonattainment area.

The public is invited to submit written comments on these proposed actions.

DATES: To be considered, comments must be submitted on or before July 19, 1979. A thirty-day comment period is being used to enable publication of final action on the SIP revisions before the July 1, 1979, statutory deadline in Section 172 of the CAAA, because a thirty day comment period was provided when this SIP revision was announced by the State, and because this SIP revision is not complex.

ADDRESSES: Written comments should be addressed to Melvin Russell of EPA Region IV's Air Programs Branch (See EPA Region IV address below). Copies of the materials submitted by Mississippi may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street S.W., Washington, DC. 20460.

Library, Environmental Protection Agency, Region IV, 345 Courtland Street, N.E., Atlanta, Georgia 30308.

Mississippi Air and Water Pollution Control Commission, Robert E. Lee Building, Jackson, Mississipi 39205.

FOR FURTHER INFORMATION CONTACT: Mr. Melvin Russell, Air Programs Branch, EPA Region IV, 345 Courtland Street, N.E., Atlanta, Georgia 30308, 404/881-2864.

SUPPLEMENTAL INFORMATION:

Background: In accordance with the Clean Air Act, as amended August, 1977, EPA, on March 3, 1978, published in the **Federal Register** a listing of States' attainment status relative to the National Ambient Air Quality Standards. Jones County (Laurel), Mississippi was designated nonattainment for TSP.

Following notice and public hearing in conformity with the requirements of 40 CFR 51.4, the Mississippi Air & Water Pollution Control Commission on January 23, 1979, adopted a revision to the SIP.

The revision represents the State's plan for attaining and maintaining the TSP National Ambient Air Quality Standard (NAAQS) in Jones County. This revision has been reviewed in light of the CAAA of 1977, EPA regulations, and additional guidance materials. The criteria utilized in this review were detailed in the **Federal Register** on April 4, 1979 (44 FR 20372) and need not be repeated in detail here.

General Discussion: Section 172(b)(1) through (11) of the CAAA of 1977 contains the requirements for nonattainment State Implementation Plans. The following is a listing of these requirements accompanied by a discussion of the contents and adequacies of the Mississippi submittal.

172(b)(1) [SIP provisions shall] be adopted by the State (or promulgated by the Administrator under Section 110(c)) after reasonable notice and public hearing;

The plan revision was adopted by the Mississippi Air and Water Pollution Control Commission on January 23, 1979. Public hearings were held in Jackson and Laurel, Mississippi on December 18, 1978, following 30 days public notice.

172(b)(2) [SIP provisions shall] provide for the implementation of all reasonably available control measures as expeditiously as practicable;

The revision provides that reasonably available control measures have been adopted and will be implemented as expeditiously as practicable . Enforceable compliance schedules and a demonstration of attainment before December 31, 1982, was in the submittal.

172(b)(3) [SIP provisions shall] require, in the interim reasonable further progress (as defined in Section 171(1)) including such reduction in emissions from existing sources in the area as may be obtained through the adoption, at a minimum, of reasonably available control technology (RACT);

The revision includes a reasonable further progress (RFP) table and graph, enforceable RACT measures which are the basis for numbers used in the table, and a description of reductions already achieved. The RFP schedule provides for attainment of primary and secondary TSP standards before December 31, 1982, including a margin for growth.

172(b)(4) [SIP provisions shall] include a comprehensive, accurate, current inventory of actual emissions from all sources (as provided by rule of the Administrator) of each such pollutant for each such area which is revised and resubmitted as frequently as may be necessary to assure that the requirements of paragraph (3) are met and to assess the need for additional reductions to assure attainment of each standard by the date required under subsection (a);

The revision includes a comprehensive and accurate inventory of actual emissions for the base year 1975. This base year was used because no major changes in emissions affecting air quality have taken place since then. EPA finds the 1975 inventory acceptable for the purpose of developing the plan. A projected emissions inventory for 1982, based on allowable emissions, was also submitted. The Plan provides that Mississippi shall report to EPA annually regarding progress toward attaining standards in the area. These reports will include update inventories of actual emissions from all TSP sources in the area, as necessary.

172(b)(5) [SIP provisions shall] expressly identify and quantify the emissions, if any, of any such pollutant which will be allowed to result from the construction and operation of major new or modified stationary sources for each such area;

Emissions from the construction and operation of major new or modified stationary sources will be permitted only if emissions from the new or modified source, combined with existing emissions, do not exceed the total emissions allowed by the Plan's RFP schedule. (See item (6) below.) Identification and quantification of emissions will be accomplished by means of the permitting process.

172(b)(6) [SIP provisions shall] require permits for the construction and operation of new or modified major stationary sources in accordance with Section 173 (relating to permit requirements);

The State requires permits for the construction and operation of new or modified major stationary sources in accordance with Section 173 (Air Emission Equipment Regulation APC–S–2). Briefly this regulation requires that any construction and operation of new or modified major stationary sources meet the following criteria before permits to construct and operate are issued:

(A) Achieve the lowest achievable emission rate (LAER) of particulate matter.

(B) Emissions from the proposed new facility combined with existing emissions may not exceed the total allowable emissions projected in the Plan's RFP schedule.

(C) All major sources located in the State owned by or under common ownership with the owner of the proposed new sources must be in compliance with all applicable State and Federal air pollution control regulations or on a schedule of compliance.

172(b)(7) [SIP provisions shall] identify and commit the financial and manpower resources necessary to carry out the plan provisions required by this subsection;

The State has identified and committed adequate financial and manpower resources necessary to carry out the provisions of this SIP provision.

172(b)(8)[SIP provisions shall] contain emission limitations, schedules of compliance and such other measures as may be necessary to meet the requirements of this section;

The Plan revision contains emission limitations which are in the form of adopted permit conditions, schedules of compliance and other necessary measures to demonstrate attainment by December 31, 1982. Because of the limited number of sources impacting the nonattainment area, the adopted permit conditions for the sources, which will be made part of the SIP, will be the regulatory basis for achieving the emission reductions. A significant amount of the required reductions has already been achieved.

The most significant emission reduction required by the plan is to require Masonite Corporation to cease all air emissions from woodchip pneumatic nozzles and cyclone WR–4 and that the wood chip pnuematic conveyance be replaced by a mechanical conveyance system by September 1, 1979.

1(b)(9)[SIP provisions shall] contain evidence of public, local government, and State legislative involvement and consultation in accordance with Section 174 (relating to planning procedures) and include (A) an identification and analysis of the air quality, health, welfare, economic, energy, and social effects of the plan provisions required by this subsection and of the alternatives considered by the State, and (B) a summary of the public comment on such analysis;

Consultation with the public, local government and State legislative involvement, and consultation in accordance with section 174 of the CAAA is evidenced by a submittal of public hearing transcripts, and copies of records from the January 23, 1979, Commission meeting when the plan was formerly adopted. Section 14 of the plan addresses the air quality, health, welfare, economic, energy, and social effects of the plan revision. The plan indicates positive effects for health, welfare, economics, energy, and air quality, and no appreciable social effects.

172(b)(10)[SIP provisions shall] include written evidence that the State, the general purpose local government or governments, or a regional agency designated by general purpose local governments for such purpose, have adopted by statute, regulation, ordinance, or other legally enforceable document, the necessary requirements and schedules and timetables for compliance, and are committed to implement and enforce the appropriate elements of the plan;

In the State of Mississippi, the Air and Water Pollution Control Commission has the full statutory authority for enforcing the SIP revisions. The Mississippi Air and Water Pollution Control Commission adopted the necessary requirements, schedules, and timetables for compliance, and is committed to implement and enforce the appropriate elements of the Plan (See items (6), (7) and (8) above).

172(b)(11)[SIP provisions shall] in the case of plans which make a demonstration pursuant to paragraph (2) of subsection (a)—

(A) establish a program which requires, prior to issuance of any permit for construction or modification of a major emitting facility, an analysis of alternative sites, sizes, production processes, and environmental control techniques for such proposed source which demonstrates that benefits of the proposed source significantly outweigh the environmental and social costs imposed as a result of its location, construction, or modification;

(B) establish a specific schedule for implementation of a vehicle emission control inspection and maintenance program; and

(C) identify other measures necessary to provide for attainment of the applicable national ambient air quality standard not later than December 31, 1987.

This requirement is not applicable to Mississippi's 1979 plan revision submittal.

Proposed Action

Based on the foregoing, EPA is proposing to approve fully the SIP under Part D of the CAAA, as it relates to the attainment of TSP standard in Jones County (Laurel) Mississippi.

(Sections 110 and 172 of the Clean Air Act [42 U.S.C. 7410 and 7502])

Dated: May 18, 1979.

Sanford W. Young,

Acting Regional Administrator.

[FRL 1095–1]

Review of Standards of Performance for New Stationary Sources: Nitric Acid Plants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Review of standards.

SUMMARY: EPA has reviewed the standard of performance for nitric acid plants. The review is required under the Clean Air Act, as amended August 1977. The purpose of this notice is to announce EPA's intent not to undertake revision of the standards at this time.

DATES: Comments must be received on or before August 20, 1979.

ADDRESSES: Send comments to the Central Docket Section (A–130), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, Attention: Docket No. A–79–06. The document "A Review of Standards of Performance for New Stationary Sources—Nitric Acid Plants" (EPA report number EPA–450/3–79–013) is available upon request from Mr. Robert Ajax (MD–13), Emission Standards and Engineering Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Ajax, (919) 541–5271.

SUPPLEMENTARY INFORMATION:

Background

Prior to the promulgation of the NSPS in 1971, only 10 of the existing 194 weak nitric acid (50 to 60 percent acid) production facilities were specifically designed to accomplish NO_x abatement.

Without control equipment, total NO_x emissions are approximately 3,000 ppm in the stack gas, equivalent to a release of 21.5 kg/Mg (43 lb/ton) of 100 percent acid produced.

At the time of the NO_x New Source Performance Standard (NSPS) promulgation there were no State or locat NO_x emission abatement regulations in effect in the U.S. which applied specifically to nitric acid production plants. Ventura County, California, had enacted a limitation of 250 ppm NO_x to govern nitric acid plants as well as steam generators and other sources.

In August of 1971, the EPA proposed a regulation under Section 111 of the Clean Air Act to control nitrogen oxides emissions from nitric acid plants. The regulation, promulgated in December 1971, requires that no owner or operator of any nitric acid production unit (or "train") producing "weak nitric acid" shall discharge to the atmosphere from any affected facility any gases which contain nitrogen oxides, expressed as NO_2, in excess of 1.5 kg per metric ton of acid produced (3.0 lb per ton), the production being expressed as 100 percent nitric acid; and any gases which exhibit 10 percent opacity or greater.

The Clean Air Act Amendments of 1977 require that the Administrator of the EPA review and, if appropriate, revise established standards of performance for new stationary sources at least every 4 years [Section 111(b)(1)(B)]. This notice announces that EPA has completed a review of the standard of performance for nitric acid plants and invites comment on the results of this review.

Findings

Industry Growth Rate

The average rate of production increase for nitric acid fell from 9 percent/year in the 1960–1970 period to 0.7 percent from 1971 to 1977. The decline in demand for nitric acid parallels that for nitrogen-based fertilizers during the same period.

Nitric acid production shows an increasing trend toward plant/unit location and growth in the southern tier of States. In 1971, 48 percent of the national production was in the south. This figure increased to 54 percent in 1976.

About 50 percent of plant capacity in 1972 consisted of small to moderately sized units (50 to 300-ton/day capacity). Because of the economies of scale some producers are electing to replace their existing units with new, larger units. New nitric acid production units have been built as large as 910 Mg/day (1000 tons/day). The average size of new units is approximately 430 Mg/day (500 tons/day).

Control Technology

A mixture of nitrogen oxides (NO_x) is present in the tail gas from the ammonia oxidation process for the production of nitric acid. In modern U.S. single pressure process plants producing 50 to 60 percent acid, uncontrolled NO_x emissions are generated at the rate of about 21 kg/Mg of 100 percent acid (42 lb/ton) corresponding to approximately 3000 ppm NO_x (by volume) in the exit gas stream. The catalytic reduction process which was considered the best demonstrated control technology at the time the present standard was established has been largely supplanted by the extended absorption process as the preferred control technology for NO_x emissions from new nitric acid plants. The latter control system appears to have become the technology of choice for the nitric acid industry due to the increasing cost and danger of shortages of natural gas used in the catalytic reduction process. Since the energy crisis of the mid-1970's, over 50 percent of the nitric acid plants that had come on stream through mid-1978 and almost 90 percent of the plants scheduled to come on stream through 1979 use the extended absorption process for NO_x control.

Levels Achievable with Demonstrated Control Technology

All 14 of the new or modified operational nitric acid production units subject to NSPS and tested showed compliance with the current standard of 1.50 kg/Mg (3 lb/ton). The average of seven sets of test data from catalytic reduction-controlled plants is 0.22 kg/Mg (0.44 lb/ton), and the average of six sets of test data from extended absorption-controlled plants is 0.91 kg/Mg (1.82 lb/ton). All of the plants tested were in compliance with the opacity standard. It appears that the extended absorption process, while it has become the preferred control technology for NO_x control, cannot control these emissions as efficiently as the catalytic reduction process. In fact, over half of the test results for extended absorption were within 20 percent of the NO_x standard. The extended absorption process thus appears to have limitations with respect to NO_x control, and compares unfavorably with catalytic reduction in its ability to reduce NO_x emissions much below the present NSPS level.

Economic Considerations Affecting the NO_x NSPS

The annualized costs of the extended absorption process and the catalytic reduction NO_x control methods appear to be quite comparable. Capital cost for the extended absorption process is appreciably higher than that for catalytic reduction. However, this is offset by the higher operating cost of the latter system which requires increasingly costly natural gas.

Conclusions

Based on the above findings, EPA concludes that the existing standard of performance is appropriate at this time. While lower emission levels are attainable, the energy penalty and shortages of natural gas are concluded to be a basis for retaining the current standard of performance under Section 111 of the Clean Air Act. However, the recent deregulation will alter the price and availablity of natural gas, and provides a basis for optimism about its future availability for process and pollution control purposes. The Agency, therefore, plans to continue to assess the standard as the effect of deregulation materializes. Moreover, it should be noted that for the purpose of attaining and maintaining national ambient air quality standards and prevention of significant deterioration requirements, State Implementation Plan new source reviews may in come cases require greater emission reductions than those required by the standards of performance for new sources.

Public participation

All interested persons are invited to comment on this review, the conclusions, and EPA's planned action. Comments should be submitted to: Mr. Don Goodwin (MD–13), Emission Standards and Engineering Division, U.S. Environmenal Protection Agency, Research Triangle Park, North Carolina 27711.

Dated: June 11, 1979.

Douglas M. Costle,

Administrator.

[FRL 1250-7]

State and Federal Administrative Orders Permitting a Delay in Compliance With State Implementation Plan Requirements; Proposed Delayed Compliance Order for Ashland Oil, Inc.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: U.S. EPA proposes to issue an Administrative order to Ashland Oil, Inc. The Order requires the Company to bring its volatile organic material loading rack into compliance with the Indiana Regulation APC-15, part of the federally approved Indiana State Implementation Plan (SIP). Because the Company is unable to comply with this regulation at this time, the proposed Order would establish an expeditious schedule requiring final compliance by July 1, 1979. Source compliance with the Order would preclude suits under the Federal enforcement and citizen suit provision of the Clean Air Act (Act) for violation of the SIP regulation covered by the Order.

The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on U.S. EPA's proposed issuance of the Order.

DATES: Written comments must be received on or before the thirtieth day from the date of this notice and requests for a public hearing must be received on or before the fifteenth day from the date of this notice. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If there is significant public interest in a hearing, it will be held after twenty-one days' prior notice of the date, time, and place of the hearing has been given in this publication.

ADDRESSES: Comments and requests for a public hearing should be submitted to Director, Enforcement Division, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. Material supporting the Order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Mr. Pierre Talbert, Attorney, Enforcement Division, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, at (312) 353-2082.

SUPPLEMENTARY INFORMATION: Ashland Oil, Inc. owns a volatile organic material loading rack at Clarksville, Indiana. The proposed order addresses emissions from this facility, which is subject to APC-15 of the Indiana Implementation Plan. The regulation limits the emissions of volatile organic materials and is part of the federally approved Indiana State Implementation Plan. The Order requires final compliance with the regulation by July 1, 1979, and the source has consented to its terms.

The proposed Order satisfies the applicable requirements of Section 113(d) of the Act. If the Order is issued, source compliance with its terms would preclude further U.S. EPA enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provisions of the Act (Section 304) would be similarly precluded.

Comments received by the date specified above will be considered in determining whether U.S. EPA should issue the Order. Testimony given at any public hearing concerning the Order will also be considered. After the public comment period and any public hearing, the Administrator of U.S. EPA will publish in the **Federal Register** the Agency's final action on the Order in 40 CFR Part 65.

Dated: May 31, 1979.

John McGuire,

Regional Administrator, Region B

1. The text of the Order reads as follows:

U.S. Environmental Protection Agency, Region V

In the matter of: Ashland Oil, Inc., Clarksville Terminal, Clarksville, Indiana. Proceeding Pursuant to Section 113(d) of the Clean Air Act, as Amended [42 U.S.C. Section 7413(d)]. Order No. EPA-5-79.

Introduction

This Order is issued this date pursuant to Sections 113(a), 113(d), and 114 of the Clean Air Act, as amended, 42 U.S.C. Section 7401 *et seq.* (hereafter "Act") and contains a schedule for compliance, interim control requirements, and reporting requirements. Public notice, opportunity for a public hearing, and thirty (30) days notice to the State of Indiana have been provided pursuant to Section 113(d)(1) of the Act.

Findings

1. On January 23, 1979, the United States Environmental Protection Agency (hereafter "U.S. EPA" or "Agency") issued a Notice of Violation (hereafter "NOV") to Ashland Oil, Inc. (hereafter Ashland) pursuant to Section 113(a)(1) of the Act, 42 U.S.C. 7413(a)(1), for alleged violation of Indiana Air Pollution Control Regulation APC-15. The NOV cited Ashland's Clarksville, Indiana Terminal located at 214 Center Street, Clarksville, Indiana.

2. Indiana Air Pollution Control Regulation APC-15 creates certain requirements applicable to facilities which load volatile organic materials in specified quantities into certain tank trucks, trailers, or railroad tank cars.

3. Indiana Air Pollution Control Regulation APC-15 is part of the State of Indiana Implementation Plan, which was created under Section 110 of the Act, 42 U.S.C. 7410.

4. In satisfaction of Section 113(a)(4) of the Act, 42 U.S.C. 7413(a)(4), an opportunity to confer with the Administrator's delegate was extended to Ashland in the NOV, and a conference was held on March 5, 1979.

5. Following the March 5, 1979, conference, Ashland, by informal discussion, stated its intent to control vapor emissions with a vapor recovery and disposal system at its Clarksville, Indiana Terminal by July 1, 1979.

6. It has been determined by the U.S. EPA that Ashland Oil, Inc. is unable to immediately comply with Indiana Air Pollution Control Regulation APC-15 of the State of Indiana Implementation Plan.

7. It has been determined by U.S. EPA that violations of Indiana Air Pollution Control Regulation have continued beyond the 30th day after the date of notification by the Director, Enforcement Division.

8. Ashland Oil, Inc. does not admit to a violation of Indiana Air Pollution Control Regulation APC-15 and its consent as hereinafter set forth is a demonstration of its good faith to avoid protracted and costly administrative and judicial proceedings.

Order

After a thorough investigation of all relevant facts, including public comment, it is determined that the schedule for compliance set forth in this Order is as expeditious as practicable, and that the terms of this Order comply with Section 113(d) of the Act. Therefore, it is hereby agreed and Ordered that:

1. Ashland Oil, Inc. will achieve compliance by July 1, 1979, with the State of Indiana Implementation Plan Air Pollution Control Regulation APC-15 as approved by the U.S. EPA in the **Federal Register** on May 14, 1973, which requires the installation of a vapor collection and recovery system or its equivalent at the volatile organic material loading rack associated with its Clarksville, Indiana Terminal in accordance with the following schedule:

a. March 26, 1979—Order Necessary Equipment.
b. May 28, 1979—Start Construction.
c. June 15, 1979—Equipment Delivery.
d. June 29, 1979—Complete Construction.
e. June 30, 1979—Unit Start-Up.
f. July 1, 1979—Achieve and Demonstrate Compliance.

2. Ashland Oil, Inc. shall adopt and implement operation and maintenance procedures to maximize the control efficiency of the vapor recovery and disposal unit and

submit a copy of such procedures to the U.S. EPA by June 1, 1979.

3. Ashland Oil, Inc. shall continue to use overhead loading submerged fill as the best practicable interim system of emission reduction at its Clarksville, Indiana Terminal loading facility above mentioned so as to minimize hydrocarbon emissions, avoid any imminent and substantial endangerment to the health of persons, and minimize product spillage.

4. Ashland Oil, Inc. shall comply with the following emission monitoring and reporting on or before the dates specified below:

a. *Emission Monitoring*

(1). Ashland Oil, Inc. shall, beginning as soon as reasonably practicable, maintain a record of the quantity of volatile organic material which passes through the Clarksville, Indiana Terminal.

(2). Ashland Oil, Inc. shall, immediately following demonstrated compliance, maintain a record of any malfunctions of the vapor recovery and disposal unit (including the reasons for such malfunctions) and the down time of the flare oxidation unit, whether caused by malfunction or other causes.

b. *Reporting Requirements*

(1). No later than ten (10) days after any date for achievement of an incremental step specified in this Order, Ashland Oil, Inc. shall notify U.S. EPA in writing of its compliance or noncompliance with the requirement.

If delay is anticipated in meeting any requirement contained in this Order, Ashland Oil, Inc. shall immediately notify U.S. EPA in writing of the anticipated delay and reasons for the delay. Notification to U.S. EPA of an anticipated delay does not excuse the delay.

(2). Beginning three months after the date for achievement of the first increment of progress specified in this Order, Ashland Oil, Inc. shall submit a status report to U.S. EPA detailing the progress made during that quarter and the information required in Section 4(a) above. These reports shall be submitted on a quarterly basis until July 1, 1980.

(3). All notifications to U.S. EPA under this Order shall be made to Chief, Air Compliance Section, Enforcement Division, U.S. EPA, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 353–2000. A copy of all submissions shall be made to the State of Indiana.

5. Ashland Oil, Inc. is hereby notified that its failure to achieve final compliance by July 1, 1979, at its Clarksville, Indiana Terminal loading facilities above mentioned may result in a requirement to pay a noncompliance penalty in accordance with Section 120 of the Act, 42 U.S.C. 7420. In the event of such failure, Ashland will be formally notified, Pursuant to Section 120(b)(3), 42 U.S.C. 7420(b)(3), and any regulations promulgated thereunder, of its noncompliance.

6. This order shall be terminated in accordance with Section 113(d)(8) of the Act, if the Administrator or his delegate determines on the record, after notice and hearing, that an inability to comply with Indiana Air Pollution Control Regulation APC–15 of the Indiana Implementation Plan no longer exists.

7. Violation of any requirement of this Order may result in one or more of the following actions:

a. Enforcement of such requirement pursuant to Section 113(a), (b), or (c) of the Act, 42 U.S.C. 7413(a), (b) or (c).

b. Revocation of this Order, after notice and opportunity for a public hearing, and subsequent enforcement of Indiana Implementation Plan Air Pollution Control Regulation APC–15 in accordance with the preceding paragarph.

c. If such violation occurs on or after July 1, 1979, notice of noncompliance and subsequent action pursuant to section 120 of the Act.

8. During the period of this Order, no Federal enforcement action pursuant to Section 113 of the Act, and no action under Section 304 of the Act shall be pursued where Ashland is in compliance with the terms of this Order.

9. Nothing herein shall be construed to be a waiver by the Administrator of any rights or remedies under the Act, including but not limited to Section 303 of the Act, 42 U.S.C. 7603.

10. The provisions of this Delayed Compliance Order shall apply and be binding upon Ashland Oil, Inc., its officers, directors, agents, servants, employees, and any successors in interest; in addition, the provisions of this Delayed Compliance Order shall apply to all persons, firms, and corporations having notice of the Delayed Compliance Order and who are or who will be acting in concert and privity with the Company or its officers, directors, agents, servants, employees, and any successors in interest. Ashland Oil, Inc. shall give notice of this Delayed Compliance Order to any successors in interest prior to transfer of ownership, and shall simultaneously verify to the United States Environmental Protection Agency, Region V, Enforcement Division, that such notice has been given.

11. This Order is effective upon final promulgation in the Federal Register.

Proposed Delayed Compliance Order for Continental Oil Co.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: U.S. EPA proposes to issue an Administrative Order to Continental Oil Company. The Order requires the Company to bring its violatile organic materials loading rack into compliance with Indiana Air Pollution Control Regulation APC–15, part of the federally approved Indiana State Implementation Plan (SIP). Because the Company is unable to comply with this regulation at this time, the proposed Order would establish an expeditious schedule requiring final compliance by July 1, 1979. Source compliance with the Order would preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act (Act) for violation of the SIP regulation covered by the Order.

The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on U.S. EPA's proposed issuance of the Order.

DATES: Written comments must be received on or before the thirtieth day from the date of this notice and requests for a public hearing must be received on or before the fifteenth day from the date of this notice. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If there is significant public interest in a hearing, it will be held after twenty-one days prior notice of the date, time, and place of the hearing has been given in this publication.

ADDRESSES: Comments and requests for a pubic hearing should be submitted to Director, Enforcement Division, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. Material supporting the Order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Mr. Pierre Talbert, Attorney, Enforcement Division, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, at (312) 353–2082.

SUPPLEMENTARY INFORMATION: Continental Oil Company owns a volatile organic materials loading rack at Griffith, Indiana. The proposed Order addresses emissions from this facility, which is subject to Indiana Air Pollution Control Regulation APC–15 of the Indiana Implementation Plan. The regulation limits the emissons of volatile organic materials and is part of the federally approved Indiana State

Implementation Plan. The Order requires final compliance with the regulation by July 1, 1979, and the source has consented to its terms.

The proposed Order satisfies the applicable requirements of Section 113(d) of the Act. If the Order is issued, source compliance with its terms would preclude further U.S. EPA enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provisions of the Act (Section 304) would be similarly precluded. Comments received by the date specified above will be considered in determining whether U.S. EPA should issue the Order. Testimony given at any public hearing concerning the Order will also be considered. After the public comment period and any public hearing, the Administrator of U.S. EPA will publish in the Federal Register the Agency's final action on the Order in 40 CFR Part 65.

Dated: May 31, 1979.

John McGuire

Regional Administrator, Region V.

1. The text of the Order reads as follows:

U.S. Environmental Protection Agency—Region V

In the matter of: Continent Oil Company, Griffith Terminal, Griffith, Indiana. Proceeding pursuant to section 113(d) of the Clean Air Act, as amended [42 U.S.C. Section 7413(d)]. Order No. EPA-5-79-

Introduction

This Order is issued this date pursuant to Sections 113(a), 113(d), and 114 of the Clean Air Act, as amended, 42 U.S.C. Section 7401 *et seq.* (hereafter "Act") and contains a schedule for compliance, interim control requirements, and reporting requirements. Public notice, opportunity for a public hearing, and thirty (30) days notice to the State of Indiana have been provided pursuant to Section 113(d)(1) of the Act.

Findings

1. On December 19, 1978, the United States Environmental Protection Agency (hereafter "U.S. EPA" or "Agency") issued a Notice of Violation (hereafter "NOV") to Continental Oil Company (hereafter Conoco) pursuant to Section 113(a)(1) of the Act, 42 U.S.C. 7413(a)(1), for alleged violation of Indiana Air Pollution Control Regulation APC-15. The NOV cited Conoco's Griffith, Indiana Terminal located at 1600 West Avenue H, Griffith, Indiana.

2. Indiana Air Pollution Control Regulation APC-15 creates certain requirements applicable to facilities which load volatile organic materials in specifies quantities into certain tank trucks, trailers, or railroad tank cars.

3. Indiana Air Pollution Control Regulation APC-15 is part of the State of Indiana Implementation Plan, which was created under Section 110 of the Act, 42 U.S.C. 7410.

4. In satisfaction of Section 113(a)(4) of the Act, 42 U.S.C. 7413 (a)(4), an opportunity to confer with the Administrator's delegate was extended to Conoco in the NOV, and a conference was held on January 8, 1979.

5. Following the January 8, 1979, conference; Conoco, by informal discussions, stated its intent to control vapor emissions with a flare unit at its Griffith, Indiana Terminal by July 1, 1979.

6. It has been determined by the U.S. EPA that Continental Oil Company is unable to immediately comply with Indiana Air Pollution Control Regulation APC-15 of the State of Indiana Implementation Plan.

7. It has been determined by U.S. EPA that violations of Indiana Air Pollution Control Regulation have continued beyond the 30th day after the date of notification by the Director, Enforcement Division.

Order

After a thorough investigation of all relevant facts, including public comment, it is determined that the schedule for compliance set forth in this Order is as expeditious as practicable, and that the terms of this Order comply with Section 113(d) of the Act. Therefore, it is hereby agreed and Ordered that:

1. Continental Oil Company will achieve compliance by July 1, 1979, with the State of Indiana Implementation Plan Air Pollution Control Regulation APC-15 as approved by the U.S. EPA in the Federal Register on May 14, 1973, which requires the installation of a vapor collection and recovery systems or its equivalent at the volatile organic material loading rack associated with its Griffith, Indiana Terminal in accordance with the following schedule:

a. May 1, 1979—Order Necessary Equipment
b. May 29, 1979—Start Construction
c. June 15, 1979—Equipment Delivery
d. June 22, 1979—Complete Construction
e. June 28, 1979—Unit Start-Up
f. July 1, 1979—Achieve and Demonstrate Compliance

2. Continental Oil Company shall adopt and implement operation and maintenance procedures for the flare unit and submit a copy of such procedures to the U.S. EPA by August 1, 1979.

3. Continental Oil Company shall continue to use bottom loading as the best practicable interim system of emission reduction at its Griffith, Indiana Terminal loading facility above mentioned so as to minimize hydrocarbon emissions, avoid any imminent and substantial endangerment to the health of persons, and minimize product spillage.

4. Continental Oil Company shall comply with the following emission monitoring and reporting requirements on or before the dates specified below:

a. *Emission Monitoring* (1). Continental Oil Company shall, beginning as soon as reasonably practicable, maintain a record of the quantity of volatile organic material which passes through the Griffith, Indiana Terminal.

(2). Continental Oil Company shall, immediately following demonstrated compliance, maintain a record of any malfunctions of the flare unit (including the reasons for such malfunctions) and the down time of the flare unit, whether caused by malfunction or other causes.

b. *Reporting Requirements* (1). No later than ten (10) days after any date for achievement of an incremental step specified in this Order, Continental Oil Company shall notify U.S. EPA in writing of its compliance or noncompliance with the requirement.

If delay is anticipated in meeting any requirement contained in this Order, Continental Oil Company shall immediately notify U.S. EPA in writing of the anticipated delay and reasons for the delay. Notification to U.S. EPA of an anticipated delay does not excuse the delay.

(2). Continental Oil Company shall, by August 1, 1979, submit performance test results associated with start up of the flare unit.

(3). Continental Oil Company shall submit a quarterly status report to U.S. EPA setting forth the throughput data required by paragraph 4.a. Such reports shall terminate following Continental Oil Company's submission covering the calendar quarter April-June, 1982.

(4). All notifications to U.S. EPA under this Order shall be made to Chief, Air Compliance Section, Enforcement Division, U.S. EPA, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 353-2090. A copy of all submissions shall be made to the State of Indiana.

5. Continental Oil Company is hereby notified that its failure to achieve final compliance by July 1, 1979, at its Griffith, Indiana Terminal loading facilities above mentioned may result in a requirement to pay a noncompliance penalty in accordance with Section 120 of the Act, 42 U.S.C. 7420. In the event of such failure, Conoco will be formally notified, pursuant to Section 120(b)(3), 42 U.S.C. 7420(b)(3), and any regulations promulgated thereunder, of its noncompliance.

6. This Order shall be terminated in accordance with Section 113(d)(6) of the Act if the Administrator of his delegate determines on the record, after notice and hearing, that an inability to comply with Indiana Air Pollution Control Regulation APC-15 of the Indiana Implementation Plan no longer exists.

7. Violation of any requirement of this Order may result in one or more of the following actions:

a. Enforcement of such requirement pursuant to Section 113 (a), (b), or (c) of the Act, 42 U.S.C. 7413 (a), (b) or (c).

b. Revocation of this Order, after notice and opportunity for a public hearing, and subsequent enforcement of Indiana Implementation Plan Air Pollution Control Regulation APC-15 in accordance with the preceding paragraph.

c. If such violation occurs on or after July 1, 1979, notice of noncompliance and subsequent action pursuant to Section 120 of the Act.

8. During the period of this Order, no Federal enforcement action pursuant to Section 113 of the Act, and no action under Section 304 of the Act shall be pursued where Conoco is in compliance with the terms of this Order.

9. Nothing herein shall be construed to be a waiver by the Administrator of any rights or remedies under the Act, including but not limited to Section 303 of the Act, 42 U.S.C. 7603.

10. The provisions of this Delayed Compliance Order shall apply and be binding upon Continental Oil Company, its officers, directors, agents, servants, employees, and any successors in interest; in addition, the provisions of this Delayed Compliance Order shall apply to all persons, firms, and corporations having notice of the Delayed Compliance Order and who are or who will be acting in concert and privity with the Company or its officers, directors, agents, servants, employees, and any successors in interest. Continental Oil Company shall give notice of this Delayed Compliance Order to any successors in interest prior to transfer of ownership, and shall simultaneously verify to the United States Environmental Protection Agency, Region V, Enforcement Division, that such notice has been given.

11. This Order is effective upon final promulgation in the Federal Register.

Date: ———

Administrator, U.S. Environmental Protection agency

Continental Oil Company, by the duly authorized undersigned, hereby consents to the requirements of this Order.

[FRL 1250-5]

Proposed Delayed Compliance Order for Ohio Ferro-Alloys Corp.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: U.S. EPA proposes to issue an Administrative Order to Ohio Ferro-Alloys Corporation. The Order requires the Company to bring its four electric submerged arc furnaces into compliance with Ohio Regulation AP–3–07 and AP–3–12, part of the federally approved Ohio State Implementation Plan (SIP). Because the Company is unable to comply with these regulations at this time, the proposed Order would establish an expeditious schedule requiring final compliance by January 15, 1980. Source compliance with the Order would preclude suits under the Federal enforcement and citizen suit provision of the Clean Air Act (Act) for violation of the SIP regulations covered by the Order.

The purpose of this notice is to invite the public comment and to offer an opportunity to request a public hearing on U.S. EPA's proposed issuance of the Order.

DATES: Written comments must be received on or before the thirtieth day from the date of this notice and requests for a public hearing must be received on or before the fifteenth day from the date of this notice. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary or any proposed testimony to be offered at the hearing. If there is significant public interest in a hearing, it will be held after twenty-one days prior notice of the date, time, and place of the hearing has been given in this publication.

ADDRESSES: Comments and requests for a public hearing should be submitted to Director, Enforcement Division, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. Material supporting the Order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Ms. Deborah Garber, Attorney, Enforcement Division, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, at (312) 353–2082.

SUPPLEMENTARY INFORMATION: Ohio Ferro-Alloys Corporation owns four electric submerged arc furnaces at Powhatan Point, Ohio. The proposed Order addresses emissions from this facility, which is subject to AP–3–07 and AP–3–12 of the Ohio Implementation Plan. The regulations limit the emissions of particulate matter and are part of the federally approved Ohio State Implementation Plan. The Order requires final compliance with the regulations by January 15, 1980, and the source has consented to its terms.

The proposed Order satisfies the applicable requirements of Section 113(d) of the Act. If the Order is issued, source compliance with its terms would preclude further U.S. EPA enforcement action under Section 113 of the Act against the source for violations of the regulations covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provisions of the Act (Section 304) would be similarly precluded.

Comments received by the date specified above will be considered in determining whether U.S. EPA should issue the Order. Testimony given at any public hearing concerning the Order will also be considered. After the public comment period and any public hearing, the Administrator of U.S. EPA will publish in the Federal Register the Agency's final action on the Order in 40 CFR Part 65.

Dated: May 31, 1979.

John McGuire,

Regional Administrator, Region V.

1. The text of the order reads as follows:

U.S. Enivornmental Protection Agency
Region V

In the matter of: Ohio Ferro-Alloys Corporation, Powhatan Point Plant, Powhatan Point, Ohio, proceeding pursuant to Section 113(d) of the Clean Air Act, as Amended [42 U.S.C. Section 7413(d)]. Order No. ———.

This Order is issued this date pursuant to Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. Section 7401 *et seq.* (hereafter the "Act") and contains a schedule for compliance, interim control requirements, and reporting requirements. Public notice, opportunity for a public hearing, and thirty (30) days notice to the State of Ohio have been provided pursuant to Section 113(d)(1) of the Act.

Findings

1. On November 13, 1978, the United States Environmental Protection Agency (hereafter "U.S. EPA" or "Agency") issued a Notice of Violation (hereafter "NOV") pursuant to Section 113(a)(1) of the Act [42 U.S.C. 7413(a)(1)] to Ohio Ferro-Alloys Corporation [the "Company"], upon a finding that the four electric submerged arc furnaces at its Powhatan Point, Ohio plant were in violation of Ohio Air Pollution Regulations AP–3–07 and AP–3–12. These regulations are part of the Ohio Implementation Plan as defined in Section 110(d) of the Act. The finding was based on emission factor calculations derived from data submitted by the Company to U.S. EPA, and on smoke readings performed on the subject facility by Ohio EPA personnel. A copy of this Notice was sent to the State of Ohio.

2. In satisfaction of Section 113(a)(4) of the Act an opportunity to confer with the Administrator's delegate was extended to Ohio Ferro-Alloys in the NOV, and a conference was held on the record on December 19, 1978.

3. U.S. EPA has determined that said violations have continued beyond the 30th day after the date said NOV was received.

4. It has been determined that Ohio Ferro-Alloys is unable to immediately comply with Regulations AP–3–07 and AP–3–12 of the Ohio Implementation Plan.

5. After a thorough investigation of all relevant facts, including public comment, it is determined that the schedule for compliance set forth in this Order is as expeditious as

practicable and that the terms of the Order comply with Section 113(d) of the Act.

Therefore, it is hereby Ordered that:

Order

1. Ohio Ferro-Alloys Corporation shall achieve compliance with the Ohio Implementation Plan Regulations AP-3-07 and AP-3-12, as approved by the Administrator on April 15, 1974, in accordance with the following schedule. The compliance program shall include installation of canopy hoods on Furnaces. #1—4, connecting ductwork into the existing pollution control system, and additional pollution control equipment on or before the dates specified:

1. November 17, 1978—Begin installation of canopy hood and ductwork on Furnace #1.*

2. December 26, 1978—Begin installation of bags on #2 collector.*

3. January 9, 1979—Submit to U.S. EPA design calculations and drawings for hoods and ductwork and operating and maintenance procedures for collectors.*

4. January 23, 1979—Receive hood for Furnace #3.*

5. January 25, 1979—Complete installation of bags and start up #2 collector.*

6. January 29, 1979—Complete installation of hood and ductwork and start up of Furnace#1.*

7. Janauary 30, 1979—Order third hood.*

8. February 1, 1979—Shut down #3 Furnace and begin installation of hood and ductwork.*

9. March 15, 1979—Complete installation of hood and ductwork on Furnace #3.*

Start engineering for move of two collector units (18 compartments) from Brilliant, Ohio plant to Powhatan plant.

10 April 1, 1979—Shut down Furnace #2 and begin installation of hood and ductwork on Furnace #2.

11. April 10, 1979—Order hood for #4 Furnace.

12. May 15, 1979—Complete installation of hood and duckwork on Furnace #2. Complete engineering to move collector units from Brilliant to Powhatan.

13. June 1, 1979—Shut down Furnace #4 and begin installation of hood and ductwork on Furnace #4. Complete necessary maintenance work to assure accuracy of all temperature and pressure drop instrumentation on collector units.

14. July 15, 1979—Complete installation of hood and duckwork on Furnace #4.

15. August 1, 1979—Begin installation of additional collector units at Powhatan *unless prior to this date* Ohio Ferro-Alloys Corporation demonstrates to U.S. EPA that its Powhatan Point facilities are in compliance with Regulation AP-3-07 of the Ohio Implementation Plan, in accordance with the following procedure:

A. Such demonstration shall consist of at least four sets of visible emissions readings conducted on four separate days by U.S. EPA certified smoke readers in accordance with Method 9, Appendix A of 40 CFR, Part 60, of emissions from collector exhaust vents, during a two week period of simultaneous operation of *all four furnaces*, under representative operating conditions, with the melt shop roof monitor completely sealed.

B. Notwithstanding subparagraph (A) above, if, on or before June 1, 1979, Ohio Ferro-Alloys certifies in writing to U.S. EPA that it shall thereafter operate no more than three furnaces simultaneously at its Powhatan Point plant, such demonstration of compliance may be made during a two week period of simultaneous operation of three furnaces (Furnace #4 plus any two additional furnaces).

C. The Company shall make any request for EPA smoke readings at least ten (10) days in advance of the intended demonstration date. Ten (10) days advance notice shall also be given to Ohio EPA to afford the State opportunity to have observers present.

16. Demonstration of compliance at the Powhatan facilities with AP-3-07 using the existing collectors prior to August 1, 1979, in accordance with paragraph 15.A., does not relieve Ohio Ferro-Alloys of a continuing obligation to maintain compliance with all applicable Ohio air pollution regulations. Failure to maintain such compliance subsequent to August 1, 1979, due to insufficient collection capacity of the existing control equipment, is a violation of this Order. Such violations shall be excused only if installation of additional collector units at Powhatan is completed and compliance with AP-3-07 and AP-3-12 is achieved and demonstrated in accordance with paragraphs 16 and 17, respectively, of this Order.

17. December 15, 1979—Complete installation of collector units.

18. January 15, 1980—Achieve and demonstrate compliance with AP-3-07 in accordance with the method and procedures set forth in paragraph I.15.A of this Order. Achieve compliance with AP-3-12.

II. Pursuant to Section 113(d)(7) of the Act, Ohio Ferro-Alloys shall comply with the following requirements which are determined to be reasonable and to constitute the best practicable means of reducing emissions during the period this Order is in effect:

A. After January 19, 1979, the five existing collectors at Powhatan shall be operated continuously except for necessary shutdowns due to malfunctions or replacement of bags.

B. After August 1, 1979, if shutdown of a collector is required for replacement of dacron bags with high temperature (Nomex) bags or installation of additional dampers, the corresponding furnace shall be shut down during that period so as to maintain compliance with Regulation AP-3-07. Notification of the decision to replace bags shall be made immediately to Ohio EPA and U.S. EPA.

C. The Company shall operate and maintain all process and pollution control equipment in such manner so as to maximize the removal of pollutants.

D. Furnace tapping cycles will be staggered so as to maximize capture of tapping and blowing emissions.

III. Pursuant to the authority granted in Sections 113(d)(1)(c) and 114(a)(1) of the Act, Ohio Ferro-Alloys Corporation shall comply with the following emissions monitoring and reporting requirements on or before the dates specified:

A. Employees shall inspect each collector unit daily; a daily record of collector operating parameters shall be made in the form shown in Exhibit 1 attached hereto and hereby made a part of this Order. A central chronological file shall be established for all operating and maintenance records, including, but not limited to the daily inspection reports required by this paragraph.

B. The Company shall immediately report all malfunctions of pollution control equipment to Ohio EPA.

C. Beginning three months after this Order is entered into and every calendar quarter thereafter, Ohio Ferro-Alloys shall submit a written report to U.S. EPA summarizing the data contained in the daily operating reports and all maintenance performed on pollution control equipment during the quarter. Such report will list all malfunctions which have occurred during the quarter giving the nature and cause of such malfunction, the time period during which control efficiency was decreased and the corrective action taken.

D. No later than ten days after any date for achievement of an incremental step specified in this Order, the Company shall notify U.S. EPA in writing of its compliance or noncompliance with the requirements and the reasons for any failure to comply. Such notification shall further contain, where applicable, an ongoing evaluation of the collection system as completed up to that point in time, including but not limited to:

—capture efficiency of hoods
—projected need for additional collection capacity
—estimated "worst condition" temperature of gases at collector intake and need for bag replacement
—estimated need for improved damper controls.

If delay is anticipated in meeting a requirement, the Company shall immediately notify U.S. EPA in writing of the anticipated delay and the reasons therefor. Such prior notification does not necessarily excuse the delay but shall be a factor in determining whether deviations from this compliance schedule are reasonable.

E. All data required to be recorded by this Order shall be retained for a period of two years and made available for inspection by U.S. EPA or its agents upon request.

IV. All submittals, notifications and reports to U.S. EPA pursuant to this Order shall be made to Mr. Eric Cohen, Chief, Compliance Section, Enforcement Division, U.S. EPA, 230 South Dearborn Street, Chicago, Illinois 60604.

V. Nothing contained in these Findings or Order shall affect Ohio Ferro-Alloys' responsibility to comply with State or local laws or regulations or other Federal laws or regulations.

VI. Ohio Ferro-Alloys Corporation is hereby notified that its failure to achieve final compliance by the dates specified in this Order, at the Powhatan Point, Ohio facility may result in a requirement to pay a noncompliance penalty in accordance with Section 120 of the Act, 42 U.S.C. 7420. In the event of such failure, Ohio Ferro-Alloys will

* Has been completed prior to issuance of this Order.

be formally notified, pursuant to Section 120(b)(3), 42 U.S.C. 7420(b)(3), and any regulations promulgated thereunder, of its noncompliance.

VII. This Order shall be terminated in accordance with Section 113(d)(8) of the Act if the Administrator or his delegate determines on the record, after notice and hearing, that an inability to comply with the applicable Ohio Implementation Plan no longer exists.

VIII. This schedule is protected by Section 113(d)(10) against Federal enforcement action and citizen suits under Section 304 until April 15, 1980, where the owner or operator of said source is in compliance with the terms of such Order.

IX. Nothing herein shall be construed to be a waiver by the Administrator of any rights or remedies under the Clean Air Act, including, but not limited to, Section 303 of the Act, 42 U.S.C. Section 7503.

X. This Order is effective upon promulgation in the Federal Register.

Date: ————

————,

Regional Administrator, U.S. Environmental Protection Agency.

Ohio Ferro-Alloys Corporation, by the duly authorized undersigned, hereby consents to the provisions of this Order and believes it to be a reasonable means by which its Powhatan Point facilities can achieve compliance with the Ohio Implementation Plan. Ohio Ferro-Alloys Corporation further waives any and all rights under any provisions of Law to challenge this Order.

Ohio Ferro-Alloys Corporation

Proposed Delayed Compliance Order for Shell Oil Co.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: U.S. EPA proposes to issue an Administrative Order to Shell Oil Company. The Order requires the Company to bring its volatile organic material loading rack into compliance with Indiana Air Pollution Control Regulation APC–15 part of the federally approved Indiana State Implementation Plan (SIP). Because the Company is unable to comply with this regulation at this time, the proposed Order would establish an expeditious schedule requiring final compliance by July 1, 1979. Source compliance with the Order would preclude suits under the Federal enforcement and citizen suit provision of the Clean Air Act (Act) for violation of the SIP regulation covered by the Order.

The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on U.S. EPA's proposed issuance of the Order.

DATES: Written comments must be received on or before the thirtieth day from the date of this notice and requests for a public hearing must be received on or before the fifteenth day from the date of this notice. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If there is significant public interest in a hearing, it will be held after twenty-one days prior notice of the date, time, and place of the hearing has been given in this publication.

ADDRESSEES: Comments and requests for a public hearing should be submitted to Director, Enforcement Division, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. Material supporting the Order and public comments received in response to this notice may be inspected and copies (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Mr. Pierre Talbert, Attorney, Enforcement Division, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, at (312) 353–2082.

SUPPLEMENTARY INFORMATION: Shell Oil Company owns a volatile organic material loading rack at Hammond, Indiana. The proposed Order addresses emissions from this facility, which is subject to APC–15 of the Indiana Implementation Plan. The regulation limits the emissions of volatile organic materials and is part of the federally approved Indiana Implementaion Plan. The Order requires final compliance with the regulation by July 1, 1979 and the source has consented to its terms.

The proposed Order satisfies the applicable requirements of Section 113(d) of the Act. If the Order is issued, source compliance with its terms would preclude further U.S. EPA enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provisions of the Act (Section 304) would be similarly precluded.

Comments received by the date specified above will be considered in determining whether U.S. EPA should issue the Order. Testimony given at any public hearing concerning the Order will also be considered. After the public comment period and any public hearing, the Administrator of U.S. EPA will publish in the Federal Register the Agency's final action on the Order in 40 CFR Part 65.

Dated: May 31, 1979.

John McGuire,

Regional Administrator Region V.

1. The text of the Order reads as follows:

U.S. Environmental Protection Agency
Region V

In the matter of: Shell Oil Company, Hammond Terminal, Hammond, Indiana. Proceeding Pursuant to Section 113(d) of the Clean Air Act, as Amended 42 U.S.C. Section 7413(d); Order No.

Introduction

This Order is issued this date pursuant to Section 113(a), 113(d), and 114 of the Clean Air Act, as amended, 42 U.S.C. Section 7401 *et seq.* (hereafter the "Act") and contains a schedule for compliance, interim control requirements, and reporting requirements. Public notice, opportunity for a public hearing, and thirty (30) days notice to the State of Indiana have been provided pursuant to Section 113(d)(1) of the Act.

Findings

1. On January 12, 1979, the United States Environmental Protection Agency (hereafter "U.S. EPA" or "Agency") issued a Notice of Violation (hereafter "NOV") to the Shell Oil Company (hereafter "Shell" or the "Company") pursuant to Section 113 (a)(1) of the Act, 42 U.S.C. 7413(a)(1), for alleged violation of Indiana Air Pollution Control Regulation APC–15.

2. Indiana Air Pollution Control Regulation APC–15 deals with the control of volatile organic materials and creates certain requirements applicable to facilities which load volatile organic materials in specified quantities into any tank truck, trailer or railroad tank car.

3. Indiana Air Pollution Control Regulation APC–15 is part of the State of Indiana Implementation Plan, which was created under Section 110 of the Act, 42 U.S.C. 7410.

4. In satisfaction of Section 113(a)(4) of the Act, 42 U.S.C. 7413(a)(4), an opportunity to confer with the Administrator's delegate was extended to Shell in the NOV, and conferences was held on February 22, 1979.

5. At the February 22, 1979, conference, after noting that Shell's Hammond Terminal is in compliance with the interpretation of the Indiana State Implementation Plan as represented and followed by the staff of the Indiana Air Pollution Control Board, Shell and others, Shell agreed to make necessary modification to the Hammond Terminal's volatile organic materials loading rack and install necessary additional equipment to tie-in the loading rack to a vapor recovery and disposal system already in existence at the

Hammond Terminal by July 1, 1979. This action will comply with U.S. EPA's interpretation of its regulation and avoid the expense and delay of litigation.

6. It has been determined by the U.S. EPA that the Shell Oil Company is unable to immediately comply with Indiana Air Pollution Control Regulation PAC–15 of the State of Indiana Implementation Plan.

7. U.S. EPA has determined that said violations have continued beyond the thirtieth day after the date of the Enforcement Director's notification.

Order

After a thorough investigation of all relevant facts, including public comment, it is determined that the schedule for compliance set forth in this Order is as expeditious as practicable, and that the terms of this Order comply with Section 113(d) of the Act. Therefore, it is hereby Agreed and Ordered that:

1. Shell Oil Company will achieve compliance by July 1, 1979, with the State of Indiana Implementation Plan Air Pollution Control Regulation APC–15 as approved by the U.S. EPA in the **Federal Register** on May 14, 1973, which requires a vapor collection and recovery system at the loading rack associated with Shell Oil Company's Hammond, Indiana, facility in accordance with the following schedule:

a. *December 1, 1978*—Place equipment orders.

b. *December 18, 1978*—Equipment received; start construction and installation.

c. *June 30, 1979*—Complete construction; start operation.

d. *July 1, 1979*—Complete manufacturer's performance tests, submit results, achieve and demonstrate compliance.

2. Shell Oil Company shall adopt and implement operation and maintenance procedures to maximize the control efficiency of the vapor collection and recovery system and submit a copy of such procedures to the U.S. EPA.

3. Shell Oil Company shall continue to use top loading submerged fill as the best practicable interim system of emission reduction at its Hammond, Indiana, loading facility so as to minimize hydrocarbon emissions, avoid any imminent and substantial endangerment to the health of persons, and minimize product spillage.

4. Shell Oil Company shall comply with the following emission monitoring and reporting requirements on or before the dates specified below:

a. *Emission Monitoring.*

(1). Shell Oil Company shall, beginning on the effective date of this Order, maintain a record of the quantity of gasoline which passes through the loading facility quarterly.

(2). Shell shall, beginning on the effective date of this Order, maintain a record of any malfunctions of the vapor recovery and disposal system (including the reasons for such malfunctions) and the down time of the vapor recovery and disposal system, whether caused by malfunctions or other causes.

b. *Reporting Requirements.*

(1). Beginning on the effective date of this Order, Shell shall notify U.S. EPA in writing of its achievement or nonachievement of an incremental step of the compliance schedule in this Order no later than fifteen (15) days after the date specified for achievement of that step.

If Shell fails to complete any of the actions required by the dates specified in the Order, it shall include a detailed explanation of such failure in the notification required in this paragraph 4.b.(1).

(2). Shell shall, beginning with the effective date of this Order, report on a quarterly basis the information required to be maintained under paragraph 4.a. of this Order. Such reporting requirement shall terminate following Shell's submission covering the calendar quarter April-June, 1980.

(3). All submittals, notifications and reports to U.S. EPA pursuant to this Order shall be made to Mr. Eric Cohen, Chief, Compliance Section, Enforcement Division, U.S. EPA, 230 South Dearborn Street, Chicago, Illinois 60604. In addition, all submittals, notifications and reports pursuant to this Order shall be made to the Indiana Air Pollution Control Board.

5. Nothing contained in these Findings or Order shall affect Shell Oil Company's responsibility to comply with State or local laws or regulations or other Federal laws or regulations.

6. Shell Oil Company is hereby notified that its failure to achieve final compliance by July 1, 1979, at the Hammond, Indiana, loading facility may result in a requirement to pay a noncompliance penalty in accordance with Section 120 of the Act, 42 U.S.C. 7420. In the event of such failure, Shell will be formally notified, pursuant to Section 120(b)(3), 42 U.S.C. 7420(b)(3), and any regulations promulgated thereunder, of its noncompliance.

7. This Order shall be terminated in accordance with Section 113(d)(6) of the Act if the Administrator or his delegate determines on the record, after notice and hearing, that an inability to comply with Indiana Air Pollution Control Regulation APC–15 of the Indiana Implementation Plan no longer exists.

8. Violation of any requirement of this Order shall result in one or more of the following actions:

a. Enforcement of such requirement pursuant to Section 113(a), (b), or (c) of the Act, 42 U.S.C. 7413(a), (b), or (c), including possible judicial action for an injunction and/or penalties and in appropriate cases, criminal prosecution.

b. Revocation of this Order, after notice and opportunity or a public hearing, and subsequent enforcement of Indiana Implementation Plan Air Pollution Control Regulation APC–15, in accordance with the preceding paragraph.

c. If such violation occurs on or after July 1, 1979, notice of non-compliance and subsequent action pursuant to Section 120 of the Act.

9. This schedule is protected by Section 113(d)(10) against Federal enforcement action and citizen suits under Section 304 until July 1, 1979, where Shell Oil Company is in compliance with the terms of such Order.

10. Nothing herein shall be construed to be a waiver by the Administrator of any rights or remedies under the Clean Air Act, including, but not limited to, Section 303 of the Act, 42 U.S.C. Section 7503.

11. The provisions of this Delayed Compliance Order shall apply and be binding upon the Company, its officers, directors, agents, servants, employees and any successors in interest; in addition, the provisions of this Delayed Compliance Order shall apply to all persons, firms, and corporations having notice of the Delayed Compliance Order and who are or who will be acting in concert and privity with the Company or its officers, directors, agents, servants, employees, and any successors in interest. The Company shall give notice of this Delayed Compliance Order to any successors in interest prior to transfer of ownership, and shall simultaneously verify to the United States Environmental Protection Agency, Region V, Enforcement Division, that such notice has been given.

12. This Order is entered into and Shell's consent to it is made for the sole purpose of settlement of this matter by compromise to avoid the expense and delay of contesting the asserted violations. Such consent shall not be deemed a waiver by Shell of any right it may have to contest U.S. EPA's findings or assertions that Shell is in violation of the regulation or contest the applicability of the regulation to Shell. However, Shell has specifically agreed to the terms of this Order and shall not be entitled to challenge any of the terms in an action to enforce the Order.

13. This Order is effective upon final promulgation in the **Federal Register**.

Date: ———

Administrator, U.S. Environmental Protection Agency.

Consent to Issuance of Order

Shell Oil Company, by the duly authorized undersigned, hereby consents to the provisions of this Order, and believes it to be a reasonable means by which the Hammond, Indiana facility can achieve compliance with Indiana Air Pollution Control Regulation APC–15 as interpreted by the U.S. EPA.

Date: ———

Shell Oil Company.

[FR Doc. 79–19007 Filed 6–18–79; 8:45 am]

BILLING CODE 6560–01–M

[40 CFR Part 65]

[FRL 1249–6]

Proposed Approval of an Administrative Order Issued By Ohio Environmental Protection Agency To Cooper Tire & Rubber Co.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: U.S. EPA proposes to approve an Administrative Order issued by the Ohio Environmental Protection Agency to Cooper Tire and Rubber Company. The Order requires the company to bring air emissions from its coal-fired boilers in Findlay, Ohio, into compliance with certain regulations contained in the federally approved Ohio State Implementation Plan (SIP) by July 1, 1979. Because the Order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by U.S. EPA before it becomes effective as a Delayed Compliance Order under the Clean Air Act (the Act). If approved by U.S. EPA, the Order shall constitute an addition to the SIP. In addition, a source in compliance with an approved Order May not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on U.S. EPA's proposed approval of the Order as a Delayed compliance Order.

DATES: Written comments must be received on or before July 19, 1979.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, U.S. EPA Region V, 230 South Dearborn Street, Chicago, Illinois 60604. The State Order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Cynthia Colantoni, Enforcement Division, U.S. EPA, 230 South Dearborn Street, Chicago, Illinois 60604. (312) 353–2082.

SUPPLEMENTARY INFORMATION: Cooper Tire and Rubber Company operates a coal-fired boiler at Findlay, Ohio. The Order under consideration addresses emissions from this boiler, which is subject to OAC–3745–17–07. The regulation limits the amount of visible emissions, and is part of the federally approved Ohio State Implementation Plan. The Order requires final compliance with the regulation by July 30, 1979 through use of coal with a quality better than or equal to that specified in Part 3 of the Order and the installation of a new type ash handling system. This company is allowed to achieve final compliance by July 30, 1979 since it was previously granted a variance which required compliance by April 15, 1977. This company could have been allowed to April 15, 1980 to achieve compliance under a 113(d) Order, but is completing its program expeditiously and will be finished by July 30, 1979.

Because this Order has been issued to a major source of visible emissions and permits a delay in compliance with the applicable regulation, it must be approved by U.S. EPA before it becomes effective as a Delayed compliance Order under Section 113(d) of the Act. U.S. EPA may approve the Order only if it satisfies the appropriate requirements of this subsection.

If the Order is approved by U.S. EPA, source compliance with its terms would preclude Federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the Order would also constitute an addition to the Ohio SIP. However, in the event final compliance is not achieved by July 1, 1979, source compliance with the Order will not preclude assessment of any noncompliance penalties under Section 120 of the Act, unless the source is otherwise entitled to an exemption under Section 120(a)(2)(B) or (C).

All interested persons are invited to submit written comments on the proposed Order. Written comments received by the date specified above will be considered in determining whether U.S. EPA may approve the Order. After the public comment period, the Administrator of U.S. will publish in the Federal Register the Agency's final action on the Order in 40 CFR Part 65.

Dated: May 31,1979.

John McGuire,

Regional Administrator.

The text of the Order reads as follows:

Before the Ohio Environmental Protection Agency

Order

In the Matter of: Cooper Tire & Rubber Company, Lima & Western Avenues, Findlay, OH 45849.

The Director of Environmental Protection (hereinafter "Director"), hereby makes the following Findings of Fact and, pursuant to Sections 3704.03 (S) and (I) of the Ohio Revised Code and in accordance with Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 *et seq.*, issues the following Orders which will not take effect until the Administrator of the United States Environmental Protection Agency has approved their issuance under the Clean Air Act:

Findings of Fact

1. Cooper Tire & Rubber Company (hereinafter Cooper Tire), operates a coal fired boiler (B004) which serves its facility located at Lima and Western Avenues, Findlay, Ohio 45840.

2. In the course of operation of said coal fired boiler (B004), air contaminants are emitted in violation of OAC–3745–17–07.

3. Cooper Tire is unable to immediately comply with OAC–3745–17–07.

4. Potential emissions of particulates from Cooper Tire are approximately 1241 tons per year; therefore, Cooper Tire constitutes a major stationary source or facility under Section 302(j) of the Clean Air Act, as amended.

5. The compliance schedule set forth in the Orders below requires compliance with OAC–3745–17–07 as expeditiously as practicable.

6. Implementation by Cooper Tire of the interim requirements contained in the Orders below will fulfill the requirements of Section 113(d)(7) of the Clean Air Act, as amended.

7. The Director's determination to issue the Orders set forth below is based upon his consideration of reliable, probative and substantial evidence relating to the technical feasibility and economic reasonableness of compliance with such Orders, and their relation to benefits to the people of the State to be derived from such compliance.

Orders

Whereupon, after due consideration of the above Findings of Fact, the Director hereby issues the following Orders pursuant to Sections 3704.03 (S) and (I) of the Ohio Revised Code in accordance with Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 *et seq.*, which will not take effect until the Administrator of the United States Environmental Protection Agency has approved their issuance under the Clean Air Act.

1. Cooper Tire shall bring its coal boiler (B004) located at Lima & Western Avenues, Findlay, Ohio, into final compliance with OAC–3745–17–07 by (A) burning a coal with a quality better than or equal to that specified in Order (3) below, (B) installing new boiler instrumentation equipment, and (C) installing a new type ash handling system, no later than July 30, 1979.

2. Compliance with Order (1) above shall be achieved by Cooper Tire in accordance with the following schedule on or before the dates specified:

Submit final control plans: complete
Award contract(s): complete
Begin construction: February 1, 1979
Complete construction: July 16, 1979
Achieve final compliance with OAC–3745–17–07: July 30, 1979.

3. Pending achievement of compliance with Order (1) above, Cooper Tire shall comply with the following interim requirements which are determined to be reasonable and to be the best practicable system(s) of emission reduction and which are necessary to ensure compliance with OAC–3745–17–07 insofar as Cooper Tire is able to comply with them during the period this Order is in effect in accordance with Section 113(d)(7) of the Clean Air Act, as amended. Such interim requirements shall include:

a. Cooper Tire shall immediately use coal with an analysis of: less than or equal to 9.2 percent ash, and greater than or equal to 12,000 BTU.

b. Cooper Tire shall immediately institute a regular maintenance program to minimize emissions from coal boiler (B004).

c. Cooper Tire shall continue to use the multiple cyclones to minimize emissions from the coal boiler (B004).

4. Within five (5) days after the scheduled achievement date of each of the increments of progress specified in the compliance schedule in Order (2) above, Cooper Tire shall submit a written progress report to the Northwest District Office. The person submitting these reports shall certify whether each increment of progress has been achieved and the date it was achieved.

On a monthly basis, Cooper Tire shall submit a written report to the Northwest District Office concening any excursions above the 20 percent opacity limitation in OAC Rule 3745-17-07, the maintenance and operation of the coal boiler, and the analysis of the coal burned. Cooper Tire shall keep on file all monitoring data for a minimum of three years.

5. Cooper Tire shall continue to properly operate and maintain a continuous recording opacity monitor and comply with any other emission monitoring and reporting required by Chapter 3704 of the Ohio Revised Code and the regulations promulgated thereunder.

6. Cooper Tire is hereby notifed that unless it is exempted under Section 120(a)(2)(B) or (C) of the Clean Air Act, as amended, failure to achieve final compliance with Order (1) above by July 1, 1979, will result in a requirement to pay a noncompliance penalty under Section 120 of the Clean Air Act, as amended.

These orders will not take effect until the Administrator of the United States Environmental Protection Agency has approved their issuance under the Clean Air Act.

Dated: February 12, 1979.

James F. McAvoy,

Director of Environmental Protection.

Waiver

The Cooper Tire & Rubber Company agrees that the attached Findings and Orders are lawful and reasonable and agrees to comply with the attached Orders. The Cooper Tire & Rubber Company hereby waives the right to appeal the issuance or terms of the attached Findings and Orders to the Environmental Board of Review, and it hereby waives any and all rights it might have to seek judicial review of said Findings and Orders either in law or equity. The Cooper Tire & Rubber Company also waives any and all rights it might have to seek judicial review of any approval by U.S. EPA of the attached Findings and Orders or to seek a stay of enforcement of said Findings and Orders in connection with any judicial review of Ohio's air implementation plan or portion thereof.

Dated: November 13, 1978.

W. P. Zimmerman,

Corporate Director Facilities Engineering.

[FRL 1247-4]

Proposed Approval of an Administrative Order Issued By Ohio Environmental Protection Agency To Fox Paper, Inc.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: U.S. EPA proposes to approve an Administrative Order issued by the Ohio Environmental Protection Agency to Fox Paper, Inc. The Order requires the company to bring air emissions from its two coal-fired boilers in Lockland, Ohio, into compliance with certain regulations contained in the federally approved Ohio State Implementation Plan (SIP) by July 1, 1979. Because the Order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by U.S. EPA before it becomes effective as a Delayed Compliance Order under the Clean Air Act (the Act). If approved by U.S. EPA, the Order will constitute an addition to the SIP. In addition, a source in compliance with an approved Order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on U.S. EPA's proposed approval of the Order as a Delayed Compliance Order.

DATE: Written comments must be received on or before July 19, 1979.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, U.S. EPA, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. The State Order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Cynthia Colantoni, Enforcement Division, U.S. EPA, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. (312) 353-2062.

SUPPLEMENTARY INFORMATION: Fox Paper, Inc. operates a paper mill at Lockland, Ohio. The Order under consideration addresses emissions from two coal-fired boilers at the facility, which are subject to OAC 3745-17-07 and OAC 3745-17-10. The regulations limit the emissions of particulate matter emissions, and are part of the federally approved Ohio State Implementation Plan. The Order requires final compliance with the regulations by July 1, 1979 by the installation of an electrostatic precipitator and mechanical collector.

Because this Order has been issued to a major source of particulate matter emission and permits a delay in compliance with the applicable regulations, it must be approved by U.S. EPA before it becomes effective as a Delayed Compliance Order under Section 113(d) of the Act. U.S. EPA may approve the Order only if it satisfies the appropriate requirements of this subsection.

If the Orer is approved by U.S. EPA, source compliance with its terms would preclude Federal enforcement action under Section 113 of the Act against the source for violations of the regulations covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the Order would also constitute an addition to the Ohio SIP.

All interested persons are invited to submit written comments on the proposed Order. Written comments received by the date specified above will be considered in determining whether U.S. EPA may approve the Order. After the public comment period, the Administrator of U.S. EPA will publish in the Federal Register the Agency's final action on the Order in 40 CFR Part 65.

(42 U.S.C. 7413, 7601)

Dated: May 31, 1979.

John McGuire,

Regional Administrator.

The text of the Orders reads as follows:

Before the Ohio Environmental Protection Agency

In the Matter of: Fox Paper, Inc., Case No. 77-AV-116.

Stipulation

The parties hereto, Fox Paper, Inc. and the Ohio Environmental Protection Agency hereby stipulate as follows:

1. The Order attached hereto represents the culmination of discussions had for the purpose of resolving the issues of fact and law in this proceeding.

2. The Order is supported by reliable, probative, and substantial evidence, and is in accordance with law.

3. The Director may issue the Order by signing it and entering it upon his Journal.

4. Pursuant to Section 113(d)(2) of the Clean Air Act, as amended, the order shall not take effect until the Administrator of the United States Environmental Protection Agency determines that it has been issued in accordance with the requirements of the Clean Air Act, as amended.

5. Upon the effective date of the Order, Fox Paper, Inc. will be deemed to have withdrawn its request for an adjudication hearing, and the above-captioned proceedings shall be dismissed.

Colleen K. Nissl

Assistant Attorney General Counsel for the Ohio Environmental Protection Agency.

Clement A. Durna,

Fox Paper, Inc., Sr. Vice President Operations, Erving Paper Mills.

Before the Ohio Environmental Protection Agency

In the Matter of: Fox Paper, Inc. [Erving Paper Mills], P.O. Box 15099 Lockland, Cincinnati, Ohio 45215, Case No. 77-AV-116.

Order

The Director of Environmental Protection (hereinafter "Director"), hereby makes the following Findings of Fact and, pursuant to Sections 3704.03(I) and 3704.03(S) of the Ohio Revised Code and in accordance with Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 *et seq.*, issues the following Orders which will not take effect until the Administrator of the United States Environmental Protection Agency has approved their issuance under the Clean Air Act.

Findings of Fact

1. Fox Paper, Inc., owned by Erving Paper Mills (hereinafter "Fox"), operates two coal-fired boilers, which serve its facility located at Cooper and Lock Streets, Lockland, Ohio 45215.

2. These boilers are identified as follows:

Boiler No. 2, Application No. 1431260171 B002, Babcock & Wilcox coal-fired underfeed stoker boiler with maximum rated heat input of 69 million BTU per hour.

Boiler No. 3, Application No. 1431260171 B003, Babcock & Wilcox Model No. FH18 pulverized coal-fired boiler with a maximum rated heat input of 97 million BTU per hour.

3. In the course of operation of said boilers, air contaminants are emitted in violation of OAC 3745-17-07 and OAC 3745-17-10.

4. The Director proposed to deny the applications for variances on April 22, 1977.

5. Fox is unable to immediately comply with the above-cited regulations.

6. Potential emissions of particulates from the two boilers are over 100 tons per year; therefore, Fox constitutes a major source under Section 302(j) of the Clean Air Act, as amended.

7. The Compliance Schedule set forth in the Orders below requires compliance with OAC 3745-17-07 and OAC 3745-17-10 as expeditiously as practicable.

8. Implementation by Fox of the interim requirements contained in the Orders below will fulfill the requirements of Section 113(d)(7) of the Clean Air Act, as amended.

9. Fox is using and will continue to use coal of sufficiently low sulfur content to maintain their existing status of compliance with federal promulgated sulfur oxide standards (U.S. Environmental Protection Agency Sulfur Oxide Plan for Ohio, 41 FR 36324 (August 27, 1976)).

10. The Director's determination to issue the Orders set forth below is based upon his consideration of reliable, probative and substantial evidence relating to the technical feasibility and economic reasonableness of compliance with such Orders, and their relation to benefits to the people of the State to be derived from such compliance.

Whereupon, after due consideration of the above Findings of Fact, the Director hereby issues the following Orders pursuant to Sections 3704.03(I) and 3704.03(S) of the Ohio Revised Code in accordance with Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 *et seq.*, which will not take effect until the Administrator of the United States Environmental Protection Agency has approved their issuance under the Clean Air Act.

1. Fox shall bring its coal-fired boilers into compliance with OAC 3745-17-10 and OAC 3745-17-07 by the installation of an electrostatic precipitator and mechanical collector no later than July 1, 1979.

2. Compliance with Order (1) above, shall be achieved by Fox in accordance with the following schedule on or before the dates specified:

Implementation Schedule

1. Preliminary engineering survey to be completed by February 15, 1978—Completed.

2. Electrostatic precipitator for Boiler B003 on order in April, 1978—Completed.

3. Drawing approval by June 1, 1978—Completed.

4. Construction of dust collector for Boiler B002 to begin by June 15, 1978—Completed.

5. Final engineering complete by July 15, 1978—Completed.

6. Construction contracts for structural, mechanical and electrical work awarded before August 15, 1978—Completed.

7. Contracts for mechanical and electrical work sent out and completion of work by June 1, 1979.

8. Construction of mechanical collector for Boiler B002 started on October 16, 1978 and completed by June 1, 1979.

9. Preparatory construction for electrostatic precipitator to begin October 1, 1978.

10. Preparatory construction for electrostatic precipitator completed by December 1, 1978.

11. Electrostatic precipitator to be delivered by January 1, 1979.

12. Installation of electrostatic precipitator to begin March 1, 1979.

13. Complete installation of electrostatic precipitator by June 1, 1979.

14. Testing June 1, 1979, results submitted by July 1, 1979.

15. Achieve final compliance with OAC Sections 3745-17-07 and 3745-17-10.

3. Pending achievement of compliance with Order (1) above, Fox shall use the best practicable systems of emission reduction for the period during which this Order is in effect in accordance with Section 113(d)(7) of the Clean Air Act, as amended. Such interim measures shall include:

a. The use of coal with analysis of: less than or equal to seven (7) to twelve (12) percent ash; less than or equal to one (1) percent sulfur; greater than or equal to 12,800 BTU per pound of coal;

b. Equipping each boiler with opacity instrumentation and recorders and oxygen anayses and recorders which have been ordered by Fox, and subsequent operation of said instrumentation; and

c. Regular maintenance of the boilers.

4. Within five (5) days after the scheduled achievement date of each of the increments of progress specified in the Compliance Schedule in Order (2) above, Fox shall submit a written progress report to the Cincinnati Division of Air Pollution Control. The person submitting these reports shall certify whether each increment of progress has been achieved and the date it was achieved. If the progress dates have not been met, Fox shall indicate why the milestones have not been met.

5. Fox shall comply with any other emission monitoring and reporting required by Chapter 3704 of the Ohio Revised Code and the regulations promulgated thereunder.

6. On a quarterly basis, Fox shall report to the Cincinnati Air Pollution Control Agency any excursions above the 20 percent opacity limitation set out in OAC 3745-17-07. Fox shall keep on file all stack monitoring data for a minimum of two years.

7. Emission tests at the normal rate of operation and at the maximum rate of operation shall be conducted upon both boilers to verify compliance with Order (1) above. Such tests shall be conducted no later than the date specified in the compliance schedule in Order (2) above, in accordance with procedures approved by the Director. Written notification of intent to test shall be provided to the Cincinnati Air Pollution Control Agency thirty (30) days prior to the testing date.

8. Fox shall apply for and obtain permits to operate the boilers in accordance with OAC 3745-35-02, at the expiration of this Order.

9. Fox is hereby notified that unless it is exempted under Section 120(a)(2) (B) or (C) of the Clean Air Act, as amended, failure to achieve final compliance with Order (1) above, by July 1, 1979, will result in a requirement to pay a noncompliance penalty under Section 120 of the Clean Air Act, as amended.

These Orders will not take effect until the Administrator of the United States Environmental Protection Agency has

approved their issuance under the Clean Air Act.

James F. McAvoy,

Director of Environmental Protection.

Waiver

Fox Paper, Inc. agrees that the attached Findings and Orders are lawful and reasonable and agrees to comply with the attached Orders. Fox Paper, Inc. hereby waives the right to appeal the issuance or terms of the attached Findings and Orders to the Environmental Board of Review, and it hereby waives any and all rights it might have to seek judicial review of said Findings and Orders either in law or equity.

Clement A. Durna,

Representative for Fox Paper, Inc. (Erving Paper), Sr. Vice President Operations, Erving Paper Mills.

[FRL 1249-7]

Proposed Approval of an Administrative Order Issued By Ohio Environmental Protection Agency To B. F. Goodrich Co.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: U.S. EPA proposes to approve an Administrative Order issued by the Ohio Environmental Protection Agency to B. F. Goodrich Company. The Order requires the company to bring air emissions from its coal-fired steam generating boiler in Akron, Ohio, into compliance with certain regulations contained in the federally approved Ohio State Implementation Plan (SIP) by July 1, 1979. Because the Order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by U.S. EPA before it becomes effective as a Delayed Compliance Order under the Clean Air Act (the Act). If approved by U.S. EPA, the Order will constitute an addition to the SIP. In addition, a source in compliance with an approved Order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on U.S. EPA's proposed approval of the Order as a Delayed Compliance Order.

DATE: Written comments must be received on or before July 19, 1979.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, U.S. EPA, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. The State Order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Cynthia Colantoni, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 353-2082.

SUPPLEMENTARY INFORMATION: B.F. Goodrich Company operates a coal-fired steam generating boiler at Akron, Ohio. The Order under consideration addresses emissions from this facility, which is subject to OAC-3745-17-07 and OAC-3745-17-10. The regulations limit the emissions of particulate matter and visible emissions, and are part of the federally approved Ohio State Implementation Plan. The Order requires final compliance with the regulations by July 1, 1979, by converting the boilers from coal firing to oil firing.

Because this Order has been issued to a major source of particulate matter emissions and visible emissions and permits a delay in compliance with the applicable regulations, it must be approved by U.S. EPA before it becomes effective as a Delayed Compliance Order under Section 113(d) of the Act. U.S. EPA may approve the Order only if it satisfies the appropriate requirements of this subsection.

If the Order is approved by U.S. EPA, source compliance with its terms would preclude Federal enforcement action under Section 113 of the Act against the source for violations of the regulations covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the Order would also constitute an addition to the Ohio SIP.

All interested persons are invited to submit written comments on the proposed Order. Written comments received by the date specified above will be considered in determining whether U.S. EPA may approve the Order. After the public comment period, the Administrator of U.S. EPA will publish in the **Federal Register** the Agency's final action on the Order in 40 CFR Part 65.

(42 U.S.C. 7413, 7601)

Dated: May 31, 1979.

John McGuire,

Regional Administrator.

The text of the Order reads as follows:

Before the Ohio Environmental Protection Agency

Order

In the matter of: The B.F. Goodrich Company, 500 South Main Street, Akron, Ohio 44318.

The Director of Environmental Protection (hereinafter "Director"), hereby makes the following Findings of Fact and, pursuant to Section 3704.03(S) and Section 3704.03(I) of the Ohio Revised Code and in accordance with Section 113(d) of the Clear Air Act, as amended, 42 U.S.C. 7401 *et seq.*, issues the following Order which will not take effect until the Administrator of the United States Environmental Protection Agency has approved its issuance under the Clean Air Act, as amended.

Findings of Fact

1. The B.F. Goodrich Company (hearinafter "Goodrich") operates a coal-fired steam generating boiler designated as boiler number 31 which serves its facilities located at 500 South Main Street, Akron, Ohio 44318.

2. This boiler is identified as follows:

Boiler No. 31, application No. 1677010051 B002, coal-fired spreader stoker.

3. In the course of operation of said boiler, particulate matter is emitted in violation of OAC 3745-17-10 and OAC 3745-17-07.

4. Said boiler is unable to comply immediately with OAC 3745-17-10 and OAC 3745-17-07.

5. The Director proposed to deny the application for a variance on November 29, 1978.

6. Potential emissions of particulate matter from said boiler are greater than 100 tons per year. Therefore, said boiler constitutes a major source under Section 302(j) of the Clean Air Act, as amended.

7. The compliance schedule set forth in the Orders below require ultimate compliance by said boiler with OAC 3745-17-10 and 3745-17-07 as expeditiously as practicable.

8. Implementation by Goodrich of the requirements contained in the Orders below will fulfill the requirements of Section 113(d)(7) of the Clean Air Act, as amended.

9. On November 11, 1976, Goodrich and the City of Akron, Ohio, executed an agreement whereby Goodrich agreed to purchase for a period of twenty-five years (with the right to five renewal periods of five years each) excess steam generated by ARES, a project for producing steam using combustible solid waste as a principal fuel source, not needed by other customers of ARES up to Goodrich's total steam requirements for all of its plants and offices located at or contiguous with 500 South Main Street, Akron, Ohio.

This agreement for excess steam constituted a commitment by Goodrich which was essential to the undertaking of the ARES project by the City of Akron. The effect of this agreement for excess steam was to enable and to allow the City of Akron to finance the construction of ARES in that the agreement provided assurance of a substantial customer for steam on a year round basis. ARES is to be completed about July 1, 1979, and after its completion, Goodrich expects to purchase significant

portions of the steam necessary for its operations from ARES thereby reducing the level of its own boiler operations. Reliance by Goodrich on steam from ARES will reduce the use of boiler number 31 after it is switched to compliance fuel and boiler number 31 will then be used primarily for peaking and in the event of a breakdown of the other boiler or the ARES system.

10. It is technically and economically unreasonable to require Goodrich to install and operate a continuous opacity monitoring system on boiler number 31 prior to achieving compliance with the Orders specified below, since Goodrich is currently unable to comply with the requirements of OAC 3745–17–07 pertaining to visible emissions, no data would be produced which is not already known, and therefore, no purpose would be served by requiring monitoring during the interim compliance period.

11. The Director's determination to issue the Order set forth below is based upon his consideration of reliable, probative, and substantial evidence relating to the technical feasibility and economic reasonableness of compliance with such Order, and their relation to benefits to the people of the State of Ohio to be derived from such compliance.

Order

Whereupon, after due consideration of the above Findings of Fact, the Director hereby issues the following Order pursuant to Sections 3704.03(S) and 3704.03(I) of the Ohio Revised Code in accordance with Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 *et seq.*, which will not take effect until the Administrator of the United States Environmental Protection Agency has approved their issuance under the Clean Air Act, as amended.

1. Goodrich shall bring its boiler number 31 into final compliance with OAC 3745–17–10 and 3745–17–07 by July 1, 1979 by converting it from coal firing to oil firing as expeditiously as practicable but not later than July 1, 1979.

2. Compliance with Order (1) above shall be achieved by Goodrich in accordance with the following schedule on or before the dates specified:

a. January 1, 1979; complete drawings for boiler modifications necessary to convert boiler number 31 from a coal firing to an oil firing boiler.

b. February 1, 1979; complete equipment specifications and bills of materials for items and equipment required for boiler modifications necessary to convert boiler number 31 from a coal firing to an oil firing boiler.

c. March 1, 1979; complete procurement of items and equipment required for boiler modifications necessary to convert boiler number 31 from a coal firing to an oil firing boiler.

d. April 30, 1979; shutdown boiler number 31 and begin construction of modifications required to convert boiler number 31 from a coal firing to an oil firing boiler.

e. July 1, 1979; complete modifications necessary to convert boiler number 31 from a coal firing to an oil firing boiler and achieve final compliance with OAC 3745–17–10 and 3745–17–07.

3. Pending achievement of compliance with this Order, Goodrich shall comply with the following interim requirements which are determined to be reasonable and to be the best practicable system of emission reduction, and which are necessary to ensure compliance with OAC 3745–17–10 and OAC 3745–17–07 insofar as Goodrich is able to comply with them during the period this Order is in effect in accordance with Section 113(d)(7) of the Clean Air Act, as amended. Such interim requirements shall include:

a. Goodrich shall conduct a regular maintenance program to minimize emissions from boiler number 31.

b. Goodrich shall continue to use the multiclone control systems to minimize particulate emissions from boiler number 31.

4. Within five (5) days after the scheduled achievement date of each of the increments of progress specified in the compliance schedule in Order (2) above, Goodrich shall submit a written progress report to the Akron Air Pollution Agency. The person submitting these reports shall certify whether each increment of progress has been achieved and the date it was achieved. The reports shall also indicate the status of compliance with the interim control requirements in Order (3) above.

5. Goodrich shall apply for and obtain permit to operate the boiler in accordance with OAC 3745–35–02.

6. Goodrich is hereby notified that unless it is exempted under Sections 120(a)(2)(B) and (C) of the Clean Air Act, as amended, failure to achieve final compliance with Order (1) above, by July 1, 1979, will result in a requirement to pay a noncompliance penalty under Section 120 of the Clean Air Act, as amended. Goodrich does not waive any right to contest the validity or appropriateness of any such penalty.

This Order will not take effect until the Administrator of the United States Environmental Protection Agency has approved their issuance under the Clean Air Act.

Dated: May 2, 1979.

James F. McAvoy,

Director of the Ohio Environmental Protection Agency.

Waiver

The B.F. Goodrich Company agrees that the attached Findings and Orders are lawful and reasonable and agrees to comply with the attached Orders. The B.F. Goodrich Company hereby waives the right to appeal the issuance or terms of the attached Findings and Orders to the Environmental Board of Review, and it hereby waives any and all rights it might have to seek judicial review of said Findings and Orders either in law or equity. B.F. Goodrich also waives its rights to seek judicial review of any U.S. EPA approval without change of said Findings and Orders or to seek a stay of enforcement pending judicial review of Ohio's Air Implementation Plan.

Dated: February 20, 1979.

Robert J. Jawett,

Vice President, Research & Development.

Social Security Administration

[45 CFR, Part 233]

Financial Assistance Programs—Need and Amount of Assistance; Using Equity Value for Resources

AGENCY: Social Security Administration, HEW.

ACTION: Notice of Decision to Develop Regulations.

SUMMARY: The Social Security Administration plans to recommend to the Secretary that a proposed regulation be published to clarify its policy on evaluating real and personal property of an applicant applying for, or a recipient receiving, public assistance.

The proposed regulation will preclude a State, in determining the amount of an applicant's or recipient's allowable resources (real or personal property), from counting as available the market value of property without regard to existing encumbrances. Thus, in evaluating real and personal property, only an applicant's or recipient's equity in property—defined as fair market value less encumbrances—can be taken into consideration in determining the amount of allowable resources. This policy reflects the court decision in *NWRO* v. *Mathews* (553 F. 2d 637).

The proposed regulation would affect applicants and recipients of AFDC, and of the adult assistance titles of the Social Security Act (titles I, X, XIV, and

XVI (AABD)) administered in Guam, Puerto Rico, and the Virgin Islands.

This proposed regulation will amend 45 CFR 233.20.

The Department of Health, Education, and Welfare has classified the regulation as policy significant.

Vol. 44, No. 119
Tuesday, June 19, 1979

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Cash in Lieu of Commodities; Value of Donated Commodities for School Year 1979

Section 6(b) of the National School Lunch Act, as amended (7 U.S.C. 1755) and the regulations governing cash in lieu of commodities (7 CFR Part 240) require the Secretary of Agriculture to make an estimate not later than May 15, 1979, of the value of agricultural commodities and other foods that will be delivered to States under the food donation regulations (7 CFR Part 250) during the school year ending June 30, 1979, for use in lunch programs by schools participating in the National School Lunch Program. If the estimated value is less than the total level of assistance authorized under Section 6(e) of the Act, as amended, for the school year ending June 30, 1979, the Secretary is required to pay to each State administering agency, not later than June 15, 1979, an amount of funds that is equal to the difference between the value of such deliveries as then programmed for each State and the total level of assistance authorized for such State under Section 6(e)

For school year 1979, the adjusted minimum national average value per lunch of donated foods or payment of cash in lieu thereof has been established under Section 6(e) at 13.75 cents per lunch (43 FR 31419) and, in accordance with these requirements, the Secretary has determined that $599,840,079 in commodities will be delivered nationally by June 30, 1979. Notice is hereby given, therefore, that no shortfall cash payments will be made for the school year ending June 30, 1979 (7 CFR Part 240)

On January 29, 1979, the amount of commodities needed to meet the requirements of Section 6(e) was revised to reflect increased participation trends, and commodities were shipped to State against their share of the revised national entitlement level of $599,426,784. By May 15 commodities valued at $599,804,079 had been purchased for shipment by June 30 to meet these requirements. However, during the May 15 review, later participation reports indicated the growth would be somewhat less than expected in January, and that the national commodity assistance level would be only $596,798,845. It was decided that since States had been given an entitlement figure based on the higher national figure of $599,426,784, it would be unfair to lower entitlements at this time. Therefore, no further adjustments will be made for the 1979 school year.

Effective Date: This notice shall become effective June 15, 1979. Dated: June 14, 1979.

Bob Greenstein,
Acting Administrator.

Carol Tucker Foreman,
Assistant Secretary.

BILLING CODE 3410-11-M

Rural Electrification Administration

United Power Association, Elk River, Minn.; Proposed Loan Guarantee

Under the authority of Pub. L. 93-32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in REA Bulletin 20-22 (Guarantee of Loans for Bulk Power Supply Facilities), notice is hereby given that the Administrator of REA will consider (a) providing a guarantee supported by the full faith and

credit of the United States of America for a loan in the approximate amount of $31,387,000 to United Power Association of Elk River, Minnesota, and (b) supplementing such a loan with an insured REA loan at 5 percent interest in the approximate amount of $10,000,000 to this cooperative.

These loans will be used to finance a construction program consisting of approximately 32 miles of 230 kV and approximately 60 miles of 69 kV transmission lines and related facilities; load management equipment; and miscellaneous generation and other system improvements providing no additional generating capacity.

Legally organized lending agencies capable of making, holding and servicing the loan proposed to be guaranteed may obtain information on the proposed program, including the engineering and economic feasibility studies and the proposed schedule for the advances to the borrower of the guaranteed loan funds from Mr. Philip O. Martin, Manager, United Power Association, Elk River, Minnesota 55330.

In order to be considered, proposals must be submitted before July 19, 1979, to Mr. Martin. The right is reserved to give such consideration and make such evaluation or other disposition of all proposals received, as United Power Association and REA deem appropriate. Prospective lenders are advised that the guaranteed financing for this project is available from the Federal Financing Bank under a standing agreement with the Rural Electrification Administration.

Copies of REA Bulletin 20–22 are available from the Director, Informtion Services Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Dated at Washington, D.C., this 11th day of June 1979.

Joseph Vellone,

Acting Administrator, Rural Electrification Administration.

BILLING CODE 3410-15-M

Soil Conservation Service

Vineland Area Tributary to Arkansas River Watershed, Colorado; Intent Not to File an Environmental Impact Statement for Deauthorization of Federal Funding of the Vineland Area Tributary to Arkansas River Watershed

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the deauthorization of Federal funding of the Vineland Area Tributary to Arkansas River Watershed, Pueblo County, Colorado.

The environmental assessment of this action indicates that deauthorization of Federal funding of the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Robert G. Halstead, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this action.

The watershed project, which included a combination of land treatment and structural measures, will not be completed and will not contribute to soil and water conservation, watershed protection or flood prevention of the area.

This notice of intent not to file an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment is on file and may be reviewed by contacting Mr. Robert G. Halstead, State Conservationist, P.O. Box 17107, Denver, Colorado 80217, 303–837–4275.

An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy request at the above address.

No administrative action on implementation of the proposal will be taken on or before August 20, 1979.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program, Public Law 83–566, 16 U.S.C. 1001–1008.)

Dated: June 11, 1979.

Joseph W. Haas,

Assistant Administrator for Water Resources, Soil Conservation Service.

1978 Survey of the Consumption of Selected Hydrocarbon, Coal, and Coke Materials by Manufacturers; Determination

In conformity with title 13, United States Code, sections 182, 224, and 225, and due notice having been published on March 29, 1979 (44 FR 18720), I have determined that the data collected on this survey will provide needed information on the consumption of fuels for nonenergy purposes. This information will be used as an aid in various policy development activities by the Department of Energy. This information will supplement the data on fuels used for heat and power that are collected in the annual survey of manufactures, Form MA-100. Therefore, these data will be useful to both the public and private sectors for a variety of analytical purposes related to energy supply and usage. They are not available in the form requested from nongovernmental or other governmental sources.

This survey will request data concerning selected hydrocarbon material consumption, produced and consumed fuels, fuel oil stocks, and coal and coke stocks.

Data will be collected on an establishment basis from a subsample of the annual survey of manufactures. The sample will consist of approximately 3,300 establishments.

Copies of the report forms are available upon request to the Director, Bureau of the Census, Washington, D.C. 20233.

I have, therefore, directed that this survey be conducted for the purpose of collecting the data hereinabove described.

Dated June 14, 1979.

National Bureau of Standards

Clinical Thermometers; Voluntary Product Standard Action of Withdrawal

In accordance with § 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10), notice is hereby given of the withdrawal of Voluntary Product Standard PS 39-70, "Clinical Thermometers (Maximum-Self-Registering, Mercury-in-Glass)."

This withdrawal action is being taken for the reason that PS 39-70 is adequately covered by the American Society for Testing and Materials' standard ANSI/ASTM E 667-79, "Standard Specification for Clinical Thermometers (Maximum Self-Registering, Mercury-in-Glass)," and duplication is inappropriate and not in the public interest. This action is taken in furtherance of the Department's announced intentions as set forth in the public notice appearing in the **Federal Register** of April 4, 1979 (44 FR 20237) to withdraw this standard.

The effective date for the withdrawal of this standard will be August 20, 1979. This withdrawal action terminates the authority to refer to this standard as a voluntary standard developed under the Department of Commerce procedures.

Dated: June 14, 1979.

Ernest Ambler,

Director.

National Laboratory Accreditation Criteria Committees for Thermal Insulation Materials and Freshly Mixed Field Concrete; Open Meetings

The National Laboratory Accreditation Criteria Committee for Thermal Insulation Materials (NLACC–1) and the National Laboratory Accreditation Criteria Committee for Freshly Mixed Field Concrete (NLACC–2) will hold a joint meeting on July 9–10, 1979, in the Main Commerce Building, 14th Street and Constitution Avenue, N.W., Washington, D.C. (public entrance to the building is on 14th Street, between Constitution Avenue and E Street, N.W.). The Committees will meet jointly from 10:00 a.m. to 5:00 p.m. on July 9 in Room B841 and separately from 9:00 a.m. to 5:00 p.m. on July 10 (NLACC–1) in Room 3708 and NLASS–2 in Room B841).

Tentative agenda items include:

1. Briefing on the implementation of the criteria for the thermal insulation materials program including experiences of using the questionnaires, the on-site examinations, and the proficiency testing programs.

2. Review of the fundamental differences in the criteria recommended by the two Committees.

3. Consideration of possible changes in each Committee's recommendations.

The meeting will be open to public observation. The public may submit written statements or inquiries to the Chairman before or after the meeting. A limited number of seats will be available to the public and to the press on a first-come, first-served basis.

Copies of the minutes and material distributed will be made available for reproduction, following certification by the Chairman, in accordance with the Federal Advisory Committee Act, at Room 3876, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

Additional information may be obtained from Mr. Peter S. Unger, Assistant Coordinator, National Voluntary Laboratory Accreditation Program, Room 3876, U.S. Department of Commerce, Washington, D.C. 20230, telephone: 202–377–5872.

Dated: June 13, 1979.

Jordan J. Baruch,

Assistant Secretary for Science and Technology.

BILLING CODE 3510-13-M

DEPARTMENT OF DEFENSE

Defense Science Board Summer Study Panel on Comprehensive Test Ban; Advisory Committee Meeting

The Defense Science Board Summer Study Panel on the Comprehensive Test Ban (CTB) will meet in closed session on July 19–20, 1979 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

A meeting has been scheduled for July 19–20, 1979 to further organize the Defense Science Board Panel on the Comprehensive Test Ban and to examine stockpile reliability and endurance, and the weapon science and technology base. This Panel will also discuss plans for future consideration of the scientific and technical aspects of the CTB in preparation for the Summer Study.

In accordance with 5 U.S.C. App. I 10(d) (1976), it has been determined that this Defense Science Board Summer Study Panel meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly this meeting will be closed to the public.

H. E. Lofdahl,

Director, Correspondence and Directives, Washington Headquarters Service, Department of Defense.

June 14, 1979.

BILLING CODE 3810-70-M

Federal Voting Assistance Program

AGENCY: Office of the Secretary of Defense.

ACTION: Notice of Intent.

SUMMARY: This notice of intent is to revise the Federal Post Card Application form to be used for absentee voting in accordance with the Federal Voting Assistance Act of 1955 and the Overseas Citizens Voting Rights Act of 1975 as amended. Individuals covered by these Acts are as follows:

(a) a member of the armed forces or merchant marine in active service;

(b) a spouse or dependent of (a) above;

(c) a U.S. citizen temporarily residing outside U.S.;

(d) a spouse or dependent residing with (c) above;

(e) U.S. citizen overseas by virtue of employment;

(f) a spouse or dependent residing with (e) above;

(g) other U.S. citizen residing outside United States.

Pub. L. 95–593 requires the Presidential designee, currently the Secretary of Defense, to design a single form of postcard application for registration to vote and for an absentee ballot request. The same law recommends that each State accept any official postcard which is duly executed by citizens covered by the Acts as a simultaneous application for registration and for absentee ballot. This proposed change incorporates the information submitted by the States to meet the requirement set forth by PL 95–593.

DATES: Comments must be received on or before July 20, 1979.

ADDRESSES: Federal Voting Assistance Program, Office of the Secretary of Defense, Pentagon, Room 1B457, Washington, D.C. 20301.

FOR FURTHER INFORMATION CONTACT: Henry Valentino, Director, Federal Voting Assistance Program, Ext. 695–9330 or 697–6125.

H. E. Lofdahl,

Director, Correspondence and Directives, Washington Headquarters Service, Department of Defense.

June 14, 1979.

BILLING CODE 3810-70-M

POST CARD REGISTRATION AND ABSENTEE BALLOT REQUEST

INSTRUCTIONS

A. TYPE or PRINT LEGIBLY all entries before signing. The term *appropriate U.S. Official* as used herein refers to Unit Voting Officers or Counsellors, Commanding Officers, U.S. Embassy or U.S. Consul Officers or any other official who has access to the Voting Assistance Guide.

B. A detailed Voting Assistance Guide is published each even numbered year. It contains voting information for all States, U.S. territories and the District of Columbia. The Voting Assistance Guide is distributed to all Unit Voting Officers, Commanding Officers, U.S. Embassies and Consulates and State Election Officials. Copies of the Voting Assistance Guide are available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

C. The information to be listed on this form will allow each State to accept it as an application for registration or request for absentee ballot or both. If you omit any items, be sure to consult with appropriate U.S. Officials BEFORE mailing an incomplete application. An incomplete application may invalidate your request.

D. Privacy Act Statement: Authority: 50USC1451, 42USC1973, EO10646, 10USC133. The principal purposes and uses of this form are to serve as an application or request for registration or request for absentee ballot and for voter identification and authentication in registration records. Disclosure of all information on this form is voluntary. However, your failure to provide the necessary information may preclude the pertinent State or other jurisdiction from processing this form and may possibly prevent you from exercising your right to vote absentee.

E. Passport or I.D. Card number is preferred, however, an alternative form of identification may be acceptable if you do not possess a valid passport or card of identity and registration. Indicate the type of identification used such as driver's license, birth or baptism certificates, or marriage certificate.

F. Some States require a separate application for registration and for each election. If you circle (All as permitted), you will receive those ballots permitted by State law. Consult the *appropriate U.S. Official* for specific information concerning your State. If you circle either (Primary), (Special), or (General) and you are eligible to vote, you will receive a ballot for the election circled only.

G. Party choice is secret in Primary Elections in the following States: Alaska, Idaho, Louisiana, Michigan, Minnesota, Montana, North Dakota, Utah, Vermont, Washington, Wisconsin. You do not have to disclose your political party preference for a Primary Election ballot in these States.

H. Most States allow military personnel and U.S. citizens outside the United States to vote absentee in State and local, as well as Federal elections. However, in a few States, you may be liable for State or local taxes if you vote in State or local elections. The exercise of any right to register or vote in Federal elections by any U.S. citizen outside the United States shall not affect the determination of his place of residence or domicile for purposes of any tax imposed under Federal, State or local law. Consult the *appropriate U.S. Official* for specific information concerning your State. If you request a Federal Ballot only and receive a full ballot (Federal and State or local) because some States do not print a Federal Ballot, you may vote the full ballot without incurring a tax liability.

I. In most States, checking any box 12(a) through (f) will entitle you to a full ballot. A U.S. citizen temporarily residing outside the U.S. means that at some future time the voter intends to reside again in the State where application is being made. Civilian employees of the Federal government assigned to an overseas area are covered by category 12(c).

J. All citizens, not employed by the Federal government, who are overseas by virtue of their employment including missionaries and students should check box 12(e).

K. Other U.S. citizen means all civilians not covered by any other listed category who are outside the U.S. in a private capacity such as retirees or persons on extended travel or vacation.

L. If you have not voted before, enter "Not Applicable." If you were registered in a precinct other than the one you are now claiming, you should complete this item. This will help transfer your registration records. If you don't remember the information, then indicate the approximate year and enter "unknown" in the other spaces.

M. Many States require this affirmation. If you have been convicted of a felony or been adjudicated mentally incompetent, some States have provisions for a pardon in order to reinstate voting rights. Consult the appropriate State Governor for reinstatement of your voting rights. If you need to know which States require this affirmation, consult the *appropriate U.S. Official* for further information.

N. Not all States require completion of the Oath or Notary provision in item 19. If completion of this item presents an undue hardship, consult the *appropriate U.S. Official* to determine if this is a requirement for your State.

O. Address the card to the proper county, township or State official. Consult with the *appropriate U.S. Official* to determine the correct address for your application.

P. Foreign airmail postage must be affixed if mailed in a foreign postal facility. No postage is required for this card if mailed in a U.S. postal facility, APO, FPO or Embassy or Consulate.

(Keep this portion of the card for your records.) Date Mailed: _____

(Mail this portion of the card to proper addressee.)

NOTICE: ILLEGIBLE OR INCOMPLETE INFORMATION MAY DELAY OR INVALIDATE YOUR REQUEST

POST CARD APPLICATION FOR ABSENTEE BALLOT

APPLICATION FOR STATE OF _____ COUNTY OF _____ SS _____

(1) _____
(TYPE OR PRINT FULL NAME—(First, Middle, Last))

(2) My home residence is (or for citizens checking 12(g), my last residence immediately prior to my departure from the United States):

_____
(Number and Street or Rural Route)

_____ _____
(City, Town, or Village) (County or Parish)

_____ _____
(State) (Zip Code)

(3) I am a United States Citizen, born on _____
(Day, Month, Year)

(4) Place of Birth _____

(5) If Naturalized:

(a) Place _____ Date _____

(b) Naturalization No. _____

(6) Sex _____, Height _____, Weight _____

Hair Color _____, Eye Color _____

(7) Social Security No. _____
See instruction D

(8) Other Identification No.: _____
(Passport, I.D. Card, etc. See instruction E)

(9) I request registration (if required) and absentee ballot(s) to vote in the coming election(s):
Circle applicable election(s) (See instruction F)
(Primary) (Special) (General) (All as permitted)

(10) For primary election ballot, my political party preference is _____
(If party choice is secret for primary in this State do not answer, see instruction G).

(11) Check one box (see instruction H)
☐ (a) I request Federal, State and Local ballot, if I am entitled.
☐ (b) I request only Federal election ballot if provided separately by State.

(12) I am: (check applicable box—see instruction I)
☐ (a) a member of the armed forces or merchant marine in active service
☐ (b) a spouse or dependent of (a) above
☐ (c) a U.S. citizen temporarily residing outside U.S.
☐ (d) a spouse or dependent residing with (c) above
☐ (e) U.S. citizen overseas by virtue of employment (See instruction J)
☐ (f) a spouse or dependent residing with (e) above
☐ (g) other U.S. citizen residing outside U.S. (See instruction K)

(13) Please mail my ballot to this address: (include zip code if applicable and ensure military or foreign address is complete)

_____

_____

_____

(14) I am not requesting a ballot from or voting in any other U.S. State, territory or possession in this election.

(15) The last time I voted was in _____
County or Township

_____
(State) (Year)

Voter Registration No., if known: _____
(See instruction L)

(16) I have not been convicted of a felony or been adjudicated mentally incompetent. (If so, see instruction M)

(17) I swear or affirm, under penalty of perjury, that the above information is true and complete.

(18) _____
(Signature of person requesting ballot)

OATH IF REQUIRED BY STATE (See instruction N)

(19) Subscribed and sworn to before me on _____
(Day, Month, Year)

_____ SEAL
(Signature of official administering oath)

_____
(Typed or printed name of official administering oath)

_____
(Title or rank, and organization of administering official)

DEPARTMENT OF ENERGY

Bonneville Power Administration

Okanogan Area Service Draft Facility Planning Supplement to Final Environmental Statement; Public Meetings

The Bonneville Power Administration (BPA) hereby gives notice of public meetings to be held to discuss and solicit comments on the Okanogan Area Service Draft Facility Location Supplement. This environmental statement supplements BPA's Final Fiscal Year 1976 Proposed Program EIS (DOI/FES 75-79) and was prepared pursuant to DOE's implementation of the National Environmental Policy Act of 1969. This supplemental statement assesses the anticipated impacts associated with the construction of approximately 63 miles of 230-kV transmission line from the Chief Joseph/Foster Creek Substations to the Tonasket Substation, and a new substation near Chillowist, Washington. Alternatives to the proposal, including nonconstruction, are also discussed.

Public information meetings will be held at the following locations:

July 24, 1979, Oak County PUD Auditorium, Okanogan, Washington, 7:00 p.m.
July 25, 1979, Brewster Grange Hall, Brewster, Washington, 7:00 p.m.

All interested parties are urged to attend. All comments are welcome in order to fully assist the agency in evaluating the environmental factors pertinent to this proposal. Comments will be considered in the preparation of the Okanogan Area Service Final Facility Location Supplement.

For those who cannot attend the meetings, written comments will be accepted until the close of comment date August 6, 1979. Copies of the environmental statement, as well as additional or clarifying information, may be obtained by writing or calling the Environmental Manager's Office, Bonneville Power Administration, P.O. Box 3621, Portland, OR 97208, 503-234-3361, extension 5137,

Dated at Portland, Oregon, this 11th day of June 1979.

Sterling Munro,
Administrator.

BILLING CODE 6450-01-M

Public Utility Regulatory Policies Act; Hearings

AGENCY: Department of Energy. Bonneville Power Administration (BPA).

ACTION: Notice of Hearings Respecting Ratemaking Standards.

SUMMARY: Bonneville Power Administration (BPA) will hold hearings on July 19, 1979, to consider and determine whether or not it is appropriate to implement standards for ratemaking concerning cost of service, declining block rates, time-of-day rates, seasonal rates, interruptible rates, and load management techniques, as provided by Section 111 of the Public Utility Regulatory Policies Act (PURPA, Pub. L. 95-617).

DATES: Public hearings concerning the adoption of ratemaking standards will be held Thursday, July 19, 1979, in the Auditorium, Bonneville Power Administration Headquarters Building, 1002 NE. Holladay street, Portland, Oregon, commencing at 9 a.m. and at 7 p.m.

SUPPLEMENTAL INFORMATION: PURPA Section 111 requires certain nonregulated electric utilities to consider certain specified standards for ratemaking and to make a determination concerning whether or not it is appropriate to implement such standards for its ratemaking. The consideration is required to be after a public hearing; the announced hearing is the public hearing for such purpose. Written and oral evidence will be accepted at the hearing. And the determination concerning whether to implement standards must be based upon such evidence.

SUBJECT OF HEARINGS: The Federal standards which must be considered and which define the scope of this hearing are specified by Section 111(d) of PURPA. The electric consumers with which these standards are concerned include any person, state agency, or Federal agency to which electric energy is sold by BPA. The standards proposed by PURPA raise issues which are to be considered and determined as a result of these hearings. The proposed standards generally provide that:

(1) *Cost of Service*—Rates to each class of consumers shall be designed to the maximum extent practicable to reflect the costs of providing service to that class. Section 115(a) establishes certain special factors upon which to base rates for consideration of this proposed standard. These special factors generally require that cost-of-service determinations take into account the changes in costs associated with daily and seasonal time of use. The cost of adding more generating capacity and of delivering additional energy also are to be taken into consideration.

(2) *Declining Block Rates*—Declining block energy charges that are not cost based shall be eliminated.

(3) *Time-of-Day rates*—Time-of-day rates shall be established if cost effective where costs vary by time of day.

(4) *Seasonal Rates*—Seasonal rates shall be established where costs vary by season.

(5) *Interruptible Rates*—Interruptible rates based on the costs of providing interruptible service shall be offered to commercial and industrial customers.

(6) *Load Management Techniques*—Load management techniques shall be offered to consumers where practicable, cost-effective, reliable, and useful to the utility for energy or capacity management.

PROCEDURE OF HEARING: Persons desiring to appear and make statements shall present themselves, in person or by counsel, at the beginning of the hearing at 9 a.m. or 7 p.m., July 19, 1979.

The hearing will be presided over by a hearing officer designated by the Administrator of BPA.

The hearing officer will disclose at the beginning of the hearing any additional rules necessary for insuring an orderly procedure. The hearing will be transcribed and copies of the transcript may be ordered at cost from the Office of General Counsel, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon 97208.

Written data, views and comments on the standards are also requested from the public. All written material received by BPA before 4:30 p.m. on August 20, 1979, will be made part of the official record and will be considered by BPA.

The BPA Branch of Rates has prepared written statements concerning

the standards; these statements will be made part of the official record and are available to the public upon request. The statements will include information concerning the standards and a summary of comments received from the public on BPA's proposed 1979 Wholesale Power Rates which may be useful to the public in developing its views and recommendations for the BPA Administrator's consideration. Copies of the staff statement are available from Donna Lou Geiger, Public Involvement Coordinator, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212, or from BPA's Area and District Offices, located as follows: Spokane Area Office, Room 561, U.S. Court House, Spokane, Washington 99201; Kalispell District Office, Box 758, Kalispell, Montana 59901; Wenatchee District Office, Room 314, U.S. Federal Building, 301 Yakima Street, P.O. Box 741, Wenatchee, Washington 98801; Portland Area Office, Lloyd Plaza Building, 919 NE. 19th Avenue, Room 201, P.O. Box 3621, Portland, Oregon 97208; Eugene District Office, U.S. Federal Building, Room 206, 211 East 7th Street, Eugene, Oregon 97401; Seattle Area Office, 415 First Avenue North, Room 250, Seattle, Washington 98109; Walla Walla Area Office, West 101 Poplar, P.O. Box 1516, Walla Walla, Washington 99362; Idaho Falls District Office, 531 Lomax Street, P.O. Box 2568, Idaho Falls, Idaho 83401.

The official record of the proceedings will consist of the verbatim transcript of the hearings and copies of all written material submitted within the time set forth above. The summary of the record will be prepared by the hearings officer and will be transmitted to the BPA Administrator along with the complete record. The record will be used by the Administrator in making the determinations required by Section 111 of the Public Utility Regulatory Policies Act of 1978.

Individual copies of the record will be available to the public at cost of reproduction. Copies will also be kept on file for public inspection at BPA's Area and District Offices and at the Office of the Public Involvement Coordinator, Room 494, Bonneville Power Administration Building, 1002 NE. Holladay Street, Portland, Oregon.

WRITTEN COMMENTS: Written comments will be accepted before the hearing and until 4:30 p.m., August 20, 1979, and may be delivered or mailed to Ms. Donna Lou Geiger, Public Involvement Coordinator, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212.

CONSUMER REPRESENTATION: Any person may appear at this hearing either in person or by an attorney or both.

As provided by Section 122 of PURPA, Pub. L. 95-617, November 9, 1978, if no alternative means for assuring representation of electric consumers is provided, and if an electric consumer of BPA substantially contributes to the approval, in whole or in part, of a position advocated by such consumer at these hearings and relating to any of the subjects of this hearing, BPA will compensate such consumer for reasonable attorney fees, expert witness fees, and other reasonable costs incurred in preparation and advocacy of such position in this hearing.

A notice of intention to claim such fees and costs shall be presented in writing before the close of the hearing. Those electric consumers of BPA who are found to be entitled to such fees and costs under Section 122(a) of PURPA will be so notified and required thereafter to file a written claim. The written claim shall be on oath and shall state (1) the names and addresses of the consumer and of his attorney, (2) a recitation of the entire fee contract made between the consumer and his attorney and witness, (3) a detailed statement of the time and charges of the attorney or witness or both for which reimbursement is sought, (4) an itemization of any other costs for which reimbursement is sought, and (5) information as to the financial situation of the consumer.

The determination as to what, if any, attorney fees, witness fees, and costs will be reimbursed by BPA will be included in the final order or determination in these proceedings. Payment to be made will be processed in due course thereafter and mailed to the consumer, or his attorney, or both.

FURNISHING INFORMATION: BPA will furnish information on the PURPA standards in accordance with the Freedom of Information Act.

FOR FURTHER INFORMATION CONTACT: Ms. Donna Lou Geiger, Public Involvement Coordinator, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212; 503-234-3361, extension 4261.

BPA also has toll-free information lines for use by the public in the region. The toll-free numbers are: Oregon 1-800-452-5978 or 452-8429; Washington, Idaho, Montana, Utah, Wyoming, California, and Nevada, 1-800-547-5977 or 547-6048.

George E. Bell,
Assistant Administrator.

Chevron Chemical Co.; Amendment to Experimental Use Permit Issued

On Thursday, September 29, 1977 (42 FR 28716), information appeared pertaining to the issuance of an experimental use permit, No. 239-EUP-68, to Chevron Chemical Company. At the request of the company, that permit has been amended. The experimental use permit now allows the use of *cis-N*-[(1,1,2,2-tetrachloroethyl)thio]-4-cyclohexene-1,2-dicarboximide (captafol) on potatoes to evaluate control of late and early blight. A total of 306 acres is involved; the program is authorized only in the States of California, Colorado, Idaho, Michigan, Nebraska, Oregon, Washington, Wisconsin, and Wyoming. The experimental use permit is effective from October 31, 1978 to October 31, 1979. A permanent tolerance for residues of the active ingredient in or on potatoes has been established (40 CFR 180.267). (PM-21, Henry Jacoby, Room E-305, Telephone: 202/755-2562)

(Section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).)

Dated: June 12, 1979.

Douglas D. Campt,
Director, Registration Division.

BILLING CODE 6560-01-M

[FRL 1251-2]

Fuel Economy Retrofit Devices Evaluation of Retrofit Device

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Retrofit Device Evaluation.

SUMMARY: This announcement summarizes the conclusions of the EPA following evaluation of the "Malpassi Filter King" under the provisions of Section 511 of the Motor Vehicle Information and Cost Savings Act.

FOR FURTHER INFORMATION CONTACT:
Peter Hutchins, Emission Control Technology Division, Office of Mobile Source Air Pollution Control, Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, Michigan 48105, 313–668–4310.

SUPPLEMENTAL INFORMATION:
Background: Section 511(b) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2011(b)) requires that:

(b)(1) Upon application of any manufacturer of a retrofit device (or prototype thereof), upon the request of the Federal Trade Commission pursuant to subsection (a), or upon his own motion, the EPA Administrator shall evaluate, in accordance with rules prescribed under subsection (d), any retrofit device to determine whether the retrofit device increases fuel economy and to determine whether the representations (if any) made with respect to such retrofit device are accurate.

* * * * *

(c) The EPA Administrator shall publish in the Federal Register a summary of the results of all tests conducted under this section, together with the EPA Administrator's conclusions as to—

(1) the effect of any retrofit device on fuel economy;

(2) the effect of any such device on emissions of air pollutants; and

(3) any other information which the Administrator determines to be relevant in evaluating such device.

On November 8, 1977, the EPA received a request from Peter Francis Coulter and Richard Harding Serivenen of Toronto, Canada, for evaluation of a fuel saving device termed the "Malpassi Filter King." An evaluation has been made and the results are described completely in an EPA report entitled "EPA Evaluation of 'Malpassi Filter King' under Section 511 of the Motor Vehicle Information and Cost Savings Act." Copies of this report are available upon request.

Summary of Evaluation: The basic conclusion following review of testing by other organizations is that the device does not have large scale applicability for improvement of fuel economy for different types of vehicles. The only reported testing performed in accordance with the Federal Emissions Test Procedure and Highway Fuel Economy Test, performed by American Motors Corporation, identified driveability problems and associated safety concerns which detracted from the universal applicability of the device as a fuel economy improver. However, because the device may potentially benefit fuel economy for certain types of vehicles, the applicant is encouraged to carry out testing designed to identify particular vehicles whose fuel economy is improved by the device. If vehicles are identified which respond favorably with respect to fuel economy while retaining their emissions control capabilities, the applicant is advised to focus on these vehicles only in advertising the product and to refrain from making sweeping claims as to applicability to all vehicles.

The emissions impact of the device has been evaluated independently by the California Air Resources Board, who determined that installation of the device did not reduce the effectiveness of motor vehicle pollution control devices.

Dated: June 13, 1979.

David G. Hawkins,

Assistant Administrator for Air, Noise and Radiation.

BILLING CODE 6560-01-M

[OPP-C30167; FRL 1251-7]

Pesticide Programs; Receipt of Applications to Conditionally Register Pesticide Products Containing New Active Ingredient

Applications have been submitted to the Environmental Protection Agency (EPA) to conditionally register pesticide products containing an active ingredient which has not been included in any previously registered pesticide products. Notice of these applications is given pursuant to the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1972, 1975 and 1978 (92 Stat. 819; 7 U.S.C. 136) and regulations thereunder (40 CFR 162). Notice of receipt of these applications does not indicate a decision by the Agency on the applications.

Interested persons are invited to submit written comments on these applications. Comments may be submitted, and inquiries directed, to Product Manager (PM) 23, Ms Willa Garner, Room E–351, Registration Division (TS–767), Office of Pesticide Programs, EPA, 401 M St., SW, Washington, DC 20460, telephone number 202/755–1397. The comments must be received on or before July 19, 1979 and should bear a notation indicating the EPA file symbol number of the application to which the comments pertain. Comments received within the specified time period will be considered before a final decision is made; comments received after the specified time period will be considered only to the extent possible without delaying the processing of the application. The labels furnished by each applicant, as well as all written comments filed pursuant to this notice, will be available for public inspection in the Product Manager's office from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Notice of approval or denial of the applications to register pesticide products will be announced in the **Federal Register**. Except for such material protected by Section 10 of FIFRA, the test data and other information submitted in support of registration as well as other scientific information deemed relevant to the registration decision may be made available after approval under the provisions of the Freedom of Information Act. The procedures for requesting such data will be given in the **Federal Register** if an application is approved.

Dated: June 14, 1979.

Douglas D. Campt,

Director, Registration Division.

Applications Received

EPA File Symbol 43142–R. Boots Hercules Agrochemicals Co., 910 Market St., Wilmington, DE 19899. ANTOR HERBICIDE FOR MANUFACTURING USE ONLY. Active Ingredient: *Diethatyl ethyl [N–chloroacetyl–N–(2,6–diethyl phenyl) glycine, ethyl ester* 90%. PM23–Ms Willa Garner, Room E–351.

EPA File Symbol 43142–E. Boots Hercules Agrochemical Co. ANTOR HERBICIDE 4 LB/GALLON EMULSIFIABLE SOLUTION. Active Ingredient: Diethatyl ethyl 36%. Application proposes that this product be classified for general use as a preemergence control of certain weeds. PM23.

BILLING CODE 6560-01-M

[PP 9G2173/T208; FRL 1251–5]

Pesticide Programs; Establishment of a Temporary Exemption From the Requirement of a Tolerance; n-Tetradecyl Formate

Hercon Products Group, Herculite Products, Inc., 1107 Broadway, New York, NY 10010, submitted a pesticide petition (PP 9G 2173) to the Environmental Protection Agency (EPA). This petition requested that a temporary exemption from the requirement of a tolerance be established for residues of the insecticide *n*-tetradecyl formate in or on the raw agricultural commodity cottonseed when used as a pheromone to disrupt mating in bollworm, and tobacco budworm.

Establishment of this temporary exemption will permit the marketing of the above raw agricultural commodity when treated in accordance with an experimental use permit (8720–EUP–7)

that has been issued under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

An evaluation of the scientific data reported and other material showed that the requested temporary exemption was adequate to protect the public health. The temporary exemption has been established for the pesticide, therefore, with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. Hercon Products Group must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance, and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary exemption expires April 3, 1980. Residues remaining in or on the cottonseed after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary exemption. This temporary exemption may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Mr. Franklin Gee, Product Manager 17, Registration Division (TS–767), Office of Pesticide Programs, 401 M St., SW, Washington, DC 20460 (202/426–0425).

Statutory Authority: Section 408(j) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 346a(j)].

Dated: June 14, 1979.

Douglas D. Campt,

Director, Registration Division.

[FR Doc. 79-19067 Filed 6-18-79; 8:45]

BILLING CODE 6560-01-M

[PP 6G1667/T209; FRL 1250–4]

Pesticide Programs; Renewal of Temporary Tolerances for Tebuthiuron

On July 8, 1977, the Environmental Protection Agency gave notice (42 FR 35186) that in response to a pesticide petition (PP 6G1667) submitted to the Agency by Elanco Products Co., Div. of Eli Lilly and Co., P.O. Box 1750, Indianapolis, IN 46206, temporary tolerances were established for combined residues of the herbicide tebuthiuron (*N*-[5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl]-*N,N'*-dimethylurea) and its metabolites in or on the raw agricultural commodities grasses (pasture and rangeland) and grass hay at 20 parts per million (ppm); in kidney and liver of cattle, goats, horses, and sheep at 2 ppm; in milk at 0.3 ppm; and in the meat, fat, and meat byproducts (except kidney and liver) of cattle, goats, horses, and sheep at 0.25 ppm. These temporary tolerances expired June 15, 1978.

Elanco Products Co. requested a one-year renewal of these temporary tolerances both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of an experimental use permit (1471–EUP–43) that has been renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and all other relevant material were evaluated, and it was determined that renewal of the temporary tolerances would protect the public health. Therefore, the temporary tolerances have been renewed on condition that the pesticide is used in accordance with the experimental use permit with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. Elanco Products Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire May 14, 1980. Residues not in excess of these temporary tolerances remaining in or on the above raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Mr. Robert Taylor, Product Manager 25, Registration Division (TS–767), Office of Pesticide Programs, 401 M St., SW, Washington, DC 20460 (202/755–7013).

Statutory Authority: Section 408(j) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 346a(j)].

Dated: June 12, 1979.

Douglas D. Campt,

Director, Registration Division.

[FRL 1251–1]

Underground Injection Control; List of States Requiring Programs

AGENCY: Environmental Protection Agency.

ACTION: Notice of Amended List of States Requiring Underground Injection Control (UIC) Programs.

SUMMARY: § 1422(a) of the Safe Drinking Water Act requires the Administrator of the Environmental Protection Agency to list in the **Federal Register** "* * * each State for which in his judgment, a State Underground Injection Control (UIC) program may be necessary to assure that underground injection will not endanger drinking water sources." For those States listed, the Act requires the development of programs to protect underground drinking water sources. EPA listed 22 States on September 25, 1978 (43 FR 43420); today, EPA adds 17 States to that list.

DATES: Comments are due August 20, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas E. Belk, Office of Drinking Water (WH–550), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, Telephone No. (202) 426–3934.

SUPPLEMENTARY INFORMATION: Section 1421 of the Safe Drinking Water Act (P.L. 93–523 as amended by P.L. 95–190) requires the Administrator of the Environmental Protection Agency (EPA) to publish regulations which contain minimum requirements for State programs to prevent underground injection which endangers drinking water sources. Such regulations were reproposed on April 20, 1979 (44 FR 23738).

§ 1422(a) of the Act further requires the Administrator to "* * * list in the **Federal Register** each State for which in his judgment a State underground injection control program may be necessary to assure that underground injection will not endanger drinking water sources * * *." Section 1422(b)

requires each listed State, within 270 days from the date of final promulgation of the "minimum requirements" regulations under Section 1421, to submit an application to the Administrator with a plan to implement a UIC program in response to these requirements. The Administrator may, for good cause, extend the date for submission of an application of any State for an additional 270 days.

If the Administrator approves the State's application, the State shall have primary enforcement responsibility for its program (Section 1422(b) (3)). If the Administrator disapproves an application in whole or in part, if a State fails to make application within the allowed time, or if the Administrator subsequently determines that a State's program no longer meets the conditions for primacy, the Administrator must prescribe a program applicable to such State within 90 days after the date of such disapproval under Section 1422(a).

On September 25, 1978 (43 FR 43420), EPA Listed 22 States under § 1422(a) for participation in the UIC program. Today, EPA amends that initial list.

Amended List of States Requiring A State Underground Injection Control Program

In addition to the 22 States listed on September 25, 1978 and to the listing of one other State, Maryland, on April 11, 1979, the following seventeen States are hereby listed as requiring a State underground injection control program to assure that underground injection will not endanger drinking water sources.

Alabama	North Carolina
Georgia	North Dakota
Hawaii	Oregon
Massachusetts	South Carolina
Minnesota	Tennessee
Missouri	Virginia
Montana	Washington
Nebraska	Wisconsin
New Jersey	

States that are listed may apply for Federal financial assistance for developing and implementing the Underground Injection Control Program in accordance with regulations entitled "State Underground Water Source Protection Program Grants" issued on October 12, 1978, 43 FR 47130.

Methodology for Designation of States

In the September 25, 1978, Federal notice, EPA explained many options and numerous models in its desire to fashion an objective and quantifiable methodology for ranking States' needs for the underground injection control (UIC) programs. The agency ultimately selected seven criteria relating to both the relative importance of ground water resource and potential endangerment caused by various injection practices. These seven criteria determined the ranking of all 57 States and territories. The first 22 States listed headed the list, i.e. they had the greatest need for UIC programs. The 17 States added today are the next group of States as determined by that initial ranking. For a full discussion of the methodology which EPA used to determine this ranking of need, please see the September 25, 1978 notice (43 FR 43420).

Public Comments:

Although the Act does not require public comment on listings under Section 1422(a), it is EPA's policy to provide for public participation in its decisions. Accordingly, EPA is soliciting written public comments on today's action. Comments should be sent to Thomas E. Belk at the address noted above. EPA will consider all comments carefully, and issue a response in the **Federal Register** which either reconfirms today's list or makes appropriate revisions in the light of the comments. EPA will accept comments until August 20, 1979.

During the comment period, any State which is not now listed may ask to be included. EPA will carefully consider any such request which indicates a State's commitment to develop an approvable program under Section 1421 in a timely fashion.

Dated: June 14, 1979.

Douglas M. Costle,

Administrator.

Water Quality Criteria; Corrections

In FR Doc. 79-7647, Thursday, March 15, 1979 at 44 FR 15936, EPA published and invited comment on Water Quality Criteria. In that document a number of errors appeared which needed correction. The corrections were published in FR Doc. 79-15191, May 16, 1979 at 44 FR 28716. One error still needs correction and it is listed below.

1. Appendix C, page 15980, left column, fourth equation,

$B_H = B^3\sqrt{\frac{70}{w}}$ is incorrect; the correct mathematical expression is:

$$B_H = B_A\sqrt[3]{\frac{70}{w}}.$$

Dated: June 13, 1979.

Thomas C. Jorling,

Assistant Administrator.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Board of Visitors for the National Academy for Fire Prevention and Control; Open Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following committee meeting:

Name: Board of Visitors for the National Academy for Fire Prevention and Control (Board).

Dates of meeting: July 10-12, 1979.

Place: Conference Room, Administration Building (Building E), National Fire Academy, Emmitsburg, Maryland.

Times: 9:00 a.m. to 5:00 p.m., Tuesday thru Thursday.

Proposed agenda: July 10, 1979: Introductory remarks; Academy budget 1980 and 1981; Overview of Academy progress; Report of Planning Task Force; Report on curriculum delivery and delivery systems; Academy administrative services; Review of Open University; Review of Outreach programs. July 11, 1979: Round table question and answer discussion; Tour of Academy facilities. July 12, 1979: Briefing on Opening Symposium; Administrative items.

The meeting will be open to the public, with approximately 20 seats available on a first-come, first-served basis. Members of the general public who plan to attend the meeting should contact Ms. Jane Sornberger, National Fire Academy, Route 1, Box 10A, Emmitsburg, Maryland 21727 (301-447-6117) on or before July 3, 1979.

Minutes of the meeting will be prepared by the Board and will be available for public viewing in the Superintendent's Office, Administration Building, National Fire Academy, Emmitsburg, Maryland. Copies of the minutes will be available upon request 30 days after the meeting.

Dated: June 14, 1979.

Gordon Vickery,

Administrator, United States Fire Administration.

BILLING CODE 4210-23-M

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Fedefal Maritime Commission, 1100 L Street, N.W., Room 10423 or may inspect the agreements at the Field Offices located at New York, N.Y.; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before July 9, 1979. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No.: T-3812.

Filing Party: Jerry A. Ganey, Administrative Assistant, North Carolina Ports Authority, P.O. Box 3248, Wilmington, North Carolina 28406.

Summary: Agreement No. T-3812 is a lease agreement between the North Carolina Ports Authority (Authority) and Harrington and Company, Inc. (Harrington) covering the lease of approximately four (4) acres of hardstand area at the Port of Wilmington. The leased premises are to be used for the general activities of Harrington, as a containership service.

When and if approved by the Commission, this agreement will supersede and cancel the presently approved Agreement No. T-3363, approved November 15, 1976.

Agreement No.: T-3814.

Filing Party: H. H. Wittren, Manager, Waterfront Real Estate, Port of Seattle, P.O. Box 1209, Seattle, Washington 98111.

Summary: Agreement No. T-3814 between the Port of Seattle (Port) and Seacon Terminals, Inc. (Seacon) provides for the one-year lease by the Port to Seacon of approximately 15 acres of container terminal facilities at Pier 42 together with the preferential use of Port-owned cranes.

Agreement No. 5600-38.

Filing Party: Charles F. Warren, Esq., Warren & Associates, P. C., 1100 Connecticut Avenue, N.W., Washington, D.C. 20036.

Summary: Agreement 5600-38 would modify the basic agreement of the Philippines North America Conference by adding the following sentence to Article 9(E): "When a circular ballot is utilized and a vote is not received by the Conference within ten (10) working days, excluding day of distribution, absent votes shall be considered affirmative votes."

Agreement No. 9522-40.

Filing Party: Marc J. Fink, Esquire, Billig, Sher & Jones, P. C., Suite 300, 2033 K Street, N.W., Washington, D.C. 20006.

Summary: Agreement No. 9522-40 among the members of Med-Gulf Conference, would amend Article 3-B to the basic agreement by adding new language to provide that substituted service by land at the expense of the member line between or from loading ports, in addition to those ports specified within the scope of the agreement, may only be authorized, altered or cancelled upon the unanimous vote of all members of the Conference section affected.

By Order of the Federal Maritime Commission.

Dated: June 13, 1979.

Francis C. Hurney,

Secretary.

[FR Doc. 79-19015 Filed 6-18-79; 8:45 am]

BILLING CODE 6730-01-M

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

Open Committee Meetings

Pursuant to the provisions of section 10 of the Federal Advisory Committee Act (P.L. 92-463), notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on:

Thursday, July 12, 1979
Thursday, July 19, 1979
Thursday, July 26, 1979

The meetings will convene at 10 a.m., and will be held in Room 5A06A, Office of Personnel Management Building, 1900 E Street, NW., Washington, D.C.

The Federal Prevailing Rate Advisory Committee is composed of a Chairman, representatives of five labor unions holding exclusive bargaining rights for Federal blue-collar employees, and representatives of five Federal agencies. Entitlement to membership of the Committee is provided for in 5 U.S.C. 5347.

The Committee's primary responsibility is to review the prevailing rate system and other matters pertinent to the establishment of prevailing rates under subchapter IV, chapter 53, 5 U.S.C., as amended, and from time to time advise the Office of Personnel Management thereon.

These scheduled meetings will convene in open session with both labor and management representatives attending. During the meeting either the labor members or the management members may caucus separately with the Chairman to devise strategy and formulate positions. Premature disclosure of the matters discussed in these caucuses would impair to an unacceptable degree the ability of the Committee to reach a consensus on the matters being considered and disrupt substantially the disposition of its business. Therefore, these caucuses will be closed to the public on the basis of a determination made by the Director of the Office of Personnel Management under the provisions of Section 10(d) of the Federal Advisory Committee Act (P. L. 92-463) and 5 U.S.C., section 552(c)(9)(B). These caucuses may, depending on the issues involved, constitute a substantial portion of the meeting.

Annually, the Committee publishes for the Office of Personnel Management, the President, and Congress a comprehensive report of pay issues discussed, concluded recommendations thereon, and related activities. These reports are also available to the public, upon written request to the Committee Secretary.

Members of the public are invited to submit material in writing to the Chairman concerning Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information concerning these meetings may be obtained by contacting the Secretary, Federal Prevailing Rate Advisory Committee, Room 1340, 1900 E Street, NW., Washington, D.C. 20415 (202-632-9710).

Dated: June 11, 1979.

Jerome H. Ross,

Chairman, Federal Prevailing Rate Advisory Committee.

[FR Doc. 79-18946 Filed 6-18-79; 8:45 am]

BILLING CODE 6325-01-M

GENERAL ACCOUNTING OFFICE

Regulatory Reports Review; Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were accepted by the Regulatory Reports Review Staff, GAO, on June 13, 1979.

See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the Federal Register is to inform the public of such receipts.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed OSM requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before July 9, 1979, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, NW, Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202–275–3532.

OFFICE OF SURFACE MINING

The Office of Surface Mining (OSM), Department of the Interior, requests clearance of new application, recordkeeping and reporting requirements contained in 30 CFR Parts 872, 877, 879, 882, 884 and 886. The Office of Surface Mining has determined that such information is necessary to perform its responsibilities under the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 et seq. and must be collected, submitted or retained. On October 25, 1978, the OSM adopted these requirements, subject only to review by GAO to assure that a minimum burden is imposed in the manner in which such information is proposed to be obtained. The requirements contained in each part are as follows:

30 CFR Part 872

Sections 872.11(b)(2) and 872.11(b)(3) require that no money shall be allocated to States and Indian Tribes, if OSM is advised in writing by the State and Indian Tribe, that a State or Indian Reclamation Plan will not be submitted. Funds allocated and granted to the States and Indian Tribes for reclamation work, that have not been expended within 3 years from the date of allocation, may be withdrawn if the Director finds in writing that the amounts involved are not necessary to carry out the approved reclamation activities, or that failure to expend is the result of avoidable delays in conducting approved reclamation activities. OSM anticipates that each of the 28 respondents will submit a Reclamation Plan and will expend their allocation within the 3-year period. Therefore OSM estimates no burden will be incurred as a result of this section.

Section 872.12(a) provides for the establishment of the State Abandoned Mine Reclamation Fund in each State with an approved Reclamation Plan and in accordance with OMB Circular No. A–102. This section will require 25 respondents to comply by filing with OSM an average of 1 report each on a one-time basis. OSM estimates that compliance with this section requires 6 hours per report and a total of 150 hours.

Section 872.13(a) sets the procedures to establish the Indian Abandoned Mine Reclamation Fund. This section will require 3 respondents to comply by filing with OSM an average of 1 report each on a one-time basis. OSM estimates that compliance with this section requires 6 hours per report and a total of 18 hours.

30 CFR Part 877

Section 877.12(b) requires OSM, the State or Indian Tribe to give notice to the landowner in writing, including a statement of the reasons why entry is necessary, of any intentions to enter upon land to conduct studies or exploration, if the owner of the land will not provide consent to enter. This section will require 28 respondents to comply by preparing and/or posting an average of 1 notice each per year. OSM estimates that compliance with this section requires 1 hour per notice and a total of 28 hours per year.

Section 877.13(c) requires the Regional Director, State or Indian Tribe to give notice to the owner or post notice on the property of its intent to enter for purposes of conducting reclamation, 30 days before entry, if the owner will not grant permission. A copy of findings which outline the reasons for entry shall be included with the notice. This section will require 28 respondents to comply by preparing an average of 1 notice and statement of findings each per year. OSM estimates that compliance with this section requires 4 hours per notice and statement of findings and a total of 112 hours per year.

30 CFR Part 879

Section 879.13 sets out the procedures and authorizations which the Director, OSM, or a State or Indian Tribe under an approved Reclamation Plan, must follow in accepting gifts of land for reclamation purposes. It regulates the offers to make a gift and prescribes the actions that must follow immediately after acceptance of the gift. This section will require 28 respondents to comply by filing with OSM an average of 1 report each per year. OSM estimates that compliance with this section requires 80 hours per report and a total of 2,240 hours per year.

Section 879.15 requires that the Regional Director, State and Indian Tribe take the following actions prior to the disposition of any acquired reclaimed lands: (1) Publish a public notice which describes the proposed disposition of the land and which provides for public comment, and hold a hearing if requested as a result of the public notice; (2) make a written finding that the proposed disposition is appropriate, considering all comments received; (3) state in writing the public purposes for which the land is to be used if it is intended to purchase the land, and (4) publish a notice in a newspaper describing the land to be sold, the appraised value, conditions of sale, and provide for the submission of sealed bids and an oral auction open to the public. This section will require 28 respondents to comply by preparing an average of 1 report each per year. OSM estimates that compliance with this section requires 16 hours per report and a total of 448 hours per year.

30 CFR Part 882

Section 882.12 provides that OSM, the State or Indian Tribe shall obtain a notarized appraisal of the fair market value of private land to be reclaimed immediately before reclamation work is performed or as early as possible if reclamation must be done without appraisal (in case of emergency). It also states the procedures to inform the landowner of the values established in each appraisal before and after reclamation and information as to whether a lien will or will not be filed because of increased market value of the land resulting from reclamation. This section will require 28 respondents to comply by filing with OSM an average of 1 report each per year. OSM estimates that compliance with this section requires 72 hours per report and a total of 2,016 hours per year.

Section 882.13(a) sets forth the procedures for OSM, the State or Indian Tribe to file a lien and describes the ranking of such lien with respect to other liens or mortgages that may be imposed on the property. This section will require 28 respondents to comply by filing with OSM an average of 1 report each per year. OSM estimates that compliance with this section requires 80 hours per report and a total of 2,240 hours per year.

30 CFR Part 884

Section 884.13 requires the State or Indian Tribe to submit a Reclamation Plan, and sets forth the elements that must be included in the plan and manner in which the plan is to be submitted to the Director, OSM. Section 884.15 sets out the requirements for submitting amendments or revisions to the approved plan. These sections will require 28 respondents to comply by filing with OSM an average of 1 report each per year. OSM estimates that compliance with these sections will require 4,080 hours per report and a total of 114,240 hours per year.

30 CFR Part 886

Section 886.14 mandates the agencies selected by the States and Indian Tribes to administer the reclamation programs, to cooperate with the OSM Regional Directors in the development of advance budget estimates to be used by the Director of OSM in the preparation of requests for appropriation of monies from the Abandoned Mine Reclamation Fund. This section will require 28 respondents to comply by filing with OSM an average of 1 report each per year. OSM estimates that compliance with this section requires 40 hours per report and a total of 1,120 hours per year.

Section 886.15 describes and sets out the procedures required to submit a grant application to the appropriate OSM Regional Director. It describes the time of submission as well as the forms to be used and the time limits within which the application is to be processed. Section 886.17 requires the State or Indian Tribe Agency to notify the Regional Director in writing of any proposed changes which may require a grant amendment. These two sections will require each of the 28 respondents to comply by filing with OSM an average of 7 reports per year. OSM estimates that compliance with this section requires 24 hours per report and a total of 4,704 hours per year.

Section 886.18(c)(2) sets forth the procedures to appeal a decision taken by the Director of OSM which modifies the original conditions of a grant. This section will require 14 respondents to comply by filing with OSM an average of 1 report each per year. OSM estimates that compliance with this section requires 8 hours per report and a total of 112 hours per year.

Section 886.23 requires the agency of each State or Indian Tribe to submit for each grant received, an Annual Financial Status Report. This section will require 28 respondents to comply by filing with OSM an average of 7 reports each per year. OSM estimates that compliance with this section requires 24 hours per report and a total of 4,704 hours per year.

Section 886.24 requires the agency of the State or Indian Tribe to maintain complete records in accordance with OMB Circular No. 102. OSM estimates that each of the 28 respondents will require an average of 8 hours for record maintenance for the requirements in this section. OSM estimates that compliance with this section will require 8 hours for each respondent and a total of 224 hours per year.

OSM Abandoned Mine Land Reclamation Program Final Rules which were adopted on October 25, 1978, promulgated 30 CFR Parts 872, 877, 879, 882, 884 and 886. Although the Final Rules specified that the revisions pertaining to application, recordkeeping and report requirements would be effective on December 11, 1978, this effective date is contingent upon OSM's compliance with 44 U.S.C 3512 which precludes the collection of information from ten or more persons until the Comptroller General has had the opportunity to advise that the information is not presently available from other Federal sources and that the proposed application, recordkeeping and reporting requirements are consistent with the provisions of section 3512. This notice represents the beginning of our review.

John M. Lovelady,

Assistant Director, Regulatory Reports Review.

BILLING CODE 1610-01-M

GENERAL SERVICES ADMINISTRATION

Regional Public Advisory Panel on Architectural and Engineering Services; Meeting

Pursuant to Public Law 92-463, notice is hereby given of a meeting of the Regional Public Advisory Panel on Architectural and Engineering Services, Region 8, on June 28, 1979, from 8 a.m. to 4. p.m., in the South Dakota Conference Room, Second Floor of Building 41 at the Denver Federal Center in Denver, Colorado. The meeting will be open to the public. In order to meet the schedule requirements of the full committee, it will be necessary to hold the meeting on the specified date.

Dated: June 8, 1979.

Dennis A. Jensen,

Regional Administrator.

BILLING CODE 6820-23-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[FDA-225-74-2011]

Dry Milk Products; Memorandum of Understanding With the Ministry of Agriculture and Fisheries of the Netherlands

AGENCY: Food and Drug Administration

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has Executed a memorandum of understanding with the Ministry of Agriculture and Fisheries of the Netherlands. The purpose of the understanding is to set forth cooperative working arrangements to diminish the detention rate of Netherland's dry milk products entering the United States and to expedite the entry of Netherland's dry milk products at U.S. ports.

DATES: The agreement became effective March 9, 1979.

FOR FURTHER INFORMATION CONTACT: Gary Dykstra, Regulatory Operations Section (HFC-22), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3470.

SUPPLEMENTARY INFORMATION: Pursuant to the notice published in the Federal Register of October 3, 1974 (39 FR 35697) stating that future memorandums of understanding and agreements between FDA and others would be published in the Federal Register (see § 20.108(c) (21 CFR 20.108(c))), the agency is issuing the following memorandum of understanding:

Memorandum of Understanding Between the Food and Drug Administration, Department of Health, Education, and Welfare, and the Directorate General for Agriculture and Food of the Ministry of Agriculture and Fisheries of The Netherlands Covering Dry Milk Products Exported to the United States of America

Revised January 8, 1979.

Objectives

The mutual goals of the Food and Drug Administration (FDA) and The Ministry of Agriculture and Fisheries of the Netherlands in entering into this Memorandum of Understanding (MOU) are to:

1. Diminish the detention rate of Netherland's dry milk products entering the United States, through improved compliance with the regulations enforced by the FDA, and by assuring that contaminated or underprocessed dry milk products will not be imported to the U.S.

2. Expedite the entry of Netherland's dry milk products at U.S. ports by minimizing the need for extensive FDA audit sampling of dry milk products certified by the Ministry of Agriculture and Fisheries of the Netherlands as being in compliance with the microbiological standards enumerated in this agreement.

Definitions

For purposes of this Memorandum, both parties agree to the following definitions:

Dry Milk Products—Dry milk products include dry whole milk, nonfat dry milk, lowfat dry milk, dry cream, dry whey, dry buttermilk, casein, and caseinates.

Lot—A lot is a quantity of dry milk product produced by one manufacturer during a discrete period of time, not exceeding one day in one continuous process using a single processing line, packaged in identical containers which are identified by a code or mark traceable to the manufacturer.

Salmonella negative—The absence of *Salmonella* in 30/25 gram portions each taken from a lot of dry milk product and reconstituted individually or composited and tested by procedures outlined in the *Bacteriological Analytical Manual* (*BAM*) 5th Edition; or in *Methods of Analysis—AOAC.*

Phosphatase negative—Each of the 30 reconstituted 25 gram portions or composited units of dry milk product contains less than 1 microgram of phenol per milliliter of milk when tested by the Scharer Rapid Method indicating no under pasteurization or contamination with raw milk. Products found negative by the Storch Test (paraphenylenediamine test) will not be tested by the Scharer Method.

Penicillin negative—Each of the 30 reconstituted 25 gram portions or composited units contains no detectable residue of penicillin when tested by the *S. lutea* cylinder method; or, by the *B. stearothermophilus*, variety calidolactis, disk assay method normally used in the Netherlands for this purpose.

Obligations of Participants

The Ministry of Agriculture and Fisheries of The Netherlands

1. The Directorate General for Agriculture and Food of the Ministry of Agriculture and Fisheries of the Netherlands agrees to have the Netherlands Inspection Institute for Milk and Milk Products (CVM) inspect each lot of dry milk product voluntarily offered to it by the manufacturer, for export to the United States of America. This inspection will certify that the lot is *Salmonella* negative, phosphatase negative and penicillin negative.

2. The Directorate General for Agriculture and Food of the Ministry of Agriculture and Fisheries of the Netherlands agrees to have the CVM issue an export certificate for only those lots which meet the criteria of 1., above.

3. The Directorate General for Agriculture and Food of the Ministry of Agriculture and Fisheries of the Netherlands agrees to require all containers of lots exported to the United States of America under certificate to be identified by a lot number and marked together with all other information required by the Federal Food, Drug and Cosmetic Act.

4. The Directorate General for Agriculture and Food of the Ministry of Agriculture and Fisheries of the Netherlands agrees to include in the certificate for each lot exported to the United States of America the following information:

a. Lot identification, including name and address of manufacturer;

b. Number and size of containers in the lot;

c. Analytical results for *Salmonella*, phosphatase, and penicillin;

d. Date of the certificate; and

e. Name and stamp, or seal of authorizing official. The validated certificate will accompany the shipping manifest.

5. The Directorate General for Agriculture and Food of the Ministry of Agriculture and Fisheries of the Netherlands agrees to furnish to the Food and Drug Administration a copy of the current regulations, and procedures used to assure that dry milk products are sanitary.

6. The Directorate General for Agriculture and Food of the Ministry of Agriculture and Fisheries of the Netherlands agrees to furnish to the Food and Drug Administration a full description of the manufacturing processes and quality controls used to assure the production of sanitary dry milk products.

The Food and Drug Administration

The Food and Drug Administration (FDA) of the Department of Health, Education, and Welfare is charged with the enforcement of the Federal Food, Drug and Cosmetic Act and the Fair Packaging and Labeling Act. In fulfilling its responsibilities under the Acts, FDA directs its activities toward the protection of the public health of the United States of America by ensuring that foods are safe and wholesome and that products are honestly and informatively labeled. This is accomplished by inspecting the processing and distribution of foods and by collecting and examining samples to assure compliance with these Acts. To carry out these responsibilities as they relate to imported dry milk products and in fulfillment of its Memorandum of Understanding commitment:

1. The Food and Drug Administration will sample dry milk products certificated under this Memorandum of Understanding to assure that the exporting country and the exported products comply with specifications set forth in this Memorandum. The intensity of sampling may be reduced on gaining confidence in the compliance of the products to these specifications. The FDA may also check for other attributes to make sure the products also comply with the other requirements of the Food, Drug and Cosmetic Act and the Fair Packaging and Labeling Act.

2. Information obtained by the Food and Drug Administration through its audit sampling will be shared with the Agricultural Attache of the Royal Netherlands Embassy.

3. Also, the Food and Drug Administration will promptly notify the Agricultural Attache of any detention of dry milk products covered by the Memorandum and of any modifications in the regulations.

4. The Food and Drug Administration will share expertise and will provide consultative assistance to the exporting country when necessary to assure the safety of the dry milk products exported to the United States of America.

5. If audit sampling discloses that certified dry milk products are not conforming to the requirements of the MOU and if adequate steps are not taken to correct the situation after proper notification, the Food and Drug Administration may consider termination of the Memorandum of Understanding.

Sample Collection

The same subsamples will be used for determining the presence of *Salmonella*, phosphatase and penicillin. They will be collected as follows:

Following aseptic techniques, 30 subsamples each containing approximately 100 grams will be randomly collected from each lot. If a lot contains packaged units weighing approximately 225 grams (about 8 ounces) or less, but more than 100 grams, 30 of these units will be randomly collected, unopened, from the lot.

Analytical Methodology

The subsamples of dry milk products will be aseptically reconstituted. To reduce the analytical workload, the subsamples collected from a lot may be combined to give 2 to 10 composites at the option of the testing laboratory and reconstituted. Examples of compositing combinations are given in Attachment A.[1]

1. *Salmonella.* Reconstituted dry milk products will first be analyzed for presence of *Salmonella* according to the methods contained in:

(a) *Bacteriological Analytical Manual*, Fifth Edition, 1978, Chapter VI—Detection and Identification of *Salmonella*, including *S. arizonae*, or in:

(b) *Methods of Analysis—AOAC*, Twelfth Edition, 1975, Chapter 46, Microanalytical Methods, Section 46.013, et seq. (Note: Both (a) and (b) give methods based upon 100 gram samples. For this MOU, 30/25 gram samples will be used instead.) Lots of dry milk products that are positive for *Salmonella* will not be certified for export to the United States.

2. *Phosphatase.* Only reconstituted dry milk products that are positive by the Storch Test will be tested for phosphatase activity by the Scharer Rapid Method for Phosphatase Analysis, described in *Standard Methods for the Examination of Dairy Products*, Thirteenth Edition, 1972, Section 18.4. Lots of dry milk products demonstrating positive phosphatase activity will not be certified for export to the United States.

3. *Penicillin.* Reconstituted dry milk products will be tested for penicillin residues by the following methods. The *S. lutea*, cylinder method as described in *Methods of Analysis—AOAC*, Twelfth Edition, Section 42.252 et seq., p. 812–813; Changes in Official Methods of Analysis made by the Nineteenth Annual Meeting, Oct. 18–21, 1978/Third Supplement to 12th Edition, Journal of AOAC, Volume 60, March 77, pp. 484–485, Section 42(4). The *B. stearothermophilus*, variety calidolactis, disk assay method described in the *International Standard FIL–IDF 57:1970* of the International Dairy Federation normally used in Denmark for this purpose.

While the Ministry of Agriculture and Fisheries of the Netherlands may choose to use either of these methods for certification of lots, FDA will continue to use the *S. lutea* cylinder method, which is an official *AOAC* method, in its regulatory enforcement to assure that imported dry milk products are free of detectable penicillin residues. Lots of dry milk products found to be penicillin positive, will not be certified for export to the United States.

Modifications and Termination of the MOU

Changes in this Memorandum of Understanding may be proposed by either of the participants. When the proposed changes are acceptable to both participants, they will be incorporated into the Memorandum. This revision to the Memorandum of Understanding will become effective 60 days after signature by the participants, and will remain in effect pending revocation by either participant. Upon its effective date, this revised Memorandum of Understanding will be published in the **Federal Register**. A copy will be available for public review at the Office of the Hearing Clerk, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

In witness whereof, the Agencies have executed this revision to the Memorandum of Understanding covering dry milk products presently in effect between our governments.

For the Directorate General for Agriculture and Food of the Ministry of Agriculture and Fisheries of the Netherlands:

Ir. A. de Zeeuw,

Director-General for Agriculture and Food, The Netherlands.

Dated: January 8, 1979.

For the Food and Drug Administration:

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs, Food and Drug Administration, United States of America.

Dated: December 20, 1978.

Effective date. This Memorandum of Understanding became effective March 9, 1979.

Dated: June 11, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

Attachment A

The 25 gram portions taken from each of the 30 samples collected from a lot of dry milk product may be composited according to the following options before reconstituting.

Number of—			
Composites to be prepared for analysis from the 30 samples collected	Samples in each composite	Grams of test product in each composite	Milliliters of sterile distilled water in which the weighed test product is to be reconstituted
2	15	375	3,750
3	10	250	2,500
5	6	150	1,500
6	5	125	1,250
10	3	75	750

Example of Compositing:

If the 2 composite option is selected, 25 gram portions are taken from each of 15 samples, weighed and reconstituted in 3,750 milliliters of sterile distilled water; 25 gram portions from each of the

[1] Filed as part of the original document.

remaining 15 samples are likewise weighed and added to an additional 3,750 milliliters of sterile distilled water. Each of these composites contains 375 grams of the test product.

[FR Doc. 79-18005 Filed 6-18-79; 8:45 am]
BILLING CODE 4110-03-M

[Docket No. 79D-0059]

Efficacy Evaluation of Equine Anthelmintics; Availability of Guideline

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The agency announces the availability of a guideline for use in developing data to establish the effectiveness of equine anthelmintic drugs. The agency invites interested persons to submit written comments on the guideline.

ADDRESS: The guideline is available for public examination at, and comments may be submitted to, the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Henry C. Hewitt, Bureau of Veterinary Medicine (HFV-110), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3420.

SUPPLEMENTARY INFORMATION: The Federal Food, Drug, and Cosmetic Act requires that a new animal drug must be the subject of an approved new animal drug application (NADA) before it may be marketed. Section 512(b)(1) of the act (21 U.S.C. 360b(b)(1)) requires that each NADA include full reports of investigations which show that the drug is safe and effective for use. Section 512(d) of the act (21 U.S.C. 360b(d)) enumerates the criteria that must be met before a new animal drug may be approved, including a requirement that a drug's effectiveness be shown by "substantial evidence" as defined in section 512(d)(3).

The Bureau of Veterinary Medicine has prepared a guideline that addresses the type of data to be included in an NADA for equine anthelmintic drugs to establish "substantial evidence" of effectiveness for the drug.

The guideline is available for public examination at the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857. Written requests for single copies may be sent to the Food and Drug Administration, Bureau of Veterinary Medicine, Industry Information Branch (HFV-226), 5600 Fishers Lane, Rockville, MD 20857.

Interested persons may submit written comments on the guideline to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857. Such comments will be considered in determining whether amendments to or revisions of the guideline are warranted. Comments should be in four copies (except that individuals may submit single copies of comments), identified with the Hearing Clerk docket number found in brackets in the heading of this document. The guideline and received comments may be seen in the Hearing Clerk's office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: June 12, 1979.

William F. Randolph,

Acting Associate Commission for Regulatory Affairs.

[FR Doc. 79-18080 Filed 6-18-79; 8:45 am]
BILLING CODE 4110-03-M

[Docket No. 79N-0206; DESI 12151]

Spironolactone; Drugs for Human Use; Drug Efficacy Study Implementation; Announcement

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces the results of the efficacy review of spironolactone and the conditions for marketing it for the indications for which it is regarded as effective. The drug is used in the treatment of hypertension.

DATE: Supplements to approved NDA's due on or before August 20, 1979.

ADDRESSES: Communications in response to this notice should be identified with the reference number DESI 12151, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Supplements to full new drug applications (identify with NDA number): Division of Cardio-Renal Drug Products (HFD-110), Rm 16B-30, Bureau of Drugs.

Original abbreviated new drug applications and supplements thereto (identify as such): Division of Generic Drug Monographs (HFD-530), Bureau of Drugs.

Requests for guidelines or information on conducting bioavailability tests: Division of Biopharmaceutics (HFD-520), Bureau of Drugs.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.

Other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD-501), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT: Herbert Gerstenzang, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of July 9, 1966 (31 FR 9426), FDA asked each holder of a new drug application that became effective before October 10, 1962, to submit reports containing the best data available in suppport of the effectiveness of each such product for the claimed indications. The agency needed that information to determine, with the assistance of the National Academy of Sciences-National Research Council (NAS-NRC), whether each claim in the labeling is supported by substantial evidence of effectiveness, as required by the Drug Amendments of 1962.

Because Searle Laboratories, the sponsor of the following drug, did not submit such information, the drug was not reviewed by NAS-NRC.

NDA 12-151; Aldactone Tablets containing spironolactone; Searle Laboratories, P.O. Box 5110, Chicago, IL 60680.

In a notice (DESI 9296) published in the Federal Register of February 6, 1973 (38 FR 3418), FDA announced its conclusion that a combination of spironolactone and hydrochlorothiazide (NDA 12-616; Aldactazide Tablets manufactured by Searle Laboratories) is effective for the treatment of hypertension, edema of congestive heart failure, cirrhosis of the liver, the nephrotic syndrome, and idiopathic edema.

Upon evaluating all available data on spironolactone in support of effectiveness, FDA has now concluded that the drug is effective for its labeled indications. This notice announces that conclusion and the conditions under which such drug products may be marketed.

As stated in the Federal Register of August 23, 1977 (42 FR 42311), the provision of 21 CFR 320.22(c) waiving

bioavailability data for certain drugs does not necessarily apply to drug products first announced as effective in DESI notices published after January 7, 1977. As this is the first notice announcing that spironolactone is effective, FDA has reviewed it for actual or potential bioavailability problems and has determined that spironolactone should be added to the list of drugs for which bioavailability data are not waived.

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). Supplemental new drug applications are required to revise the labeling in and to update previously approved applications providing for such drugs. An approved new drug application is a requirement for marketing such drug products.

In addition to the product specifically named above, this notice applies to any drug product that is not the subject of an approved new drug application and is identical to the product named above. It may also be applicable, under 21 CFR 310.6, to a similar or related drug product that is not the subject of an approved new drug application. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product that the person manufactures or distributes. Such person may request an opinion of the applicability of this notice to a specific drug product by writing to the Division of Drug Labeling Compliance (address given above).

A. *Effectiveness classification.* The Food and Drug Administration has reviewed all available evidence and concludes that the drug is effective for the indications in the labeling conditions below.

B. *Conditions for approval and marketing.* The Food and Drug Administration is prepared to approve abbreviated new drug applications and abbreviated supplements to previously approved new drug applications under conditions described herein.

1. *Form of drug.* The drug is in tablet form suitable for oral administration.

2. *Labeling conditions. a.* The label bears the statement, "Caution: Federal law prohibits dispensing without prescription."

b. The drug is labeled to comply with all requirements of the act and regulations, and the labeling bears adequate information for safe and effective use of the drug. The Indications are as follows:

Spironolactone is indicated in the management of:

Primary hyperaldosteronism for:

Establishing the diagnosis of primary hyperaldosteronism by therapeutic trial.

Short-term preoperative treatment of patients with primary hyperaldosteronism.

Long-term maintenance therapy for patients with discrete aldosterone-producing adrenal adenomas who are judged to be poor operative risks, or who decline surgery.

Long-term maintenance therapy for patients with bilateral micro- or macronodular adrenal hyperplasia (idiopathic hyperaldosteronism).

Edematous conditions for patients with:

Congestive heart failure: For the management of edema and sodium retention when the patient is only partially responsive to, or is intolerant of, other therapeutic measures. Spironolactone is also indicated for patients with congestive heart failure taking digitalis when other therapies are considered inappropriate.

Cirrhosis of the liver accompanied by edema and/or ascites: Aldosterone levels may be exceptionally high in this condition. Spironolactone is indicated for maintenance therapy together with bed rest and the restriction of fluid and sodium.

The nephrotic syndrome: For nephrotic patients when treatment of the underlying disease, restriction of fluid and sodium intake, and the use of other diuretics do not provide an adequate response.

Essential hypertension:

Usually in combination with other drugs. Spironolactone is indicated for patients who cannot be treated adequately with other agents or for whom other agents are considered inappropriate.

Hypokalemia:

For the treatment of patients with hypokalemia when other measures are considered inappropriate or inadequate. Spironolactone is also indicated for the prophylaxis of hypokalemia in patients taking digitalis when other measures are considered inadequate or inappropriate.

3. *Marketing Status.* a. Marketing of such drug products that are the subject of a new drug application approved before October 10, 1962, may be continued provided that, on or before August 20, 1979, the holder of the application has submitted (i) a supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (ii) a supplement to provide updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD–356H (21 CFR 314.1(c)) to the extent required in abbreviated applications (21 CFR 314.1(f)).

b. Approval of an abbreviated new drug application (21 CFR 314.1(f)) must be obtained before marketing such products. The bioavailability regulations (21 CFR 320.21) require any person submitting an abbreviated new drug application after July 7, 1977, to include evidence demonstrating the in vivo bioavailability of the drug or information to permit waiver of the requirement. No waiver will be granted for spironolactone. In light of the tumorigenic potential of spironolactone, demonstration of bioavailability must be undertaken in patients employing a multiple dose steady-state design performed under an IND. Guidelines are available from the Division of Biopharmaceutics (address given above).

Marketing before approval of a new drug application will subject such products, and the persons who caused the products to be marketed, to regulatory action.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.70).

Dated: June 14, 1979.

J. Richard Crout,

Director, Bureau of Drugs.

BILLING CODE 4110-03-M

National Institutes of Health

Committee Advisory to National Cancer Institute; Open Meetings

Pursuant to Pub. L. 92–463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be entirely open to the public to discuss issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205, unless otherwise stated.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will furnish summaries of the meetings and rosters of committee members upon request.

Other information pertaining to the meeting can be obtained from the Executive Secretary indicated.

Name of committee: President's Cancer Panel.

Dates: July 25, 1979; 9:30 a.m.—adjournment

Place: Building 31C Conference Room 7, National Institutes of Health

Times: Open for the entire meeting

Agenda: To hear reports on activities of the President's Cancer Panel and the National Cancer Program.

Executive Secretary: Dr. Richard A. Tjalma

Address: Building 31, Room 11A46, National Institutes of Health
Phone: 301–496–5854.

Name of committee: Cancer Control and Rehabilitation Advisory Committee
Dates: July 30, 1979; 9:00 a.m.—adjournment
Place: Building 31C Conference Room 7, National Institutes of Health
Times: Open for the entire meeting
Agenda: To review planning for several projects planned for funding in fiscal year 1980.
Executive Secretary: Mr. H. C. Noyes
Address: Blair Building, Room 720, National Cancer Institute, Silver Spring, Maryland 20910
Phone: 301–427–8636.

Name of committee: Chemical Selection Subgroup of the Clearinghouse on Environmental Carcinogens
Dates: July 30, 1979; 9:00 a.m.—adjournment
Place: Building 31C Conference Room 8 National Institutes of Health
Times: Open for the entire meeting
Agenda: To consider chemicals for bioassay and other matters relevant to chemical selection
Executive secretary: Dr. James M. Sontag
Address: Building 31 Room 3A16National Institutes of Health
Phone: 301–496–5106.

Dated: June 8, 1979.

BILLING CODE 4110-08-M

Public Health Service

Alcohol, Drug Abuse, and Mental Health Administration; Statement of Organization, Functions and Delegations of Authority

Part H, Chapter HM (Alcohol, Drug Abuse, and Mental Health Administration) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare (39 FR 1654, January 11, 1974, as amended most recently by 43 FR 20562, May 12, 1978 and 44 FR 32292, June 5, 1979) is revised to reflect: (1) the establishment of an Office of Extramural Project Review in the National Institute on Drug Abuse and the National Institute of Mental Health and (2) the establishment of an Office of Extramural Policy and Project Review in the National Institute on Alcohol Abuse and Alcoholism.

Section HM–B, *Organization and Functions* is amended as follows:

1. Under *National Institute on Drug Abuse (HMH)* insert the following statement after the statement for the *Office of the Director (HMH1):*

Office of Extramural Project Review (HMH14)

(1) Plans, administers and coordinates peer and objective review of grant applications and contract proposals; (2) develops Institute review policies and procedures, provides orientation and guidance on such policies and procedures, and monitors the review process to ensure quality of review and conformance to policy; (3) recommends nominees for review groups; (4) administers the committee management function; (5) collects and analzses data relating to grant appications and contract proposals reviewed, and makes recommendations, as necessary, for changes in Institute committee structure and/or referral guidelines; (6) collaborates with other Institute and Office of the Administrator offices to ensure adequate exchange of information and assume optimum effectiveness of the review process; and (8) participates in the review of proposed DHEW, PHS, and ADAMHA policies and documents e.g., program announcements and guidelines affecting peer and object review.

2. Under *National Institute on Alcohol Abuse and Alcoholism (HMC),* insert the following statement after statement for the *Office of the Director (HMC1):*

Office of Extramural Policy and Project Review (HMC14)

(1) Plans, administers and coordinates peer and objective review of grant applications and contract proposals, except nonresearch and development contracts; (2) develops Institute review policies and procedures, provides orientation and guidance on such policies and procedures, and monitors the review process to ensure quality of review and conformance to policy; (3) recommends nominees for review groups; (4) administers the committee management function; (5) coordinates and assures the development of and adherence to program policies related to Institute extramural activities; (6) collects and analyzes data relating to grant applications and contract proposals reviewed, and makes recommendations, as necessary, for changes in Institute committee structure and/or referral guidelines; (7) collaborates with other Institute and OA offices to ensure adequate exchange of information and assure optimum effectiveness of the review process; and (8) participates in the review of proposed DHEW, PHS, and ADAMHA policies and documents (e.g., program announcements and guidelines) affecting peer and objective review.

3. *Under National Institute of Mental Health (HMM)* insert the following statement after statement for the *Office of the Director (HMM1):*

Office of Extramural Project Review (HMM14)

(1) Plans, administers and coordinates peer and objective review of grant applications and contract proposals; (2) develops Institute review policies and procedures, provides orientation and guidance on such policies and procedures, and monitors the review process to ensure quality of review and conformance to policy; (3) recommends nominees for review groups; (4) collects and analyzes data relating to grant applications and contract proposals reviewed, and makes recommendations, as necessary, for changes in Institute committee structure and/or referral guidelines; (5) collaborates with other Institute and Office of Administrator

offices to ensure adequate exchange of information and assure optimum effectiveness of the review process; and (6) participates in the review of proposed HEW, PHS, and ADAMHA policies and documents affecting peer and objective review.

Dated: June 9, 1979.

Frederick M. Bohen,

Assistant Secretary for Management and Budget.

Office of the Secretary

Statement of Organization, Functions, and Delegations of Authority

Correction

In FR Doc. 16727 appearing on page 31045 in the issue for Wednesday, May 30, 1979, make the following correction: In the middle column, in the third paragraph of the document with the introductory sentence, "Section AA.10 Organization", among the listing of elements constituting the Office of the Secretary, "Office of Civil Rights" should be corrected to read:

"Office for Civil Rights".

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Colorado 27941]

Pipeline Application T.C.P. Gathering Co.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), TCP Gathering Co., 2334 East 3rd Avenue, Denver, Colorado 80206, has applied for a right-of-way for an 8⅝" o.d. natural gas pipeline across lands located in Colorado and Utah. The pipeline will cross approximately 4.808 miles in Colorado to the Slick Rock Processing Facility. The lands affected are described as:

T. 44 N., R. 19 W., N.M.P.M., Colorado
Section 7: Lots 1, 2, S½NE¼, SE¼NW¼
Section 8: S½N½, N½S½
Section 9: SW¼NE¼, S½NW¼
T. 44 N., R. 20 W., N.M.P.M., Colorado
Section 1: Lots 3, 4
Section 2: Lots 1, 2, 3
Section 12: N½NE¼
T. 45 N., R. 20 W. N.M.P.M., Colorado
Section 36: SW¼SE¼, SE¼SW¼

The proposed pipeline will enable the applicant to collect natural gas in San Juan County, State of Utah, and convey it to the Slick Rock Processing Facility to be refined then conveyed to customers.

The purposes for this notice are: (1) To inform the public that the Bureau of Land Management is proceeding with the preparation of the environmental and other analytic reports, necessary for determining whether or not the application should be approved and if approved, under what terms and conditions. (2) To give all interested parties the opportunity to comment on the applications. (3) To allow any party asserting a claim to the lands involved or having bona fide objections to the proposed natural gas pipeline to file its claims or objections in the Colorado State Office. Any party so filing must include evidence that a copy thereof has been served on TCP Gathering Co.

Any comments, claims, or objections must be filed with the Chief, Branch of Adjudication, Bureau of Land Management, Colorado State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colorado 80202, as promptly as possible after publication of this notice.

Merrill G. Anderson,

Leader, Montrose Team, Branch of Adjudication.

BILLING CODE 4310-84-M

[M 43822]

Montana; Application

June 11, 1979.

Notice is hereby given that, pursuant to Sec. 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), Continental Pipe Line Company has applied for one 3-inch crude oil pipeline across the following land:

Principal Meridian, Montana.

T. 8 N., R. 24 E.,
Sec. 2, Lots 1 and 8.

This pipeline will convey crude oil across 0.09 miles of public lands in Musselshell County, Montana.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views on this matter should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, P.O. Drawer 1160, Lewistown, Montana 59457.

Kenneth J. Sire,

Acting Chief, Branch of Lands and Minerals Operations.

DEPARTMENT OF JUSTICE

Antitrust Division

United States v. Stewart Mechanical Enterprises, Inc.; Proposed Consent Judgment

Pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16, the following written comments on the

proposed judgment filed with the United States District Court for the Western District of Kentucky in Civil Action No. C75-0377L(A), United States of America v. Stewart Mechanical Enterprises, Inc., were received by the Department of Justice and are published herewith, together with Justice's response to the comments.

Dated: June 6, 1979

Charles F. B. McAleer,

Special Assistant for Judgment negotiations, Office of Operations, Antitrust Division.

May 30, 1979.

Donald R. Balleisen, Esquire,
Greenbaum, Doll & McDonald, 33rd Floor, 101 South Fifth Street, First National Tower, Louisville, Ky.

Re: United States v. Stewart Mechanical Enterprises, Inc.—C75-0377L(A).

Dear Mr. Balleisen: Your letter of May 22, 1979 describes two concerns of Stewart Mechanical Enterprises ("Stewart") about the proposed Consent Judgment in this matter. First, you have indicated that, since all of the officers of Stewart often are out of town when it is time for a bid to be submitted, it sometimes would be very difficult for an officer to sign the noncollusion affidavit that the proposed Consent Judgment requires be attached to bids or quotations for mechanical contracting services. Because of the burden this provision would place upon Stewart and because of the possibility that the decree would have an anticompetitive effect in that this provision would prevent Stewart from submitting a bid in certain situations, the United States is willing to change the words "an officer * * * bids or quotations" to "the employee * * * bid or quotation" in lines five and six of Section VII. In changed form Section VII will read as follows:

VII

The Defendant is ordered and directed for a period of five (5) years from the date of entry of this Final Judgment to affix to every bid or quotation for the rendering of mechanical contracting services a written certification, signed by the employee of the defendant responsible for the preparation of the bid or the quotation, that such bid or quotation was not in any way the result, directly or indirectly, of any discussion, communication, agreement, understanding, plan or program, whether formal or informal, between the Defendant and any other mechanical contractor, except as specifically permitted by Paragraph VI of this final Judgment.

Based on my conversation with you on May 22, 1979, it is my understanding that these changes in Section VII would resolve the first problem Stewart has raised.

Your letter of May 22, 1979 also expressed concern as to whether the United States interpreted Section VII of the proposed Consent Judgment as including Stewart's repair service. Since this work generally involves repairs which are done on an emergency basis and the customers requesting such work generally do not seek competitive bids, the United States does not consider the repair service of Stewart to fall under Section VII of the proposed Consent Judgment.

Sincerely yours,

William J. Oberdick,

Attorney, Antitrust Division.

Law Offices Greenebaum Doll & McDonald
3300 First National Tower, Louisville, Kentucky 40202 (502) 589-4200, May 22, 1979.

Mr. William Oberdick,
Department of Justice, Antitrust Division, 995 Celebrezze Federal Bldg., Cleveland, Ohio

RE: United States of America v. Steward Mechanical Enterprises, Inc., C75-0377L(A).

Dear Mr. Oberdick: This letter is being sent as a result of certain problems that Stewart Mechanical Enterprises, Inc. has discovered in connection with the proposed Final Judgment in the above action. Stewart has two particular problems, both of which relate to the application of numerical section 7 of the Judgment.

These problems were developed at a meeting held on April 19, 1979, with the executive officers of Stewart and its employees involved in the preparation of mechanical contracting bids at which time the terms and application of the Judgment were reviewed.

The first problem relates to the person or persons required to sign the noncollusion statement provided for in numerical section 7 of the Judgment. Stewart at this time has appriximately 15 people involved in the preparation of mechanical contracting bids, all of whom at times may supervise or have knowledge of a particular bid. Only three of those persons are officers and those three have substantial duties in other areas of the business including supervision and inspection of work at job sites. Frequently such jobs are not in the Louisville area. At times all three are out of town at the same time when a bid is to be signed and filed. In these circumstances the bids are signed on behalf of Stewart by the employee in charge of the bid or who has knowledge of the bid. To require as presently provided in numerical section 7 of the Judgment, that the noncollusion certificate be signed by an officer with knowledge would in some instances require Stewart to withhold its bid because of the unavailability of such an officer. We believe that such a result was not the intent of either party to the Judgment. This problem could be solved by substituting for the word officer on the fifth line of numerical section 7, the employee of the Defendant responsible for the bid.

The second problem caused Stewart under the terms of numerical section 7 of the Judgment relates to its repair operation. Stewart has a repair group which operates separate and apart from its mechanical contracting business and deals almost exclusively with emergency work. The repair operation involves approximately 20 men who work from radio-equipped trucks. A customer with a repair problem calls the Stewart office and the office in turn contacts the truck nearest to the party who has called. The personnel on the truck then go to the customer and take care of his problem which usually is of an emergency nature and needs to be taken care of as soon as possible. These calls involve in the main such matters as malfunctioning air conditioners and furnaces or plumbing leaks which by their very nature compel immediate service. Approximately 98% of such work is for commerical and industrial customers. Only on rare occasions is a residential call involved.

The repair work also does not generally involve alteration work. On occasion an air conditioning window-type unit may be replaced but the repair department does not engage in modifying or enlarging heating, air conditioning or plumbing systems. It would appear that the nature of the business is such that repair work of this type is not within the terms of numerical section 7 of the Judgment and, if we are correct in this interpretation, we would appreciate your so advising us.

Sincerely yours,

Donald H. Balleisen,

United States Department of Justice,
Antitrust Division, Great Lakes Office, 995 Celebrezze Federal Building, Cleveland, Ohio 44199, 216-522-4070, April 24, 1979.

Donald H. Balleisen, Esquire,
Greenbaum, Doll & McDonalds, 3300 First National Tower, Louisville, Ky.

Re: United States v. Stewart Mechanical Enterprises, Inc.—C75-0377L(A).

Dear Mr. Balleisen: In response to your letter of April 20, 1979, this is to advise you that we do not agree to incorporate your two requested clarifications into the proposed Final Judgment in this action. To agree at this time to such modifications, on the basis of circumstances which should have been considered by the defendant prior to the filing of this proposal, would require republication of the amended Judgment pursuant to the provisions of the Antitrust Procedures and Penalties Act.

If, after entry of the proposed Judgment, the defendant continues to believe some changes are necessary it may file an appropriate Motion to the Court under Paragraph X of the Judgment.

Sincerely yours,

William A. LeFaiver,

Attorney, Antitrust Division.

April 20, 1979.

Mr. William A. LeFaiver,
Department of Justice, Antitrust Division, 995 Celebrezze Federal Bldg., Cleveland, Ohio.

Re: United States of America v. Stewart Mechanical Enterprises, Inc., C75-0377L(A).

Dear Mr. LeFaiver: This letter is being written relative to clarifications of the Final Judgment entered in the above matter as discussed in our telephone conversation of April 19, 1979.

The two clarifications we desire both involve numerical paragraph VII of the Final Judgment. The first relates to exempting from the requirements of affixing the non-collusion statement to quotations of bids in amounts less than $1,000. The reason for this request is that Stewart Mechanical Enterprises, Inc. has a repair service which operates as a separate division. This service utilizes approximately

20 repairmen who work from trucks and make an average of 100 calls a day in total. The servicemen make their visits as a result of telephone calls and do the work and bill usually in the same day. Rarely, if ever, is a competitive bid involved and most of the calls involve relatively small amounts of money and only in a most unusual situation does the work involve more than $1,000.

The second clarification deals with the person required to sign certification. At the present time Stewart has approximately fifteen people involved in the preparation of bids and the filing of bids. Frequently bids are submitted under the signature of a non-officer and at the time of submission no corporate officer with knowledge is available to sign. The expansion of the business and the large amount of work being done outside of the Louisville area has caused this problem. We request that to meet it, Stewart be allowed to have the person who submits the bid sign the certification with the understanding that his signature be considered the action of the company and binding on it.

Unless we receive a written response that the above clarifications are not acceptable, we will advise Stewart Mechanical Enterprises, Inc. that they may act in accord with those clarifications.

I appreciate your courtesies in the matter.

Very truly yours,

Donald H. Balleisen.

bcc: Mr. George Duthie, Mr. Frank E. Haddad, Jr.

BILLING CODE 4410-01-M

United States v. Krause Milling Company and ADM Milling Co.; Proposed Consent Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b) through (h), that a proposed consent judgment and a competitive impact statement as set out below have been filed with the United States District Court for the District of Kansas in *United States of America* v. *Krause Milling Company and ADM Milling Co.*, Civil Action No. 78-1122. The complaint in this case alleges that the two grain milling industry defendants conspired with each other by entering into an agreement to rig bids and allocate contracts for the sale of a blended food known as soy fortified sorghum grits (SFSG) to the Commodity Credit Corporation, an agency of the U.S. Department of Agriculture, in violation of Section 1 of the Sherman Act.

The proposed judgment enjoins defendant ADM for ten years from engaging in the illegal conduct alleged in the complaint. Krause remains a defendant. Also enjoined are communications by ADM with any seller of blended foods concerning prices or other terms of sale prior to communication of such information to the public generally, except in the course of bona fide purchase and sale transactions. The proposed judgment requires defendant ADM to take affirmative action for a period of five years to apprise management personnel of the requirements of the proposed judgment and the possible consequence of its violation. Further details of the injunctive relief are contained in the proposed judgment and the competitive impact statement.

Public comment is invited within the statutory 60-day comment period and should be directed to John E. Sarbaugh, Chief, Midwest Office, Antitrust Division, Department of Justice, Room 2634 219 South Dearborn Street, Chicago, Illinois 60604. Such comments and responses thereto will be published in the Federal Register and filed with the Court.

Dated June 6, 1979.

Charles F. B. McAleer,

Antitrust Division, Department of Justice.

U. S. District Court, District of Kansas

United States of America, Plaintiff, v. *Krause Milling Company, and ADM Milling Co.*, Defendants.

Civil Action No. 78-1122.

Filed: June 6, 1979.

Stipulation

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. The parties consent that a Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings: *Provided*, That plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendant ADM and by filing that notice with the Court.

2. In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to the plaintiff and defendant ADM in this and any other proceeding.

Dated: June 6, 1979.

For the Plaintiff. John H. Shenefield, Assistant Attorney General. William E. Swope, Director of Operations. Charles F. B. McAleer, /s/ Allyn A. Brooks, James J. Kubik, Diane C. Lotko-Baker, John E. Sarbaugh, Attorneys, Department of Justice.

For the Defendants. Dick H. Woods, Esq., Attorney, for ADM Milling Co., Stinson, Mag, Thomson, McEvers & Fizzell, Ten Main Center, Suite 2100, Kansas City, Missouri 64141.

Mark S. Prosperi, Attorneys, Department of Justice, Room 2634 Everett M. Dirksen Bldg., Chicago, Illinois 60604 (312) 353-7283.

U.S. District Court, District of Kansas

United States of America, Plaintiff, v. *Krause Milling Company and ADM Milling Co.*, Defendants.

Civil Action No. 78-1122.

Filed: June 6, 1979.

Final Judgment

Plaintiff, United States of America, having filed its complaint herein on March 27, 1978, and its amended complaint on July 20, 1978 and defendant ADM Milling Co. ("ADM"), having appeared and filed its answer to the amended complaint denying the material allegations thereof and raising an affirmative defense, and plaintiff having dismissed Counts Two and Three of its amended complaint as to defendant ADM by agreement with defendant ADM; and plaintiff and defendant ADM, by their respective attorneys, each having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein, and without this Final Judgment constituting evidence against or an admission by any party hereto with respect to any such issue;

Now, therefore, before the taking of any testimony, without trial or adjudication of any issue of fact or law herein, and without this Final Judgment constituting any evidence or admission by any party with respect to any such issue, and upon the consent of the parties aforesaid, it is hereby

Ordered, adjudged and decreed, with respect to Count One of plaintiff's amended complaint as to defendant ADM only as follows:

I

This Court has jurisdiction of the subject matter of this action and of each of the parties consenting hereto. Count One of the amended complaint states a claim upon which relief may be granted against defendant ADM under Section 1 of the Sherman Act (15 U.S.C. 1).

(D) Communicate to or exchange with any other person manufacturing or selling blended foods any term or condition of sale including but not limited to any actual or proposed price, price component, price change, discount, total quantity, incremental price or quantity, or freight rate, at or upon which blended foods are to be, or have been, sold to any person, prior to the communication of such information to the public generally.

Subparagraphs (A) and (D) of this Section IV shall not apply to prices, discounts, or other terms or conditions of sale, or necessary communications relating thereto, offered by defendant ADM to any person or offered by any person to defendant ADM in negotiating for, entering into or carrying out a

bona fide sale or proposed sale or purchase of blended foods either between the defendant and such other person or where such other person is acting as a purchasing agent or group buying representative on behalf of any third person.

V

Defendant ADM shall furnish to the plaintiff a copy of each audit of its bidding procedures that may be required by the Final Order entered against it in the Commodity Credit Corporation Debarrment proceedings involving defendant ADM and commenced by the Commodity Credit Corporation's issuance on April 28, 1978, of its notices of proposed debarrment, and any written modifications or interpretations of those Orders.

VI

For a period of five (5) years from the date of entry of this Final Judgment, defendant ADM shall preserve all written price computations and other written calculations performed by it, subsequent to March 27, 1978, in the preparation of any bid on blended foods.

VII

Defendant ADM is ordered and directed:

(A) To furnish, within sixty (60) days after the entry of this Final Judgment, a copy of this Final Judgment to each of its officers and directors, and to each of its employees and agents who have any responsibility for preparing, reviewing or submitting bids on blended foods;

(B) To furnish a copy of this Final Judgment to each successor to such officers, directors, employees or agents described in Paragraph (A) of this Section VII within sixty (60) days after such successor becomes employed or associated with defendant ADM;

(C) To obtain a receipt from each person to whom a copy of this Final Judgment has been furnished pursuant to Sections VII A and B hereof, and to maintain said receipts so long as this Final Judgment is effective;

(D) To establish a program for dissemination of, education as to, and compliance with this Final Judgment, involving each corporate officer, director, employee and agent having responsibilities in connection with or authority over the establishment of prices, discounts, or other terms or conditions of sale of blended foods, advising them of its and their obligations under this Final Judgment. This program shall include an explanation of the Final Judgment and a statement of corporate compliance policy thereunder;

(e) To furnish to plaintiff within one hundred and twenty (120) days of the entry of this Final Judgment, and thereafter upon request by plaintiff for a period of five (5) consecutive years from the date of its entry, an annual account of all steps defendant has taken since the prior account to discharge its obligations under this Section VII and to include with said account copies of all written directives issued during the prior year with respect to compliance with the terms of this Final Judgment.

VIII

Defendant ADM shall require, as a condition of the sale or disposition of all, or substantially all, of the assets used by it in the production and sale of blended foods, that the acquiring party agree to be bound by the provisions of this Final Judgment, and that such agreement be filed with the Court.

IX

Defendant ADM agrees to cooperate with plaintiff during both the pre-trial discovery and the trial of this case, including but not limited to the following cooperation:

(A) Producing expeditiously in advance of trial any and all corporate documents not privileged and relevant to the issues in this case requested by the Government without the necessity of a subpoena;

(B) Consenting to interviews of corporate personnel, who may have counsel present, regarding any of the allegations in the complaint in this case and the explanation of corporate documents.

X

For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

(A) Duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to defendant ADM made to its principal office, be permitted:

(1) Access during office hours of such defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of such defendant, who may have counsel present, relating to any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of such defendant and without restraint or interference from it, to interview under oath officers, employees and agents of such defendant, who may have counsel present, regarding any such matters.

(B) Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division made to defendant ADM's principal office, such defendant shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

No information or documents obtained by the means provided in this Section X shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law or court order.

(C) If at the time information or documents are furnished by defendant ADM to plaintiff, such defendant represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and said defendant marks each pertinent page of such material, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then 10 days notice shall be given by plaintiff to such defendant prior to divulging such material in any legal proceeding (other than a grand jury proceeding) to which defendant ADM is not a party.

XI

Jurisdicition is retained by this Court for the purpose of enabling either of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance therewith, and for the punishment of violation thereof.

This Final Judgment shall be in effect for a period of ten years from the date of its entry by this Court.

XIII

Entry of this Final Judgment is in the public interest.

Dated: ———.

United States District Judge.

U.S. DISTRICT COURT, DISTRICT OF KANSAS

United States of America, Plaintiff, v. *Krause Milling Company, and ADM Milling Co.*, Defendants.

Civil No. 78–1122.

Filed: June 6, 1979.

Competitive Impact Statement

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act (15 U.S.C. 16(b)), the United States hereby submits this Competitive Impact Statement relating to the proposed consent judgment submitted for entry in this civil antitrust proceeding.

I

Nature of the Proceeding

On March 27, 1978, the United States filed a civil complaint under Section 4 of the Sherman Act (15 U.S.C. 4), alleging that the defendants, Krause Milling Company and ADM Milling Co., had violated Section 1 of the Sherman Act (15 U.S.C. 1). The Complaint alleged that, beginning in late 1974 and continuing until late 1976, defendants and various co-conspirators engaged in a combination and conspiracy in unreasonable restraint of interstate trade and commerce, the substantial terms of which were: (a) To allocate between the defendants contracts awarded by the Commodity Credit Corporation (hereinafter CCC), an agency of the United States Department of Agriculture, for the total volume of Soy Fortified Sorghum Grits, a type of blended food purchased by the CCC under the Food For Peace Program; and (b) to submit rigged, collusive and non-competitive bids to the CCC for the above-described contracts.

On July 26, 1978 the United States filed a First Amended Complaint in which the

above-described violation of Section 1 of the Sherman Act was realleged as Count One. In addition, Count Two alleged a violation of the False Claims Act (31 U.S.C. 231–233) and Count Three alleged actual damages under Section 4A of the Clayton Act (15 U.S.C. 15(a)). Counts Two and Three of the First Amended Complaint, seeking money damages for alleged overcharges suffered by the United States as a result of the alleged conspiracy, have been previously settled and compromised by the United States and the defendant ADM in the amount of $225,000 without adjudication of any issue of fact or law. The attached final judgment provides injunctive relief against defendant ADM under Count One. Krause remains a defendant.

A federal grand jury indictment against the same corporate defendants and one individual defendant, Charles A. Krause, president of Krause Milling Company, was also filed in the District of Kansas on March 27, 1978. The indictment alleged a criminal felony violation of Section 1 of the Sherman Act arising out of the same conspiracy alleged in this case. All defendants in the criminal case entered pleas of *nolo contendere* and were sentenced by District Judge Earl E. O'Connor on November 13, 1978. The sentences were as follows:

Krause Milling Company; $300,000 fine.
ADM Milling Co.; $200,000 fine.
Charles A. Krause; 2 years custody of the Attorney General, 6 months to be served with the remainder suspended.

Entry by the Court of the proposed consent judgment will terminate the remaining portions of this civil action against ADM, except insofar as the Court will retain jurisdiction over the matter for possible further proceedings which may be required to interpret, modify or enforce the judgment, or to punish alleged violations of any of the provisions of the judgment.

II

Description of Practices Involved in the Alleged Violation

The defendants are grain millers which manufacture Soy Fortified Sorghum Grits (SFSG), a high protein blended food product, which is sold to the CCC under the "Food For Peace Program" (Title II of the Agricultural Trade Development and Assistance Act of 1954, as amended). The CCC ships the product to foreign countries for distribution by relief organizations to undernourished people and to victims of war, famine and a variety of natural disasters. Defendants' total sales of SFSG during the period of the alleged conspiracy amounted to about $28 million.

The Government would have been prepared to prove at trial that representatives of defendants entered into an agreement in mid-1974 to allocate the total purchases of SFSG by the CCC between their two companies roughly on the basis of their respective plant capacities (approximately 30% for ADM and 70% for Krause). This allocation was to be accomplished through a series of phone calls on the occasion of each bid during which the prices and quantities to be bid by each company would be discussed and agreed upon. Although representatives of defendants were unable to contact each other before each and every bid, they did so about one-half to three-fourths of the time. Bids were then submitted to the CCC containing the prearranged prices and quantities which each company had agreed to submit. This alleged bid rigging and contract allocation agreement continued until November, 1976 when grand jury subpoenas *duces tecum* were served upon the defendants.

According to the Complaint, the alleged conspiracy had the following effects:

(a) Prices of SFSG sold to the CCC under the Food For Peace Program were fixed, maintained, and established at artificial and non-competitive levels;

(b) Competition in such sales was restrained, suppressed and eliminated; and

(c) The United States Government was denied the benefits of free and open competition in the purchase of SFSG.

Defendants, in their formal pleadings filed in the case, denied all of the allegations in the Government's Complaint and were prepared, and Krause remains prepared, to dispute the evidence to be offered by the Government at a trial.

III

Explanation of the Proposed Final Judgment

The United States and the defendant ADM have stipulated that the proposed final judgment, which is in a form negotiated by the parties, may be entered by the Court at any time after compliance with the Antitrust Procedures and Penalties Act. The stipulation between the parties provides that there has been no admission by any party with respect to any issue of fact or law. Under the provisions of Section 2(e) of the Antitrust Procedures and Penalties Act, entry of the proposed judgment by the Court is conditioned upon a determination by the Court that the judgment is in the public interest.

A. *Prohibited Conduct.* The proposed judgment will prohibit ADM for a period of ten years from entering into or adhering to any agreement with any person to fix or maintain the prices or other terms or conditions for the sale of blended foods to any third party. The judgment also prohibits the submission of non-competitive, collusive, or rigged bids on contracts for the sale of blended foods to any person. Also forbidden is any agreement by ADM to allocate contracts, rotate or divide markets, customers, or territories with respect to sales of blended foods. The judgment also prohibits ADM, by agreement or individually, from communicating or exchanging with any other person any information on prospective prices, quantities, freight rates, discounts or other terms and conditions for the sale of blended foods, before such prices or other terms are made available to the public generally, except in the course of bona fide purchase and sales transactions.

B. *Require Conduct.* To ensure that all bids to the Government are made without collusion or agreement, the proposed judgment requires defendant ADM to furnish the Government a copy of any audit of its bidding procedures for CCC sales prepared in accordance with any Order of the CCC entered as a result of debarment proceedings conducted by CCC against ADM. To permit monitoring of compliance with the provisions relating to competitive bidding, defendant ADM is also required, over a five-year period, to preserve all written price computations and other calculations actually performed in connection with the submission of bids to public agencies.

To permit enforcement of the judgment against purchasers of ADM's milling assets, ADM Must require any purchaser of all or substantially all of ADM's assets used in the production and sale of blended foods to agree to be bound by the provisions of the judgment, and such agreement must be filed with the Court.

For the purpose of notifying all necessary employees regarding the prohibitions of the judgment, defendant ADM is required, within 60 days, to serve a copy of the judgment on each of their directors and officers, and upon each of their employees or agents who have any responsibility for preparing, reviewing, or submitting bids on blended foods. If new employees are hired in these positions in the future, ADM must also serve a copy of the judgment on these new employees. ADM must obtain and keep receipts reflecting the service of the judgment on corporate personnel. The judgment applies not only to the defendant corporation but also to its officers, directors, employees, and agents who have actual notice of the judgment. Requiring the defendant ADM to give such notice to its responsible personnel serves two purposes: it enables the affected employees to know what activities are prohibited, and it permits prosecution for criminal contempt of those employees who disregard the provisions of the judgment. ADM is also required to establish a reasonable program of advising those persons having duties in regard to establishment of prices, discounts, or other terms or conditions of sale of blended foods of the company's obligations under the judgment.

Under the proposed judgment, the Department of Justice is given access for ten years to the files and records of the defendant ADM in order to examine such records for compliance or noncompliance with the judgment. The Department is also granted access to interview employees of the defendant ADM to determine whether defendants are complying with the judgment.

C. *Effect of the Proposed Judgment on Competition.* The relief encompassed in the proposed consent judgment is designed to prevent a recurrence of any of the activities alleged in the Complaint. The prohibitory language of the judgment will ensure that all pricing decisions on blended foods are made independently by the individual competitors. The judgment contains sufficient record-keeping requirements and access to defendant ADM's records to allow the Department to adequately monitor defendant AMD's activities in the future.

Accordingly, it is the opinion of the Department of Justice that the proposed judgment is fully adequate to prevent any future antitrust violations by the defendant

ADM. It is also the view of the Department that disposition of the case without additional litigation is appropriate in view of the fact that the proposed judgment includes the form and scope of relief equal to that which might be obtained after a full hearing on the issues at a trial.

IV

Remedies available to Potential Private Litigants

Section 4 of the Clayton Act (15 U.S.C. 15) provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages such person has suffered, as well as costs and reasonable attorney fees. Since the CCC, an agency of the United States Department of Agriculture, was the only purchaser of blended foods, there are no potential private plaintiffs who have suffered any equitable or monetary damage as a result of the alleged violation in this case. Hence, no potential private litigants exist who have standing to sue under Section 4 9f the Clayton Act in this matter.

V

Procedures Available for Modification of the Proposed Judgment
